NEWFOUNDLAND (N. America), discovered by Sebastian Cabot, who called it *Prima Vista*, 24 June, 1497. It was formally taken possession of by sir Humphry Gilbert, 1583. In the reign of Elizabeth, other nations had the advantage of the English in the fishery. In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England.—*Hakluyt*. But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was recognised in 1713, by the treaty of Utrecht, certain rights on the "French shores" being reserved for France. Newfoundland obtained the privilege of a colonial legislature in 1832; and the bishopric was established in 1839. Population, 1884, 193,124. Appalling fire at St. John's, a great portion of the town destroyed, the loss estimated at 1,000,000. sterling, 9 June, 1846. On 14 Jan. 1857, a convention was concluded between the English and French governments, confirming certain French privileges of fishery in exchange for others. The English colonists were dissatisfied with this convention. Newfoundland refused union with the dominion of Canada, March, 1869; a railway from St. John's to St. George's bay, proposed by the colonial government Aug. 1878. Capital, St. John's; population, 1884, 31,142. Governor, col. sir Stephen J. Hill, 1870; sir John H. Glover, Jan. 1876. Maxse died Sept. 1883; sir John Hawley Glover, Dec. 1883; died 30 Sept. 1885; sir G. Wm. des Vœux, Feb. 1886; sir J. Terence N. O'Brien, Nov. 1888. See *Canada*, Nov. 1877.

Fishery Dispute. At Fortune bay, U.S., fishers fixed nets on Sunday, 13 Jan. 1878; this being contrary to local regulations, they were forcibly removed; controversy ensued; Mr. Evans on part of U.S. government sent despatch, 24 Aug.; correspondence, Sept. Oct.; the marquis of Salisbury refused compensation; but earl Granville

was rebuilt. It was burnt by the duke of Berwick when fleeing from Schomberg and the English army, and only the castle and a few houses escaped, 1689.

NEWS-LETTERS. News-writers in the reign of Charles II. collected from the coffee-houses information, which was printed weekly and sent into the country. The *London Gazette*, then the only authorised newspaper, contained little more than proclamations and advertisements.

NEW MODEL, see *Council of Officers*.

NEW SOUTH WALES, the principal colony of Australia on the eastern coast was explored and taken possession of and named by captain Cook in 1770. At his recommendation a convict colony was first formed here. Captain Arthur Phillip, the first governor, arrived at Botany Bay with 800 convicts, 20 Jan. 1788; but he subsequently preferred Sydney, about seven miles distant from the head of Port Jackson, as a more eligible situation for the capital. A new constitution was granted in 1855 (18 & 19 Vict. c. 54). The Intercolonial Exhibition was opened at Sydney, by the governor-general lord Belmore, 30 Aug. 1870. It consisted of two departments, agricultural and non-agricultural. A conference of delegates from the Australian colonies met at Sydney in Jan. 1873, to deliberate on a customs' union, postal and railway arrangements, &c. NEWSPAPERS. The *Roman Acta Diurna* were issued, it is said, 691 B.C. In modern times *Gazetta*, which derived its name from its price, small coin, was published in Venice (about 1500). The *Gazette de France*, now existing, first appeared in April, 1631, edited by Renaudot, a physician, was patronised by the king, Louis XIII., who wrote one article for it, and by Richelieu. The first newspaper published in England* was established by sir Roger L'Estrange, in 1663; it was called the *Public Intelligencer*, and continued near three years, when it ceased, on the appearance of the *Gazette*. In the reign of James I., 1604, appeared the *London Weekly Courant*; and in the year 1643 (the period of the civil war) was printed a variety of publications, certainly in no respect entitled to the name of newspapers. The following are the titles of some of them:—

The Diurnal of Certain Passages in Parliament.
The Mercurius Aulicus.
The Scotch Intelligencer.

* Some copies of a publication are in existence called *The English Mercury*, professing to come out under the authority of queen Elizabeth, in 1588, the period of the Spanish Armada. The researches of Mr. T. Watts, of the British Museum, proved these to be forgeries executed about 1766. The full title of No. 50 is "The English Mercury, published by authority, for the prevention of false reports, imprinted by Christopher Barker, her highness's printer, No. 50." It describes the Spanish Armada, giving "A Journal of what passed since the 21st of this month, between her majesty's fleet and that of Spayne, transmitted by the Lord High Admiral to the Lordes of council."

NEW STYLE. Pope Gregory XIII., in order to rectify the errors of the current calendar, published a new one, in which ten days were omitted—5 Oct. 1582, becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Holland, Flanders, Portugal, in 1582, in Germany in 1584, in Switzerland in 1583 and 1584, in Hungary in 1587; and in Great Britain in 1751. In 1752 eleven days were left out of the calendar—3 Sept. being reckoned as 14 Sept. The difference between the old and new style up to 1699 was 10 days; after 1700, 11 days; after 1800, 12 days. In Russia, Greece, and throughout the East, the old style is still retained. The czar, Alexander II., was born on the 17th April, 1818, old style, 29 April, new style; see *Calendar*.

NEW TESTAMENT, see *Bible*.

NEWTONIAN PHILOSOPHY, the doctrines respecting gravitation, &c., taught by sir Isaac Newton in his "Principia," published in 1687; see *Gravitation*. He was born 25 Dec., 1642; became master of the mint, 1699; president of the Royal Society, 1703; and died 20 March, 1727. A statue of him in marble by Koubilius was set up at Trinity College, Cambridge, 14 July, 1755, and one in bronze by Theed, at Grantham, 21 Sept. 1858, when lord Brougham delivered a discourse on the life and works of Newton. NEW YEAR'S DAY, &c. The beginning of the Jewish year was changed and the passover instituted, 1491 B.C. A feast is said to have been instituted by Numa, and dedicated to Janus (who presided over the new year), 1 Jan. 713 B.C.

On this day the Romans sacrificed to Janus a cake of new sifted meal, with salt, incense, and wine; and all

the mechanics began something of their art of trade; the men of letters did the same, as to books, poems, &c.; and the consuls, though chosen before, took the chair and entered upon their office this day. Mucius Marcellus refers the origin of New-Year's gifts among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorized the custom afterwards, and gave these gifts the name of Strenus, 747 B.C.

NEW YORK, the "empire state" of the United States of N. - NEY'S EXECUTION.** Ney, duke of Enghingen, prince of the Moskwa, and one of the most valiant of the marshals of France, was shot as a traitor, 7 Dec. 1815. On 7 Dec. 1853, his statue was erected on the spot where he fell.
- After the abdication of Napoleon I., 5 April, 1814, he took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invaders' way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the slain, his clothes pierced with bullet-holes, five horses having been shot under him; night and dawn obliged him to flee. Though included in the decree of 24 July, 1815, which guaranteed the safety of Frenchmen, he was sought out, and on 5 Aug. taken at the castle of a friend at Urtillac, and brought to London before the Chamber of Peers, 4 Dec. The 14th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favour in vain.
- NEZIB, Syria.** Here Ibrahim and the Egyptians defeated the Turks, 24 June, 1839.
- NIAGARA (N. America).** At the head of the river, on the western shore, is Fort Erie, which was taken by the English, 24 July, 1759. It was abandoned in the war with the United States, May, 1813, but was retaken, 19 Dec. following. A suspension bridge of a single span of 820 feet on the Niagara, connecting the railways of Canada and New York, was opened in March, 1865. It is elevated 18 feet on the Canadian, and 28 feet on the American side.
- About eighteen miles below Fort Erie are the remarkable falls. The river is here 740 yards wide; the half immediately above the cataracts is a rapid, in which the water falls 38 feet; it is then thrown, with astonishing grandeur, down a stupendous precipice of 15 feet perpendicular, in three distinct and collated sheets; and, in a rapid that extends to the distance of nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters Lake Ontario at Fort Niagara.
- The falls visited by the prince of Wales, Sept. 1860. Blondin crossed the falls on a tight rope, 17 Aug. 1859. Professor Tyndall visited the falls, Nov. 1872, and lectured on them at the Royal Institution, 4 April, 1873. Company formed to utilize its water power mechanically, 1877.

NIBELUNGE NOT or **NIBELUNGEN-LIED**, popular German epic of the 12th century, composed of various ancient mythical poems, termed *agas*; which according to the poet Wm. Morris, should be to our race what Homer was to the Greeks.

NICARAGUA, a state in Central America (which see). The present constitution was established 19 Aug. 1858. At the commencement of 1855 it was greatly disturbed by two political parties: that of the president, Chamorro, who held Grenada, he capital, and that of the democratic chief, Castillon, who held Leon. The latter invited Walker, the filibuster, to his assistance, who in a short time became sole dictator of the state.* By the united efforts of the confederated states the filibusters were all expelled in May, 1857. On May, 1858, Nicaragua and Costa Rica appealed to the great European powers for protection. Nicaragua

* William Walker was born at Tennessee, in the United States, where he became successively doctor, lawyer, and journalist, and afterwards gold-seeker in California, whence he was invited to Nicaragua by Castillon, with the promise of 52,000 acres of land, on condition of bringing with him a band of adventurers to sustain the revolutionary cause. Walker accepted the arms, and on 28 June landed at Realajo with 68 men. He increased his forces at Leon, and soon after attacked the town of Rivas, where he was repulsed with loss. He then joined col. Kinney, who had occupied and overruled Grey Town, 6 Sept. On 13 Oct. Walker captured Grenada by surprise when in a defenceless state, hot Mayorga, one of the ministers, and established a rule of terror. By intervention of the American consul he made peace with the general of the state army, Corral, and shot him on 7 Nov., on finding him corresponding with fugitives at Costa Rica. Walker at first was only general-in-chief; but on Rivas, whom he had made resident, deserting him, he became sole dictator. On 4 May, 1856, his envoy Vilij was recognised by the resident of the United States, whence also he obtained reinforcements during his retention of power. Costa Rica declared war against him, 28 Feb. 1856; the other states of central America soon followed the example, and a sanguinary struggle ensued, lasting till May, 1857. On 5 Nov. 1856, Walker totally burnt Grenada, being unable to defend it, and removed the seat of government to Rivas. This place he surrendered to gen. Mora on 4 May, 1857, on the intervention of capt. Davis, of the *St. Mary's*, U.S. Hisself, his staff, and 200 men, were conveyed in that vessel to New Orleans, where they were received with great enthusiasm. On 25 Nov., 1857, he again invaded Nicaragua, landing at Punta Arenas with 400 men; but on 8 Dec. was compelled to surrender to capt. Faulding, U.S., and was conveyed to New York. He escaped punishment by *notte prosequi* (2 June, 1858); but capt. Faulding was tried for exceeding orders, and blamed—

NICE or **NICEÆA**, a town in Bithynia, Asia Minor, N. W. Antigonus gave it the name Antigoneia, which Lydimachus changed to Nicæa, the name of his wife. It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival, Pescennius Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. The first general council was held here 19 June to 25 Aug. 325, which adopted the *NICENE CREED* and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Easter. An addition was made to the creed, 381; was rejected, 431. See *Filioque*. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice and reigned there till 1261, when they returned to Constantinople; see *Eastern Empire*. Nice was taken by the Ottoman Turks in 1330.

NICE (N. Italy) was the seat of a colony from Massilia, now Marseilles, and formed part of the Roman empire. In the middle ages it was subject to Genoa, and suffered from the frequent wars, being taken and re-taken by the imperialists and French. It was taken by the Austrians under Melas, 1800; seized and annexed to France 1792; restored to Sardinia in 1814. Nice was again annexed to France in virtue of the treaty of 24 March, 1860; the people having voted nearly unanimously for this change by universal suffrage. The French troops entered 1 April, and definite possession was taken 14 June following. Garibaldi, a native, vehemently protested against this annexation.

He was pursued, caught, given up to the Honduras government, tried, and shot (12 Sept.). His followers were dismissed. Grey Town was surrendered to Nicaragua in 1860.

The Roman emperors frequently resided here during their eastern wars. Here Diocletian resigned the purple, 305; and Constantine died at his villa in its neighbourhood, 337. It surrendered to the Seljukian Turks, 1078; and to Orchan and the Ottoman Turks in 1338.

Here was fought a battle between the allied Christian powers under Sigismund, king of Hungary, afterwards emperor, and the Turks under Bajazet; said to have been the first battle between the Turks and Christians; the latter were defeated, losing 20,000 slain, and as many wounded and prisoners, 28 Sept. 1396. NIKOLSBURG (Moravia). Here were signed, 26 July 1866, the preliminaries of a peace between Austria and Prussia.

NIKSICH, a strong Turkish fortress in Montenegro, many times besieged; having been left by the Turks with insufficient garrison, it was captured by Montenegrins, 7, 8 Sept. 1877, causing great rejoicings.

NIL DARPAN, see *India*, June 1861.

NILE (Egypt). This great river rises in the Mountains of the Moon, in about ten degrees of N. lat. The travels of Bruce were undertaken to discover the source of the Nile. He set out from England in June, 1768; on the 14th of November, 1770, discovered the source of the Blue Nile, and returned home in 1773. This river overflows regularly every year, from about the 15th of June to the 17th of September, when, having given fertility to the land, it begins to decrease. It must rise 16 cubits to ensure that fertility. The first Nilometer (a pillar) was set up by Solyman the Caliph, 715. In 1829, the inundations of the Nile rose to 26 instead of 22, by which 30,000 people were drowned and immense property lost. Mr. Petherick set out early in 1861 to explore the country at the source of the Nile. For recent discoveries, see *Africa* 1863. A bridge over the Nile (above 1300 feet) at Cairo, was completed by a French company, Aug. 1872.

NILE, BATTLE OF THE (or Aboukir), 1 Aug. 1798, near Rosetta, between the French fleet under Brueys, and the British under sir Horatio Nelson. Nine of the French line-of-battle ships were taken, two were burnt, and two escaped. The French ship, *L'Orient*, with Brueys and 1000 men on board, blew up, and only 70 or 80 escaped. Nelson's exclamation upon commencing the battle was, "Victory or Westminster Abbey!"

NIMEGUEN (Holland). Here was signed the treaty of peace between France and the United Provinces, 1678. The French were successful against the British under the duke of York, before Nimeguen, 28 Oct. 1794; were defeated by them 3 Nov. but gained the place 8 Nov.

NINETEENTH CENTURY, a magazine open to writers of totally different opinions; first appeared, March, 1877; editor, James Knowles.

NINEVEH, the capital of the Assyrian empire (see *Assyria*), founded by Ashur about 2245 B.C. Ninus reigned in Assyria, and named this city Nineveh, 2069 B.C.—*Abbe Lenglet*. Jonah preached against Nineveh (about 862 B.C.), which was taken by Nebuchadnezzar, 606 B.C. The discoveries of Layard and others since 1839, in the neighbourhood of Mosul, at Koyunjik, the site of the ancient Nineveh, and other places, have in a manner disinterred and re-peopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work "Monuments de Ninive," 1849-50. In 1848 Mr. Layard published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. Mr. Hormuzd Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876. See *Assyria*. Mr. Rassam, appointed his successor, among other valuable discoveries at Balawat, nine miles N.E. of Nimroud, and at Koyunjik, &c., found a bronze monument with inscriptions recording the names, title, genealogy, and exploits of king Assur-nazir-pal (B.C. 885-860), builder of the palaces and temples of Kalak, the capital of the middle Assyrian empire. Mr. Rassam arrived in London with collections, Dec. 1882.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that enrich the British Museum, may be mentioned, the winged bull and lion, and numerous hunting and battle pieces; and the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from *Nisr*, an eagle or hawk), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 B.C. 2 *Kings* xix. 37.

NIOBIUM, a rare metal, discovered by Hatchett in columbite, a black earth, and named columbium, 1801. It was pronounced to be identical with tantalum (or tantulium) by Wollaston; but was rediscovered by H. Rose in 1846, and named niobium.

NIRVANA, see *Buddhism*.

NISBET or **NESBIT** (Northumberland). Here a battle was fought between the English and Scotch armies, the latter greatly disproportioned in strength to the former. Several thousands of the Scots were slain upon the field and in the pursuit, 7 May, 1402.

NISERO. See *Acheen*.

NISI PRIUS ("unless before"), words in a writ summoning a person to be tried at Westminster, *unless* the judges should come to hold their assizes in the place where he is. Judges sit in Middlesex by virtue of 18 Eliz. c. 12 (1576).

NISMES (Nîmes), S. France, was the flourishing Roman colony, Nemausus. Its noble amphitheatre was injured by the English in 1417. The inhabitants embraced Protestantism, and suffered much persecution in consequence, and Nîmes has frequently been the scene of religious and political contests. The treaty termed the Pacification of Nîmes (14 July, 1629) gave religious toleration for a time to the Huguenots.

NITRE, see *Saltpetre*.

NITRIC ACID, a compound of nitrogen and oxygen, formerly called *aqua fortis*, first obtained

in a separate state by Raymond Lully, an alchemist, about 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. H. Cavendish demonstrated the nature of this acid in 1785. *Nitrous acid* was discovered by Scheele about 1774. *Nitrous gas* was accidentally discovered by Dr. Hales. *Nitrous oxide gas* (laughing gas) was discovered by Dr. Priestley in 1776. The use of this gas as an anæsthetic began in America in 1864; at Paris, 1866; in London, 31 March, 1868, ingenious apparatus having been invented for its application.

NITROGEN or **AZOTE** (from the Greek *a*, no, and *zao* or *zō*, I live), an irrespirable elementary gas, and an important element in food, discovered by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies.

NITRO-GLYCERINE (also called **NITRO-LEUM**), an intensely explosive amber-like fluid, discovered by Sobrero in 1847, is produced by adding glycerine (in successive small quantities) to a mixture of one part of nitric acid, and two parts of sulphuric acid. Alfred Nobel, a Swede, first attempted its application as an explosive agent, in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town moor at Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson, town surveyor; see *Dynamite*. Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blown up; 15 persons killed, many injured, 10 June, 1868. An act prohibiting its importation for a time, and regulating its transmission, was passed in 1869, and repealed by the Explosives Act of 1875. Secret manufacture discovered, see *Birmingham*, 1883.

NIZAM, see *Hyderabad*.

NOBILITY. The Goths, after they had seized a part of Europe, rewarded their heroes with titles of honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquis of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV., 1478. Noblemen's privileges were restrained in June, 1773; see *Lords*, and the various orders of the nobility.

In 1845 a statistical writer said that there were 500,000 nobles in Russia, 230,000 in Austria; in Spain (in 1780), 470,000; in France (before 1790) 360,000 (of whom 4,120 were of the *ancienne noblesse*; in the United Kingdom, 1,631 with transmissible titles (dukes to baronets).

NOBILITY OF FRANCE preceded that of England. On 18 June, 1790, the National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquises, knights, barons, excellencies, abbots, and others, be abolished; that all citizens take their family names; liveries and armorial bearings also to be abolished. The records of the nobility, 600 volumes, were burnt at the foot of the statue of Louis XIV., 25 June, 1792. A new nobility was created by the emperor Napoleon I., 1808. The

hereditary peerage was abolished 27 Dec. 1831; re-instituted by Napoleon III., 1852.

NOBLE, an English gold coin (value 6s. 8d.), first struck in the reign of Edward III., 1343 or 1344, said to have derived its name from the excellence of the metal of which it was composed.

NOCTURNE, a name given by John Field (who died 1837) to a new and very pleasing musical composition. He was followed very successfully by Chopin, who died, 1849. The term was adopted by Mr. Whistler, the artist, for his night pieces, in which he began with line, form, and colour, 1877-8.

"NOLUMUS LEGES ANGLIÆ MUTARI," see *Bastards*, and *Merton*.

NOMINALISTS (or **CONCEPTUALISTS**), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscellin, a canon of Compiègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the 12th century. Among the Nominalists are reckoned Abelard, St. Thomas Aquinas (partially), Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

NON-CONFORMISTS. The Protestants in England are divided into conformists and non-conformists, or, churchmen and dissenters. The first place of meeting of the latter, in England, was established at Wandsworth, near London, 20 Nov. 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1662 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed "for the uniformity of public prayers and administration of the sacraments;" see *Puritans*, and *Dissenters*. The laws against them were relaxed by the Toleration act, 24 May, 1689. — The *Nonconformist* newspaper (edited by Mr. Edward Miall, aft. M.P.) first appeared 14 April, 1841. He died 29 April, 1881. The non-conformists presented to Mr. Miall 10,000 guineas for his exertions on behalf of religious equality . . . 18 July, 1873

NONES, in the Roman calendar, were the fifth day of each month, excepting March, May, July, and October, when the nones fell on the seventh day.

NON-JURORS considered James II. to have been unjustly deposed, and refused to swear allegiance to William III. in 1689. Among them were Sancroft, archbishop of Canterbury; Ken, bishop of Bath and Wells, and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived 1 Feb. 1691. Non-jurors were subjected to double taxation, and obliged to register their estates, May, 1723. They formed a separate communion, which existed till the beginning of the present century.

NON NOBIS, DOMINE! ("Not unto us, O Lord!") &c., *Psalm* cxv. 1), a musical canon, sung as a grace at public feasts, was composed by W. Birde in 1618.

NON-RESISTANCE OATH (containing a declaration that it is unlawful to take arms against the king upon any pretence whatever), enforced by the Corporation act, 1661, was repealed in 1719.

NOOTKA SOUND (Vancouver's Island, discovered by captain Cook in 1778, and settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards in 1789 captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

"NO-POPERY RIOTS," see *Gordon*. The cry was revived against the Catholic emancipation bill, 1829.

NORDLINGEN (Bavaria). Here the Swedes under count Horn were defeated by the Austrians, 27 Aug. 1634; and the Austrians and allies by Turenne in 1645.

NORE MUTINY, see *Mutinies*.

NORFOLK ISLAND (Pacific Ocean). Discovered in 1774, by captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1809, but re-occupied as a penal settlement in 1825. The descendants of the mutineers of the *Bounty* were removed to it in June, 1856, from *Pitcairn's Island* (which see).

NORICUM, see *Austria*.

NORMAL SCHOOLS (from *norma*, a rule). One for the instruction of teachers, established at Paris by a law, 30 Oct. 1794, opened 20 Jan. 1795, under the direction of La Place, La Harpe, Haüy, and other eminent men, was soon closed. Another, established by Napoleon in 1808, was closed in 1822. The plan was revived in 1826, and has been developed in England and other countries.

NORMANDY (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which, after various changes, was united to France by Charles the Bald in 837. From the beginning of the 9th century it was continually devastated by the Scandinavians, termed Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, 905. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William the seventh duke, acquired England, in 1066. It remained a province of England till the reign of king John, 1204, when it was conquered by Philip Augustus and reunited to France. It was re-conquered by Henry V., 1418, and held by England partially till 1450. The English still possess the islands on the coast, of which Jersey and Guernsey are the principal.

NORTH AMERICA, see *America, United States, Indians, Canada, &c.*

NORTH AMERICAN REVIEW began at Boston, U.S., in 1815, as a rival of the Edinburgh and Quarterly Reviews. It was published at first every second month; in 1818, quarterly; in 1879, monthly, at New York.

NORTHAMPTON was burnt by the Danes in 1010. Here Henry III. proposed to found a university in 1260, and held a parliament in 1269. On 10 July, 1460, a conflict took place between the duke of York and Henry VI. of England, in which the king was defeated, and made prisoner (the second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1637. It was seized and fortified by the parliamentary forces in 1642. A fire nearly destroyed the town, 3 Sept. 1675. Riots here because Mr. C. Bradlaugh was not elected M.P., 6 Oct. 1874, were suppressed by the military.

NORTH BRITON, a newspaper, first published 29 May, 1762, supported by John Wilkes, M.P. for Aylesbury, and a London alderman, and very bitter against the earl of Bute's administration, accusing him of unduly favouring the Scotch. NORTH-EAST AND -WEST PASSAGES.

The attempt to discover a north-west passage was made by a Portuguese named Corte Real, about 1500. In 1585, a company was formed in London called the "Fellowship for the discovery of the North-West Passage." From 1743 to 1818 parliament offered 20,000*l.* for this discovery. In 1818 the reward was modified by proposing that 5000*l.* should be paid when either 110°, 120°, or 130° W. long. should be passed; one of which payments was made to sir E. Parry. For their labours in the voyages enumerated in the *list below*, Parry, Franklin, Ross, Back, and Richardson, were knighted.

* Capt. M'Clure sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of sir John Franklin, 20 Jan. 1850. On 6 Sept. he discovered high land, which he named Baring's land; on the 9th, other land, which he named after prince Albert; on the 30th the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's straits, he set out on 21 Oct., with a few men in his sledge, to test his views. On 26 Oct. he reached Point Russell (73° 31' N. lat., 114° 14' W. long.), where from an elevation of 600 feet he saw Parry or Melville Sound beneath them. The strait connecting the Atlantic and Pacific Oceans he named after the prince of Wales. The *Investigator* was the first ship which traversed the Polar sea from Behring's straits to Behring island. Intelligence of this discovery was brought to England by com. Ingfield, and the Admiralty chart was published 14 Oct. 1853. Capt. M'Clure returned to England, Sept. 1854. In 1855, 5000l. were paid to capt. (afterwards sir Robert) M'Clure, and 5000l. were distributed among the officers and crew. On 30 Jan. 1855, the Admiralty notified that the Arctic medal would be given to all persons engaged in the expeditions from 1818 to 1855.

NORWICH, BISHOPRIC OF, originally East Anglia; the first bishop was Felix, a Burgundian, sent to convert the East Anglians about 630. The see was divided into two distinct bishoprics—Elmham, in Norfolk, and Dunwich, in Suffolk, about 673. Both sees suffered extremely from the Danish invasions, inasmuch that after the death of St. Humbert, they lay vacant for a hundred years. At last the see of Elmham was revived, and Dunwich was united to it; but Arfautus removed the seat to Thetford, where it continued till Herbert Losinga removed it to Norwich, 1004. This see has given to the church of Rome two saints; and to the nation five lord chancellors. It was valued in the king's books at 899*l.* 18*s.* 7*d.* per annum. NOTABLES, French assemblies of nobles, bishops, knights, and lawyers. An assembly of the notables was convened by the duke of Guise, 20 Aug. 1560, and by other statesmen. Calonne, the minister of Louis XVI., summoned one which met on 22 Feb. 1787, on account of the deranged state of the king's finances, and again in 1788, when he opened his plan: but as any reform militated too much against private interest to be adopted, Calonne was dismissed, and soon after retired to England. Louis having lost his confidential minister, De Vergennes, by death, called De Brienne, an ecclesiastic, to his councils. The notables were re-assembled on 6 Nov. 1788. In the end, the states-general were convoked 5 Dec.; and from this assembly sprang the national assembly (*which see*). The notables were dismissed by the king, 12 Dec. 1788.—The *Spanish notables* assembled and met Napoleon (conformably with a decree issued by him commanding their attendance), at Bayonne, 25 May, 1808.

It was taken by the Badenes under Von Werder, 18 Dec. 1870, after five hours' conflict, in which above 1000 French are said to have been killed and wounded, and 700 prisoners taken. The German loss was also heavy. A depot of arms and ammunition was gained by the victors.

NUMANTINE WAR. The war between the Romans and the Celtiberians (Celts who possessed the country near the Iber, now the Ebro) began, 143 B.C., on account of the latter having given refuge to their allies the Sigidians, who had been defeated by the Romans. Numantia, an unprotected city, withstood a long siege, in which the army of Scipio Africanus, 60,000 men, was opposed by no more than 4000 men able to bear arms. The Numantines fed upon horse-flesh, and their own dead, and then drew lots to kill one another. In conjunction with Dr. Tongue, he invented a plot against the Roman Catholics, who he asserted had conspired to assassinate Charles II., and extirpate the Protestant religion. He made it known 12 Aug. 1678, and in consequence about eighteen Roman Catholics were accused, and upon false testimony convicted and executed; among them the aged viscount Stafford, 29 Dec. 1680. Oates was afterwards tried for perjury (in the reign of James II.), and being found guilty, was fined, put in the pillory, publicly whipped from Newgate to Tyburn, and sentenced to imprisonment for life, May, 1685. OBELISK (Greek *obelos*, a spit, *monolithos*, a single stone). The Egyptian symbol of the supreme God. The first mentioned in history was that of Rameses, king of Egypt, about 1485 B.C.

The Arabians called them Pharaoh's needles, and the Egyptian priests the fingers of the sun. Several were erected at Rome; one was erected by the emperor Augustus in the Campus Martius, on the pavement of which was a horizontal dial that marked the hour, about 14 B.C. Of the obelisks brought to Rome by the emperors, several have been restored and set up by various popes. One was excavated and set up in the piazza of St. John Lateran, Rome, by Sixtus V. 1588.

In London are three English obelisks: first in Fleet-street, at the top of Bridge-street, erected to John Wilkes, lord mayor of London in 1775 (see *North Briton*); and immediately opposite to it at the south end of Farringdon-street, stands another of granite to the memory of Robert Walpole, lord mayor in 1824, erected 25 June, 1833; the third at the south end of the Blackfriars-road marks the distance of one mile and a fraction from Fleet-street.

Egyptian Obelisks.—42 are known, some broken: 12 at Rome; 1, from Luxor, set up in the Place de la Concorde, Paris, Oct. 1836; 5 in England (2 British museum; 1 Alnwick; 1 Boughton hall; 1 on Thames embankment).

The obelisks improperly named *Cleopatra's Needles* were erected by Thothmes III. at On (Heliopolis), about 1500 B.C. One was removed to Alexandria by Augustus, about 23 B.C. After being long imbedded in the shore, it was acquired for Great Britain by sir Ralph Abercromby, in 1801; but not removed. It was offered to the British government by Mehemet Ali, and again by the Khedive, 15 March, 1877.

Mr. James Erasmus Wilson (knt. Nov. 1881) having offered to pay all expenses, Mr. John Dixon, the engineer, undertook to convey it to England. The vessel, *Cleopatra*, containing it sailed with the *Olga* 21 Sept. During a violent gale, the vessels were separated, 14-15 Oct.; six lives were lost in a fruitless attempt to recover it. The *Cleopatra*, which was abandoned, was found by the *Fitzmaurice* (capt. Carter), and towed to Ferrol, whence it was towed by the *Anglia*, and arrived in London, 20 Jan. 1878.

The salvage awarded was 2000*l.*, 6 April, 1878. After much discussion, the Thames embankment (between Charing cross and Waterloo bridges) was selected for its site; where, by much engineering skill, it was placed, 12 Sept. 1878.

The obelisk weighs 186 tons, 7 cwt., 2 stones, 12 lb. Height, from base to point, 68 feet 5½ inches. It was placed under the care of the metropolitan board of works by act passed 22 July, 1878.

Sir J. Erasmus Wilson died 8 Aug. 1884.

The first in authentic history was at Alexandria, about 300 B.C., erected by Ptolemy Soter. "Observatory, a monthly review of astronomy," first appeared in 1877.

ODONTOLOGY (from the Greek *odontes*, teeth), the science of the teeth, may be said to have really begun with the researches of professor Richard Owen, who in 1839 made the first definite announcement of the organic connection between the vascular and vital soft parts of the frame and the hard substance of a tooth. His comprehensive work, "Odontography" (illustrated with beautiful plates), was published 1840-45. The Odontological Society was established 1856.

Sitalces, killed in battle with the Triballi, 424, was succeeded by Seuthes, who reigned prosperously; Cotys, another king (382-353), disputed the possession of the Thracian Chersonesus with Athens. After 9 or 10 years' warfare, Philip II. of Macedon reduced the Odrysæ to tributaries, and founded Philippopolis and other colonies, 343. The Romans, after their conquest of Macedon, favoured the Odrysæ, and in 42 their king Sadales bequeathed his territories to the Romans. The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messrs. Taylor and Martineau contrived apparatus for producing oil-gas on a large scale, 1815.—**OIL SPRINGS**; see *Petroleum*. **OIL FRASCOS**; see under *Painting*.

OPERAS IN ENGLAND. Sir William Davenant introduced a species of opera in London in 1684. The first regularly performed opera was at York buildings in 1692. The first at Drury Lane was in 1705. Handel's opera, *Radamistus*, was performed in 1720, and others by him were frequently performed a few years after. Gay's *Beggar's Opera*, first performed in 1727 at the Lincoln's Inn theatre. It ran for sixty-three successive nights, but so offended the persons in power, that the lord chamberlain refused a licence for the performance of a second part of it entitled "Polly." By Gay's friends' subscription, his profits on its publication amounted to 1200l., whereas the *Beggar's Opera* gained him only 400l. By the exertions of Carl Rosa (Rosé) and the company formed by him since 1875, performances of the opera have been greatly promoted in England. The company was joined by Mr. Augustus Harris in April 1889, and obtained the command of Drury Lane in 1889, to Covent Garden and the Prince of Wales's.—Carl Rosa died, aged 46, 30 April, 1889, much lamented. See *Theatres*.

OPERA COMIQUE, a new theatre, 299, Strand, opened 29 Oct. 1870, by Mlle. Déjazet and a French company. The French *opéra comique* began 1715; destroyed by fire, about 131 persons perished, 25, 26 May, 1887, see *Paris*.

OPERA-HOUSE, THE ITALIAN, or **QUEEN'S**, or (since 1837) **HER MAJESTY'S THEATRE**. The original building is generally sup-

posed to have been constructed by sir John Vanbrugh, though Mr. Pennant attributes it to sir Christopher Wren. It was built as "the queen's (afterwards changed to king's), theatre" opened 9 April, 1705; and burnt down 17 June, 1789. The foundation of the new theatre was laid 3 April, 1790; and the house was opened 22 Sept. 1791, on an improved plan; a new exterior was erected in 1820, from designs by Mr. Nash. This theatre was totally destroyed by fire (cause unknown) on the night of 6-7 Dec. 1867. The loss of the lessee, Mr. Mapleson, was about 12,000*l.*, and that of Madlle. Titiens (valuable jewels and dresses), was valued at 2000*l.*; rebuilt, but internal arrangements not completed. Moody and Sankey's revival meetings were held here, 12 April, 31 May, 1875. The new house was opened for Italian opera by Mr. Mapleson, 28 April, 1877; see *Theatres*.—THE ENGLISH OPERA (or Lyceum) was opened 15 June, 1816. It was entirely destroyed by fire 16 Feb., 1830. The new English Opera-house, or Lyceum, was erected from designs by Mr. S. Beazley, and opened in July, 1834; see *Theatres and National Opera-house*.

OPHTHALMOSCOPE, an apparatus for inspecting the interior of the eye, invented by professor H. Helmholtz, and described by him in 1851.

OPIUM, the juice of the white poppy, was known to the ancients, its cultivation being mentioned by Homer, and its medicinal use by Hippocrates. It is largely cultivated in British India, and was introduced into China by our merchants, which led eventually to the war of 1839, the importation being forbidden by the Chinese government. The revenue derived from opium by the Indian government in 1862 was about 7,850,000*l.*; in 1874, 8,000,000*l.* Laudanum, a preparation of opium: was employed early in the 17th century. A number of alkaloids have been discovered in opium: narcotine by Derosne, and morphia by Sertürner, in 1803. A society for suppressing the opium trade held meeting in London, 17 Jan. 1881, and since. Opium is now largely grown by the Chinese, 1889.

OPORTO (W. Portugal), the ancient *Calle*, one of the most impregnable cities in Europe, and the mart of Portuguese wine known as "Port." A chartered company for the regulation of the port-wine trade was established in 1756. The French, under marshal Soult, were surprised here by lord Wellington, and defeated in an action fought 12 May, 1809. The Miguelites besieged Oporto, and were repulsed by the Pedroites, with considerable loss, 19 Sept. 1832. The Oporto wine company was abolished in 1834, but re-established by a royal decree, 7 April, 1838. An international exhibition was opened here by the king, 18 Sept. 1865; see *Portugal*.

The Baquet theatre burnt; panic; about 100 lives lost; 30 March, 1888.

Business paralyzed by the strike of masters and men connected with the wine trade, through the government favouring speculators for a monopolizing company; riots quelled by the military about 30 May, *et seq.* 1889.

OPTIMISM (from *optimus*, the best), the doctrine that everything which happens is for the best, in opposition to Pessimism (from *perius*, the worst). The germ of optimism is to be found in Plato, and in St. Augustin, and other fathers; and has been especially propounded by Malebranche and Leibnitz, and adopted by Pope, Bolingbroke, Rousseau, and others. Optimism as expressed in the term, "the best of all possible worlds," is introduced by Voltaire (1694-1778) in his "Candide." The term *meliorism* (from *melior*, better) has lately introduced. See *Pessimism*.

"OPTION," a term given at the time to the permission given to the inhabitants of Alsace and Lorraine by the German government to choose, before 30 Sept. 1872, whether they would quit their country or become German subjects. Great numbers emigrated into the French territories. The "option" of archbishops respecting their claims on benefice becoming void on the creation or translation of a bishop, was abolished in 1845.

ORACLES, a term applied to revelations made by God to man. They were given to the Jews at the Mercy-seat in the tabernacle; see *Exod. xxv. 8-22*. The Holy Scriptures are the Christian "oracles," *Rom. iii. 2*; *1 Pet. iv. 11*. King Ahab sent to consult the oracle of Baalzebub at Ekron about 896 B.C. The Greeks consulted especially the oracles of Jupiter and Apollo (see *Dodona* and *Delphi*); and the Italians those of Faunus, Fortune, and Mars.

ORAN, Algeria (N. Africa), a Moorish city several times captured by the Spaniards; definitively occupied by the French in 1831, who have since added docks, &c.

ORANGE, a principality in S.E. France, formerly a lordship in the 9th or 10th century. It has been ruled by four houses successively: that of Giraud Adhemar (to 1174); of Baux (1182 to 1393); of Chalons (to 1530); and of Nassau (1530 to 1713); see *Nassau*. Philibert the Great, prince of Orange, the last of the house of Chalons, having been wronged by Francis I. of France, entered the service of the emperor Charles V., to whom he rendered great services by his military talents. He was killed at the siege of Florence, 3 Aug. 1530. He was succeeded by his nephew-in-law, René of Nassau; see *princes of Orange under Holland*. The eldest son of the king of Holland is styled the prince of Orange, although the principality was ceded to France in 1713. See *Araucio*.

ORANGE FREE STATE, a republic in South Africa, founded by Boers from Cape Colony in 1836. The British government proclaimed its authority over this territory, on 3 Feb. 1848, but declared it independent, 23 Feb. 1854. A constitution proclaimed, 10 April, 1854; revised, 1866, and 1879. The able president, sir John Henry Rand, first elected, 1863, died, 14 July, 1888. Resident Reitz elected, 11 Jan. 1889. Defensive treaty with the Transvaal, about 13 March, ratified 5 May, 1889. Concession granted to the Cape government to construct a railway to Bloemfontein, the capital, May, 1889. Population, 1885, 133,518.

ORANGEMEN. The "Battle of the Diamond," 21 Sept. 1795 (see *Diamond*), and the seachery experienced by the Protestants on that occasion, convinced them they would become an easy prey to the Roman Catholics, from their small numbers, unless they associated for their defence, and consequently the Orange Society was formed in 1795. The first Orange lodge was formed in Armagh; at the name of Orangemen already existed. An Orange lodge was formed in Dublin; the members published a declaration of their principles (the maintenance of church and state under the house of Brunswick) in Jan. 1798. After 1813 Orangemen declined; but revived again in 1827, when the duke of Cumberland became grand-master; and it is stated that in 1836 there were 145,000 Orangemen in England, and 125,000 in Ireland. After a parliamentary inquiry Orange clubs were broken up in conformity with resolutions of the house of commons; but were revived in 1845-1889. In Oct. 1857, the lord chancellor of Ire-

land ordered that justices of the peace should not belong to Orange clubs. The Orangemen in Canada were greatly excited during the visit of the prince of Wales in Sept. 1860. Mr. Wm. Johnston, a grand master, convicted of violating the Party Processions Act, was elected M.P. for Belfast, Nov. 1869. See *Belfast*.

ORANGES. The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547; and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success, in 1595; they are said to have been planted at Beddington park, near Croydon, Surrey. The duty on imported oranges was repealed in 1860.

ORATOR HENLEY. An eccentric English gentleman of some talents, in 1726, opened his "oratory," a kind of chapel, in Newport-market, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelty procured him many hearers; but he was too imprudent to gain any permanent advantage. He removed his oratory to Clare-market, and sank into obscurity previously to his death, in 1756.

ORATORIAN (from the Latin *orare*, to pray), a regular order of priests established by St. Philip Neri, about 1564, and so called from the oratory of St. Jerome, at Rome, where they prayed. They had a foundation in France, commenced by Guillaume Gibieuf and Pierre de Berulle (afterwards cardinal), 1612, approved by pope Paul V. 1613.—The rev. Frederick Faber and others, as "Fathers of the Oratory," established themselves first in King William-street, Strand, in 1848, and afterwards at Brompton.

ORATORIO, a kind of musical sacred drama, the subject of it being generally taken from the Scriptures. The origin of our oratorios (so named from having been first performed in an oratory), is ascribed to St. Philip Neri, about 1550. The first true oratorio, Emilio del Cavaliere's "Rappresentazione," was performed at Rome in 1600. He was followed by Giovanni Carissimi, Alessandro Scarlatti, &c. The first oratorio in London was performed in Lincoln's-inn theatre in Portugal-street, in 1732. Handel's oratorio of "Israel in Egypt" was produced in 1738, and the "Messiah" in 1741; Haydn's "Creation" in 1798; Beethoven's "Mount of Olives," 1803; Spohr's "Last Judgment" (properly "Things"), 1825; Mendelssohn's "St. Paul" in 1836, and "Elijah" in 1846; Costa's "Eli," 1865; "Naaman," 1864; S. Bennett's "Woman of Samaria," 1867; Benedict's "St. Peter," 1870; Macfarren's "John the Baptist," 1873; "Resurrection," 1876; and "Joseph," 1877; Dr. P. Armes' "Hezekiah," 1878; professor Macfarren's "King David," 1883.

ORCHOMENUS, a small Greek state in Boeotia, was destroyed by the Thebans, 368 B.C.; restored by Philip II. of Macedon, 354; and given up by him to Thebes, 346.

ORDEAL was known among the Greeks and Jews (*Num. v. 2*). It was introduced into England by the Saxons. A prisoner who pleaded not guilty might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only. The trial by ordeal was abolished in 1218.

ORDER OF THE CORPORATE RE-UNION, virtually a new episcopal church, said to arise out of the Christian Unity Association (*which see*). It proposed to form four stations, (Canterbury, York, Caerleon, and St. Andrews,) with rectors and provincials; announced 11 Sept. 1877.

ORDERS, see *Knighthood*.

ORDERS IN COUNCIL were issued by the British government 7 Jan. and 11 Nov. 1807, prohibiting trade with the ports occupied by the French, being reprisals for Napoleon's *Berlin decree* (*which see*). They greatly checked the progress of manufactures in this country, and caused much distress till their removal in 1814.

ORDONNANCES, see *Ordonnances, Self-Denying Ordinances*.

ORDINATION of ministers in the Christian church began with Christ and his apostles; see *Mark* iii. 14, and *Acts* vi. and xiv. 23. In England in 1549 a new form of ordination of ministers was ordered to be prepared by a committee of six prelates and six divines.

ORDNANCE OFFICE. Before the invention of guns, this office was supplied by officers under the following names: the bowyer, the cross-bowyer, the galeater, or purveyor of helmets, the armourer, and the keeper of the tents. Henry VIII. placed it under the management of a master-general, a lieutenant, surveyor, &c. The master-general was chosen from among the first generals in the service of the sovereign. The appointment was formerly for life; but since the restoration, was held *durante bene placito*, and not unfrequently by a cabinet minister.—*Beaumont*. The letters patent for this office were revoked 25 May, 1855, and its duties vested in the minister of war, lord Panmure. The last master-general was lord Fitzroy-Somerset, afterwards lord Raglan. The revival of the office recommended by the Ordnance Commission (see under *Army*, 1886).

ORDNANCE SURVEY. The trigonometrical survey of England was commenced by gen. Roy, in 1783, continued by col. Colby, and completed by col. (aft. sir Henry) James in 1856. The publication of the maps commenced in 1819, under the direction of col. Mudge, and was completed in 1862; a large part of these maps have been coloured geologically. The survey of Ireland has been completed and published; that of Scotland, completed Nov. 1882. By the survey act, passed 12 May, 1870, the ordinance survey was transferred to the Board of Works. Directors, lieutenant-gen. John Cameron, succeeded sir Henry James in 1875, died 30 June, 1878; col. A. C. Cooke; col. R. H. Stott-herd, 1885.

ORDONNANCES, the laws enacted by the Capetian kings of France previous to 1789. They began with "in the name of the king," and ended with "such is our good pleasure." The first in French is dated 1287 (Philip IV.). The publication of these "ordonnances," ordered by Louis XIV., 1706, is still in progress. The "ordonnances" of Charles X., promulgated 26 July, 1830, led to the revolution.

OREGON TERRITORY (N. America). A dispute respecting boundaries arose in 1845 between the British government and that of the United States, which was settled by treaty, 12 June, 1846. Oregon was admitted as a state, Feb. 1859. Capital, Salem. Population, 1880, 174,768.

ORGAN, a development of the pandean pipes; the "organ" in *Gen.* iv. 21 should be trans-

lated *pipe*. The invention is attributed to Orpheus, a barber of Alexandria, about 250 B.C.; and to Archimedes, about 220 B.C. The organ was brought to Europe from the Greek empire, and was applied to religious devotions in churches, about A.D. 65.

—*Bellarmino*. Organs were used in the western churches by pope Vitalianus, in 658. — *Assmann*. It is affirmed that the organ was known in France in the time of Louis I., 815, when one was constructed by an Italian priest. The organ at Harlem is one of the largest in Europe; it has 60 stops and 8000 pipes. At Seville is one with 110 stops and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices. Of the organs in ENGLAND that at St. George's Hall, Liverpool, by Mr. Willis, was the largest; next in order that at York minster, and that in the music-hall, Birmingham. In London, the largest was perhaps that of Spitalfields church; and that in Christ Church was nearly as extensive. The erection of the famous Temple organ was competed for by Schmidt and Harris; after long disputes, the question was referred to vote, and Mr. Jefferies, afterwards chief justice, gave the casting vote in favour of Schmidt (called Father Smith), about 1682. A monster organ was erected in the Crystal Palace, Sydenham, in June, 1857. The organ, by Willis, at the Royal Albert Hall, is now said to be the largest in the world; 1871. A larger project for a cathedral in Long Island, North America, 1880. A noble organ (by Brycecon), with many appliances, opened in the hall, Primrose-hill-road, London, N. Jan. 1876.

Barrel organs are said to have been first made early in the 18th century. The finest was the *Apolonia* (which see).

ORGANIC SYNTHESIS, see *Chemistry*.

ORIEL COLLEGE (Oxford), founded in 1326, by Adam de Brome, archdeacon of Stow, and almoner to king Edward II. This college derives its name from a tenement called *l'Oriole*, on the site of which the building stands.

ORIENTALISTS. The first International Congress of these scholars was held at Paris, 1 Sept. 1873; M. Léon de Rosny, the founder, president. The second Congress met at the Royal Institution, in London, 14-19 Sept. 1874; Dr. S. Birch, president. The third Congress met at St. Petersburg, 1 Sept. 1876; the fourth at Florence, Sept. 1878. The fifth met at Berlin, 12-17 Sept. 1880. M. Dittman, president. The sixth at Leyden, 18 Sept. 1883. The seventh, Vienna, 27 Sept. 1885. The next congress to be at Stockholm 2-6 Sept. 1889. See *Asiatic Societies*.

ORIFLAMME, see *Auriflamma*.

ORIGENISTS pretended to draw their opinions from the writings of Origen, who lived 185-255. They maintained that Christ was the son of God in no other way than by adoption and grace; that souls were created before the bodies; that the sun, moon, stars, and the waters that are under the firmament, have souls; that the torments of the damned shall have an end, and that the fallen angels shall, after a time, be restored to their first condition. They were condemned by councils, as the reading of Origen's work was forbidden. — *Brown*. These doctrines were condemned by the council at Constantinople in 553.

"ORIGIN OF SPECIES, BY MEANS

NATURAL SELECTION" by Charles Darwin, F.R.S., first published, 24 Nov. 1859. He was born 12 Feb. 1809, died 19 April, 1882. See *Species*.

ORION STEAM-SHIP. On 18 June, 1850, this splendid vessel, bound from Liverpool to Glasgow, struck on a sunken rock, northward of Portpatrick, within a stone's throw of land, and instantly filled. Of two hundred passengers more than fifty were drowned.

ORISSA, a province of N. W. Bengal, India, with an area of 74,413 square miles, and a population of 20,000,000. It was conquered by Clive in 1755, and nearly all acquired by the company in 1765. It suffered much by famine in 1770, and 1792-3, and more especially from the end of 1865 to Nov. 1866, when it is said about 750,000 persons perished. The government and officials were censured for neglect and want of forethought. It is also said that during a hurricane in Oct. 1836, 22,500 persons were drowned.

ORKNEY AND SHETLAND ISLES (North of Scotland), were conquered by Magnus III. of Norway, 1099, and were ceded to James III. as the dowry of his wife Margaret, in 1469. The Orkneys were the ancient Orkades; united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney, founded by St. Servanus early in the 5th century, some affirm by St. Colm, ended with the abolition of episcopacy in Scotland, about 1689; see *Bishops in Scotland*.

ORLEANS (a city in central France), formerly *Aurelianum*; gave title to a kingdom, 491, and afterwards to a duchy, usually held by one of the royal family. Attila the Hun, besieging it, was defeated by Aetius and his allies, 451. It was besieged by the English under earls of Salisbury and Suffolk, 12 Oct. 1428, bravely defended by Gaucour (as its fall would have ruined the cause of Charles VI. king of France), and relieved by the heroism of Joan of Arc, afterwards surnamed the Maid of Orleans, 29 April, 1429, and the siege was raised 18 May; see *Joan of Arc*. (The 439th anniversary was celebrated 10 May, 1868; the emperor and empress being present.) During the siege of Orleans, Feb. 1563, the duke of Guise was assassinated.

After nine hours' severe fighting, Orleans captured by the Germans, under general Von der Tann. More than 4000 prisoners were taken. The loss on both sides was heavy. About 35,000 on each side were engaged. The city was made to pay a war contribution of 60,000. 11 Oct. 1870

Von der Tann and the Bavarians defeated by generals D'Aurelle de Paladines and Pallières, and Orleans re-taken. The Germans acknowledged the loss of about 700 men and 1000 prisoners, chiefly wounded. The French asserted the numbers of both to be higher, and were much cheered with their victory. The French loss was heavy. The chief conflict took place between Coulmiers and Bacon or Baccen. 9, 10 Nov. " Severe conflicts at Bazoches and Chevilly, near Orleans, between a part of the army of the Loire and prince Frederick Charles and the grand-duke of Mecklenburg. 2-4 Dec. "

Orphan houses properly so called are mentioned for the first time in the laws of the emperor Justinian. At the court of Byzantium the office of inspector of orphans, *orphanothropos*, was so honourable that it was held by the brother of the emperor Michael IV. in the 11th century; see *Foundling Hospitals*.

ORRERY, a planetary machine to illustrate and explain the motions of the heavenly bodies, appears to have been coeval with the clepsydra. Ptolemy devised the circles and epicycles that distinguish his system about 130. The planetary clock of Finée was begun 1553. The planetarium of De Rheita was formed about 1650. The planetarium, now termed the Orrery, it is said, was constructed by Rowley, after a pattern devised by the clock-maker, George Graham, at the expense of Charles Boyle, earl of Orrery, about 1715. A large "planetarium" was constructed by the rev. Wm. Pearson, for the Royal Institution, London, about 1803. An excellent planetarium, constructed in London by signor N. Perini, was exhibited in Dec. 1879.

OSTEND (Belgium), sustained a siege by the Spaniards, from July, 1601, to Sept. 1604, when it honourably capitulated. On the death of Charles II. of Spain, the French seized Ostend; but in 1706, after the battle of Ramilies, it was retaken by the allies. It was again taken by the French in 1745, but restored in 1748. In 1756, the French garrisoned this town for the empress-queen Maria Theresa. In 1792, the French once more took Ostend, which they evacuated in 1793, but regained in 1794. The English destroyed the works of the Bruges canal; but the wind shifting before they could re-embark, they surrendered to the French, 19 May, 1798. The Ostend East India company, established 1723, was dissolved 1731. Riotous attacks on British fishermen landing fish quail with bloodshed; intervention of the king; peace restored 23-30 Aug. 1887. OSTRACISM (from the Greek *ostrakon*, a potsherd or shell), a mode of proscription at Athens, is said to have been first introduced by the tyrant Hippias; others ascribe it to Cleisthenes, about 510 B.C. The people wrote the names of those whom they most suspected upon small shells; these they put in an urn or box and presented to the senate. Upon a scrutiny, he whose name was offered written was sentenced by the council to be banished from his altar and hearth. 6000 votes were required. Aristides, noted for his justice, and Miltiades, for his victories, were thus ostracized. The custom was abolished by ironically proscribing Hyperbolus, a mean person, about 338 B.C.

Captain Cook came hither in 1770 to observe the transit of Venus; sailed round the whole island in a boat, and stayed three months. He visited it twice afterwards. See *Cook*. Omai, a native of this island, was brought to England by Cook, and carried back in his last voyage. In 1799, king Pomare ceded the district of Matavai to some English missionaries. Queen Pomare was compelled to put herself under the protection of France, 9 Sept. 1843. She retracted, and Otaheite and the neighbouring islands were taken possession of by admiral Dupetit-Thouars in the name of the French king, Nov. 1843. The French imprisoned Mr. Prichard, the English consul, 5 March, 1844, but the act was censured in France.

Queen Pomare IV., born, 23 Feb. 1813; succeeded her brother, Pomare III., in Jan. 1827; died 17 Sept. 1877, having reigned 50 years. By consent of her successor the island was formally annexed to France, 29 June, 1880. The queen arrived at Paris, 27 Feb. 1884.

OWHYHEE or **HAWAII**, an island in the N. Pacific Ocean, discovered Dec. 1778, by capt. Cook. On 14 Feb. 1779, he here fell a victim to a sudden resentment of the natives. A boat having been stolen by one of the islanders, the captain went on shore to seize the king, and keep him as a hostage till the boat was restored. The people would not submit to this insult, and their resistance brought on hostilities, and captain Cook and some of his companions were killed. Great progress has been recently made in civilisation here; and an order of nobility and a representative assembly were instituted in 1860. The population then was about 120,000; about 60,000 in 1878; a railway opened, in 1878. See *Sandwich Isles* and *Leprosy*.

OXFORD'S ASSAULT ON THE QUEEN. Edward Oxford, a youth who had been a servant in a public-house, discharged two pistols at queen Victoria and prince Albert, as they were proceeding up Constitution-hill in an open phaeton from Buckingham palace, 10 June, 1840. He stood within a few yards of the carriage, but neither her majesty nor the prince was injured. Oxford was tried at the Old Bailey (10 July), and was adjudged to be insane, and sent first to Bethlehem hospital, next to Broadmoor; and set at liberty in 1868, on condition of going abroad.

OXYGEN, a gas (named from the Greek *oxus*, sharp, as being generally found in acids), is the most abundant of all substances, constituting about one-third of the solid earth, and forming about nine-tenths of water and one-fifth of the atmosphere. It was first separated from red oxide of mercury by Priestley, 1 Aug. 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is a supporter of animal life (in respiration), and of combustion. An oxygen gas company was announced in Dec. 1864; its object being the cheap manufacture of oxygen for its application to the production of perfect combustion in lamps, stoves, furnaces, &c. Oxygen was liquefied by Raoul Pictet at Geneva; (pressure, 320 atmospheres, temp. 140 below zero cent.) 22 Dec. 1877. See *Ozone*.

Professor Dewar obtained 2 cubic centimetres ($\frac{1}{16}$ of a fluid oz.) of liquid oxygen by means of liquid ethylene (the illuminating part of coal gas), temp. 140° below zero Cent. (by Wroblewski and Olzewski's method) at the Royal Institution, London, in the presence of the prince and princess of Wales, 26 June, 1884. He exhibited for the first time some solid oxygen in the form of snow (temperature -200 cent. -400 Fahr.) produced by placing liquid oxygen in a partial vacuum at the Royal Institution 27 May, 1886.

A statue of Priestley, by F. J. Williamson, at Birmingham, was unveiled by professor T. H. Huxley, 1 Aug. 1874, the centenary of the discovery of oxygen. This was also celebrated at Northumberland, Pennsylvania, where he was buried, Feb. 1804. The following telegram was sent 31 July: "The brethren at the grave to the brethren at the home of Priestley send greeting on this centennial anniversary of the birth of chemistry."

A method of obtaining oxygen from air, devised and patented by M. Margis, of Paris. The principle is that of dialysis, or diffusion under pressure, Sept. 1882. See *Gas* (liquefaction).

OYER and TERMINER, a commission directed to the judges of the courts, by virtue whereof they have power to *hear and determine* treasons, felonies, &c., 1285.

O YES! A corruption of the French *oyez*, hear ye! The ancient term still used by a public crier and by the usher of courts of justice to enjoin silence and attention.

OYSTER (the Latin *Ostrea edulis*). British oysters are celebrated by the Roman satirist Juvenal (Sat. iv. 140) about 100. The robbery of oyster-beds is prohibited by 7 & 8 Geo. IV. c. 29 (1827). About 15,000 bushels of oysters were said to be produced from the Essex beds alone. In 1858 M. Coste commenced rearing oysters in great numbers on the coast of Brittany, and his plan has been found successful.

An act for promoting the cultivation of oysters in the United Kingdom, passed Aug. 1866
 One for the preservation of oyster fisheries 3 May, 1867
 Certain restrictions of the Oyster Fisheries act, 1862, removed by the Fisheries act 1868
 The fisheries (oyster, crab, and lobster) act forbids the sale of deep-sea oysters between 15 June and 4 August; and the sale of others, between 14 May and 4 August; passed 10 Aug. 1877
 Professor Huxley at the Royal Institution asserts the uselessness of restrictions and a close time for oysters, and the present uncertainty of culture 11 May, 1883

Artificial breeding greatly promoted by professor Brooks of Baltimore, (who discovered non-hermaphrodite) lieutenant Winslow, U.S., and M. Bouchen-Brandely, announced June, 1884
 Act for the cultivation of oysters in Ireland passed
 Oysters, about 1830 the commonest of food, are now becoming scarcer and scarcer, although their reproduction is about a million-fold. A committee recommend a close time for dredging, viz. 1 May to 1 Sept., deep-sea fishing to be restricted, as at present, from 15 June to 15 Aug.; no oyster to be sold under 2½ inches in diameter. The Whitstable beds in 1875 are said to have produced about 79,564,000 oysters; value about 55,400.
 American and Portuguese oysters are now largely imported.

OZOKERIT, a mineral hydro-carbon found in Moldavia and Wallachia. From it is distilled a substance suitable for making candles, introduced in the autumn of 1871.

OZONE (from the Greek *ozein*, to yield an odour), was discovered by Schönbein, of Basel, in 1840, when experimenting with the then newly-invented battery of sir Wm. Grove, and was recognised by him successively as a minute constituent of the oxygen gas resulting from the electrolysis of water effected by a current of high tension; of air

or oxygen through which electric discharges have taken place; and of air in which moist phosphorus has been undergoing slow oxidation.

Marignac determined the action of ozone on various substances to be due to their oxidation . . . 1845

Ozonometers constructed . . . 1858

M. Schönbein announced his discovery of another modification of oxygen, which he termed *autosome*, hitherto found only in the compound state (in peroxides of sodium, potassium, &c.) . . . 1859

The French Academy of Sciences appointed a com-

mittee of eminent philosophers to inquire into the nature and relations of ozone . . . 4 Dec. 1863

Andrews and Tait demonstrated ozone to be a condensed form of oxygen . . . 1860

This further established by Soret and Brodie, by quantitative reactions. (Odling suggested and Brodie proved ozone to be 3 parts of oxygen compressed into the space of 2) . . . 1867

Ozone, generated by a current produced by Wilde's magneto-electric machine, employed to bleach sugar, by Edward Beane's patent . . . Aug. 1868

Liquefied by Hautefeuille and Chappuis . . . Oct. 1860

Other properties since discovered . . . 1861-4

PADLOCKS are said to have been invented by Beecher at Nuremberg, 1540, but are mentioned much earlier.

PADUA, the Roman Patavium, in Venetia, N. Italy, said to have been founded by Antenor, soon after the fall of Troy, 1183 B.C. It flourished under the Romans. Patavian Latin was considered very corrupt, and is traced in Livy, a native of Padua. After being an independent republic, and a member of the Lombard league, Padua was ruled by the Carrara family from 1318 with a short interruption till 1405, when it was seized by the Venetians. The university was founded about 1220. It was closed through disturbances, 1848-50.

PALLAS, the planet, was discovered by Olbers, at Bremen, 28 March, 1802.

PALLISER'S CHILLED SHOT, see Cannon.

PALL MALL, a street near St. James's palace, London, is named from a French game at ball (*paillé-maille*, being a wooden mallet), resembling the modern croquet, having been played there about 1621. Among eminent inhabitants were Nell Gwyn and Dr. Thomas Sydenham. The **PALL MALL GAZETTE**, a daily independent political and literary journal, first appeared 7 Feb. 1865, and was edited by Mr. Frederick Greenwood till 1 May, 1880, when it became a liberal paper, edited by Mr. John Morley, who retired 25 Aug. 1883. Price 2d. reduced to 1d. 2 Jan. 1882.

Nos. 6, 7, 8, 9 July, 1885, contained Mr. Stead's statements respecting offences against young women and children. Greatly disproved on investigation. See *Trials*, Oct.-Nov. 1885.

PALMERSTON ADMINISTRATION.*

The resignation of the Aberdeen administration was announced 1 Feb. 1855, but nearly all its members returned to office soon after under lord Palmerston, lord Derby and lord John Russell having each in vain endeavoured to form an administration. Lord Canning was appointed governor-general of India, 4 July, 1855. PALM-SUNDAY. When Christ made his entry into Jerusalem, multitudes of the people who were come to the feast of the Passover, took branches of the palm-tree, and went forth to meet him, 33. It is usual, in some countries, to carry palms on the Sunday before Easter, hence called Palm-Sunday.

PALMYRA (Syria) was supposed to have been the Tadmor in the wilderness built by Solomon, but was manifestly Grecian. The brilliant part of the history of Palmyra was under Odenatus and his queen Zenobia. At the death of Odenatus, Zenobia assumed the title of queen of the East, in 267. Aurelian defeated her at Emesa, in 272, and made her captive, 273, and killed Longinus, the philosopher, her friend. Palmyra is now inhabited by a few Arab families. The ruins were visited in 1751, by Mr. Wood, who published an account of them in 1753.

PAMPELUNA (N. E. Spain, taken by the French on their invasion of Spain), was invested by the British, between whom and the French obstinate conflicts took place, 27 and 29 July, 1813. It surrendered to the British, 31 Oct. in that year.

PAMPHLETS. Their first appearance amongst us is generally thought to have been in opposition to the church of Rome. Those who were first convinced of the reasonableness of the "new learning," as it was then called, propagated their opinions in small pieces, cheaply printed, and (what was then of great importance) easily concealed. Political pamphlets began in Edward VI.'s time, and were very numerous in the 17th and 18th centuries (by De Foe, Swift, Steele, and others).

Paul Louis Courier wrote "Simple Discours" and other pamphlets against the priests and nobles after the restoration of the Bourbons, 1815. His "Pamphlet des Pamphlets," defending the pamphleteer (published, 1824), probably led to his murder, 10 April, 1825. Large collections are in the libraries of the British Museum and the Royal and London Institutions. Certain enactments respecting pamphlets removed by an act passed July, 1869.

PANAMÁ, the isthmus which joins the two Americas; see *Darien*. Across this a ship canal was proposed by the *Bulwer-Clayton treaty*, 19 April, 1850. A treaty for the construction of a ship canal through the isthmus by the United States was signed by representatives of that government and that of Colombia 26 Jan. 1870. A railway was opened in 1855. In that year a new state, New Granada, was divided into eight federal states, one of which is named PANAMÁ. A revolution took place in Panamá, on 9 March, 1865; the government was deposed, and don Jil Colunje became president; succeeded by Vincent Olatte, 1 Oct. 1866. Panamá is now subject to Colombia (*which see*). The government overthrown by Colombian troops without bloodshed, about 12 Oct. 1875. Civil war between Dr. Damaso Cervera and gen. B. (He died in April, 1866.) J. P. Louthenbourg, a painter, termed the panormist, invented the "Eidophusikon," natural phenomena represented by moving pictures, exhibited at Lisle-street, Leicester-square, 3 April, 1781. PANTECHNICON, a range of buildings, Motcombe-street, Knightsbridge, London, W., erected by Seth Smith, as a receptacle for paintings, jewellery, furniture, carriages, &c., 1830; was destroyed by fire 13-14 Feb. 1874, when much property was lost: re-built, 1874.

PANTHAYS, Mahometans in the Chinese province, Yunnan, became independent under a sultan, during the Tae-ping revolt, 1851-64. After its suppression, the Panthays, after a severe struggle, were also subdued. Their capital, Talifoo, was captured, and its inhabitants cruelly massacred in Feb. 1873. The Panthays sent an embassy to England in 1872, without effect. Sultan Suleiman committed suicide.

PANTHEISM, the formula of which is "everything is God, and God is one," was especially taught by Xenophanes, who died 500 B.C. The doctrine is attributed to Spinoza, Kant, Fichte, and other modern philosophers. Amalie of Chartres, censured for holding the doctrine, recanted 13th century. He is said to have asserted that "all is God, and God is all."

PANTHEON, at Rome, a circular temple built by Agrippa, the son-in-law of Augustus, 27 B.C. It had niches in the wall, where the image or representation of a particular god was set up; the gates brass, the beams covered with gilt brass, and the roof covered with silver. Pope Boniface III. dedicated it to the Virgin Mary and all the saints, by the name of S. Maria della Rotunda, or "ad Martyres," A.D. 608.*—The **PANTHEON IN LONDON** was erected by subscription, and opened 27 Jan. 1772; formed into an opera house; burned down 14 Jan. 1792; rebuilt for masquerades in 1795; opened as theatre, 1812; made a bazaar in 1834. The bazaar was closed in 1867, and the premises taken by Gilbey and Co., wine merchants, who lent the south part for a temporary church.

PANTHEON, Paris, a magnificent building founded by Louis XV. in pursuance of a vow, dedicated to Ste. Geneviève; built by Soufflot, 1757-90; named Pan-

theon, and decreed to be a mausoleum for eminent men, 1791; made a church, 1806; named Ste. Geneviève, 1821; re-named Pantheon, 1831; again a church Nov. 1852; again secularised, 27 May, 1885; received the remains of Victor Hugo, 1 June, 1885.

PANTOGEN, see *Atomic Theory*.

PANTOMIMES were representations by gestures and attitudes among the Greeks, and were introduced on the Roman stage by Pylades and Bathyllus, 22 B.C. Comic masques were introduced here from Italy about 1700. The first regular English pantomime is said to have been "Harlequin executed," produced by John Rich at the Lincoln's-inn-fields theatre, 26 Dec. 1717. Joseph Grimaldi (1779-1837) was a most eminent clown.

"PAPAL AGGRESSION." In a consistory holden in Rome, 30 Sept. 1850, the pope (Pius IX.) named fourteen new cardinals, of whom four only were Italians. Among them was Dr. Nicholas Wiseman, vicar-apostolic of the London district, who was at the same time nominated lord archbishop of Westminster.

Dr. Ullathorne enthroned as Roman Catholic bishop of Birmingham in St. Chad's cathedral 27 Oct. 1859. A pastoral letter from Dr. Wiseman read in all the Roman Catholic chapels of his see (all England travelled out into Romish dioceses). 27 Oct. "

The answer of the bishop of London (Dr. Blomfield) to a memorial from the protestant clergy of Westminster, against a Romish hierarchy in this country, was followed by the "Durham" letter from lord John Russell, then chief minister of the crown, to the bishop of Durham, in which he severely censured, not only the papal aggression, but also the proceedings of the tractarian clergy of the Church of England. 4 Nov. "

Immediately from every quarter of England addresses poured in to her majesty the queen, calling upon her and the government to resist the usurpation; 6,000 addresses, it is said, had been voted from nearly as many influential meetings up to 31 Dec. "

Dr. Briggs, created Roman Catholic bishop of Beverley, was enthroned in St. George's chapel at York, 13 Feb. 1851

Dr. Browne, created bishop of Clifton, and Dr. Burgess, bishop of Shrewsbury: both consecrated in St. George's cathedral, Southwark 27 July, "

The Ecclesiastical Titles act, 14 & 15 Vict. c. 60, prohibited the constitution of bishops of pretended provinces under a penalty of 100*l*. Aug. 24 July, 1871

PAPAL INFALLIBILITY. This dogma, maintained by one party in the Roman church, tolerated by another, and utterly rejected by a third, was adopted and promulgated at the general council at Rome 18 July, 1870, a great many bishops having withdrawn. The dogma was inculcated by the false decretals of Isidore and others, but not adopted by the council of Trent; see *Canons XXI*. Professor Dollinger, the historian, was excommunicated at Munich for rejecting this dogma, 18 April, 1871: he was made a D.C.L. at Oxford about 16 June following; see *Old Catholics*. The doctrine was strenuously attacked by Mr. W. E. Gladstone, in his pamphlet, "The Vatican Decrees," Nov. 1874.

PAPER, see *Papyrus*. Paper was probably made in Egypt, and centuries before the Christian era. It was made of cotton about 600 A.D.; and of rags about 1300.* White coarse paper was made

* Mr. Joseph Hunter (in the *Archæologia*, xxxvii.) states that the earliest paper which he had seen was a MS. account-book, dated 1302, probably of Bordeaux manufacture. He gives engravings of manufacturers' marks, French and English, the dates of which range

by sir John Spielman, a German, at Durtford, in England, 33 Eliz. 1580; and here paper mills were erected. *Stow.* Paper for writing and printing manufactured in England, and an act passed to encourage it, 2 Will. III. 1690; before this time we paid for these articles to France and Holland 100,000*l.* annually. The French refugees taught our people; we had made coarse brown paper almost exclusively, until they came among us; we made white paper first in 1690. *Anderson.* Paper-making by a machine was suggested by Louis Robert, who sold his model to Didot, the great printer, who brought it to England, and, conjointly with Fourdrinier, perfected the machinery. The latter obtained a patent for paper-making machinery in 1801; and for manufacturing paper of an indefinite length in 1807. The machinery was improved by Bryan Donkin. A sheet of paper, 3,800 feet long, and 4 feet wide, was made at Whitehall-mills, Derbyshire, in 1830; and one 11,000 feet long, and 6 feet 3 inches wide, was made at Colyton in Devon in 1860. Esparto, a Spanish grass, first imported in 1857, has been largely employed in the paper manufacture since 1864. In 1866 wood was largely manufactured into paper at Philadelphia; and at the Paris exhibition, 1867, fine specimens of wood-paper were shown; see *Parchment* (note). The paper duty, imposed in 1604 (producing, latterly, about 1,400,000*l.* annually), after having been the subject of agitation for several years, was repealed in 1861. Hop-stalks used to be used for paper-making in France, 1873.

Paper-mills in Great Britain, 1877, about 38 (England, 300; Scotland, 65; Ireland, 20); annual produce about 360,000 tons; value, 16,000,000*l.* Great increase since that time.

Paper-exhibition at Berlin, Aug. 1878: contained not only great varieties of paper, but a paper house, tables, chairs, carpets, barrels, boats, &c.

Paper pianoforte exhibited, soft tone, July, 1885.

Bottles largely made of paper in America, 1887.

PAPER-HANGINGS, &c. Stamped paper for this purpose was first made in Spain and Holland about 1555. Made of velvet and floss, for hanging apartments, about 1620. The manufacture of this kind of paper rapidly improved in this country during the present century. — **PAPER** BUCKS have been made in America; and paper tubing for water and gas, made by M. Jaloureaux of Paris, was shown in 1860.

PAPER-MONEY, see Banks.

PAPIER MACHÉ. This manufacture (of paper-pulp combined with gum and sometimes with china clay) has existed for above a century. Martin, a German snuff-box maker, is said to have learnt the art from one Lefevre about 1740. In 1745 it was taken up by Baskerville, the printer at Birmingham, and soon spread over that district. Papier maché is now largely employed in ornamenting the interior of buildings, &c. A large dome at Brussels ordered to be made of it, Dec. 1881.

PAPIN'S DIGESTER (see *Steam*), invented about 1681. Denis Papin, a French philosopher, assisted Boyle in his experiments about 1678.

from 1330 to 1431. He also gives an extract from a work by Bartholus, a writer of the middle of the 14th century, in which mention is made of a paper manufactory in the Marches of Ancona. At the end of Wynkin de Worde's edition of Bartholomæus De Proprietatibus Rerum, 1494, his thin paper, made by John Tute in England, is commended.

PAPYRUS, the reed from which was made the paper of Egypt and India, used for writings until the discovery of parchment, about 190 B.C. Ptolemy prohibited the exportation of it from Egypt, lest Eumenes of Pergamus should make a library equal to that of Alexandria, 263 B.C. Many papyri were discovered at Herculaneum in 1754; and many were collected by the French in Egypt, 1798. A manuscript of the *Antiquities of Josephus* on papyrus, among the treasures seized by Bonaparte in Italy, and sent to the National Library at Paris, was restored in 1815.

Fac-similes of the largest known papyrus, found in 1855, behind Modinet Habu on the Nile, and now in the British Museum, were published with translations by the trustees in 1866.

PARACLETE (Greek for comforter), a name given by Abelard to the convent which he founded in Champagne in 1122, of which Héloïse became the first abbess.

PARADISE LOST, the great English epic by John Milton, appeared first in ten books in 1667; in twelve books in 1674.

PARADOX (Greek, *para*, beyond; and *doxa*, opinion), something contrary to common opinion. Professor De Morgan's "Budget of Paradoxes" (of all kinds) was published in 1872. John Paget's "Paradoxes and Puzzles, Historical, Judicial, and Literary," published 1874.

PARAFFIN (from *parum affinis*, from its having little affinity with anything), also called photogen, a solid substance, somewhat like spermaceti, produced by distillation of coal, and first obtained by Reichenbach in 1830, and by Dr. Christison about the same time. It was procured from mineral oil by Mr. James Young about 1848 at Alfreton in Derbyshire. Soon after it was largely obtained from Boghead coal. It is also obtained from Irish peat. It makes excellent candles. Much litigation ensued through interference with Mr. Young's patent-right.

PARAGUAY, a republic in S. America, discovered by Sebastian Cabot in 1526; conquered by Alvarez Nuñez in 1535, and civilized by the Jesuits, who in 1608 commenced their missions there and held it till their expulsion in 1768. Paraguay rose against the Spanish yoke in 1811. In 1814, Dr. José G. R. Francia was elected dictator; he ruled vigorously but tyrannically; he was succeeded on his death in 1840 by Vibal. From 1814 to 1844 the country was rigidly closed against foreigners. The president, C. A. Lopez, elected in 1844, was succeeded by his son, Francis S. Lopez, Sept. 1862 (see below). Paraguay was recognised as an independent state by the Argentine Confederation, 14 July, 1852, and by Great Britain in 1853. Population in 1857, 1,337,433; in 1873, 221,079; in 1888 (estimated) 270,000.

1. The first step in the process is to identify the problem. This involves gathering information about the situation and understanding the needs of the stakeholders involved.

2. Once the problem is identified, the next step is to develop a plan. This involves setting goals, identifying resources, and determining the steps that need to be taken to address the problem.

3. The third step is to implement the plan. This involves putting the plan into action and monitoring progress to ensure that the goals are being met.

4. Finally, the fourth step is to evaluate the results. This involves assessing the effectiveness of the plan and making adjustments as needed to improve the outcome.

PARISHES. Their boundaries in England were first fixed by Honorius, archbishop of Canterbury, 636. They were enlarged, and the number of parishes was consequently reduced in the 15th century, when there were 10,000. Parish registers were commenced in 1538. Acts were passed in 1844 and 1856 by which new parishes may be formed out of too extensive ones; acts amended in 1869. The appointment of parish constables was made unnecessary by an act passed Aug. 1872. See *Registers*, and *Benefices*.

PARKESINE. A new substance, composed of gun-cotton, obtained from various vegetable bodies, and oil. It can be formed with the properties of ivory, tortoiseshell, wood, india-rubber, gutta-percha, &c. It is the invention of Mr. Alexander Parkes, of Birmingham, and was shown by him at the Exhibition in 1862. In Dec. 1865, at the Society of Arts, parkesine was proved to be an excellent electric insulator, and therefore likely to be suitable for telegraphic purposes.

PARK LANE MURDER, see *Trials*, 1872.

PARKS. The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made was that of Woodstock, formed by Henry I., 1125. Queen Caroline, consort of George II., inquired, it is said, of the first Mr. Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." The design was never afterwards entertained. See *Finbury*, *Southwark*, *Green*, *Hyde*, *James's*, *St.*, *Regent's*, *Victoria*, *Alexandra*, *Battersea*, and *People's Parks*, and *Yellowstone Park*, U.S., and *London Parks Act*.

PARK'S TRAVELS. Mungo Park set sail on his first voyage to Africa, under the patronage of the African society, to trace the source of the river Niger, 22 May, 1795; and returned 22 Dec. 1797, after having fruitlessly encountered great danger.

He again sailed from Portsmouth on his second voyage, 30 Jan. 1804, appointed to a new expedition by government; but never returned. His murder at Broussa on the Niger was well authenticated.

PARLIAMENT (from the French *parlement*, discourse) derives its origin from the Saxon general assemblies, called *Wittenagemot*. The name was applied to the assemblies of the state under Louis VII. of France, about the middle of the 12th century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edw. I., 1272: and yet Coke declared in his *Institutes*, and spoke to the same effect, when speaker (1592), that this name was used even in the time of Edward the Confessor, 1041. The first clear account we have of the representatives of the people forming a house of commons, was in the 43rd Hen. III. 1258, when it was settled by the statutes of Oxford, that twelve persons should be chosen to represent the commons in the three parliaments, which, by the sixth statute, were to be held yearly. *Burton's Annals*. The general representation by knights, citizens, and burgesses, took place 49 Hen. III. 1265. *Dugdale's Summons to Parliament*, edit. 1685; see *Commons and Lords*. The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown (as was done in the reigns of Henry VIII. and William III.). It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. *Sir Edward Coke*.* The ninth edition of May's "Practical Treatise on Parliament" was published in 1883; see *Triennial* and *Septennial*. Return of the names of members of parliament from the earliest period to the present time, ordered by the house of commons, 4 May, 1876, and 9 March, 1877. Part I. (1213-1702), published 1879. See *Reforms* and *Local Parliaments*.

* When the royal assent is given to a public bill, the clerk says "Le roi (or la reine) le veut." If the bill be a private bill, he says "Soit fait comme il est desire." If the bill have subsidies for its object, he says, "Le roi (or la reine) remercie ses loyaux sujets, accepte leur benévolence, et ainsi le veut." If the king do not think proper to assent to the bill, the clerk says, "Le roi (or la reine) s'oppose," which is a mild way of giving a refusal. It is singular that the French language should still be used.

Lee: this embankment, faced with granite, is 286 feet in length, and projected into the river in a line with the inner side of the third pier of old Westminster-bridge. Sir Charles Barry (born 1795, died 1860) was the architect of the sumptuous pile of buildings raised since 1840. The whole stands on a bed of concrete twelve feet thick; to the east it has a front of about 1000 feet, and covers an area of nine statute acres. It contains 100 apartments, 100 staircases, and two miles of passages or corridors. The great Victoria tower at the south-west extremity is 346 feet in height, and towers of less magnitude crown other portions of the building.

Ostius having killed his father, the Romans scourged the parricide, sewed him up in a leathern sack made air-tight with a live dog, a cock, a viper, and an ape, and cast him into the sea. Miss Blandy was executed at Oxford for the murder of her father, April, 1752.

Many submitted to the conquerors, but others fled to India, and their descendants still reside at Bombay (where they are termed Parsees), and where they numbered 114,000 in 1849. Sir Jamsetjee Jejeebhoy, the 3rd baronet, was elected president of the community there, July, 1877. PARTHIA (Asia). The Parthians were originally a tribe of Scythians, who, being exiled, as their name implies, from their own country, settled near Hyrcania. Arsaces laid the foundation of an empire which ultimately extended over a large part of Asia, 250 B.C.; the Parthians were never wholly subdued by the Romans. The last king, Artabanus V., was killed, A.D. 226; and his territories were added to the new kingdom of Persia founded by Artaxerxes, who had revolted against Parthia.

PASSION-WEEK, the name given since the Reformation to the week preceding Easter, was formerly applied to the fortnight. Archbishop Laud says the two weeks were so called "for a thousand years together," and refers to an epistle, by Ignatius, in the 1st century, in which the practice is said to have been "observed by all." The week preceding Easter is now by some termed "Holy Week," the previous week "Passion Week."

PATENTS (from *pateo*, I lie open), licences and authorities granted by the king. Patents granted for titles of nobility were first made 1344, by Edward III. They were first granted for the exclusive privilege of printing books, in 1591. The property and right of inventors in arts and manufactures were secured by letters patent by an act passed in 1623. The later laws regulating patents are very numerous; among them are 5 & 6 Will. IV. c. 83 (1835), and 15 & 16 Vict. c. 83 (1852). By the latter COMMISSIONERS OF PATENTS were appointed, viz., the lord chancellor, the master of the rolls, the attorney-general for England and Ireland, the lord advocate, and the solicitors-general for England, Scotland, and Ireland. In 1853, a journal was published under their authority, and indexes of patents, from March, 1617 to the present time. Specifications of patents may be consulted by the public at the Free Library and Reading-Room, in Southampton buildings, opened 5 March, 1854. A museum containing models, portraits, &c., was established in 1859 at South Kensington, mainly by the exertions of Mr. Bennet Woodcroft.

In 1864, the alleged defalcations of Mr. Edmunds, a clerk in the patent office and an official of the house of lords, led to his retirement. He obtained a pension of 800*l.*, which was taken from him by a vote of the house of lords on 9 May, 1865. Much litigation ensued. In an action against Mr. Gladstone, the prime minister, and others, for a libel, Mr. Edmunds was non-suited, 21-22 June, 1872; and he failed in actions against several newspapers for printing a treasury minute. His appeal to the house of lords failed 16 June, 1873.

It was first conferred on the five grand sees of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. The Latin church had no patriarchs till the 6th century. The first founders or heads of religious orders are called patriarchs.

PATRONAGE OF LIVINGS by Laymen in England is very ancient; in Scotland was opposed by the books of discipline 1560 and 1578, abolished 1649, restored 1660. The system led to the disruption of the established church, and the foundation of the free church, 18 May, 1843. The abolition of lay patronage was earnestly advocated by the authorities of the established church in March, 1870, and the duke of Argyll volunteered to resign his patronage in May. Of 1109 livings 319 belonged to the crown, and about 600 to private persons. An act (37 & 38 Vict. c. 82) for abolishing patronage in Scotland, brought in by the duke of Richmond, 18 May, passed, 7 Aug. 1874.

PAULICIANS, a sect of Christian reformers, arose about 652. Although they were severely persecuted, they spread over Asia Minor, in the 9th century, and finally settled at Montford, in Italy, where they were attacked by the bishop of Milan in 1028. Severe decrees against them were made in 1163, and they gradually dispersed; very probably sowing the seeds of the great reformation of the 16th century.

PAUL JONES, a Scotchman, born 1742; died at Paris, 1792. He commanded an American privateer during the American war, and made daring depredations on British commerce. He pillaged the house of lord Selkirk, near Kirkcudbright, and at Whitehaven burnt shipping in the harbour, April 1778. The Dutch permitted Paul Jones to enter their ports with two British ships of war which he had taken, and which the stadtholder peremptorily refused to deliver up, 1779.

(London), which stood at the north side of the cathedral, was a pulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to preaching, but to political and ecclesiastical discourses, &c. The cross was demolished in 1643, by order of the parliament.

PAUL'S SCHOOL, ST., was endowed in 1512 by John Colet, dean of St. Paul's, for 153 boys "of every nation, country, and class," in memory of the number of fishes taken by Peter. (*Johns* xxi. 11). The first schoolhouse was burnt in 1666; the second, by Wren, was taken down in 1824, and another building erected by George Smith. William Lilly was the first master, and his grammar is still used by the school. *Timbs*. PAUPERS, see *Poor*.

PAVAN, Pavane, or Pavin, was a slow dance of the 16th and 17th centuries, sometimes accompanied by singing.

PAVEMENT. The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavement in many of their streets; the Appian way, a paved road, was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about 1533. It was paved with flagstones between 1815 and 1825. Wood and asphalt paving were tried in 1839, and have been disused since 1847; see *Wood Pavement*. Asphalt has been much used since 1869. Wood reported to be the best for London, May, 1876.

Grano-metallic stone laid down in a plastic state in part of the Strand, London, and in other places, 1885

PAVIA (N. Italy), the ancient *Ticinum* or *Papia*. Its university, founded by Charlemagne, is said to be the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths: in 568 it was taken by the Lombards, and became the capital of their kingdom. In the 12th century it was erected into a republic, but soon after was subjected to Milan and followed its fortunes. On 24 Feb. 1525, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men with his own hand, was at last obliged to surrender himself a prisoner. It was long asserted that Francis wrote to his mother, Louisa of Savoy, regent of the kingdom during his absence, saying, *Tout est perdu, madame, fors l'honneur* (All is lost, madam, except honour). The words are now said to have been, *L'honneur et la vie qui est saulé*.

PAWNBROKING. The Roman emperors lent money upon land. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about 1462. The institutions were termed *monti di pietà* (which see). Soon afterwards, it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London, 1127; the number is increasing more than in proportion to the population. In 1860 an act was passed enabling pawnbrokers to charge a half-penny for every ticket describing things pledged for a sum under 5*l.* The acts relating to pawnbrokers were amended in 1856, 1859, 1860. Pawnbrokers in Great Britain; 1851, 1873; in 1861, 2578; in 1871, 3540. The law was consolidated in the pawnbrokers' act passed 10 Aug. 1872.

A PEACE SOCIETY, founded 1816, for the promotion of universal peace; holds annual meetings; proposed amalgamation with the International Arbitration and Peace Association (founded by Mr. Lewis Appleton in 1880), Dec. 1884. The association divided in May, 1886, when the British arbitration association was founded by Mr. Appleton. A congress of the friends of peace, from all parts of the world, commenced its sittings at Paris, 22 Aug. 1849. It met in London at Exeter hall, 30 Oct. following; and at Frankfurt, in St. Paul's church, 22 Aug. 1850; at Birmingham, 28 Nov. 1850; and at Exeter hall, 22 July, 1851. A meeting was held at Manchester, 27 Jan. 1853; and at Edinburgh, 12 Oct. 1853

Mr. Bright and Mr. Cobden were among the most conspicuous members of the society. A deputation from the Peace Society, consisting of Messrs. J. Sturge, A. Pease, and another Quaker friend, stated their views to the emperor of Russia at St. Petersburg, at an interview granted them in Feb. 1854. At the stormy international arbitration and peace congress at Geneva, Garibaldi was present,

PEACHES are said to have been introduced into this country from Persia about 1562.

PEARLS, mentioned *Job* xxviii. 18. M. éaumur, in 1717, alleged that pearls are formed like other stones in animals. An ancient pearl was valued by Pliny at 80,000*l.* sterling. One which was brought in 1574, to Philip II., of the size of a geon's egg, was valued at 14,400 ducats. A pearl named the *Incomparable*, spoken of by De Boete, weighed thirty carats, equal to five pennyweights, and was about the size of a muscadine pear. The pearl mentioned by Tavernier, as being in possession of the emperor of Persia, was purchased of an Arab in 1633, and is valued at a sum equal to 110,400*l.* value of pearls imported into Great Britain, 1856, 5,162*l.* Artificial mother of pearl is said to have been made at Berne by Mr. K. "PECULIAR PEOPLE," a small sect founded in London by Wm. Bridges and Jas. Barnard in 1838; chief seat Essex. Two members, Thomas and Maryanne Wagstaffe, were tried and acquitted of manslaughter, 29 Jan. 1868. They had neglected getting medical assistance for their sick child, and depended on the efficacy of their elders' prayers and anointing it with oil (*James* v. 14). Many cases of healing by these means are asserted. On 8 May, 1872, a father was convicted for neglecting to get medical advice for his child who died of small pox; and the act agreed to modify their practice. Establishments for healing diseases by prayer exist in Germany. At another trial, Thomas Hines was acquitted, in accordance with the opinion of the court; Baron Pigott held that the case did not amount to criminal neglect because the prisoner had not called in a doctor to his sick child, 19 Aug. 1874; similar cases since; 1875-6. John Robert Downes (for neglect respecting scarlet fever) sentenced to 3 months' imprisonment 21 Sept. 1876.

PEDESTRIANISM. Euehidas, a citizen of Plataea, went from thence to Delphi to bring the sacred fire. No sooner had he saluted his fellow-citizens, and delivered the fire, than he fell dead at their feet. After the battle of Marathon, a soldier was sent from the field to announce the victory at Athens. Exhausted with fatigue, and bleeding from his wounds, he cried out, "Rejoice, we are conquerors!" and immediately expired.

PEEL ADMINISTRATIONS. * The FIRST

* Sir Robert Peel was born 5 Feb. 1788; entered parliament in 1809; became under-secretary of the colonies in 1811, chief secretary for Ireland in 1812; M.P. for Oxford in 1818 (when he resigned his office); secretary for home department in 1822; resigned office and re-appointed in 1827; resigned again in 1830; became premier in 1834 and 1841 (see above). He was thrown from his horse 29 June, and died 2 July, 1850. He greatly

succeeded the Melbourne administration, which was broken up on the retirement of lord Althorp, the chancellor of the exchequer, in Nov. 1834. Sir R. Peel, then in Italy, was summoned home, the duke of Wellington holding the seals of office in the interim. They both resigned in April, 1835. In May, 1841, sir R. Peel carried a vote of want of confidence in the Melbourne cabinet, but did not take office; and in Sept. of that year, he became again premier. He lost the support of the conservative party by obtaining the repeal of the corn laws, and resigned 29 June, 1846.

PEGU, a province of the Burmese empire, discovered by the Portuguese in 1520. Pegu, its capital, was taken by major Cotton, with 300 *men*, in June, 1852, without loss; and afterwards abandoned. It was again occupied by the Burmese and strongly fortified, with a garrison of 4000 *men*. It was recaptured by general Godwin with 120 *men* and two guns, in two hours, with the loss of six killed and thirty-two wounded. The province was annexed to our Indian possessions, by proclamation, 20 Dec. 1852, and has since prospered. In Feb. 1862, it was united with Arracan and Tenasserim as British Burmah.

PEKIN, the capital of China, was built at Kachilai-Khan, grandson of Genghis-Khan, about 1267. Here was held the court of the Mongol or Yuen dynasty, 1280 to 1368. In 1369, Hung-wu, of the Ming dynasty, removed to Nankin, which was the capital till Yung-lo removed his court to Peking in 1410; and by him and his successors the city was enlarged, fortified, and beautified. It was visited by lord Macartney, Sept. 1793; surrendered to the allied English and French armies, 12 Oct. 1860; and evacuated by them 5 Nov., after peace had been signed 24 Oct. It was described as being in a very desolate state, and the inhabitants scattered and indigent. English and French representatives were settled at Peking, March, 1861. Preliminary Peace with France concluded here, 5 April, 1885.

PELAGIANS, followers of Pelagius, a Briton, appeared at Rome about 400. Their doctrines were condemned by councils at Jerusalem, Carthage, and other places, 415, 530. They maintained:—

1. That Adam was by nature mortal, and whether he sinned or not would certainly have died.
2. That the consequences of Adam's sin were confined to his own person.
3. That new-born infants are in the same condition with Adam before the fall.
4. That the less qualified men for the kingdom of heaven, and was founded upon equal promises with the Gospel.
5. That the general resurrection of the dead does not follow in virtue of Christ's resurrection.

PELASGI, the primitive inhabitants of Asia Minor, Greece, and Italy, appear to have belonged to the Indo-Germanic race. They were in Greece about 1900 B.C., and in Italy about 1600 B.C. They have been termed Tyrrheni, Sicani or Siculi, Apuli, &c. From the Pelasgi came the Dorians, Eolians, and Ionians; all three being Hellenes or Greeks. The Pelasgi appear not to have had the art of writing, but have left numerous architectural remains; they were probably a wealthy, powerful, and intelligent people.

PELEW ISLANDS (N. Pacific Ocean), discovered by the Spaniards in the 17th century. The East India Company's packet *Antelope*, captain Wilson, was wrecked here in 1783. The king, Abba Thulle, allowed captain Wilson to bring prince Le Boo, his son, to England, where he arrived in 1784, and died of the small-pox soon after. The East India Company erected a monument over his grave in Rotherhithe churchyard.

PELHAM ADMINISTRATION. Mr. H. Pelham replaced the earl of Wilmington as premier, 25 Aug. 1743; see *Wilmington*. In Nov. 1744, the following ministry was formed (termed "the broad bottom administration," because it comprehended a grand coalition of the parties). It was dissolved by the death of Mr. Pelham, 6 March, 1754.

Lord Hardwicke, *lord chancellor*.

Duke of Dorset, *president of the council*.

PELOPIUM, see *Niobium*.

PELOPONNESUS (the island of Pelops), S. Greece, termed Morea in the 13th century, said to have been settled by Pelops about 1283 B.C. PELOPONNESIAN WAR continued for twenty-seven years between the Athenians and the people of the Peloponnesus, with their respective allies, and is the most famous of the wars of Greece. It began by an attempt of the Boeotians to surprise Plataea, 431 B.C., on 7 May, and ended 404 by the taking of Athens by the Lacedaemonians.

PELUSIUM (now *Tineh*), formerly Sin, the key of Egypt. Here, in 525 B.C., Psammetichus III. was defeated by Cambyse, the Persian, who thereby obtained possession of the kingdom. Pelusium surrendered to Alexander, 333; was taken by the Persians, 309; by Antiochus, 173; by Augustus, 30 B.C.; and after a protracted resistance by Amrou, the Saracen, A.D. 638.

PENANG, or **PRINCE OF WALES'S ISLAND**, was given up to the East India Company in 1786, by captain F. Light, who received it as a marriage portion with the daughter of the king of Keddah. After several changes it became one of the Straits Settlements (*which see*).

PENDULUMS. The isochronous property of the pendulum is said to have been applied to clocks by Galileo about 1639, and by Richard Harris about 1641. Christian Huyghens claimed this discovery, 1658. See *Clocks*. George Graham invented the compensating pendulum, 1715. Experiments were made to determine the density of the earth by pendulums by Mr. (aft. sir) G. B. Airy (aft. astronomer royal), and others, in a mine in Cornwall, in 1826 and 1828; and at Horton Colliery 1854. In 1851, M. Foucault demonstrated the rotation of the earth by the motion of a pendulum.

PENNSYLVANIA (N. America), the first state in the Union in regard to mineral wealth. Sir Walter Raleigh was the first adventurer who planted a colony on these shores, in the reign of Elizabeth. Pennsylvania was granted by Charles II. to the duke of York, 1664; and it was sold to the Penn family, 1681. Pennsylvania was afterwards purchased from the Indians by the celebrated William Penn (son of admiral Penn), who went out from England with a number of colonists; from which period the settlement gradually increased. Mr. Penn granted a charter in May, 1701, but the emigrants from the Low Countries refused it, and separated themselves from the province of Pennsylvania. They afterwards had their own assembly, in which the governor of Pennsylvania presided. This state adopted an independent constitution in 1776, and established the present in 1790. Capital, Harrisburg; principal city, Philadelphia. It was strongly unionist during the civil war, 1861-5; see *United States of America*, and *Petroleum*. For strikes see *United States*, 1877, 1882. Population in 1860, 2,906,370; in 1870, 3,521,791; in 1880, 4,282,891.

Great destruction of property and life by a tornado, especially at Pittsburg and Reading, 9 Jan. 1880.

Several days' violent storms and heavy rain in the Alleghenies, swelled the rivers and caused the overflow of the lakes, May, 1889. At 5 p.m. 31 May, the South Fork reservoir, a lake about 4 miles square burst the huge dam, and a mass of water rushed down the South Fork, four miles, by the deep circuitous Conemaugh valley to its junction with the Conemaugh river, driving all before it. For a distance of about 12 miles round Johnstown the flood swept out towns and villages, destroying all the bridges, railways, and factories. South Fork, Johnstown, Cambria, city Morrellville, Sheridan, and other flourishing towns were completely blotted out. A great mass of floating wreckage, which was stopped by a stone railway bridge at Johnstown, took fire, above five hundred persons, who were hurled on the burning mass, perished.

On June 2nd the loss of life was estimated to be between 10 and 12 thousand (of whom about 8,000 were burned or drowned around Johnstown), and of property about \$15,000,000.

The most energetic measures were taken by the government, by several states and by the railway companies for the relief of the sufferers, and for averting imminent famine and pestilence. Robbers of the dead and living were lynched by a vigilance committee. Troops were sent to maintain order, liberal subscriptions were begun in London, Paris, and other places, June.

It is stated that the dam had previously given visible signs of its being in a very insecure condition, and had not been properly constructed. The floods caused by the overflow of the Susquehanna caused great destruction of life and property in N. Pennsylvania; several towns and villages submerged, June; many bridges swept away; above 150 deaths reported.

PENNY. The ancient silver penny was the first silver coin struck in England, and the only one current among the Anglo-Saxons. The penny until the reign of Edward I. was struck with a cross, so deeply indented that it might be easily parted into two for halfpence, and into four for farthings, and hence these names. Copper penny and two-penny pieces were coined by Boulton and Watt, at Soho, Birmingham, in 1797, and were accounted the finest of our copper currency; see *Coins*, &c.—

PENNY-POST; see *Post-Office*.—**THE PENNY MAGAZINE** began in 1832; the **PENNY CYCLOPEDIA** in 1833 (supplements in 1846 and 1858). The **PENNY RECEIPT** stamp was appointed in 1853 (postage stamps authorised to be used for receipts after 1 June, 1881), and in 1858 a penny stamp was directed to be placed on bankers' cheques.—**PENNY BANKS** (in 1861 about 200) were established about 1850. They have become numerous, and in 1878 were authorised to invest their funds.—**PENNY READINGS**, for the working classes, became general in 1859. Carpenter's "Penny Readings," published in 1865-7.

The value of the Roman penny (mentioned *Matt. xx. 2*), or *denarius*, was estimated at 74d. of our money.

PERJURY. The early Romans threw the offender headlong from the Tarpeian precipice; and the Greeks set a mark of infamy upon him. After the empire became Christian, any one who swore falsely upon the Gospels, was to have his tongue cut out. The canons of the primitive church enjoined eleven years' penance; and in some states the false swearer became liable to the punishment he charged upon the innocent. In England perjury was punished with the pillory, fine, and imprisonment, 1562. By the Abolition of Oaths bill, persons making a false declaration are deemed guilty of a misdemeanor; Act 5 & 6 Will. IV. cc. 60 and 61, 9 Sept. 1835. Perhaps the greatest perjurer in modern times was Titus Oates; see *Oates*. A woman named Alice Grey was convicted of many perjuries in 1856. See *Trials*, 1873.

PERUGIA, a city of central Italy; as Perusia, anciently one of the Etruscan confederation. It allied itself with the Samnites, but was ruined by two defeats by the Romans, 309 and 295 B.C. It was taken by Octavius Caesar from the adherents of Antony; many of whom were immolated on altars by their victor, 41. Leo X. took Perugia from the rival families Oddi and Baglioni, in A.D. 1520. An insurrection here against the pope was put down by the Swiss with great cruelty, 20 June, 1859. Perugia was taken by the Sardinian general Fanti, in Sept. 1860, when the cruel papal general Schmidt and 1600 men were made prisoners.

PERUKE or **WIG**. The ancients used false hair, but the present peruke was first worn in France and Italy about 1620; and introduced into England about 1660, and prevailed more or less till about 1810.

It is said that bishop Blomfield (of London), in 1836, obtained permission for the bishops to discontinue wearing their wigs in parliament, of which they gradually availed themselves. On account of the heat, Sir J. P. Wilde, and other judges and several counsel, appeared in court without wigs, 22, 23 July, 1863.

PESCHIERA, a strong Austrian fortress, on an island in the Mincio, near the Lago di Garda, N. Italy. It has been frequently taken by siege:—by the French, 1796; by the Austrians and Russians, 1799; by the French again, 1801; given up by them, 1814; taken by the Sardinians, May, 1848; retaken by Radetsky, March, 1849. PESSIMISM (from *pessimus*, the worst), the opposite doctrine to *optimism* (which see). Mr. James Sully's "Pessimism, a History and a Criticism," was published in 1877. Arthur Schopenhauer (1788-1800), an eminent pessimist, says, "All life is effort, all effort is painful, the pains of life must predominate."

PESTALOZZIAN SYSTEM of education was devised by John Henry Pestalozzi, born at Zurich in Switzerland, in 1746, died 17 Feb. 1827. In 1775 he turned his farm into a school for educating poor children in reading, writing, and working; but he did not succeed. In 1798 he established an orphan school where he began with the mutual instruction, or monitorial system, since adopted by Lancaster; but his school was soon after turned into a hospital for the Austrian army. In 1802, in conjunction with Fellenberg, he established his school at Hofwyl, which at first was successful, but eventually declined through mismanagement.

taken by the imperialists, 5 Jan. 1849. The Hungarians afterwards defeated the Austrians, who were obliged to evacuate it 18 April, same year; see *Hungary*. Buda-Pesth formally constituted capital of Hungary, Nov. 1873.

Petards of metal, nearly in the shape of a bat, were employed to blow up gates or other barriers, and also in countermines to break through into the enemy's galleries. Cahors was taken by Henry IV. by means of petards, in 1580, when it is said they were first used. "Hoisted with his own petar." *Shakespeare*, Hamlet iii. 4.

PETER THE WILD BOY, a savage creature found in the Harzwald, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, Nov. 1725. At this time he was supposed to be thirteen years old. He died, while under the care of an English farmer, Feb. 1785.

The king caused him to taste of all the dishes at the royal table; but he preferred wild plants, leaves, and the bark of trees, which he had lived on from his infancy. No efforts of the many philosophic persons about court could entirely vary his savage habits, or cause him to utter one distinct syllable. Lord Monboddo represented him to be a proof of the hypothesis that "man in a state of nature is a mere animal."

PETERBOROUGH, anciently Medeshamstede (Northamptonshire); obtained its present name from a king of Mercia founding an abbey and dedicating it to St. Peter about 655. The church, destroyed by the Danes, was rebuilt with great beauty. The tower becoming dangerous, restoration resolved on, Dec. 1882. Foundation laid of new building, 7 May, 1884. The bishopric was erected by Henry VIII., out of the lands of dissolved monasteries in the diocese of Lincoln. The first bishop was John Chambers, the last abbot of Peterborough, 1541. The see was valued in the king's books at 419*l.* 19*s.* 11*d.* Present income 4500*l.*

PETERSBURG, ST., the modern capital of Russia, founded by Peter the Great, 27 May, 1703. He built a small hut for himself, and some wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hands, laid the foundation of a house of the same material. The seat of empire was transferred from Moscow to this place in 1711. Here, in 1736, a fire consumed 2000 houses; and

in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again, in June, 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, 29 Dec. 1837. The railway to Moscow was finished in 1851; to Berlin, opened 5 May, 1862. The university was closed in Oct. 1861, on account of the riotous conduct of the students. On 10 June, 1862, property to the amount of nearly a million sterling was destroyed by fire. PETER'S CHURCH, ST. (Rome), originally erected by Constantine, 306. About 1450, pope Nicholas V. commenced a new church. The present magnificent pile was designed by Bramante; the first stone laid by pope Julius II. in 1506. In 1514, Leo X. employed Raphael and two others to superintend the building. Paul III. committed the work to Michael Angelo, who devised the dome, in the construction of which 30,000 lb. of iron were used. The church was consecrated 18 Nov. 1626. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet; the length of the interior is 600 feet, forming one of the most spacious halls ever constructed. The length of the exterior is 669 feet; its greatest breadth within is 442 feet; and the entire height from the ground 432 feet. Renewal of the leaden envelope completed, July, 1884.

PETITIONS. The right of petitioning the crown and parliament for redress of grievances is a fundamental principle of the constitution. Peti-

tions are extant of the date of Edward I. In the reign of Henry IV. petitions began to be addressed to the house of commons in considerable numbers. In 1837 there were presented to parliament 10,831 petitions, signed by 2,905,905 persons; in 1859, 24,386, signed by 2,290,579; in 1867, 12,744, signed by 1,145,216. See *Abhorrens*, and *Rights*.

A petition from Boulogne for a consul was brought in, but not received by the commons. April-May, 1876. PETROLEUM, rock oil or mineral oil similar to paraffin, has been found in many parts of the world, especially at Rangoon. In 1859 and since, a number of oil-springs were discovered in the bituminous coal regions of N. W. Pennsylvania, now termed "Petrolia," and others have been discovered in Ohio and other states, and also in Canada. Numerous artesian wells were sunk, manufactories erected, and an almost unlimited supply obtained; between 1859-77, 2,802,500,000 gallons; in 1863, 8,907,365 gallons. In consequence of the importation of this oil into this country, and many accidents having taken place through its inflammability at low temperature, acts for "the safe keeping of petroleum" were passed, 29 July, 1862; July, 1868, Aug. 1871, and 1879. Petroleum became an awful weapon in the hands of the insurgents in Paris, 23-27 May, 1871. About fifty killed by explosion at a petroleum manufactory near Rheims, 16 July, 1871. The Petroleum Association test petroleum, with the view of preventing the importation of that which is dangerous. Refined petroleum imported: 1872, 5,670,674 gallons; 1877, 33,474,955 gallons; 1881, 58,371,386 gallons. Unrefined and refined: 1882, 59,095,982 gallons; 1883, 70,526,996 gallons; 1884, 52,075,789 gallons; 1885, 73,873,641 gallons; 1886, 71,251,736 gallons; 1887, 77,390,435 gallons. They destroyed the batteries, but failed in taking the Russian frigates, except the *Sitka*, a store-ship taken by the *President*, and a schooner taken by the *Pique*. Admiral Price was killed, it is supposed by the accidental discharge of his own pistol. A party of 700 sailors and marines landed to assault the place, but fell into an ambushade; many were killed, including captain Parker and M. Boursat, English and French officers. The objects of the attack were not attained, it is thought from want of stores. After this the Russians greatly strengthened their defences, but on 30 May, 1855, the allied squadron in the Pacific arriving here found the place deserted. The fortifications were destroyed, but the town was spared. The Russian ships escaped.

PHAROS, of Ptolemy Philadelphus of Alexandria, was esteemed as one of the wonders of the world. It was a tower built of white marble, completed about 283 B.C. On the top there were constantly kept to direct sailors in the way. The building cost 800 talents, which are equivalent to above 165,100*l.* English, if Attic; or, if Alexandrian, double that sum. It is said that here was this inscription upon it—"King Ptolemy to the gods, the saviours, for the benefit of sailors;" but Sostratus, the architect, wishing to claim all the glory, engraved his own name upon the stones, and afterwards filled the hollow with mortar, and wrote the above inscription. PHIPPS' EXPEDITION. The hon. captain Phipps (afterwards lord Mulgrave) sailed for England in command of the *Sea-Horse* and *Carex* ships, to make discoveries, as near as possible to the North Pole. In August 1773, he was for six days environed with barriers of ice, in the Frigid Ocean, north of Spitzbergen, 80° 48' N. lat. If progress or retreat was impossible, and all on board gave themselves up for lost; but a brisk wind two or three days accomplished their deliverance. They returned to England without having made any discoveries, 20 Sept. 1773. Nelson was outswain to the second in command.

PHLOGISTON, a term employed by Stahl to designate the matter or principle of fire; "the inflammable principle" of bishop Watson, nearly close of the 17th century. The chemical theory based upon it, considered to have been totally refuted by Lavoisier, 1790, has been recently revived in a modified form.

PHOCIS, a state in Northern Greece. The Phocians seized Delphi 357 B.C., and commenced the second Sacred War. They were opposed by Thebes and other states, and were utterly subdued by Philip II. of Macedon in 346.

PHENICIA, on the sea coast of Syria. The natives were the most eminent navigators and traders of antiquity; their cities or allied states being Tyre, Sidon, Berytus, Tripoli, Byblos, &c. Ptolemais, or Acre. From the 19th to the 13th centuries before Christ, they established colonies on the shores or isles of the Mediterranean.—Carthage, Hippo, Utica, Gades, Panormus, &c. are said to have visited the British Isles. Phenicia

as conquered by Cyrus, 537 B.C.; by Alexander, 32; by the Romans, 47; and after partaking of the fortunes of Palestine, was added to the Ottoman empire, A.D. 1516.

PHOENIX CLUBS, of a treasonable character, were formed in Ireland in 1858. They met at night to drill. Several persons were arrested and tried in March, 1859, at Tralee; but the jury could not agree on their verdict. Daniel Sullivan was condemned to penal servitude for ten years, April, 1859. Eventually some of the prisoners pleaded guilty, and were discharged on being bound over to keep the peace.

PHONEIDOSCOPE, an instrument for observing the colour-figures of liquid films under the action of sonorous vibrations, being a visible demonstration of the vibratory and molecular motion of a telephone plate; invented by Mr. Sedley Taylor, 1877; manufactured by S. C. Tisley & Co., London, 1878.

PHONOGRAPH, a machine proposed to be attached to pianofortes and other keyed instruments, by which any music that is played may be written down on blank paper, since it rules and prints the notes simultaneously. It was patented by Mr. Fenby, 13 June, 1863. The motive-power is electro-magnetism. Machines with a similar object were projected by Mr. Creed in 1747; Mr. J. F. Unger in 1774; and by Mr. Carreyre in 1827.

A new phonograph by Thomas Elvey Edison, electrician of New Jersey, was announced Dec. 1877. Linear indentations are made by means of a pin in a sheet of tinfoil by speaking or singing; and from these casts may be taken. When these are placed upon the diaphragm of a telephone connected with revolving apparatus, the sounds may be reproduced with a weirdlike effect. Improved by Mr. Shelford Bidwell, 1879. See *Telephone*.

PHONOGRAPHY (from the Greek *phōnē*, sound), suggested by Franklin, 1768. The Phonetic society, whose object was to render our mode of writing and printing more consonant to sound, was established, 1 March, 1843; sir W. C. Trevelyan, president, and Mr. Isaac Pitman, secretary, the latter being the inventor of the system which was made known in 1837. Among other works published by the promoters of the system, was the "Phonetic News," in 1849; see *Visible Speech*.

PHOSPHORESCENCE. The property possessed by some bodies of retaining luminosity after exposure to light observed by the ancients; especially noticed by Vincenzo Cascariolo (1602), Boyle, Canton, Wilson, and others; and specially studied by Edmond Becquerel, and Balmain. See *Luminous Paint*.

PHOSPHORUS was discovered in 1667, by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunkel, a Saxon chemist, about 1670, and by the hon. R. Boyle about the same time. *Now. Dict.* Phosphoric acid is first mentioned in 1743, but is said to have been known earlier. Gahn pointed out its existence in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Phosphoretted hydrogen was discovered by Gengembre in 1812. The consumption of phosphorus has immensely increased since the manufacture of lucifer matches. In 1845, Schrötter, of Vienna, discovered allotropic or amorphous phosphorus, which ignites more slowly and is less unwholesome in working than ordinary phosphorus.

PHOTOGRAPHY. The action of light on chloride of silver was known as early as the 16th century. The phenomenon was studied by Scheele (1777), Senebier (1790), Ritter and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, in the Royal Institution, London, which were published in its Journal, 1802. Wedgwood may be regarded as the first *photographer*. His paper was entitled "an account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of silver."

Further discoveries were made by Niepce in 1814, and sir J. Herschel in 1819.

Louis J. M. Daguerre commenced his experiments in 1824; and in 1826 joined Joseph Nicéphore Niepce, and worked with him till the death of the latter in 1833. The production of *Daguerreotype* plates was announced in Jan. 1839; and the French chamber of deputies granted a pension to Daguerre and to Niepce's son Isidore.

In 1839 Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions by producing a *negative* photograph (i. e., with the light and shades reversed) from which any number of positive copies may be obtained. His patent for producing the *Talbotype* or *Calotype* (on paper) is dated Feb. 1841. In 1851, Collodion (which see) was applied to photography by Mr. F. Archer.

Capt. Abney photographs a disc in rapid motion by the electric spark, 17 March, 1882.

Celestial Photography began with professor Bond, the astronomer, of Cambridge, U.S., who exhibited a photograph of the moon in 1851. Since then, Mr. Warren de la Rue, of London, has produced excellent photographs of the moon, and other heavenly bodies, and on 18 July, 1860, photographed the solar eclipse.

By means of the gelatine dry plate, the results of the astronomical work of years is now obtained in hours. Delicate details are obtained not only of comets, nebulae and faint stars, but also of stars invisible by the most powerful telescopes. Since 1876, Dr. W. Huggins and Mr. Andrew A. Common in England, and Mr. Draper in America, have been eminently successful in celestial photography. About 400 stars have been depicted in the space of two square inches.

PHOTOALVANOGRAPHY, the art of producing engravings by the action of light and electricity. The earliest specimens were produced by Nicéphore Niépce, and presented by him in 1827 to the great botanist, Robert Brown. Great advances have since been made in this art by MM. Niépce de St. Victor (who published a treatise on it in 1856), Vitry, W. R. Grove, H. Fox Talbot, &c. In 1852, Paul Pretsch patented a process which he called "Photovalvanography."

PHOTOZINCIC ENGRAVING (a process by which the light actually etches a picture on a plate that may be and has been printed from) was patented by Mr. Fox Talbot in 1838, and is described and exemplified in the *Photographic News*, 9 and 16 Sept. 1859, a specimen being given in the latter number.

PHOTOZINCOGRAPHY (a process by which photographs are transferred to zinc plates which may be printed from) was devised by sir Henry James, chief of the Ord-

nance Survey, and made known in 1860. By it maps, charts, and engravings may be printed at a small cost. *PHOTO-SCULPTURE*: M. Villème's employment of photographs in the formation of sculpture was announced in 1863.

Messrs. Goupil's process of *Photogravure*, rivaling mezzo-tint, reported highly successful; fine pictures reproduced, Feb. 1884.

PHOTOMETER (light measurer); one was constructed by Dr. W. Ritchie in 1825. Many improvements have been made recently in photometry.

Mr. A. Vernon Harcourt's new holophotometer highly approved June, 1888.

PHOTOPHONE. In this apparatus, constructed by professor Graham Bell and Mr. Sumner Tainter of Washington, in 1880, a thin plane mirror is thrown into vibration by the voice; a beam of light is reflected from this mirror and received at a distance by a cell of the metal selenium; when, by arrangement, this is connected with a telephone, the sounds are reproduced.

PHRYGIA (now Karamania), a province in Asia Minor, became part of the Persian empire in 537 B.C., and partook of its changes. It became a Roman province in 47 B.C., and a Turkish one, A.D. 1392.

PHYLLOXERA, see *Vine*.

PHYSIC appears to have been first practised by the Egyptian priests. Pythagoras endeavoured to explain the philosophy of disease and the action of medicine, about 529 B.C. Hippocrates, the father of medicine, flourished about 422 B.C., and Galen, born A.D. 131, was the oracle of medical science. About 980 Avicenna, an Arab, wrote a system of medicine. Dr. R. Quain's *Dictionary of Medicine*, published 1882. See *Medical*.

The dogmatic age of medicine lasted till the Reformation, when it was attacked by Paracelsus (1493-1541) and Vesalius (1514-84). Since 1800 medical practice has been completely transformed by physiological and chemical research.

The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628. See *Medical and Societies*.

PHYSICIAN TO THE KING.—John, the king's chaplain and physician (afterwards bishop of Bath and Wells), mentioned 1090.

The earliest mandate or warrant for the attendance of a physician at court is dated 1454, and 33 Henry VI., a reign fertile in the patronage which was afforded to practitioners in medicine; but no appointment existed which can justly be called physician to the royal person. By this warrant the king, with the consent of his privy council, deputed to three physicians and two surgeons the regulation of his diet, and the administration of such medicines and remedies as might be sufficient for his cure, without any allusion to the previous existence or permanency of the office which they were authorised for a time to fill, or to a remuneration for their services.—*Life of Lincoln*.

Miss Garrett (afterwards Mrs. Anderson) licensed at Apothecaries' hall, London, to practise medicine, 25 Sept. 1865.

At a meeting of the Royal Medical and Chirurgical Society, 3 May, 1860, it was resolved that the "Royal Society of Medicine" (including the various sections) be founded; the resolution was affirmed, 22 Feb. 1870; but in 1871 the project dropped.

PHYSIC GARDENS. The first cultivated in England was by John Gerard, surgeon of London, in 1567; that at Oxford was endowed by the earl of Danby, in 1652; that at Cambridge was commenced about the middle of the last century; and that at Chelsea, originated by sir Hans Sloane, was given to the Apothecaries' company in 1721; this last was very much admired by the illustrious Linneus.

PHYSICAL SOCIETY, established 14 Feb. 1874; Dr. J. H. Gladstone, first president.

PHYSICIANS, ROYAL COLLEGE OF, of London (of England since 1858), was projected by Dr. Linacre, physician to Henry VIII., who, through his interest with cardinal Wolsey, obtained letters patent, constituting a corporate body of regular physicians in London, with peculiar privileges, 23 Sept. 1518. Linacre was elected the first president of the college. Dr. W. Harvey was a great benefactor to this institution, 1653. He built a library and public hall, which he granted for ever to the college, with his books and instruments. The college was afterwards held in a building in Warwick-lane, erected by sir C. Wren, where it continued till 1825, when the present elegant stone edifice in Trafalgar-square was erected from designs by sir R. Smirke.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. The Royal College of Physicians, Edinburgh, 29 Nov. 1681.

PHYSICS, see under *Philosophy*.

PHYSIOGNOMY, a science which affirms that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle; and Cicero was attached to the science. It became a fashionable study from the beginning of the 16th century; and in the last century, the essays of Le Cat and Parnethy led to the modern system. Lavater's researches in the pursuit arose from his having been struck with the singular countenance of a soldier who passed under a window at which he and Zimmerman were standing; his "Fragment" on this subject appeared in 1776.

PHYSIOLOGY is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Müller, Milne-Edwards, Huxley, and Carpenter are much celebrated, and Todd's "Cyclopædia of Physiology" (1836-59) is a library in itself. Physiological Society, in London, founded by Dr. Burdon-Sanderson and others, early in 1876; see *Royal Institution*.

PIACENZA, see *Piacentia*.

PIANETTE, a small upright piano introduced by Bord of Paris in 1857.

PIANOFORTE.* The invention is attributed to Cristofalli (or Cristofori), an Italian, J. C. Schröter, a German, and Marius, a Frenchman, early in the 18th century. The strings are struck by small hammers, and not by quills, as in harpichords. Schröter is said to have presented a model of his invention to the court of Saxony, in 1717; and G. Silberman manufactured pianofortes with considerable success in 1772. Pianofortes were made in London by M. Zumpe, a German, 1766, and have been since greatly improved by Clementi, Broadwood, Collard, Kirkman, Erard, Pleyel, and others.

Upright pianos, first made in this country, were suggested by Isaac Hawkins in 1800, and Thomas Loud, in 1802. Wm. Southwell patented "cabinet pianos" in 1807; superseded, from about 1840, by the cottage, piccolo, and other pianos.

A keyed instrument at Modena was named "piano e forte," 1598.

A "stone pianoforte," formed of a series of flints and other stones of various sizes, collected in France and arranged by M. Baudre, was played on by him at the Royal Institution, on 16 March, 1866.

See Grove's "Dictionary of Music," article "Pianoforte."

PICARDY (N. France), was conquered by the English in 1346, and by the duke of Burgundy in 1417, to whom it was ceded by the treaty of Arras, 21 Sept. 1435, and annexed to France by Louis XI., 1463.

PICCADILLY, a fine street, W. London; the name, of uncertain origin, was Pickadilla and Pidgello, about 1660, when a house of entertain-

* The nucleus of the instrument was a little box over which was stretched strings: such was the citole, the dulcimer, and the psalter. The clavitherium had keys; the clavichord (about 1500) had dampers; successive improvements were the virginals (on which queen Elizabeth played), the spinet (about 1700), and the harpsichord (with two rows of keys), said to have been used in the 15th century, for which Bach and Handel composed in the 17th century. A collection of harpsichords (one dated 1555) is in the South Kensington museum. A double-pianoforte (with two keyboards reversed), giving remarkable effects (patented by M. M. Mengoet), played on at Covent-garden theatre, 21 Oct. 1878.

ment existed near the Haymarket, termed Pickadilly hall, after which buildings were gradually extended westwards.

PICCOLO, a small piano introduced by Robert Wornum in 1829.

PICENTINES, a Sabine tribe, subdued by the Romans, and their capital, Asculum, taken, 268 B.C. They began the Social war in 90, and were conquered in 89 B.C.

PICHEGRU'S CONSPIRACY, see *Georges*, &c.

PICKETING, see *Trials*, Aug. 1867.

R. Read and four other cabinetmakers imprisoned for picketing May, 1875

PICQUET, a game with cards, invented, it is said, by Joquemin, for the amusement of Charles VI. of France, then in feeble health, 1390. *Mézeray*.

PICTS (from *Picti*, painted), Scythians, who landed in Scotland much about the time that the Scots began to seize upon the Hebrides, or Western Isles (Hebudes). They afterwards lived as two distinct nations, the Scots in the highlands and isles, and the Picts in that part now called the lowlands. Between 838 and 842, the Scots under Kenneth II. totally subdued the Picts, and seized all their kingdom. Their incursions in England led to the Saxon invasion; see *Roman Wall*.

PICTURES, see *Painting*.

PIEDMONT (*Pedemontium*, Latin, foot of the mountains), a region in N. Italy, formerly the seat of government of the kingdom of Sardinia, which see, and *Savoy*.

PIE-POUDRE COURT, the Court of Dusty Foot, whose jurisdiction was established for cases arising at fairs and markets, to do justice to the buyer and seller immediately upon the spot. By stat. 17 Edw. IV., it had cognizance of all disputes in the precincts of the market to which it might belong, 1477.

PIER AND HARBOUR ACT, to facilitate the formation, management, and maintenance of piers and harbours in Great Britain and Ireland, was passed in 1862.

PIETISTS, a Lutheran sect, instituted in Leipsic, by Philip James Spener, a professor of theology, about 1689, with the view of reforming the popular religion. He established "colleges of pietists," with preachers resembling those of the society of friends and the methodists in Britain, about 1760. A body resembling the Pietists, named Chasidim, arose among the Jews in the Ukraine, and spread through Poland and European Turkey.

PIETRO BARSANTI CLUB, see *Italy*, 1878.

PIEZOMETER (Greek *piezo*, I compress), an apparatus for measuring the compressibility of liquids, invented by Ersted (died 1851); improved by Despretz & Saigey.

PIGEONS were employed as carriers by the ancients. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. The pigeons of Aleppo served as couriers at Alexandretta and Bagdad. Thirty-two pigeons liberated from London at 7 o'clock in the morning, 22 Nov. 1819; at noon one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day. *Phillips*. At a pigeon race, 25 July, 1872, from Spalding to London, the speed allowed was 90 seconds a mile; see *Post Office*, 1870.

In a pigeon race from Dover to Plymouth, some pigeons attained the velocity of 1,233 yards, 1,218 yards, and 1,008 yards per minute 22 July, 1886. About 300 pigeon-flying societies exist in France: the organization of carrier-pigeon stations ordered by the minister of war, Jan. 1888. About 350 similar societies exist in Germany, stated Jan. 1888.

National Peristeric Society (originating from the Columbarian Society, founded in 1790), has annual bills. A bill for prohibiting shooting pigeons rising from a trap, attended with cruelties, passed by the commons with large majorities, in 1883 and 1884 (195-4 and 195-4) but rejected by the lords in 1883 (30-17), and on 7 May, 1884 (78-48).

PILCHARD FISHERY. Peculiar to Lizard End, Cornwall, reverts to W. Ireland, after suspension of two centuries (stated July, 1883).

PILGRIMAGE OF GRACE, a name assumed by religious insurgents in the north of England, who opposed the dissolution of the monasteries. The movement, which commenced in Lincolnshire in Sept. 1536, was suppressed in Oct.; but soon after revived in Yorkshire; and an expedition bearing the foregoing name, having banners on which were depicted the five wounds of Christ, was headed by Aake, and other gentlemen, and joined by priests and 40,000 men of York, Durham, Lancaster, and other counties. They took Hull and York, with smaller towns. The duke of Norfolk marched against them, and by making terms dispersed them. Early in 1537 they again took arms but were promptly suppressed, and the leaders, several abbots, and many others, were executed.

PILGRIMAGES began with the pilgrimage of the empress Helena to Jerusalem, 326. They became very frequent at the close of the 10th century. Robert II. of France made several pilgrimages; among others one to Rome about the year 1025, perhaps in 1020, when he refused the imperial dignity and the kingdom of Italy. The pilgrimages to Canterbury is described by Chaucer in his *Canterbury Tales* about 1383. The pilgrimage of Mahometans to Mecca, the birth-place of the prophet, is commanded in the Koran. Pilgrimages to shrines of the Virgin Mary in France revived in 1873, and since, in consequence of miracles alleged to have taken place at La Salette in 1846 and at Lourdes, 11 Feb. 1858; those of La Salette discredited by Pope Leo X., 1879. See *Sacred Heart*.

100 American pilgrims received by the pope 9 June, 1879. About 100 agricultural labourers (locked out for being unionists) traversed England as pilgrims, receiving hospitality and money; beginning 30 June, at *St. Edmund*. English R.C. pilgrimage to shrine of St. Edmund, archbishop of Canterbury, at Pontigny. Sept. English pilgrimage to Lourdes directed by the "Catholic Union of Great Britain," start proposed: given up Aug. 1879.

[See *Boulogne*.]

PILGRIM FATHERS, the name given in North America to a party of 74 English puritans and 28 women, members of John Robinson's church, who sailed in the *May Flower* from Leyden to North America, and landed on Plymouth Rock, where they founded a colony, 25 Dec. 1620.

"**PILGRIM'S PROGRESS FROM THIS WORLD TO THAT WHICH IS TO COME**," written by John Bunyan, in Bedford gaol, where he was imprisoned twelve years, 1660-72. The first part was published in 1678. A Hebrew version appeared in 1851; see *Bedford*.

PILLAR SAINTS, see *Monachism*.

PILLORY, a scaffold for persons to stand on, to render them publicly infamous. This punish-

ment was awarded against persons convicted of forgery, perjury, libelling, &c. In some cases the head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears were cut off. There is a statute of the pillory, 41 Hen. III. 1256. Many persons died in the pillory by being struck with stones by the mob, and pelted with rotten eggs and putrid offal. It was abolished as a punishment except for perjury, 1815, and totally abolished in 1837. The last who suffered at the Old Bailey was Peter Jas. Bossy, for perjury, 24 June, 1830.

PILNITZ (near Dresden, Saxony). The convention of Pilnitz took place between the emperor Leopold and the king of Prussia, 20 July, 1791. On 27 Aug. the treaty of Pilnitz, or, as some style it, the Partition treaty, was finally agreed upon at Pavia by the courts in concert. It was to the effect "that the emperor should retake all that Louis XIV. had conquered in the Austrian Netherlands, and uniting these provinces to the Netherlands, give them to his serene highness the elector palatine, to be added to the palatinate; Bavaria to be added to the Austrian possessions," &c.

PILOT. The act relating to pilots, 16 & 17 Vict. c. 129 (1853), with other acts, is embodied in the Merchant Shipping act; see *Trinity-House*.

PILPAY, see *Fables*.

PIMLICO, S.W. suburb of London, belonging to the Grosvenor family, who have built largely upon it since 1830.

On 20 Dec. 1881, Georgina Moore, 7½ years old, living with her parents in Winchester-street, disappeared; her body was found by bargemen in the Midway, near Yalding, 30 Jan. 1882. Esther Pay, with whom she was last seen, accused of her murder, was acquitted, 29 April, 1882.

Pimlico poisoning case. See *Trials*, April, 1886.

PINCHBECK, an alloy of 25 per cent. of zinc, and 75 copper, used for watch-cases, &c., named after Mr. Christopher Pinchbeck, a tinseller in Cockburn-street, London, who died March, 1783.

PINE-TREES. The stone pine (*Pinus Pinea*), brought to these countries before 1548. The cluster pine (*Pinus Pinaster*), brought from the south of Europe before 1596. The Weymouth pine (*Pinus Strobus*), from North America, 1705. Frankincense pine (*Pinus Teda*), from North America, before 1713. There are other varieties.

PINKEY (near Edinburgh), where the English under the Earl of Hertford, protector, totally defeated the Scots under the regent Arran, 10 Sept. 1547. There fell not 200 of the English, but above 10,000 of the Scots. Above 1500 were taken prisoners.

PINS have been found in British barrows (*Fos-broke*); and are mentioned in a statute of 1483. Brass pins were brought from France in 1540, and first used in England, it is said, by Catherine Howard, queen of Henry VIII. Pins were made in England in 1543. *Slow*. They were first manufactured by machinery in England in 1824, under a patent of Lemuel Wellman Wright, of the United States.

PIOMBINO, a principality, Italy, previously ruled by the Appiani family, was acquired by the Spaniards, 1589. It was ceded to France, 1801, and given by Napoleon to his sister Elise, wife of prince Bacciochi, who held it from 1805 to 1815, when it was restored to the Buoncampagni family, subject to Tuscany. It became part of the kingdom of Italy, 1860.

PIPE ROLL SOCIETY, founded in 1884

for printing all extant public records prior to the year A.D. 1200.

PIRACY was severely suppressed by the Romans. Pompey destroyed the Cilician pirates, 67 B.C.; see *Buccaneers*. Many acts of parliament have been passed for the suppression of piracy; the latest in 1837.

PIRÆUS, the port of Athens, was united to the city by two long walls, one erected by Themistocles, and the other by Pericles, 456 B.C., which were destroyed by Lysander, 404 B.C. It was fortified by Conon, 393 B.C. The Piræus was able to contain 400 Greek vessels. It was occupied by the French during the Russian war in 1854.

PIRMASENS (Bavaria). Here Moreau and the French were defeated by the duke of Brunswick and the Prussians, 14 Sept. 1793.

PISA, an ancient city in Tuscany, was founded about six centuries before Christ, and was favoured by the early Roman emperors as a flourishing republic. The citizens took an active part in the Italian wars of the middle ages, but became subject to Florence, after a long siege, 1405-6. In 1494 Pisa became independent under the protection of Charles VIII. of France, but was retaken by the Florentines in 1509. The university was founded in 1343, and revived by the Medici in 1472 and 1542. The rival popes, Benedict XIII. and Gregory XII., were deposed at a council held at Pisa in 1409, and Alexander V. elected in their room. The Campanile or leaning tower was built about 1154,* and the Campo Santo about the same time.

PISCICULTURE, see *Fisheries*.

PISTOLS, the smallest fire-arms, said to have been invented at Pistoia in Italy; were first used by the cavalry of England about 1544. Of late years they have been made with a revolving cylindrical breech, in which are formed several chambers for receiving cartridges, and bringing them in succession into a line with the barrel ready for firing. The earliest model of this kind of arm is to be found in the museum of the United Service Institution, and is supposed to date from the reign of Charles I. An eight-chambered matchlock revolver of the 16th century is placed in the Royal Artillery Museum, Woolwich. The manufacture of pistols by machinery was first introduced into England from the United States, America, in the year 1853, by col. Colt, who invented the Colt revolving pistol, 1851. This system of manufacture induced the British government to establish the Enfield armoury, in 1855; see *Fire-Arms*.

PIT BROW WOMEN, see *Coal*, 23 June, 1887.

PITCAIRN'S ISLAND, in the Pacific Ocean, said to have been discovered by Pitcairn in 1768, seen by Cook in 1773, and since colonised by ten mutineers from the ship *Bounty*, captain Bligh, in 1789; see *Bounty*.

The mutineers remained unknown to England until discovered accidentally in 1814. A ship nearing the island was hailed by a swarthy youth in the English

* The Campanile was erected to contain bells, and stands in a square close to the cathedral. It is built entirely of white marble, and is a cylinder of eight stories, each adorned with a round of columns, rising one above another. It inclines so far on one side from the perpendicular, that in dropping a plummet from the top, which is 188 feet in height, it falls sixteen feet from the base. Some thought this was done purposely by the architect; others attributed it to an accidental subsidence of the foundation. From this tower Galileo made his observation on gravitation (about 1635).

language, when it appeared that the mutineers, soon after settling there, had married some black women from a neighbouring island, and had become a well-conducted community under the care of Adams, the principal mutineer. He died in 1829, when George Hunn Nobbs, an Englishman, who arrived a few years before, became chief. In Aug. 1852 admiral Moresby spent a few days on the island. By his means Nobbs was sent to England and obtained ordination. His death (aged 86) announced Jan. 1885. As their numbers increased, the island proved incapable of their support. The English government removed them, with all their property, in the ship *Morayshire*, on 3 May, 1856, and landed them, after a boisterous passage, on Norfolk Island, prepared previously for their reception, 8 June. The government stocked Norfolk Island with 2000 sheep, 450 head of cattle, and twenty horses, and gave them stores to last twelve months; their numbers were 96 males and 102 females. The island visited by H.M.S. *Peterel* was found to be prosperous, Dec. 1875; 86 inhabitants, 2 Mar. 1878; 93, 15 Aug. 1879; 130 in 1884.

PITCH, see under *MUSIC*.

PITTSBURG LANDING (near Corinth, Tennessee). On Sunday, 6 April, 1862, a great battle was fought between the American federals under Grant and Prentiss, and the confederates under Albert Sydney Johnston and Beauregard. The latter began the attack and were victorious, but lost their able general Johnston. The federals were reinforced the next day and renewed the attack; the confederates maintained their ground; but soon after retired in good order to Corinth. This engagement is also named the battle of Shiloh.

PLACENTIA (now Piacenza), N. Italy, founded by the Romans about 230 B.C. It suffered in all the convulsions attending the fall of the empire, and the wars of the middle ages. In 1254 it fell under the rule of the family of the Scotti. In 1302 Alberto Scotti was overcome, and Placentia was united to Milan, then ruled by the Visconti. On their extinction in 1447, Placentia revolted, but was taken by Sforza duke of Milan, and treated very cruelly. In 1513 it was given to pope Leo X. In 1545, Paul III. gave it with Parma as a duchy to his son Peter Louis Farnese. The French and Spaniards were defeated by the Austrians and Sardinians near Placentia, 16 June, 1746; see *Parma*.

PLAGUE. The plagues of Egypt (1491 B.C.) are described in *Exodus* ix., &c. The first recorded general plague in all parts of the world occurred 767 B.C. *Petavius*. At Carthage a plague was so terrible that people sacrificed their children to appease the gods, 534 B.C. *Baronius*. At Rome a desolating plague prevailed, 453 B.C. The devastating plague at Athens, which spread into Egypt and Ethiopia, 430 B.C., is admirably described by *Thucydides*. Another which raged in the Greek islands, Egypt, and Syria, destroyed 2000 persons every day, 187 B.C. *Pliny*. See *Cattle*.

At Rome, a most awful plague; 10,000 persons perished daily, A.D. 80.

Again ravaged the Roman empire, 167, 169, 189.

Another in the Roman empire. For some time 5000 persons died daily at Rome; many towns entirely depopulated, 250-265.

In Britain, a plague swept away such multitudes that the living were scarcely sufficient to bury the dead, 430.

A long-continued dreadful one began in Europe in 558, extended all over Asia and Africa.

At Constantinople, when 200,000 of its inhabitants perished, and in Calabria, Sicily, and Greece, 746-749.

THE GREAT PLAGUE OF LONDON, began Dec. 1664, which carried off 68,596 persons; some say 100,000. Fires were kept up night and day to purify the air for three days; and it was thought the infection was not totally destroyed till the great conflagration of Sept. 1666.

[Graphically described by De Foe in his partially imaginative *History of the Plague*.]

The cholera again visited England, &c. 1848 and 1849 (see *Cholera*).

PLAN OF CAMPAIGN, see *Ireland* Oct. 1886. Condemned by the Pope, 20 April, 1888.

PLANE. A true plane, so important in machinery, has been most successfully obtained by sir Joseph Whitworth. Fine specimens were exhibited at the Royal Institution in 1873.

PLANETARIUM, see *Orrery*.

PLANETS. Jupiter was known as a planet to the Chinese and the Chaldeans, and inserted in a chart of the heavens, made about 600 B.C., and in which 1460 stars are accurately described; this chart is said to be in the national library at Paris. The four satellites of Jupiter discovered by Galileo, 7 Jan. 1601, see *Mars, Saturn*. We now know nine primary planets, termed major; *Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune*, and *Vulcan* (doubtful); and, secondary or minor, situated between the orbits of Mars and Jupiter. The numerical order differs in the lists of English, German, and French astronomers. In the French and German lists, *Aglaia* to *Pandora* are numbered 47 to 55; *Meletè* is 56.

Uranus, formerly called *Georgium Sidus* and *Herschel*; discovered by W. Herschel (see *Georgium Sidus*) 13 March, 1781.

Neptune, discovered by Galle (in consequence of the

calculations of Le Verrier and Adams) (see *Neptune*) 23 Sept. 1846.

Vulcan (between Mercury and the Sun), said to be discovered by M. Lescaubault, a physician (not seen since), 26 March, 1859; said to have been seen by Watson during the solar eclipse (doubted by Peters) 29, 30 July, 1878.

A red star seen by M. Trouvelot during the solar eclipse, most probably Vulcan 6 May, 1883.

PLANIMETER, a machine for measuring the area of any figure by the passage of a tracer round about its perimeter. *Amster's* planimeter (in use for several years) was described at the British Association meeting at Brighton, Aug. 1872.

PLANING-MACHINE. One for wood was constructed by Bramah, about 1802; and one for iron by Joseph Clement in 1825.

PLANTAGENET, * **HOUSE OF**, to which belonged fourteen English kings, from Henry II. 1154, to Richard III. killed at the battle of Bosworth, 1485; see *England, Kings*.

PLANTATIONS, see *Trade*.

PLASSEY, in Bengal, India, the site of a battle fought between the British under Clive, and the Hindoos under Surajah Dowlah, 23 June, 1757. The nabob, although at the head of about 68,000 men, was vanquished by 1000 British and about 2000 sepoys. The victory laid the foundation of our empire in India; see *India*.

PLASTER OF PARIS. Gypsum, sulphate of lime, used for moulds, statuary, &c., first found at

* Fulke Martel, earl of Anjou, having contrived the death of his nephew, the earl of Brittany, in order to succeed to the earldom, his confessor sent him, in atonement for the murder, to Jerusalem, attended by only two servants, one of whom was to lead him by a halter to the Holy Sepulchre, the other to strip and whip him there, like a common malefactor. Broom, in French *genêt*, in Latin *genista*, being the only tough, pliant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement he was called *Planta-genista*, or Plantagenet; other accounts are given. *Skinner* and *Mézray*.

Montmartre, near Paris, whence its name. The method of taking likenesses by its use was first discovered by Andrea del Verrochio, about 1466.

PLATA, *LA*, see *Argentine Republic*.

PLATÆA (Borotia, N. Greece), site of the battle between Mardonius, commander of the army of Xerxes of Persia, and Pausanias, commander of the Lacedæmonians and Athenians, 22 Sept. 479 B.C.; the same day as the battle of Mycale. Of 300,000 Persians scarce 3000 escaped with their lives. The Grecian army, about 110,000, lost but few men. The Greeks obtained immense plunder, and were henceforth delivered from the fear of Persian invasions. Platæa, as an ally of Athens, was destroyed by the Thebans, 372; and rebuilt by Philip II. after his victory at Chæronea, 338.

PLATE. In England, plate, with the exception of spoons, was prohibited in public-houses by statute 8 Will. III. (1696). The celebrated Plate act passed in May, 1756. This act was repealed in 1780. The act laying a stamp-duty upon plate passed in 1784; see *Goldsmiths' Company*. By 17 & 18 Vict. c. 96 (1854), gold wares were allowed to be manufactured at a lower standard; but a later act excepted marriage rings.—The art of covering baser metals with a thin plate of silver, either for use or for ornament (**PLATING**), said to have been invented by a Birmingham spur-maker, who began with making the branches of a pair of spurs hollow, and filling the hollow with a slender rod of steel. He continued to make the hollow larger and the iron thicker, till at last he merely coated the iron spur with silver; see *Electrotype*.

Mr. Wilfred Joseph Cripps' "Old English Plate," a valuable work, containing the researches of Mr. O. Morgan, published, 1878. His "Old French Plate," 1880. Duty on silver plate to be reduced gradually till abolished, from 1 June, 1881.

PLATE-WAYS, on ordinary roads for waggons carrying goods, proposed at Liverpool about 1880, to supersede railways for cheapness; not adopted, Jan. 1883.

PLATINUM, the heaviest of all the metals, except iridium. The name originated with the Spaniards on account of its silvery colour; *Plata* signifying silver. It was found in the auriferous sand of the river Pinto, in South America, and was unknown in Europe until 1741, when don Antonio Ulloa announced its existence in the narrative of his voyage to Peru. *Greig*. In its ore have been found the metals palladium, rhodium, osmium, iridium, and ruthenium (*which see*). In 1859, M. H. Ste.-Claire Deville made known a new method of obtaining platinum from its ore, in great abundance and purity; and at the international exhibition of 1862 was shown a mass worth 3840*l.*, weighing 266½ lb., of a metal hitherto considered infusible, obtained by his process, employing the oxy-hydrogen flame. See *Philosophical Lamp*.

Dodé's process for coating iron with platinum to prevent rust, shown at Johnson & Matthey's, 11 Jan. 1879.

PLATONIC PHILOSOPHY, the most popular of all systems (see *Philosophy*). Plato's dialogues have been termed "Philosophy backed by example." He was a disciple of Socrates, 409 B.C., and died 347. The leading feature of his mind was comprehensiveness.

PLATONIC YEAR, the period of time which the equinoxes take to finish their revolution, at the end of which the stars and constellations have the same place with regard to the equinoxes that they had at first. Tycho Brahe says that this year or

period requires 25,816 common years to complete it; Ricciolus computes it at 25,920; and Cassini at 24,800; at the end of which time some imagined that there would be a total and natural renovation of the whole creation.

PLATTSBURG. A British expedition against this place, a town of New York, on Lake Champlain, was designed under general sir George Prevost, but was abandoned after the naval force of England had suffered a defeat in an engagement with the Americans, 11 Sept. 1814, when the British squadron in Lake Champlain was captured; see *United States*.

PLAY-GROUNDS. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the marquis of Westminster and others; and in 1859 an act of parliament was passed to facilitate grants of lands for this purpose, for which part of Smithfield was to be reserved. The scheme was not successful.

The Metropolitan Public Garden, Boulevard, and Play-ground association formed by lord Brabazon (aft. earl of Meath) and others in 1882 has done good service in the east of London.

PLAYS, see *Drama and Theatres*.

PLEADINGS. Clothaire held a kind of movable parliament called *placita* whence came the word *pleas*, A.D. 616. *Hénault*. In the early courts of judicature in England, pleadings were made in the Saxon language in 786; and in Norman-French from the period of the conquest in 1066 until 1362. Pleadings were ordered to be in English by 36 Edward III. 1362, and Cromwell extended the rule to all legal proceedings 1650. In English law the proceedings are the mutual statements of the plaintiff's cause of action, and the defendant's ground of defence.

PLEBEIANS, Plebes, the citizens of Rome, as distinguished from the Patricians; see *Rome*, 494-366 B.C.

PLEBISCITUM, a term given to a law passed by the *comitia tributa*, an assembly of the Roman people in their tribes, first established in 491 B.C. The term has been recently revived in France and Italy, and applied to *Universal Suffrage* (which see).

PLETHYSMOGRAPH, an apparatus for detecting the state of the mind by observing the relations of the circulation of the blood from the heart to the brain, invented by M. Moissol, of Turin, 1882.

PLEVNA, Bulgaria, 27 miles N.N.W. of Nicopolis; near the river Vid; the site of very fierce conflicts during the Russo-Turkish war, 1877.

Occupied by the Russians, 6 July, but retaken by Osman Pacha, 18 July, and held by him after severe combats, with Schildner-Schuldner, 19, 20 July; with Krudener . . . 29-31 July, 1877. The Russians lost about 2000 killed, 4000 wounded. The Russian attack was considered rash, like that at Balaklava, and a disastrous check. Osman Pacha defeated in a desperate sortie, about

PLOTS, see *Conspiracies, and Rebellions*.

PLOUGH. "Thou shalt not plough with an ox and an ass together." *Deut.* xxii. 10 (1451 B.C.). The Roman plough is minutely described by Virgil, about 31 B.C. Engines to plough grounds, whether inland or upland, were patented by David Ramsay and Thomas Wildgoose, in 1618; and many improvements in ploughs have been patented since. The application of steam power to ploughing was patented by John Upton in 1837, and by others since, more especially by lord Willoughby D'Eresby, the marquis of Tweeddale, and the earl of Caithness; see *Steam-Plough*.

International trial of ploughs, &c. at Haarlem: prizes won by English makers (Howards, Ransomes, &c.), 17-19 Sept. 1879.

PLOUGH MONDAY, in January, the first Monday after the Epiphany. It received the appellation from its having been fixed upon by our forefathers as the day upon which they returned to the duties of agriculture after enjoying the festivities of Christmas. *Ashe*. On Plough Monday, too, the ploughmen of the north country used to draw a plough from door to door and beg plough money to drink. *Bailey*.

PLUM. We have two native plums; our finer kinds came from Italy and Flanders about 1522. The *Diospyros Lotus*, the date plum, was brought from Barbary, before 1596; the Pishamin plum, *Diospyros virginiana*, from America, before 1629. Formerly damsons, apricots, and peaches went by this name, as raisins do to this day.

PLUMBAGO, see *Graphite*.

PLURALITIES. Clergymen have been restrained from holding more than one benefice by several statutes; the first being 21 Henry VIII. 1529. In 1838 an act was passed prohibiting the holding of more than two benefices except they were at a distance less than ten miles; and the law on this subject was still further amended in 1850, 1855, and 1885, provisions being made for the amalgamation of neighbouring benefices.

PLURAL NUMBER, see *We*.

PLUS (+) AND MINUS (-). Professor De Morgan attributes these signs to either Christopher Rudolf, who published a book on algebra about 1522, or Michael Stifelius, about 1544.

PLYMOUTH, a fortified seaport in Devonshire, originally Sutton, was incorporated as Plymouth in 1439. It was in 1588 the rendezvous of the English fleet of 120 sail under Howard, Drake, &c., which pursued the Spanish armada. The fine hotel and assembly-rooms were burnt 6 Jan. 1863; loss about 50,000*l*. The National Association for Social Science met here, Sept. 1872. See *Armada*, 1888, *Breakwater*, *Dock-yards*, and *Population*.

PLYMOUTH BRETHREN, a body of Christians calling themselves "the Brethren," first

appeared at Plymouth about 1830. In 1851 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to other dissenters as too sectarian. They receive into communion all who confess Christ, and own the Holy Ghost as his vicar. Their doctrines agree with those of most evangelical protestant churches, but they recognise no order of ministers. Mr. Darby, regarded as their founder, afterwards separated from them with some adherents.

PNEUMATIC DESPATCH COMPANY, to convey letters and parcels through tubes by means of atmospheric pressure and a vacuum. The company's act was passed 13 Aug. 1859, and tubes were laid down in Threadneedle-street on 12 Sept. 1860; and on 20 Aug. 1861, successful experiments were performed at Battersea. In 1862 tubes were laid down from the Euston railway station to the N. W. post-office in Camden-town, and on 21 Feb. 1863, the conveyance of the mail-bags began. In Oct. 1865, tubes had been laid down between Euston railway and Holborn; and on 7 Nov. several persons travelled in them. Engineer, Mr. Rammell. The company stopped through insufficient support, 1876. A pneumatic tube by Siemens, employed to transmit telegraphic messages, began about Jan. 1871.

POET-LAUREAT. Selden could not trace the precise origin of this office.

Warton, in his *History of English Poetry*, states that in the reign of Henry III. there was a *Versificator Regis*, to whom an annual stipend was first paid of one hundred shillings.

Chaucer, on his return from abroad, assumed the title of poet-laureat; and in the twelfth year of Richard II., 1380, he obtained a grant of an annual allowance of wine.

In the reign of Edward IV., John Kay was laureat. Andrew Bernard was laureat, temp. Henry VII.; and John Skelton, temp. Henry VIII.

James I. in 1615, granted to his laureat a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 100*l.* per annum, with an additional grant of one tierce of Canary Spanish wine to be taken out of the king's store of wine yearly. We believe that on Southey's appointment the tierce of Canary wine was commuted for 2*l.*

Laurence Eusden commenced a series of Birth-Day and New Year's Odes, which continued till the death of Pyc, in 1813.

On the death of Warton its abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850—"This is the best time for not filling up the office, when the prince is a man of virtue, and the poet just departed was a man of genius."

POISONING. A number of Roman ladies formed a conspiracy and poisoned their husbands. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there are some remarkable instances), 23 Henry VIII. 1531; see *Boiling to death*. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law regarding the sale of arsenic difficult (14 Vict. c. 13, 6 June, 1851). The sale of poison is now regulated by the Pharmacy act of 1868. Additional restrictions enacted by act passed in 1885. The *Poisoned Grain Prohibition Act* was passed 28 July, 1863.

A deadly poison freely administered by Italians in the seventeenth century, was called *aqua tofana*, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but, on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was thrown into a ferment, and many fled, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution of crystallised arsenic.

Between 1666 and 1676, the marchioness de Brinvilliers poisoned her father and two brothers and many others. She was executed, 16 July, 1676.

Nov. 1858, 17 persons died at Bradford through eating sweetmeats in which arsenic had been mixed by mistake. Mr. Hodgson, a chemist, was tried for homicide, and acquitted.

Weltmann, a bookbinder at Posen, poisoned 4 wives and 2 children, about 1859.

Christiana Edmunds, of Brighton, was convicted of murdering a child by poisoned sweetmeats; other persons barely escaped (sentence remitted on the ground of insanity), 16 Jan. 1872.

Mad. Van Der Linden convicted of many poisonings at Leyden, 3 May, 1885.

Albert Pei poisoned mother, wife, mistress and others, 1872, & seq.; convicted at Paris 13 June; penal servitude 14 Aug. 1885.

Mrs. Maybrick charged with the murder of her husband James Maybrick by poisoning with arsenic, 6 June, 1889; she was tried before Mr. Justice Stephen at Liverpool, and convicted 31 July—7 Aug. 1889.

On 22 Feb. 1846, an Austrian force under general Collin, which had entered Cracow on the approach of armed bands of peasantry, was attacked and driven out of the town. A provisional government was then proclaimed by the insurgents, and two days afterwards they crossed the Vistula, expecting to be joined by the peasantry of Galicia, who were solicited by the nobles and clergy to strike a blow in the cause of liberty. The Austrian government, in order to prevent this junction, excited in the peasantry a suspicion of the motives of the nobles, and offered a reward for every noble delivered up, alive or dead; a general massacre of the nobility and clergy in the circle of Tarnow followed; the insurgents from Cracow were defeated at Gdow, where they retreated to Podgorze, a suburb of Cracow; but they were attacked by general Collin, and driven out of Cracow on the 27th of February. The forces of the nobles then began to concentrate on Cracow; the powers in the town opened negotiations with the Austrians for a surrender, and while these were going on a Russian corps entered the town without resistance, and afterwards the revolution was at an end.

POLICIES OF ASSURANCE ACT, passed 20 Aug. 1867; see *Insurance*.

POLITICAL ECONOMY, the science which has for its object the improvement of the condition of mankind, and the promotion of civilisation, wealth, and happiness. Its history in this country may be dated from the publication of Dr. Adam Smith's "Wealth of Nations," 1776. The works of Mill, McCulloch, and Fawcett are celebrated. A professorship of Political Economy was established at Oxford by Mr. Henry Drummond, M.P., 1825; and at Cambridge, first by Mr. G. Pryme, in 1828; but regularly established by the university in 1863, Henry Fawcett (blind) being the first professor.

Archbishop Whately endowed a professorship at Trinity College, Dublin; Isaac Butt first professor 1832
 The Political Economy Club, London, founded in 1821, by Thos. Tooke and others, to propagate free trade principles, kept the hundredth anniversary of the publication of Smith's "Wealth of Nations" 31 May, 1876

POLITICAL OFFICES PENSIONS ACT passed 9 Aug. 1869.

POLITICAL UNIONS were formed in England in 1831 to carry the Reform Bill; the most important was that of Birmingham.

POLITICIANS. A politician is described as a man well versed in policy, or the well regulating and governing of a state or kingdom; a wise and cunning man. A man of artifice; one of deep contrivance. *South*. The term was first used in France about 1569. A new faction appeared, known by the name of Politicians, headed by the duc d'Alençon and the Montmorencies, and strengthened by the accession of the Huguenots in 1574. The duke was arrested and the Montmorencies sent to the Bastille.

POLKA, a dance said to have been invented between 1830 and 1834 in Bohemia, and to have obtained its name in Prague in 1835. It became very popular, and was introduced into England about 1844.

POLL ACT passed in Ireland by the Junto of the Pale, putting a price upon the heads of certain Irish; the earl of Desmond being then deputy, 5 Edward IV. 1465. This act long endured, see *Ireland*, 1465.

POLLENTIA (Piedmont, N. Italy), the site of a great victory of Stilicho, the Imperial general, over Alaric the Goth, 29 March, 403.

POLL-TAX or CAPITATION TAX, existed among the ancient Romans. It was first levied in England in 1380; and occasioned the rebellion of Wat Tyler (see *Tyler*), 1381. It was again levied in 1513. By the 18th Charles II. every subject was assessed by the head, viz., a duke 100l., a marquis 80l., a baronet 30l., a knight 20l., an esquire 10l., and every single private person 12d., 1667. This grievous impost was abolished by William III. 1689.

POLLUTION OF RIVERS, see *Rivers*.

POLO, the game of ball termed hockey played on horseback, became popular in England in 1872, having been introduced from India. Games were played by lancers and life-guards at Woolwich, 16, 19 July, 1872. A polo club was formed, and international contests held; at Brighton one opened 3 Aug. 1878. Polo is said to have been an old Russian game, mentioned 1492 under the name of Chügän, as brought from Persia.

POLOTSK (Russia). The French under marshal Oudinot were here defeated by the Russians under general Wittgenstein, 30 and 31 July, 1812; the next day, the Russians were defeated. After several smaller actions with various results, Polotsk was stormed by the Russians, and retaken Oct. 1812.

POLTOWA, see *Pultowa*.

POLYGAMY, &c., was permitted among the early nations, and now by Mahometans. In Media, it was a reproach to a man to have less than seven wives. Among the Romans, Maro Antony is mentioned as the first who took two wives. The practice was forbidden by Arcadius, 393. The emperor Charles V. punished polygamy with death. In England, by stat. 1 James I. 1603, it was made felony, with benefit of clergy. It was formerly punished with transportation, but now by imprisonment or penal servitude; see *Marriages*. Polygamy exists among the Mormons (which see). Abolished in the United States, 23 March, 1882.—**POLYANDRY** (where one woman has several husbands) is permitted in some eastern countries, the children having equal rights.

POLYGLOT, from two Greek words denoting "many languages," is chiefly applied to editions of the Bible in several languages.

Justiniani published a polyglot psalter, 1576.

1. The Complutensian Polyglot, in six vols. folio, was printed at Alcalá (Complutensis), in Spain, 1502-14; the first edition published in 1522, at the expense of the celebrated cardinal Ximenes, costing 250,000 ducats. Six hundred copies of it were printed; three on vellum. Count MacCarthy, of Toulouse, paid 483l. for one of these copies at the Pinelli sale.
2. The Polyglot, printed at Antwerp, by Montanus, 8 vols. folio, in 1559-69, at the expense of Philip II. of Spain.
3. Printed at Paris, by Le Jay, in 10 vols. folio, 1628-45.
4. Edited by Bryan Walton, in 6 vols. folio, 1654-7. Copies of all four are in the library of the British and Foreign Bible Society.

5. Edited by Dr. Samuel Lee, published by S. Bagster, 1 vol. folio, 1831.
 6. Hexaglot bible: begun by Henry Cohn; completed by the Rev. Edw. R. De Levante and others, 6 vols. 4to, 1874.

POLYNESIA, a name recently given to the isles in the great Pacific Ocean.

POLYPES, also named *Hydræ* (*many-footed* animals), on account of their property of reproducing themselves when cut in pieces, every part soon becoming a perfect animal; first discovered by Leeuwenhoek, and described by him in the *Philosophical Trans.* 1703. The polypes are of the order Zoophytes, and partake of the animal and vegetable nature.

POLYTECHNIC INSTITUTION, ROYAL, Regent-street, London, was erected by Thompson in 1838, opened 6 Aug. 1839, and enlarged in 1848. It contained a hall of manufactures with machines worked by steam-power, lecture theatres, &c., diving-bell, electric machine, &c. *Timbs*. The institution did not prosper commercially, and its decline was hastened by the fall of a staircase on 3 Jan. 1859, when one person was killed and many injured. The institution was closed in May, 1859, but was re-opened by a new company on 12 Nov. 1860; see *Ecole Polytechnique*. Professor Pepper, the director for many years, resigned in 1872; returned, 1878. The classes were formed into a college, which was inaugurated by the earl of Shaftesbury, 7 Oct. 1872. Polytechnic institution announced to be closed on 27 Aug. 1881; affairs wound up. Plant sold for about 2000*l.* 23 March, 1882. In 1882 it was occupied by the Polytechnic young men's christian institute, principally by the instrumentality of Mr. Quintin Hogg, for educational purposes, with about 2000 members.

The number of members in May, 1888, were 12,128. The establishment of similar institutions in south and south-west London promoted by the charity commissioners and liberally subscribed for—1888-9. See *Beaumont Trust and Goldsmiths' Company*.

POMEGRANATE TREE (*Punica Granatum*) was brought to England from Spain before 1584.

POMERANIA, a Prussian province, N. Germany, was held by the Poles, 980, and by Denmark, 1210; made an independent duchy, 1479; and divided between Sweden and Brandenburg, 1648. The Swedish part, awarded to Denmark in 1814, was given up to Prussia for Lauenburg, 1815; see *Denmark*; *Wrecks*, 1878.

POMFRET or **PONTEFRAC** (S. York). At the castle (built 1069), Richard II. was confined and murdered, 10 Feb. 1399. Henry IV., by whom he was deposed, wishing for his death, an assassin, attended by eight followers, rushed into the king's apartment. He wrested a pole-axe from one of the murderers, and soon laid four of their number dead at his feet, but was at length overpowered and slain. Some writers assert that Richard escaped and died in Scotland. In this castle also, the earl Rivers, lord Grey, sir Thomas Vaughan, and sir Richard Haut or Hause, were put to death by order of the duke of Gloucester, then protector of England (afterwards Richard III.) about 26 June, 1483. The first parliamentary election by ballot took place here, 15 Aug. 1872, very quietly.

POMPEII (S. Italy), an ancient city of Campania, was partly demolished by an earthquake in A.D. 63. It was afterwards rebuilt, but was over-

whelmed by an eruption of Vesuvius, accompanied by an earthquake, on the night of 24 Aug. 79. The principal citizens were then assembled at a theatre where public spectacles were exhibited. The ashes buried the whole city and covered the surrounding country. After a lapse of fifteen centuries, a countryman, as he was turning up the ground, found a bronze figure; and this discovery led to further search, which brought numerous other objects to light, and at length the city was uncovered. The part first cleared was supposed to be the main street, 1750. The kings of Naples greatly aided in exploring Pompeii, and the present Italian government resumed the work in 1803.

A commemorative meeting of antiquaries and philosophers met at Pompeii, 25 Sept. 1879. Further discoveries made, autumn 1882.

POMPEY'S PILLAR stands about three-quarters of a mile from Alexandria, between the city and the lake Mareotis. The shaft is fluted, and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of three pieces, and of the Corinthian order. The column measures, according to some, 94 feet; to others 141, and even 160 feet; but of its origin, name, use, and age, nothing is certain.

It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One supposes the edifice was dedicated to Vespasian, another to Severus; and Mr. Clarke, from a half-effaced inscription on the base, considered that Adrian is the person honoured; while many assert, from the same inscription, that it is dedicated "to Diocletian Augustus, most adorable emperor, tutelary deity of Alexandria."

PONDICHERY (S.E. India), the capital of French India, and first settled by the French in 1674. It was taken from them by the Dutch in 1693, restored 1697; besieged by the English, 1748; taken by them, Jan. 1761; restored, 1763; again taken, Oct. 1778; restored in 1783; taken 23 Aug. 1793, and in 1803; restored, 1815. Visited by the Viceroy of India (Earl Dufferin), Dec. 1884. Prosperous state of the colony reported Jan. 1889.

PONDOLAND; the coast between Cape Colony and Natal, S. Africa, the British protectorate was proclaimed and notified, 6 Jan. 1885.

PONT-À-CHIN, see *Epiettes*.

PONT-À-NOYELLES. At this place, near Amiens, took place a fierce indecisive conflict, lasting from 11 A.M. to 6 P.M., between the Germans under Manteuffel and the French army of the north under Faidherbe, 23 Dec. 1870. Both sides claimed a victory; the French general asserted that he remained master of the field.

PONTEFRAC, see *Pomfret*.

PONTIFFS (Latin *Pontifices*), the highest Roman sacerdotal order, established by Numa. The college first consisted of 4 patricians, with a chief (Pontifex Maximus); to these 4 plebeians were added, by the Ogulian law, 300 B.C. Sylla increased the number to 15 (8 *maiores*, 7 *minores*). (81), and Julius Caesar to 16. T. Coruncanus, a plebeian, obtained this office, 254 B.C.

PONTUS, in Asia Minor, seems to have been a portion of Cappadocia, and received its name from its vicinity to the *Pontus Euxinus*. Artabazus was made king of Pontus by Darius Hystaspes, B.C. 487. His successors were mere satraps of the kings of Persia.

POPE (from the Greek *Pappas* and *Papa*, a father or grandfather), considered by Romanists to be the visible chief of the church, the vicar of Jesus Christ, and the successor of St. Peter. He styles himself "servant of the servants of God." The title pope was formerly given to all bishops. It

was first adopted by Hyginus, 139; and pope Boniface III. induced Phocas, emperor of the east, to confine it to the prelates of Rome, 606. By the connivance of Phocas also, the pope's supremacy over the Christian church was established; see *Italy, Reformation, and Rome, Modern*.

POPLIN (or Tabinet), an elegant rich fabric composed of silk and worsted, introduced by the Huguenot refugees from France about 1693; first manufactured in Dublin. Irish poplins are still deservedly esteemed.

PORCELAIN, see Pottery.

PORPHYROGENITUS, "born in the purple," a term applied to emperors of the east, born while their fathers were reigning.

PORT BRETON, an isle near New Caledonia, South Pacific.

In 1877 the marquis Du Breil de Rays purchased of the king Maragano a quantity of land on which to found a colony. Glowing prospectuses were issued in France, a company was formed, and, the scheme being favoured by the legitimists, a large number of shares were purchased and much money received. Other speculating companies were formed, and colonial government officers nominated. In spite of warning and prohibition several vessels sailed in 1879 with emigrants to meet with misery, disease, and, to a large extent, with death. A few who had been landed in New Caledonia got back to France and published an account of their sufferings. The marquis and some of his associates were brought to trial 27 Nov. 1883; he was sentenced to four years' imprisonment and a fine of 3000 francs; his associates to shorter imprisonment, 2 Jan. 1884; on appeal, sentence confirmed, 14 March, 1884.

PORT EGMONT, a fine harbour on the N.W. coast of Falkland Islands. Commodore Byron was despatched to found a colony here in 1765; see *Falkland Islands*.

PORTE, or **SUBLIME PORTE**, official name of the court of the sultan of Turkey. Mostasem, the last of the Abbasside caliphs (1243-58), fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. —*Bouillet*.

PORTEOUS MOB. Capt. Porteous, at Edinburgh, on 15 April, 1736, commanded the guard at the execution of Wilson, a smuggler, who had saved the life of a fellow criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled. This excited great commiseration, and the spectators pelted the guard with stones. Fearing a rescue, Porteous ordered his men to fire upon the mob, and seventeen persons were killed or wounded. He was found guilty of murder, 22 June, 1736; but the queen granted him a reprieve (the king being then in Hanover). The people, at night, broke open the prison, took out Porteous, and hanged him on a dyer's sign-post, in the Grass-market, 7 Sept. 1736. None of the rioters were ever detected.

PORTER. Dr. Ashe says that this beverage obtained its appellation on account of its having been drunk by porters in the city of London, about 1730.* The number of licensed brewers in 1850, in England, was 2257; in Scotland, 154; and in Ireland, 96—total, 2507. On 17 Oct. 1814, at Meux's brewhouse two large vats of porter burst, destroying neighbouring houses. Several lives were lost; and the loss was between 8000 and 9000 barrels.

* The malt liquors previously in use were ale, beer, and twopenny, and it was customary to call for a pint or tankard of half-and-half,—i.e., half of ale, and half of beer. In the course of time it also became the practice to ask for a pint of three-thirds, meaning a third of ale, beer, and twopenny. To avoid trouble, Harwood, a brewer, made a liquor which partook of the united flavours of ale, beer, and twopenny, calling it entire, or entire butt beer, meaning that it was drawn entirely from one cask or butt. Being relished by porters and other working people, it obtained its name of porter, and was first retailed at the "Blue Last," Curtain-road. —*Leigh*.

PORTERAGE ACT, regulating the charge for portorage of small parcels, passed 1799.

PORT HAMILTON, see *Correa*.

PORT JACKSON (New South Wales), thirteen miles north of Botany Bay, was so named by capt. Cook in 1770; see *Sydney*. Here the duke of Edinburgh was shot by O'Farrell, a Fenian, 12 March, 1868, but soon recovered. The assassin was hanged, 21 April.

PORTLAND ADMINISTRATIONS.

The first was the "Coalition ministry," of which William Henry Cavendish, duke of Portland,* was first lord of the treasury, was the head. It obtained the name of the "Coalition" ministry, and included lord North with Mr. Fox, formerly inveterate opponents. PORTLAND CEMENT, first mentioned in a patent granted to Joseph Aspdin, a bricklayer of Leeds, 1824. His son made the true cement at Northfleet. Its value as a building material was established by Mr. John Grant's tests, 1859-71.

* Born 1738; became lord chamberlain, 1765; lord lieutenant of Ireland, 1782; premier, 1783; home secretary, 1794; lord president, 1801; premier again, 1807; died, 1809; when Mr. Spencer Perceval became premier.

Portland cement concrete was used by Mr. E. A. Bernay in 1867.

PORTLAND ISLE (off Dorset), the English Gibraltar. Fortified before 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a naval engagement commenced between the English and Dutch, 18 Feb. 1653, which continued for three days. The English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English.—Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb. 1792. Prince Albert laid the first stone of the Portland breakwater, 25 July, 1849, and the last stone was laid by the prince of Wales, 10 Aug. 1872. Mr. James Kendal, the first chief engineer, was succeeded on his death in 1856 by Mr. (aft. sir) John Coode. The breakwater and other harbour works cost 1,033,600*l.* exclusive of convict labour. The Portland prison was established in 1848. A mutiny among the convicts here in Sept. 1858, was promptly suppressed.

PORTLAND (or **BARBERINI**) **VASE**. This beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices raised on it in white enamel; height 10 inches; diameter in the broadest part, 7; with a handle on each side) was discovered about the middle of the 16th century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 2½ miles from Rome. The sepulchre was supposed to have been that of the Roman emperor, Alexander Severus (222-235), and his mother Mamma, and the vase is supposed to have been the cinerary urn of one of these royal personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the duchess of Portland, 1787; at the sale of her effects, it is said to have been bought by the then duke of Portland, who, in 1810, deposited it (on loan) in the British Museum. On 27 Feb. 1845, this vase was smashed to pieces with a stone by a man named William Lloyd; it has been skilfully repaired, and is now shown to the public in a special room. Josiah Wedgwood made a mould of it, and took a number of casts.

After these calamities, the custom-house and public offices were removed to Kingston. The Port Royal des Champs, in 1656, became the retreat of the Arnaulds, Tillemont, Pascal, Lancelot, and other eminent Jansenists, who devoted themselves to education, and produced the Port Royal grammars, logic, and other works. This institution was condemned by the pope in 1709, and the buildings were pulled down, and tombs desecrated, by the order of Louis XIV., in 1710. PORTUGAL, the ancient Lusitania. The present name is derived from Porto Callo, the original appellation of Oporto. After a nine years' struggle, under Variathes, a brave able leader, the Lusitanians submitted to the Roman arms about 137 B.C. Portugal underwent the same changes as Spain on the fall of the Roman empire. There are in Portugal two universities, that of Coimbra, founded in 1308, and the smaller one of Evora, founded in 1533. Lisbon has also its royal academy, and the small town of Thomar has an academy of sciences; but, in general, literature is at a low ebb in Portugal. The poet Camoens, called the Virgil of his country, and author of the *Lusiad* (1569), translated into English by Mickle, was a native of Lisbon. Population of the kingdom and colonies, 31 Dec. 1863, 8,037,194; in 1872, kingdom on the continent, with Madeira and Azores, 4,390,589; colonies, 3,258,140; in 1878, kingdom and colonies, 8,031,831; 1881, kingdom, 4,708,178. POSITIVE PHILOSOPHY set forth by Auguste Comte, an eminent mathematician, born about 1795; died at Paris, 1852. M. P. Emile Littré, the great French philologist, ardently embraced the system, and published "De la Philosophie Positive," in 1845.

Comte's "Cours de Philosophie Positive," published 1830-42; "Système de Politique Positive, ou Traité de Sociologie, Institutant la Religion de l'Humanité (l'amour pour principe, l'ordre pour base, et le progrès pour but)," 1851-4.

It professes to base itself wholly on positive facts or observed phenomena, and rejects all metaphysical conceptions, which it considers negatives, having nothing real or true in them; and dispenses with the science of mind. It sets aside theology and metaphysics as too merely preliminary stages in life; and abandons all search after causes and essences of

things, and restricts itself to the observation and classification of phenomena and the discovery of their laws. Comte asserted that Europe had now arrived at the third stage of its progress.

Positivism does not recognise the supernatural or the future state.

The Society of Positivists in London meet in Newton hall, in Fleur-de-Lys-court, near Gough-square, Sunday evenings, when discourses on physics, morality, science, politics, &c., are delivered. The professed object is to promote the perfection of man by means of education in its widest sense, aiming at the attaining of universal brotherhood independent of all professed religious sects; concerts are occasionally given; Frederick Harrison, president (*Gen. Mail Gazette*, 29 Nov. 1883).

"The Church of Humanity" is a modified form of positivism, described by Mr. Richard Congreve (*Gen. Mail Gazette*, 17 Jan. 1884).

In England, in the reign of Edward IV. 1481, riders on post-horses went stages of the distance of twenty miles from each other, in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots.—*Gale.* Richard III. improved the system of couriers in 1483. In 1543 similar arrangements existed in England.—*Sadler's Letters.* Post communications between London and most towns of England, Scotland, and Ireland, existed in 1635.—*Strype.*

POTATOES, natives of Chili and Peru, generally considered to have been brought to England from Santa Fé, in America, by sir John Hawkins,

565. Others ascribe their introduction to sir Francis Drake, in 1586; their general introduction, 1592. Their first culture in Ireland is referred to sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 620. A fine kind of potato was first brought from America by Mr. Howard, who cultivated it at Carlington, near Bedford, 1765; and its culture became general soon after. The failure of the potato crop in Ireland, several years, especially in 1846, caused famine, to which succeeded pestilential disease of which multitudes died; among them many priests and physicians. Parliament voted ten millions sterling; and several countries of Europe, and the United States of America, forwarded provisions and their succours; see *Ireland*. In 1868 it was reported that in England and Wales 500,000 acres, and in Ireland 1,000,000 acres, were under cultivation for potatoes. Potato disease prevailed greatly in England, and autumn of 1872. POULTRY. An exhibition of poultry was held in London, Jan. 1853, when nearly 1000 cocks were exhibited; and similar exhibitions have been held at the Crystal Palace since.

POULTRY COMPTER (London) was one of the most noted of the old city prisons. The comptor of Wood-street belonged to the sheriff of London, and was made a prison-house in 1555. This latter and Broad-street comptor were re-built in 1667. The Giltspur-street prison, built to supply the place of the old city comptors, was pulled down in 1855. The Poultry chapel was erected on the site of the Poultry comptor, in 1819. — *Leigh*.

POUND, from the Latin *Pondus*. The value of the Roman *pondo* is not precisely known, though some suppose it was equivalent to an Attic *mina*, or 3*l.* 4*s.* 7*d.* The pound sterling was in Saxon times, about 671, a pound troy of silver, and a shilling was its twentieth part; consequently the latter was three times as large as it is at present. — *Peacham*. Our avoirdupois pound weight came from the French, and contains sixteen ounces; it is in proportion to our troy weight as seventeen to fourteen; see under *Standard*.

POYNINGS' LAW, named after sir Edward Poynings, lord deputy of Ireland at the time of its passing, at Drogheda, 13 Sept. 1494. By this law all legislation in the Irish parliament was confined to matters first approved of by the king and the English council. The act was repealed, together with the English Declaratory act of the 6th of Geo. I. and other obnoxious Irish statutes, April, 1782.

PRÆMONSTRATENSIAN ORDER, or **WHITE CANONS**, founded in 1120 by Norbert, a monk, at Pré Montré, near Laon. Its first house in England was founded by Peter de Gousal or Gousel, at Newham, in Lincolnshire, 1143—*Tanner*; according to others in 1146. The order spread widely through England soon after. The house at Newham was dedicated to St. Mary and St. Martial.—*Levis*.

PRÆMUNIRE, LAW OF. This law (which obtained its name from the first two words "*Præmuneri*," or "*Præmuniri facias*," "Cause to be forewarned," which is applied to any offence in the way of contempt of the sovereign or his government) derived its origin from the aggressive power of the pope in England. The offence introduced a foreign power into the land, and created an *imperium in imperio*. The first statute of Præmunire was enacted 35 Edward I. 1306.—*Coke*. The pope bestowed most of the bishoprics, abbeyes, &c., before they were void, upon favourites, on pretence of providing the church with better qualified successors before the vacancies occurred. To put a stop to these encroachments, Edward III. enacted a statute in 1353. The statute commonly referred to as the statute of Præmunire is the 16th of Richard II. 1392. Several similar enactments followed. The assertion that parliament is independent of the sovereign was declared a *præmunire*, 1661.

PRÆTORIAN GUARDS, instituted by the emperor Augustus (13 B.C.); their numbers enlarged by Tiberius, Vitellius, and their successors. At first supporters of the imperial tyrants, they eventually became their masters, actually putting up the diadem for sale (as in March, 193 A.D., when it was bought by Didius Julianus). They committed many atrocities, and were finally disbanded by Constantine in 312.

PRÆTORS, Roman magistrates. In 365 B.C., one prætor was appointed; a second appointed in 252 B.C. The *prætor urbanus* administered justice to the citizens, and the *prætor peregrinus* acted in causes relating to foreigners. In 227 B.C. two more prætors were created to assist the consul in the government of Sicily and Sardinia, lately conquered; and two more when Spain was made a Roman province, 197 B.C. Sylla, the dictator, added two, and Julius Cæsar increased the number to 10, which afterwards became 16. After this, their number fluctuated, being sometimes 18, 16, or 12; till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three.

PRAGA, a suburb of Warsaw, where a bloody battle was fought, 4 Nov. 1794; 30,000 Poles were killed by the Russian general Suwarrow. Near here, on 25 Feb. 1831, the Poles, commanded by Skrznecki, defeated the Russians, under general Giemars, who lost 4000 killed and wounded, 6000 prisoners, and 12 pieces of cannon.

PRAGMATIC SANCTION, an ordinance relating to church and state affairs. The ordinances of the kings of France are thus called; in one the rights of the Gallican church were asserted against the usurpation of the pope in the choice of bishops, by Charles VII. in 1438. The Pragmatic Sanction for settling the empire of Germany in the house of Austria, 1439. The emperor Charles VI. published the Pragmatic Sanction, whereby, in default of male issue, his daughters should succeed in preference to the daughters of his brother Joseph I., 19 April, 1713; and he settled his dominions on

his daughter Maria Theresa, in conformity therewith, 1723. She succeeded in Oct. 1740; but it gave rise to a war, in which most of the powers of Europe were engaged, and which lasted till 1748.

PRAGUE, the capital of Bohemia (which in 1419). The old city was founded about 759; the new one rebuilt in 1348 by the emperor Charles IV., who made it his capital and erected a university. Prague has suffered much by war.

It was soon quelled; Louis was exiled, and Alexander put to death by drowning, July, 1440.

PRASLIN MURDER. The duchesse de Choiseul-Praslin was murdered by her husband the duc de Praslin, at his own house, in Paris, 11 Aug. 1847. She was the only daughter of the celebrated marshal Sebastiani, the mother of nine children, and in her forty-first year. Circumstances were so managed by him as to give it the appearance of being the act of another. During the arrangements for the trial, the duke took poison.

PRAYER-BOOK, see *Common Prayer*. The Prayer-book and Homily Society, London, was founded in 1812.

Prayer-book Revision Society, established 1854, for promoting a revision of the book of common prayer, and such liturgical reforms in the church of England as will strengthen its Protestant and scriptural character.

PRAYERS. "Then began men to call upon the name of the Lord" (*Gen.* iv. 26), 3875 B.C. The mode of praying with the face to the east was instituted by pope Boniface II. A.D. 532. Prayers for the dead, first introduced into the Christian church about 100, are advocated by some ministers of the English church. Prayers addressed to the Virgin Mary and to the saints are said to have been introduced by pope Gregory, 593. See *Liturgies*.

PREBENDARY a clergyman attached to a cathedral or collegiate church, who receives an

income termed *prebenda* for officiating at stated times. The office slightly differs from that of a canon.

PRECEDENCE was established in very early ages, and was amongst the laws of Justinian. In England the order of precedence was regulated chiefly by two statutes, 31 Hen. VIII. 1539, and 1 Geo. I. 1714.

PRECEPTORS, COLLEGE OF, Bloomsbury, London, established in 1846, and incorporated by royal charter 28 March, 1849, for promoting sound learning, especially among the middle classes, by the instruction of teachers, and by the examination of pupils at stated times.

A new building in Bloomsbury Square opened by the prince of Wales, 30 March, 1887.

PREDESTINATION (*Ephes. i.*). The doctrine concerning this is defined in the seventeenth article of the Church of England (*Ephes. i.* and *Romans ix.*). It was maintained by St. Augustin, and opposed by Pelagius, in the early part of the fifth century. In later times it has been maintained by the Augustinians, Jansenists, the church of Scotland, and many dissenters (termed Calvinistic), and opposed by the Dominicans, Jesuits, and dissenters (termed Arminian), especially by the Wesleyan methodists.

PREHISTORIC ARCHÆOLOGY began in Sweden, and first systematised by Mr. Nilsson. Daniel Wilson's "Archæology and Pre-historic Annals of Scotland," published 1851. An international congress for treating prehistorical subjects met at Neuchâtel in 1866, and at Paris in 1867. At the third meeting at Norwich, Aug. 1868, it assumed the name of "International Congress for Prehistoric Archaeology," and published its transactions in 1869. A meeting was held at Stockholm 7-14 Aug. 1874. See *Barrow's, Man, and Ancient Monuments*.

Sir John Lubbock divides prehistoric archaeology into four great epochs: 1. The Drift or Palæolithic or old stone age; 2. The Neolithic or polished stone age; 3. The Bronze age; 4. The Iron age, when bronze was superseded. — (1880.)

PRE-RAPHAELITE SCHOOL, a name given about 1850, to J. E. Millais, Wm. Holman Hunt, D. G. Rossetti, and other artists, who opposed the routine conventionality of academic teaching, and resolved to study nature as it appeared to them, and not as it appeared in the antique. For a short time they published "The Germ, or Art and Poetry," beginning in 1850. Their works have been much criticised, but their influence has been beneficial. Their principles are much advocated by the great art-critic, John Ruskin.

PREROGATIVE COURT, in which formerly all wills were proved, and all administrations taken, which belonged to the archbishop of Canterbury by his prerogative, a judge being appointed by him to decide disputes.* Appeals from this court, previously to the pope, were commanded to be made to the king in chancery, 1533; to the privy council in 1830-2. This court was abolished, and the *Probate Court* established in 1857. Sir John Dodson, the last judge, died in 1858.

PREROGATIVE ROYAL. In England the sovereign is the supreme magistrate, and it is a

maxim that he can do no wrong. He is the head of the established church, of the army and navy, and the fountain of office, honour, and privilege, but is subject to the laws, unless exempted by name. The royal prerogatives were greatly exceeded by several despotic sovereigns, such as Elizabeth, James I., and Charles I. Elizabeth used the phrase "We, of our Royal prerogative, which we will not have argued or brought in question" (1591). James I. told his parliament "that as it was blasphemy to question what the Almighty could do of His power, so it was seditious to inquire what a king could do by virtue of his prerogative." These extreme doctrines were nullified by the revolution of 1688, and the exercise of the prerogative is now virtually subject to parliament; see *Lords*.

PRESBURG, the ancient capital of Hungary, where the diets were held and the kings crowned. On 26 Dec. 1805, a treaty was signed between France and Austria, by which the ancient states of Venice were ceded to Italy; the principality of Eichstadt, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Brisgau, and Ortenau, were transferred to the elector of Bavaria, and the duke of Würtemberg, who, as well as the duke of Baden, were then created kings by Napoleon. The independence of the Helvetic republic was also stipulated.

PRESBYTERIANS are so called from their maintaining that the government of the church appointed in the New Testament was by presbyteries, or association of ministers and ruling elders, equal in power, office, and in order. "The elders (Greek, *presbyteros*) I exhort, who am also an elder (*sympresbyteros*)." 1 Peter v. 1. Presbyterianism was accepted by parliament in place of episcopacy in England in 1643, but set aside at the restoration in 1660. It became the established form of church government in Scotland in 1606. Its tenets were embodied in the formulæ of faith said to have been composed by John Knox, in 1560, which was approved by the parliament, and ratified, 1567, and finally settled by an act of the Scottish senate, 1606, afterwards secured by the treaty of union with England in 1707. The first Presbyterian meeting-house in England was established at Wandsworth, Surrey, 20 Nov. 1572.

A pan-presbyterian congress held in London. Representatives of about fifty bodies, British, American, and foreign, agreed to form an "Alliance of Presbyterian churches" 19-22 July, 1875. The presbyterian church of England re-constituted at Liverpool (in union with the United Presbyterian Church of Scotland) 13 June, 1876. A pan-presbyterian congress held at Edinburgh, began 3 July, 1877; at Philadelphia, U.S.A., 23 Sept. 1880.

PRESCOTT (Upper Canada). On 17 Nov. 1838, the Canadian rebels were attacked by the British under major Young, and (on the 18th) by lieut. colonel Dundas, who dispersed the insurgents, several of whom were killed, and many taken prisoners, and the remainder surrendered. The troops also suffered considerably.

great seal, *durante beneplacito*, and, by his office, is to attend the sovereign's royal person, and to manage the debates in council, to propose matters from the sovereign at the council-table, and to report to his majesty the resolutions taken thereupon.

PRESS, LIBERTY OF THE. The *imprimatur* "let it be printed" was much used on the title-pages of books printed in the sixteenth and seventeenth centuries. The liberty of the press was severely restrained, and the number of master-printers in London and Westminster limited by the Star Chamber, 13 Charles I., July 1, 1637. John Milton published his noble work, "Areopagitica; or, a Speech for the Liberty of Unlicensed Printing," 1644.

"Disorders in printing" were repressed by the parliament in 1643 and 1649, and by Charles II. in 1662. The censorship of the press (by a licence established in 1655 and 1663) abandoned.

The toast, "The liberty of the press; it is like the air we breathe—if we have it not we die," was first given at the Crown and Anchor tavern, at a Whig dinner.

Presses licensed, and the printer's name required to be placed on both the first and last pages of a book.

The severity of the restrictions on the French press relaxed by M. Persigny, minister of the interior, but soon restored.

The liberty of the press in the United States greatly checked during the civil war.

Certain restrictions on printers in the United Kingdom removed by act passed.

Bill greatly freeing the press in France introduced into the chamber.

Press (newspaper), a revolutionary journal, published in Dublin: commenced in Oct. 1797; Arthur O'Connor, Mr. Emmett, the barrister (whose brother was executed in 1803), and other conspicuous men, contributors to it; it inflamed the public mind in Ireland on the eve of the rebellion in 1798. The paper was suppressed by a military force.

PRESS-GANG for the royal navy was regulated by statute, 1378, and by 5 & 6 Will. IV. 1835; the compulsory service is limited to five years, see *Imprisonment*.

PRESTON (Lancashire). Near here Cromwell totally defeated the royalists under sir Marmaduke Langdale, 17 Aug. 1648. Preston was taken in 1715 by the Scotch insurgents, under Forster, who proclaimed king James VII. They were defeated in a battle on 12, 13 Nov. by generals Willes and Carpenter, who with the royal army invested Preston on all sides. The Scots laid down their arms, and their nobles and leaders were secured; some were shot as deserters, and others sent to London pinioned and bound together, to intimidate their party.—The stoppage of the cotton manufacture in 1861 and 1862, through the civil war in America, occasioned great suffering in Preston. See *Population*.

"The Preston guild Merchant festival," said to have been instituted in Saxon times, recorded as beginning 1328, and to have been kept once in 20 years regularly since 1562, was duly celebrated in Sept. 1862, and Sept. 1882.

A fine art and industrial exhibition here opened 21 Sept. 1865.

The new town hall opened by the duke of Cambridge 3 Oct. 1867.

Statue of the late earl of Derby publicly inaugurated 4 June, 1873.

Preston strikes.—In 1853, a great number of strikes took place among the workmen in the north of England. Those at Preston struck for an increase of 10 per cent. on their wages. On 15 Oct. the

masters, in consequence, closed forty-nine mills, and 20,000 persons were thrown out of employment, who were mostly maintained for a short time by subscriptions from their fellows. In the week ending 17 Dec. 14,972 were relieved, at the cost of 282ol. 8s. The committee of workmen addressed lord Palmerston, 15 Nov., who gave them his advice.

After many attempts at reconciliation, the strike closed for want of funds.

Another strike was closed in May.

PRESTON-PANS, near Edinburgh, the scene of a battle between the Young Pretender, pret. Charles Stuart, and his Scotch adherents, and the royal army under sir John Cope, 21 Sept. 1745. The latter was defeated with the loss of 500 men and fled.

PRETENDERS. A name given to the 12 and grandsons of James II. of England.

The **OLD PRETENDER**, James Francis Edward Stuart, Chevalier de St. George, born 10 June, 1688, was acknowledged by Louis XIV. as James III. of England, in 1701.

Proclaimed, and his standard set up, at Braemar and Castletown, in Scotland.

Landed at Peterhead, in Aberdeenshire, from France, to encourage the rebellion that the earl of Mar and his other adherents had prompted.

This rebellion having been soon suppressed, the Pretender escaped to Montrose (from whence he proceeded to Gravelines).

Died at Rome.

The **YOUNG PRETENDER**, Charles Edward, was born in Scotland, and proclaimed his father king.

Landed in Scotland, and proclaimed his father king.

Gained the battle of Preston-pans, 21 Sept. 1745, and of Falkirk.

Defeated at Culloden, and sought safety by flight.

He continued wandering among the wilds of Scotland for nearly six months; and as 30,000l. were offered for taking him, he was constantly pursued by the British troops, often hemmed round by his enemies, but still rescued by some lucky accident, and at length escaped from the island of Ulst to Morlaix in Sept. He died.

His natural daughter assumed the title of duchess of Albany; died in.

His brother, the cardinal York, calling himself Henry IX. of England, born March, 1725; died at Rome in.

His alleged grandson, Charles Edward Stuart, comte d'Albanie, died.

On the 6th Dec. 1648, colonial Pride, with two regiments, surrounded the house of parliament, and seizing in the passage forty-one members of the Presbyterian party, sent them to a low room, then called *hell*. PRIENE, one of the twelve cities of the Ionian ague in Asia Minor. The temple of Minerva oliaas, founded here by Alexander the Great, and the work of Pythios, was excavated by Mr. R. P. ullan, for the Dilettanti Society, in 1868-9.

PRIEST (derived from *presbyteros*, elder), in the English church the minister who presides over the public worship. In *Gen.* xiv. 18, Melchizedek ing of Salem is termed "priest of the most high od." (1913 B.C.; see *Hebrews* vii.) The Greek *ierous*, like the Jewish priest, had a sacrificial character, which idea of the priesthood is still maintained by the Romanists and those who favour their views. Among the Jews, the priests assumed their office at the age of thirty years. The dignity of high or chief priest was fixed in Aaron's family, 491 B.C. After the captivity of Babylon, the civil government and the crown were superadded to the high priesthood; it was the peculiar privilege of the high priest, that he could be prosecuted in no court but that of the great Sanhedrim. The heathens had their arch-flamen or high priest, resembling the Christian archbishop. For "Priest n Absolution," see *Holy Cross*.

PRIMER. A book so named from the Romish book of devotions, and formerly set forth or published by authority, as the first book children should publicly learn or read in schools, containing prayers and portions of the scripture. Primers were printed 1535, 1539. Henry VIII. issued a prayer-book called a "primer" in 1546. The three were published by Dr. Burton in 1834.

PRIMOGENITURE, RIGHT OF. A usage brought down from the earliest times. The first-born in the patriarchal ages had a superiority over his brethren, and in the absence of his father was priest to the family. In some parts of England, by the ancient customs of gavel-kind and borough-English, primogeniture was superseded. It came in with the feudal law, 3 Will. I. 1068. The rights of primogeniture abolished in France, 1790.

The marquis of Salisbury became grand master.

The league, which began with under a thousand members, was declared to consist of 810,228 knights, dames, and associates, with 1,992 "habitations," on 20 May, 1889. The league issues great number of political leaflets and songs. "Habitations" have been established in Scotland and Ireland.

PRINTING. Block printing invented by the Chinese about 593 A.D., movable types made in the 10th century. The honour of first printing with single types in Europe has been appropriated to Ments, Strasburg, Haarlem, Venice, Rome, Florence, Basle, and Augsburg; but the names of the three first only are entitled to attention; see *Press*.

PRINTING-MACHINES.—William Nicholson, editor of the *Philosophical Journal*, first projected (1790-1), but Mr. König first contrived and constructed a working printing machine, which began with producing the *Times* of 28 Nov. 1814, a memorable day in the annals of typography.

In 1818, Mr. E. Cowper patented improvements.† König's machine printed 1800 an hour on one side; Cowper's improvements increased this number to 4200. This was raised to 15,000, by Mr. Applegath's machine, which printed the *Times*.

Joe's American machine, introduced into London 1858, prints 20,000 an hour.

Larionov's machine at Paris said to print 36,000 an hour; Dec. 1868.

Valter press, invented for the *Times* by J. C. Macdonald and Mr. Calverley, between 1862-9, prints about 17,000 an hour perfected: 1872.

American Campbell press said to print 50,000 sheets perfected in an hour, Feb. 1876.

Ugram web rotary machine, invented by Mr. W. J. Ingram, M.P., for printing illustrated papers; first used to print *Illustrated London News*, 4 Oct. 1877.

PRINTING IN COLOURS was first commenced by the employment of several blocks, to imitate the initial letters in MSS. (for instance, the Ments Psalter of Fust, 1455, which has a letter in three colours). Imitations of chiaroscuro soon followed ("Repose in Egypt," engraving on wood after Louis Cranch, in 1519, in Germany; others by Ugo da Carpi, in Italy, 1518).

F. B. Jackson (1720-54) attempted, without success, to imitate water-colour drawings, and to print paper-hangings.

About 1783, John Skipple, an amateur, printed some chiaroscuro.

In 1819-22, Mr. William Savage produced his remarkable work, "Hints on Colour Printing," illustrated by imitations of chiaroscuro, and of coloured drawings, giving details of the processes employed.

* Romish Service-books, used at Salisbury, by the devout called Pies (*Pica*, Latin), as is supposed from the different colour of the text and rubric. Our printing-type *Pica* is called *Cleero* by foreign printers.—*W. Healey*.

† In 1817 was published Blumenbach's Physiology by Elliotson, the first book printed by machinery. The machine employed was König's, one which printed both sides in one operation at the rate of 900 sheets an hour (1810).

In 1836, Mr. George Baxter produced beautiful specimens of Picture-Printing, and took out a patent, which expired in 1855. In some of the illustrations to the "Pictorial Album" (1836), he employed twenty different blocks.

It has been applied to Lithography (hence Chromolithography).

In 1849, Mr. G. C. Leighton produced imitations of water-colour drawings, by means of modifications and improvements of Savage's processes. In 1851 he commenced colour-printing by machinery, and has since availed himself of aqua-tinted plates, and also of electrotyped silver and copper surfaces to obtain purity of colour as well as durability.

The large coloured prints of the *Illustrated London News* were first issued in Dec. 1856.

Mr. E. Meyerstein explained his process of printing many colours at one impression (stenochromy), Society of Arts, 13 Dec. 1876.

Printing surfaces. Vulcanised India-rubber was first employed for this purpose by Mr. John Leighton, F.S.A., about 1862, and patented in the name of Alfred Leighton, 1864. The application is much used for hand-stamps for books, &c.

PRIORIES, at first dependent on the great abbeys, are mentioned in 722 in England; see *Abbeys*, and *Monasteries*. *Alien priories* were seized by the king (Edward I.) in 1285, and in succeeding reigns on the breaking out of war with France; but were usually restored on the conclusion of peace. These priories were dissolved, and their estates vested in the crown, 3 Henry V. 1414.—*Rymer's Fodera*.

The Spanish, French, and American prisoners of war in England were 12,000 in number, 30 Sept. 1779. The number exchanged by cartel with France, from the commencement of the then war, was 44,000 June, 1781.

The English prisoners in France estimated at 6000, and the French in England 27,000 Sept. 1798

PRIVATE BILLS, see *Acts of Parliament*.

PRIVATEER, a ship belonging to private individuals, sailing with a licence (termed a *Letter of Marque*), granted by a government in time of war, to seize and plunder the ships of the enemy. The practice, said to have been adopted by Edward I. against the Portuguese in 1295, was general during the war between Spain and the Netherlands in the 17th century, and during the last French war. Privateering was abolished by the great sovereigns of Europe by treaty, 30 March, 1856. The United States government refused to agree unless the right of blockade was also given up. The British government declined this, asserting "that the system of commercial blockade was essential to its naval supremacy." On 17 April, 1861, Jefferson Davis, president of the southern confederacy, announced his intention of issuing letters of marque, and on the 19th president Lincoln proclaimed that all southern privateers should be treated as pirates. This decree was not carried out: see *United States*. All the great powers for-

bade privateering during the American civil war (which see). By the treaty of Washington privateering was prohibited.

PRIVILEGED PLACES, see *Asylums*.

PRIVY COUNCIL. A council was instituted by Alfred, 895. The number of the council was about twelve when it discharged the functions of state, now confined to the members of the cabinet, but it had become of unwieldy amount before 1750, in which year it was remodelled upon sir William Temple's plan, and reduced to thirty members. Anthony Ashley, earl of Shaftesbury, being president. The number is now unlimited. To attend the life of a privy councillor in the execution of his office was made capital, occasioned by Guisard's stabbing Mr. Harley while the latter was examining him on a charge of high treason, 9 Anne, 1711.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.—In 1851 the Court of Delegates, for appeals from the lord chancellors of Great Britain and of Ireland in cases of lunacy—from the Ecclesiastical and Admiralty Courts of England, and the Vice-Admiralty courts abroad—from the Warden of the Stannaries, the courts of the Isle of Man, and other islands, and the Colonial courts &c.,—fixed by statute 3 & 4 Will. IV. c. 41, 1851, amended by other acts in 1844, 1851, 1852.

JUDGES.—The lord president, lord chancellor, master of the rolls, vice-chancellor, lords justices in appeal, lord chief justice of the queen's bench and common pleas, lord chief baron, judges of the courts of bankruptcy, probate, and admiralty, and others appointed by the queen. In consequence of the increase of business, and consequent delay, the queen was empowered to appoint four new judicial members of the committee, by 34 & 35 Vict. c. 91 (21 Aug. 1871). The attorney-general, sir R. Collier, was made a judge of the Common Pleas, 7 Nov., and a member of the judicial committee 22 Nov. 1871.

These proceedings were considered contrary to the spirit of the act by several judges and the legal profession generally. A vote of censure on the Gladstone ministry was negatived in the house of lords (89-87), 15 Feb. in the commons (268-241), 19 Feb. 1872. Other changes were made by an act passed in 1876.

PRIVY SEAL, THE LORD, the fifth great officer of state, has the custody of the privy seal, which he must not put to any grant, without good warrant under the king's signet. This seal is used by the king to all charters, grants, and pardons, signed by him before they come to the great seal. Richard Fox, bishop of Winchester, held this office in the reign of Henry VIII. previously to 1523, when Cuthbert Tunstall, bishop of London, was appointed. The privy seal has been on some occasions in commission.—*Beaton*. See under *Liverpool*, *Canning*, *Wellington*, and succeeding *Administrations*. The distribution of army prize-money is regulated by an act passed in 1832. Naval prize-money is now regulated by royal proclamation; the last, 19 May, 1866.

PROBABILITY, THEORY OF (termed by Butler, "the guide of life"; by Laplace, "good sense reduced to calculation"), was originated by Pascal, and taken up by Fermat, in their correspondence in 1654.

Its object is "the determination of the number of ways in which an event may happen or fail, in order that we may judge whether the chances of its happening or failing are greater."—*Jerome*.

has been treated upon by the most eminent mathematicians, viz., the Bernoullis, De Moivre, D'Alembert, Euler, Lagrange, Laplace, and Quetelet. Isaac Todhunter's copious "History of Probability," published 1865.

The first judge appointed, 5 Jan. 1858, was sir Cresswell Cresswell, who took his seat on 12 Jan. In his death, sir James P. Wilde (aft. lord Penance) was appointed judge, 28 Aug. 1863; see *Supreme Court*. The present judge of the probate, divorce, and admiralty division is sir James Hannen (1889). A probate and matrimonial division of the high court of justice of Ireland was established by Judicature act, 1877; present judge, Robert Richard Warren (1889). *Probate* is the exhibiting and proving a will before the proper authority. By the Prosecution of Offences Act, 42 & 43 Vict. c. 22 (3 July, 1879), the appointment of a director of public prosecutions with assistants was enacted, somewhat resembling officers in Scotland and Ireland. It came into operation 1 Jan. 1880. John Blossett Maule, appointed director of public prosecutions, Dec. 1879.

PROTESTANT REFORMATION SOCIETY, established 1820; it employs missionaries and readers.

PROTESTANTS. The emperor Charles V. called a diet at Spire in 1529, to request aid from the German princes against the Turks, and to devise means for allaying the religious disputes which then raged owing to Luther's opposition to the Roman catholic clergy. Against a decree of this diet, to support the doctrines of the church of Rome, six Lutheran princes, with the deputies of thirteen imperial towns, formally and solemnly protested, 19 April, 1529. Hence the term protestants was given to the followers of Luther; it afterwards included Calvinists, and other sects separated from the see of Rome. The six protesting princes were: John, elector of Saxony; George, margrave of Brandenburg; Ernest and Francis, the dukes of Lunenburg; the landgrave of Hesse; and the prince of Anhalt; these were joined by the citizens of Strasburg, Nuremberg, Ulm, Constance, Heilbron, and seven other cities; see *Lutheranism*, *Calvinism*, *Huguenots*, *Germany*, *Church of England*, &c.

PROVENCE (the Roman *Provincia*), S. E. France, was made a kingdom by the emperor Lothaire for his son Charles. It afterwards became part of the kingdom of Arles as a feudal fief, and was re-united to the German empire in 1024 by Conrad II. On the fall of the Hohenstaufens it was acquired by Charles of Anjou, who married the heiress of the count in 1245, and became king of Naples, in 1268; and was held by his successors till its annexation to France by Charles VIII. in 1487.

PROVERBS. The book of Proverbs by Solomon is dated about 1000 B.C. The latter part was collected by order of Hezekiah, about 700 B.C. Ray's collection of English proverbs appeared in 1672, and Bohn's general collection in 1857. Martin P. Tupper's "Proverbial Philosophy" appeared in 1839. Alfred Henderson's "Latin Proverbs," 1860. PROXIES. Voting by proxy, an ancient privi-
 lege of the house of peers, was very frequently
 abused. In the reign of Charles II., when the duke
 of Buckingham sometimes brought 20 proxies in his
 pocket, it was ordered that no peer should bring
 more than two proxies. From 1830 to 1867, both
 inclusive, proxies were only called 73 times. In
 conformity with the recommendation of a committee,
 a new "standing order" was adopted, 31 March,

1868, by which it was ordered "That the practice of
 calling for proxies on a division shall be discon-
 tinued."

prudens homo, a prudent man), trade tribunals in
 France, composed of masters and workmen, were
 constituted to arbitrate on trade disputes in 1806.
 Similar bodies with this name existed as far back as
 1452 at Marseilles, and at Lyons in 1464.

PRUSSIA. This country was anciently pos-
 sessed by the Venedi, about 320 B.C. They were
 conquered by the Borussii, who inhabited the Ri-
 phæan mountains; and from these the country was
 called Borussia. Some historians derive the name
 from *Po*, signifying near, and *Russia*. The Porusii
 afterwards intermixed with the followers of the
 Teutonic knights, and latterly with the Poles. The
 constitution, established 31 Jan. 1850, was modified

PULLEY, vice, and other mechanical instruments, are said to have been invented by Archytas of Tarentum, about 400 B.C., or by Archimedes, 287-212. In a single movable pulley the power gained is doubled: in a continued combination the power is equal to the number of pulleys, less one, doubled.

Here also the French under Napoleon fought the Russian and Prussian armies: both sides claimed the victory, but it inclined in favour of the French, 26 Dec. 1806.

PUMILINE, an oil extracted from the *Ficus Pumilio*, which grows in E. and S.E. Europe. Shown by Dr. Sykes to be a powerful antiseptic, and is consequently now used medicinally. Its establishment for the treatment of patients by inhalings, &c., was opened at Farnborough by E. J. Nethersole, Dec. 1887, where Stern's Fine Products are employed.

PUMPS. Ctesibius of Alexandria is said to have invented pumps (with other hydraulic instruments), about 224 B.C., although the invention is ascribed to Danaus, at Lindus, 1485 A.C. Pumps were in general use in England, A.D. 1425. An inscription on the pump in front of the late Bank Exchange, London, stated that the well was first in 1282. The air-pump was invented by Otto Guericke in 1654, and improved by Boyle in 1657; see *Air and Wells*.

PUNCH, the puppet show, borrowed from the Italian Polichinello, is descended from a character well known in the theatres of ancient Rome. *Punch and Judy*. The satirical weekly publication, *Punch, or the London Charivari*, was established by Henry Mayhew, Mark Lemon, Douglas Jerrold, Gilbert A. Beckett, and others: first published 17 July, 1841. PUNCTUATION. The Hebrew accents for punctuation are very ancient. The period (.) is the most ancient; the colon (:) was introduced about 1485; the comma (,) was first seen about 1521, and the semicolon (;) about 1570. In sir Philip Sidney's "Arcadia" (1587), they all appear, as well as the note of interrogation (?), asterisk (*), and parentheses ().

Our wars with the Sikhs began Jan. 14 Dec. 1845, and were closed on 29 March, 1849 when the Punjab was annexed; see *India*. The Punjab has since greatly flourished, and on 1 Jan. 1859, was made a distinct presidency (to include the Sutlej states and the Delhi territory); see *Durbar*. The Sirhind canal (502 miles) opened by the viceroy, marquis of Ripon, 24 Nov. 1882. Local self-government bill passed 10 Oct. 1883.

PURCHASE OF LAND, see under *Land*.

PURCHASE SYSTEM in the army. The payment of a present or gratuity for a commission was prohibited by William III., 1693; but in 1702 purchase was legally re-organised. In 1711 the sale of commissions was forbidden without the royal permission; in 1719-20 regulations were issued; and a fixed scale of prices was adopted in consequence of a commission in 1765. Large over-regulation payments continued to be paid. Commissions of inquiry were held frequently since 1858; and in 1871 the system was abolished, with compensation, by royal warrant, 20 July, 1871, the bill for the purpose having been rejected by the house of lords. For amounts paid, see under *Army*.

PURGATIVES of the mild species (aperients), particularly cassia, manna, and senna, are ascribed to Actuarius, a Greek physician, 1245.

PURGATORY, the middle place between heaven and hell, where, it is believed by the Roman Catholics, the soul passes through the fire of purification before it enters the kingdom of God. The doctrine was known about 250; was introduced into the Roman church in the 5th century, and made a religious dogma by Gregory I., 590-604. It was first set forth by a council at Florence, 1439; enforced by the council of Trent, Dec. 1563; see *Indulgences*.

PURIFICATION, after childbirth, was ordained by the Jewish law, 1490 B.C. (*Lev. xii.*); see *Churching*. The feast of the purification was instituted, 542, in honour of the Virgin Mary's going to the temple. (*Luke ii.*) Pope Sergius I. ordered the procession with wax tapers, whence Candlemas-day.

PURITANS, the name first given, it is said, about 1564, to persons who aimed at greater purity of doctrine, holiness of living, and stricter discipline than others. They withdrew from the established church, professing to follow the word of God alone, and maintaining that the church retained many human inventions and popish superstitions; see *Cuthari*, *Nonconformists*, and *Presbyterianism*.

PURLEY, see *Diversions*.

PURPLE, a mixed tinge of scarlet and blue, discovered at Tyre. It is said that Hercules Tyrius having observed his dog's lips to be stained, after eating a shell-fish named *murex* or *purpura*, was thereby led to invent the dye. Purple was anciently used by the princes and great men for their garments. It was restricted to the emperor by Justinian I. 529, and *porphyrogenitus* attached to the names of some emperors signifies "born to the purple."

PURVEYANCE, an ancient prerogative of the sovereigns of England of purchasing provisions, &c., without the consent of the owners, led to much oppression. It was regulated by Magna Charta, 1215, and other statutes, and was only surrendered by Charles II. in 1660, for a compensation.

PUSEYISM, a name attached to the views of certain clergymen and lay members of the church of England, who proposed to restore the practice of

the church of England to what they believed to be required by the language of her Liturgy and Rubrics, but which were considered by their opponents to be of a Romish tendency. The term was derived from the name of the professor of Hebrew at Oxford, Dr. Edwd. Pusey. The heads of houses of the university of Oxford passed resolutions censuring Dr. Pusey's attempts to renew practices which are now obsolete, 15 March, 1841; and his celebrated sermon was condemned by the same body, 30 May, 1843; he died 16 Sept. 1882; see *Tractarians*, and *Ritualism*.

PYRAMIDS OF EGYPT. The three principal are situated on a rock, at the foot of some high mountains which bound the Nile. The first building commenced, it is supposed, about 1500 B.C. The greatest is said to have been erected by Cheops, 1082 B.C., but earlier dates are assigned. The largest, near Gizeh, is 461 feet in perpendicular height, with a platform on the top 32 feet square, and the length of the base is 746 feet. It occupies about twelve acres of ground, and is constructed of stupendous blocks of stone. There are many other smaller pyramids to the south of these. They have been visited and described by Belzoni, 1815; Vyse, 1836; C. Piazzi Smyth, and others.—The *battles of the Pyramids*, when Bonaparte defeated the Mamelukes, and thus subdued Lower Egypt, took place 13 and 21 July, 1798; see *Egypt*.

PYRENEES. After the battle of Vittoria (fought 21 June, 1813), Napoleon sent Soult to supersede Jourdan, with instructions to drive the allies across the Ebro; Soult retreated into France with a loss of more than 20,000 men, having been defeated by Wellington in a series of engagements from 25 July to 2 Aug. One at the Pyrenees on 28 July. A railway through the Pyrenees (from Bilbao to Miranda) was opened 21 Aug. 1862.—THE PEACE OF THE PYRENEES was concluded between France and Spain, by cardinal Mazarin, for the French king, and don Louis de Haro, on the part of Spain, in the island of Pheasants, on the Bidassoa. By this treaty Spain yielded Roussillon, Artois, and her right to Alsace; and France ceded her conquests in Catalonia, Italy, &c., and engaged not to assist Portugal, 7 Nov. 1659.

PYROMETER (fire-measurer), an apparatus employed to ascertain the temperature of furnaces, &c., where thermometers cannot be employed; Muschenbroek's pyrometer (a metallic bar) was described by him in 1731. Improvements were made by Ellicott and others. Wedgwood employed clay cylinders, 1782-6. In 1830 professor Daniell received the Rumford medal for an excellent pyrometer made in 1821. Mr. Ericsson's pyrometer appeared in the Great Exhibition of 1851. (*Eng. Cyc.*) Mr. (aft. sir) C. W. Siemens employed electric resistance in his pyrometers, exhibited in 1871.

It consists of glass tubes of various lengths; the tones being produced by what are termed "singing flames." It is based upon the "chemical harmonicon." Keys are attached for playing, as in the piano. The invention was reported to the French Academy of Sciences, 17 March, 1873; exhibited at Vienna, same year; and at the Society of Arts, 17 Feb. 1875. M. Kastner died aged 31, 6 April, 1882.

PYX, the casket in which Catholic priests keep the consecrated wafer. In the ancient chapel of the pyx, at Westminster abbey, are deposited the standard pieces of gold and silver, under the joint custody of the lords of the treasury and the comptroller-general. The "*trial of the pyx*" signifies the verification by a jury of goldsmiths of the coins deposited in the pyx or chest by the master of the mint; this took place on 17 July, 1861, at the exchequer office, Old Palace-yard, in the presence of twelve privy councillors, twelve goldsmiths, and others, and on 15 Feb. 1870. This trial is said to have been ordered in the reign of Henry II., 1154-89; King James was present at one in 1611. The first annual trial of the pyx, appointed by the Coinage act of 1870, took place 18 July, 1871.

Quack medicines were taxed in 1783 *et seq.* An inquest was held on the body of a young lady, Miss Cashin, whose physician, St. John Long, was afterwards tried for manslaughter, 21 Aug. 1830; he was found guilty, and sentenced to pay a fine of 250*l.*, 30 Oct. following. He was tried for manslaughter in the case of Mrs. Catherine Lloyd, and acquitted, 19 Feb. 1831. The Arabian astronomers under the caliphs, in 995, had a quadrant of 21 feet 8 inches radius, and a sextant 59 feet 9 inches radius. Davis's quadrant for measuring angles was produced about 1600; Hadley's quadrant about 1731; see *Navigation*.

QUAKERS.

Sylla raised the number to twenty; Julius Cæsar to forty. Two were called *Peregrini*, two (for the city) *Urbanî*.

QUAKERS or **SOCIETY OF FRIENDS**, originally called Seekers, from their seeking the truth, and afterwards Friends (3 *John*, 14). Justice Bennet, of Dorby, gave the society the name of Quakers in 1650, because George Fox (the founder) admonished him and those present to quake at the word of the Lord. This sect was commenced in England about 1646, by George Fox (then aged 22), who was joined by George Keith, William Penn, and Robert Barclay, of Ury, and others. Fox rejected all religious ordinances, explained away the commands relative to baptism, &c.; discarded the ordinary names of days and months, and used *thes* and *thou* for *you*, as more consonant with truth. He published a book of instructions for teachers and professors, and died 13 Jan. 1691. Sir H. Nicolas explains the Quaker calendar in his *Chronology of History*. The first meeting-house in London was in White Hart-court, Gracechurch-street.

Their principles are contained in "Extracts of minutes" (from the beginning) published 1782: revised 1802, 1861, and 1883.

The Quakers early suffered grievous persecutions. At Boston, U.S., where the first Friends who arrived were females, they (even females) were cruelly scourged, and had their ears cut off; some put to death.

In 1659 they stated in parliament that 2000 Friends had endured sufferings and imprisonment in Newgate: and 164 Friends offered themselves at this time, by name, to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death, 1659.

Fifty-five (out of 120 sentenced) were transported to America, by an order of council, 1664.

The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. The Friends would not walk on board, nor would the sailors hoist them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed: but it was immediately captured by the Dutch, who liberated twenty-eight of the prisoners in Holland, the rest having died of the plague. Few reached America.

QUARANTINE: the custom observed at Venice as early as 1127, whereby all merchants and others coming from the Levant were obliged to remain in the house of St. Lazarus, or the Lazaretto, forty days before they were admitted into the city. Various southern cities have now lazarettos; that of Venice is built in the water. In the times of plague, England and all other nations oblige those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe. Quarantine acts were passed in 1753 and in 1825. By order of council, 10 Nov. 1866, foreign cattle were made subject to quarantine.

QUATERNIONS, an important mathematical method or calculus, invented by Sir Wm. Rowan Hamilton, about 1843.

It is based upon the separation of multiplication from addition, and its fundamental idea is mental transference or motion by what he termed vectors. He attributed to addition motion from a point; to multiplication about a point. Four numbers are generally involved, hence the name quaternion. Hamilton's "Lectures on Quaternions," was published 1853; his "Elements," 1866. Other works by professors Kelland and Tait, published since.

QUATRE-BRAS (Belgium). Here on 16 June, 1815, two days before the battle of Waterloo, a battle was fought between the British and allied army under the duke of Brunswick, the prince of Orange, and sir Thomas Picton, and the French under marshal Ney. The British fought with remarkable intrepidity, notwithstanding their inferiority in number, and their fatigue through marching all the preceding night. The 42nd regiment (Royal Highlanders) suffered severely in pursuit of a French division by cuirassiers posted in ambush behind growing corn. The duke of Brunswick was killed.

QUEEN (Saxon, *cwen*; German, *königin*). The first woman invested with sovereign authority is said to have been Sebeknefrura, an Egyptian queen regnant of the 12th dynasty of Thebes, about 1650 B.C. In 1554 an act was passed "declaring that the regal power of this realm is in the queen's majesty [Mary] as fully and absolutely as ever it was in any of her most noble progenitors kings of this realm." The Hungarians called a queen-regnant king; see *Hungary*. John Knox's "Monstrous Regiment of Women," published 1555, against Mary queen of Scots, greatly offended Elizabeth of England.

In the bay admiral Hawke gained a complete victory over the French admiral Conflans, and thus defeated the projected invasion of Great Britain, 20 Nov. 1759. Quiberon was taken by some French regiments in the pay of England, 3 July, 1795; but on 21 July, through treachery, the French republicans, under Hoche, retook it by surprise, and many emigrants were executed. About 900 of the troops, and nearly 1500 royalist inhabitants who had joined

There are mines of it in various parts, the chief of which are at Almaden, in Spain, and at Idria, in Illyria; the latter, discovered by accident in 1497, for several years yielded 1200 tons. A mine was discovered at Ceylon in 1797; and at New Almaden and other places in California. Quicksilver was congealed in winter at St. Petersburg, in 1759. It was congealed in England by a chemical process, without snow or ice, by Mr. Walker, in 1787. Corrosive sublimate, a deadly poison, is a combination of mercury and chlorine; see *Calomel*.

QUIETISM, the doctrine of Miguel Molinos, a Spaniard (1627-96), whose work, the "Spiritual Guide," published in 1675, was the foundation of a sect in France. He held that religion consisted in an internal silent meditation on the merits of Christ and the mercies of God. Madame de la Mothe-Guyon, a quietist, was imprisoned in the Bastille for her visions and prophecies, but released through the interest of Fénelon, archbishop of Cambray, between whom and Bossuet, bishop of Meaux, arose a controversy, 1697. Quietism was finally condemned by pope Innocent XII. in 1699.

QUININE or **QUINIA**, an alkaloid (much used in medicine), discovered in 1820 by Pelletier and Caventou. It is a probable constituent of all genuine cinchona barks, especially of the yellow bark; see *Jesuits' Bark*. Artificial quinine was prepared (synthetically) by Mr. W. L. Scott, in Oct. 1865.—**QUINORDINE**, see *Fluorescence*. John Eliot Howard, promoter of the cultivation of cinchona in India, and author of "Quinologia" (1862) died 22 Nov. 1883.

QUINQUAGESIMA SUNDAY. The observation is said to have been appointed by Gregory the Great (pope, 590-604). Papirius Cursor, general in the Roman army, first erected a sun-dial in the temple of Quirinus, from which time the days began to be divided into hours, 293 B.C. *Aspen*. The sun-dial was sometimes called the *Quirinus*, from the original place in which it was set up. *Ashe*. The Sabines who became Roman citizens were termed *QUIRITES*.

RACES, one of the ancient games of Greece; see *Chariots*. Horse-races were known in England in very early times. Fitz-Stephen, in the days of Henry II., mentions the delight taken by the citizens of London in the diversion. In James I.'s reign Croydon in the south, and Garterly in the north, were celebrated courses. Near York there were races, and the prize was a little golden bell, 1607. *Camden*. In the end of Charles I.'s reign, races were performed at Hyde Park. Charles II. patronised them, and instead of bells, gave a silver bowl, or cup, value 100 guineas. William III. added to the plates (as did queen Anne), and founded an academy for riding.

The first racing calendar is said to have been published by John Cheney.

The *Jockey Club*, which now chiefly regulates races and the betting connected with them, was founded in 1750. Its gradually accumulating rules were modified in 1828 and revised in 1857.

He died in 1741, aged 26 years.

Eclipse was the fleetest horse that ran in England since the time of *Childers*; he was never beaten, and died in February, 1789, aged 25 years. His heart weighed 14 lb., which accounted for his wonderful spirit and courage. *Christie White's Hist. of the Turf*.

Lord Coke states from tradition that the duke of Exeter, in the reign of Henry VI., erected a rack of torture (thence called the duke of Exeter's daughter, now seen in the Tower, 1447).

In the case of Felton, who murdered the duke of Buckingham, the judges of England protested against the proposal of the privy council to put the assassin to the rack, as contrary to the laws, 1628; the use of the rack was abolished 1640. See *Ravallac* and *Torture*.

He died 1 Nov. 1714, leaving 40,000l. to the university of Oxford for the founding a library, the first stone of which was laid 17 May, 1737, and the edifice was opened 13 April, 1749. — The **RADCLIFFE OBSERVATORY**, Oxford, founded by the exertions of Dr. Hornsby, Savilian professor of astronomy, about 1771, was completed in 1794. RADICALS or "RADICAL REFORMERS," persons who professed to aim at procuring a thorough reformation in the government and policy of England, became prominent in 1816, when Hampden clubs were formed, of which sir Francis Burdett, lord Cochrane, major Cartwright, and William Cobbett were prominent members. Samuel Bamford's "Life of a Radical," published in 1842, gives much information; he died 13 April, 1872. Many

radicals were severely punished, 1817-20. Wm. Harris's "History of the Radical Party," published early in 1885.—The "Radicals" in the United States were the party headed by Thaddeus Stevens, bitterly opposed to the policy of president Johnson, as too favourable to the subdued Southern States.

The *Radical Programme*, advocated by the rt. hon. Joseph Chamberlain, widely circulated, first appeared July, 1885, in the *Fortnightly Review*; it included reform of the land laws, free education, increased local government, reform in taxation and finance, improvement of condition of agricultural labourers and of the poor, and religious equality and dis-establishment of national churches. Which tended to disorganise the liberal party.

Mr. C. C. Greville (*Journal*, 25 Aug. 1837) describes "Tory Radicals." Some politicians were so termed in 1885.

RAGGED SCHOOLS, free schools for outcast destitute ragged children, set up in large towns. The instruction is based on the scriptures, and most of the teachers are unpaid. John Pounds, a cobbler, of Portsmouth, who died in 1839, opened a school of this kind; and one was set up by Andrew Walker, in "Devil's Acre," Westminster, in 1839. *Knight*. They did not receive their name till 1844, when the "Ragged school union" was formed, principally by Mr. S. Starey and Mr. Wm. Locke (afterwards hon. secretary). The earl of Shaftesbury was chairman. In 1856 there were 150 Ragged school institutions. Sunday ragged schools reported in London in 1867, 226; in 1878, 177; day schools, in 1867, 204; in 1878, 58; week evening schools, in 1867, 207; in 1878, 147. Ragged school buildings were exempted from rates, 1869. The day schools are being gradually superseded by those established by the London school board; but the Sunday and night schools, mother's meetings, &c., are still maintained in very great efficiency (1886). The union has many affiliated institutions (1888). Dr. Guthrie, a founder of ragged schools in Edinburgh, &c., died 24 Feb. 1873. The earl of Shaftesbury presided at the 40th anniversary of the Ragged School Union, 12 May, 1884. See *Shoe-Black*.

The original was given up to Robert Bruce, king of Scotland, in 1328, when his son David was contracted in marriage to the princess Joanna of England.

taken by the French in 1806, and given up to Austria in 1814.

Patrick Bell stated that he invented a reaping-machine in 1826, which was used in 1827; the principle being that on which the best American machines are now constructed. McCormick's American machine was invented about 1831, and perfected in 1846; he received a gold medal from the jurors of the Exhibition of 1851; and also at the Royal Agricultural Society's competition at Bristol, 6 Aug. 1878. The

sheaves are bound by these reaping machines. About 200 patented; few good. Husey's machine, also American, exhibited in 1851, was highly commended.

* It was calculated (about 1856) that there were in London 30,000, and in England 100,000 youths under 17 leading a vagabond life, and that out of 15,000 of those who were committed for trial nearly half were in custody for the first time.

REGALIA, *see Crown*.

REGATTA. A public boat race, introduced into this country from Venice in 1775; and in that year one took place on the Thames.

REGELATION. *See Ice*.

REGENCY BILLS. One was passed 1751. One was proposed to parliament in consequence of the mental illness of George III., and debated 10 Dec. 1788. It was relinquished on his majesty's recovery, 26 Feb. 1789. The return of the malady led to the prince of Wales (afterwards George IV.) being sworn in before the privy council as regent of the kingdom, 5 Feb. 1811. The Regency Bill providing for the administration of the government, should the crown descend to the princess Victoria while under eighteen years of age, passed 1 Will. IV., 23 Dec. 1830. A Regency Bill appointing prince Albert regent in the event of the demise of the queen, should her next lineal successor be under age; passed 4 Aug. 1840.

REGENTS, *see Protectorates*.

REGENT'S CANAL, begun at Paddington, where it joins a cut to the Grand Junction, passes under Maida-hill, continues its course by the Regent's-park to Islington, where another subterranean excavation, about three-quarters of a mile in length, was formed for its passage. It then proceeds by Hoxton, Hackney, Mile-end, to Limehouse, where it joins the Thames. The whole length of it is nine miles; it comprises twelve locks and thirty-seven bridges. Begun, 1812; opened 1 Aug. 1820. Great explosion of *gunpowder* (*which see*), 2 Oct. 1874. New bridge, near Gloucester gate, Regent's park, opened by the duke of Cambridge, 3 Aug. 1878. Regent's Canal and City Railway Co. act passed, 1882.

REGENT'S PARK, originally part of the grounds belonging to a palace of queen Elizabeth, near to the north end of Tottenham court-road, pulled down in 1791. Since 1600, the property was let to various persons, but the leases having expired it reverted to the crown; and in 1814 great improvements were commenced under the direction of Mr. Nash. The park consists of about 450 acres; within it are the gardens of the Zoological Society and the Royal Botanical Society. During a frost on 15 Jan. 1867, the rotten ice of one of the lakes gave way, and about 200 persons were immersed, of whom above 40 perished. Addition of 20 acres made to the public park, 1883.

Joseph Rumbold was murdered near York Gate, 24 May. Eight youths, George Galleley, 17, William Elvis, 16, Francis Coles, 18, Peter Lee, 17, William Joseph Grace, 17, William Henshaw, 16, Charles Henry Govier, 16, and Michael Duling, 15, all described as labourers, were charged with the wilful murder, 4 Aug.; Galleley was convicted; the rest acquitted of murder, 2 Aug.; they pleaded guilty to minor charges, and were sentenced to various terms of penal servitude, 4 Aug. The evidence disclosed the existence of local bands of young roughs carrying on internecine warfare. Joseph Rumbold was not the intended victim; Galleley reprieved, Aug. 1888.

REGENT STREET, London, W.; designed and executed by John Nash; authorised by act, 53 George III. 1813. The colonnades of the quadrant were removed in 1848.

REGGIO, *see Rhegium*.

REGICIDES, in English history, are the commissioners appointed to try king Charles I., 150 in number; of whom 70 acted, and 59 signed the

death-warrant, Jan. 1649. Of these last, 29 were tried, and 10 executed: Harrison, 13 Oct.; and Peters, 16 Oct.; Scott, Scroop, Clement, Jones, 17 Oct.; Axtell and Hacker, 19 Oct. They asserted themselves to be martyrs. Others were imprisoned. *See Assassinations*.

REGIMENTAL EXCHANGE ACT passed 28 May, 1875.

REGIMENTS OF INFANTRY were formed in France about 1588; *see Infantry*. The following are the approximate dates of the establishment of several British regiments:—

CAVALRY.

Oxford Blues are erroneously said to have been formed in the reign of Henry VIII.; they derive their name from their colonel, the earl of Oxford, in 1602.
Three Indian regiments (19th, 20th, and 21st) added 1801.
The Dragon Guards, the Royal Irish, and the Scots Greys were formed by James II., about 1684.
Several regiments of Light Dragoons were armed with lances and termed *Lancers* Sept. 1802.

INFANTRY (*see Guards*).

1st Royal or Royal Scots regiment, 1633; the old title resumed Dec. 1707.
Coldstream Guards, established by Monk, in 1688.
3rd Buffs, represent London train bands and have special privileges 1704.
2nd Queen's Royal 1686.
4th King's Own 1686.
5th Northumberland Fusiliers 1686.
26th Cameronian 1802.
100th Canadian 1802.
101st to 109th (Indian) added Aug. 1881.
The Highland regiments are the 42nd, 71st, 72nd, 78th, 79th, 92nd, and 93rd. *See Army Organization*.

REGISTERS. The registering of deeds and conveyances disposing of real estates was appointed to be effected in Yorkshire and in Middlesex, 2 Anne, 1703, *et seq.* Greater security was thus given to purchasers and mortgagees; and the value of estates increased in those counties. Wills have been for a series of years kept and registered in London, at Doctors' Commons; *see Wills*. The registering of shipping in the Thames was commenced, 1786; and throughout England, 1787; and several acts and amendments of acts have since followed for keeping and improving registers.

The duties and payments of the Lord Clerk Register of Scotland and his deputy were regulated by 42 & 43 Vict. c. 44 1879.

REGISTERS, PAROCHIAL, were established by Cromwell, lord Essex, by which the dates of births, marriages, and burials, became ascertainable, Sept. 1538. This measure was opposed by the people, who feared some new taxation. A stamp-tax was laid on registers in 1784. Laws for their better regulation were enacted in 1813 *et seq.* The great Registration act (introduced by lord John Russell), 6 & 7 Will. IV. c. 86, passed 17 Aug. 1836; *see Bills of Mortality, &c.*

A new registration act for births and deaths, passed 7 Aug. 1874, came into operation 1 Jan. 1875.
Major George Graham, the first registrar-general (1838), was succeeded by sir Brydges Powell Henmiker, appointed Jan. 1880.

RENNES (capital of Brittany, N. W. France). Here was established by Henry II., in 1553, the parliament so celebrated for its independence, especially in its struggle with the court, 1788-89. On 20 May, 1788, it declared infamous every one who should take part in the *cour plénière* then proposed, but afterwards suppressed.

RENTS said to have been first made payable in money, instead of in kind, about 1135. Numerous statutes have been enacted in various reigns to define the relations and regulate the dealings between landlord and tenant. 8 & 9 Vict. c. 106 (1845) regulates leases. By the act 8 Anne, 1709, no goods are removable from tenements under an execution until the rent shall have been paid to the landlord by the sheriff, 1709. The rental of England, including land, houses, and mines, was 6,000,000*l.* about the year 1600, and twelve years' purchase the value of land. About 1690, the rental amounted to 14,000,000*l.*, and the land was worth eighteen years' purchase. *Davenport on the Revenues*. The rental of the United Kingdom has been estimated in the present century at 127,000,000*l.*; Great anti-riental agitation in Ireland, 1879, *et seq.*; see *Land and Ireland*, &c.

REPEAL OF THE UNION, IRELAND. An Irish association was formed with this object under the auspices of Mr. O'Connell, in 1829. See *Home Rule and Ireland*.

A proclamation of the lord lieutenant prohibited the meetings of a society "leagued for the purpose of procuring a repeal of the union, under the name of the Irish Society for Legal and Legislative Relief, or the Anti-Union Society" . . . 18 Oct. 1830. The commons, by a majority of 484, reject Mr. O'Connell's motion for repeal . . . 27 April, 1834

A new association in 1841, 1842, and 1843 became more violent. Assemblies of the lower classes of the people were held in the last-named year, in various parts of Ireland, some of them amounting to 150,000 persons, and called "monster meetings."

A great meeting at Trim, 16 March; other meetings were held at Mullingar, Cork, and Longford, on 14, 21, and 28 May, respectively; at Drogheda, Kilkenny, Mallow, and Dundalk, on 5, 8, 11, and 29 June; at Donnybrook and Balinglass, 3 and 20 July; at Tara, 15 Aug.; at Loughrea, Clifton, and Lismore, 10, 17, and 24 Sept.; and at Mullaghmast . . . 1 Oct. 1843

A meeting to be held at Clontarf, on 8 Oct. was prevented by government; and Mr. O'Connell and his chief associates were brought to trial for political conspiracy, 15 Jan. 1844; and convicted 12 Feb.; but the sentence was reversed by the house of lords, 4 Sept.; see *Trials*.

The association for the repeal of the union continued for some time under the direction of Mr. John O'Connell, but was little regarded.

The total "repeal rent" is said to have amounted to 134,379*l.*

A fruitless attempt was made in Dublin to revive repeal agitation . . . 4 Dec. 1860

REPLENISHER, see *Electricity (Frictional)*.

REPORTING. The publication of the debates in parliament is forbidden as a breach of privilege, but was virtually conceded, after a severe struggle, in 1771.* Reporters' galleries were erected in the

houses of parliament after the fire of 1834. Total unfettered liberty of reporting we doubtless owe much of our freedom and good government to under *Law*. By the verdict for the defendant in the case of *Wason v. The Times* (for libel) report of parliamentary debates were decided to be privileged, Nov. 1868. For the attempted exclusion of reporters, see *Parliament*, 1875. A commons committee on reporting recommended continuance of Hansard's debates with improvement, May, 1879. The publication of Hansard's parliamentary debates began 1803 and closed in 1888; the publication of the debates was taken up by Messrs. Macnair, Curteis & Co. . . . Feb. 1888

REPRESENTATION OF THE PEOPLE ACT FOR ENGLAND, passed 15 Aug. 1832; for Ireland and Scotland, 13 July, 1868; a new act passed, 6 Dec. 1884. See *Reform*.

"REPTILE BUREAUCRACY," term applied in Germany to certain journalists writing in government pay, 1871, *et seq.*

REPUBLICANS, see *Democrats*. Sir Charles Dilke, M.P. professed himself a republican at public meetings and was much applauded, Nov. 1871; but at some places his appearance led to riotous proceedings. His motion for returns respecting the expenditure of the civil list by the queen was rejected in the house of commons (2—276), 19 March, 1872. A national republican conference of delegates was held at Sheffield, 1 Dec. 1872, when a national flag was adopted.

REPUBLICS, see *Athens, Rome, Greece, Venice, France* (1792, 1848, 1870), and *Spain* (1833).

REQUESTS, COURTS OF; see *Court of Chancery*.

REQUIEM, a solemn mass, sung for the dead, so called from the introit "*Requiem Eternam*," &c. Palestrina's Requiem was printed at Rome, 1591; Vittoria's at Madrid, 1605; Mozart's last work was a requiem, 1791.

REREDOS, the screen or decorated portion of the wall behind the altar in a church.

A highly sculptured reredos, designed by sir G. G. Scott, was erected in Exeter cathedral, by subscription . . . 1873

Prebendary Philpotts, the chancellor, and others who objected, brought their objections before the bishop's visitation court, on 7 Jan.; it was decided that the bishop had jurisdiction in the matter, and he ordered the reredos to be removed, 15 April, 1874. Dean Boyd appealed to the court of arches, and sir R. Phillimore reversed the previous decision . . . 6 Aug. 1874

Prebendary Philpotts appealed to the judicial committee of the privy council, who decided that the reredos should remain . . . 24 Feb. 1875

The magnificent reredos set up in St. Paul's Cathedral, London, was protested against as idolatrous by some of the London clergy, April, 1888. An action against the dean having been stopped by the bishop, an action was brought against him in the queen's bench division in Nov. Chief Justice Coleridge, Justice Manisty, and baron Pollock ordered the bishop to withdraw his veto upon the prosecution . . . 1 June, 1888

RESERVE FORCES. In the summer of 1859, acts were passed to provide for the establishment of a military reserve force of men who have been in her majesty's service (not to exceed 20,000), and a volunteer reserve force of seamen not to exceed 30,000. These acts were consolidated and amended in 1867 and 1882. The reserve forces called out by proclamation, on account of possible war with Russia, 2 April, 1878. About 35,000 good soldiers appeared, and were commended. They were disbanded 31

* Very inaccurate reports of parliamentary debates were inserted in the *Gentleman's Magazine* and other periodicals in the middle of the last century. Miller, printer of the *London Evening Mail*, was arrested in the city of London, by order of the house of commons, for publishing the debates, but was discharged by the lord mayor, who for doing this was sent to the Tower, where he remained until the end of the session. No opposition was made to the publication of the debates in the next session, 1772.

Aug. 1878. Again called out on account of war in Egypt, 25 July, 1882, and prospect of war with Russia, 27 March, 1885.

RESOLUTE, ship, see *Franklin Search*, 854.

RESONATOR, a small apparatus, placed in the mouth to strengthen and increase the volume of the voice in singing, invented by signor Alberto Bach, who exhibited its effects at the Royal Academy of Music, 29 June, 1880.

RESPIRATORS, see *Charcoal and Fireman*.

RESTITUTION BILL, of Mr. Jesse Colings, proposes the surrender of lands illegally taken from commons, to be given to small cultivators, to become peasant proprietors, Jan. 1885.

RESTORATION, THE, of king Charles II. of the crown of England, after an interregnum of eleven years and four months, between 30 Jan. 1649, when Charles I. was beheaded, and 29 May, 1660, when Charles II. entered London amidst the acclamations of the people. The annual form of prayer, with thanksgiving, then appointed, was ordered to be disused by 22 Vict. c. 2, 25 March, 1849. See *France*, 1814, 1815.

RETREAT OF THE TEN THOUSAND GREEKS, who had joined the army of the younger Cyrus in his revolt against his brother, Artaxerxes Mnemon. The Greeks were victors, but Cyrus was defeated and slain at the battle of Cunaxa, 401 B.C. Artaxerxes having enticed the Greek leaders into his power and killed them, Xenophon was called to the command of his countrymen. Under continual alarms from sudden attacks, he led them across rapid rivers, through vast deserts, over the tops of mountains, till he reached the sea. The Greeks returned home after a march of 1155 parasangs or leagues (3465 miles), which was performed in 215 days, after the absence of fifteen months. This retreat has been immortalised by the account given by its conductor, in his "*Anabasis Cyri*" (*Expedition of Cyrus*).

REUNION, see *Order*.

REUSS-GREIZ AND REUSS-SCHLEIZ, two principalities in central Germany, with a united population of 166,502 in 1885. The reigning family sprang from Ekbert, count of Osterode, in the 10th century. The princely dignity was conferred by the emperor Sigismund in 1426.

1859. Henry XXII., prince of Reuss-Greiz, 8 Nov.; born 28 March, 1846.

REVELATION, see *Apocalypse*.

REVENUE AND EXPENDITURE OF ENGLAND. The revenue collected for the civil list, and for all the other charges of government, as well ordinary as extraordinary, was 1,200,000*l.* per annum, in 1660, the first after the restoration of Charles II. In 1690 it was raised to 6,000,000*l.*, every branch of the revenue being anticipated; this was the origin of the funds and the national debt, 2 William and Mary. *Salmon*. The revenue laws were amended in 1861. Previously to 1854 there had been an average *surplus* of 2,500,000*l.* since 1849. In consequence of the Russian war the *deficiency* in 1854 was 3,209,059*l.*; in 1855, 21,141,183*l.*; in 1856, 10,104,412*l.* In 1857 there was a *surplus* of 36,097*l.*; in 1858, of 1,127,657*l.*; in 1859, a *deficiency* of 2,019,584*l.*

* Revised in relation to army, navy, and India.

The weekly instead of the quarterly publication of the public revenue and expenditure was begun by Mr. Robert Lowe, the chancellor of the exchequer, 16 Feb. 1870. By an act passed 31 July, 1868, revenue officers are permitted to vote for the election of members of parliament. Above 100 statutes relating to inland revenue fell into disuse 1 Jan. 1871.

The revenue friendly societies, and national debt act, 45 & 46 Vict. c. 73, passed 18 Aug. 1882. New revenue act passed, 1884.

REVEREND, an honorary appellation given to the clergy, since the middle of the 17th century. In Tamworth parish register the minister is first styled "reverend," in 1657, occasionally afterwards; but regularly so after 1727. It first appears in the registry of All Hallows, Barking, 1732. The prefix on a family tombstone was refused to Mr. Keet, a Wesleyan preacher, by the bishop of Lincoln, but given by the archbishop of Canterbury 1874. On trial, Mr. Walter G. F. Phillimore, the chancellor of Lincoln, decided against Mr. Keet, who gave notice of appeal, 3 June. Sir R. Phillimore gave a similar decision in the court of arches, 31 July, 1875. On appeal to the privy council these decisions were reversed. It was decided that there is no law or usage restricting the epithet to ministers of the Church of England; it is merely laudatory. 21 Jan. 1876.

REVIEWS. The *Journal des Scavans*, published on 5 Jan. 1665, by Denis de Salo, under the name of Hédouville, was the parent of critical journals. It was soon imitated throughout Europe, and was itself translated into various languages. It is still published. George III. spoke of this publication to Dr. Johnson, in the private interview with which he was honoured by his majesty, in the library of the queen's house, in Feb. 1767. *Boncell.* The *Bibliothèque Anglaise* came out in 1716-27. REVISING BARRISTERS' COURTS, to examine the lists of voters for members of parliament, were instituted by the Reform Act of 1832.

REVISION, see under *Bible*. Advocates of the revision of the French constitution, chiefly Bonapartists or Jeromists, termed *Revisionists*, Feb. 1884.

REVIVALS on the subject of religion arose in the United States in 1857. In the autumn of 1859, they began in Scotland, the north of Ireland (particularly Belfast), and England. Many meetings were held for prayers and preaching throughout the week, as well as on Sundays. The "*twelve days' mission*," a series of revival services, took place in many London churches during advent, 1869.

Mr. Moody, preacher, and Mr. Sankey, singer, American Revivalists, visited many towns in the United Kingdom, 1874-5. Their meetings in London began at the Agricultural Hall, 9 March, about 15,000 present; at the Queen's theatre, Haymarket, 12 April; 31 May; farewell meeting, 12 July, 1875. Moody and Sankey again in London, 6 Oct. 1881; 3 Nov. 1883-23 June, 1884.

REVOLVERS, see *Pistols*.

REVUE DES DEUX MONDES, the French literary and historical periodical published on the 1st and 15th of each month, first appeared in 1831. It includes among its contributors the most eminent writers in France.

REYNARD THE FOX, "*REINEKE FUCHS*," a satirical epic in low German, in which beasts are actors and speakers, was first printed as Reineke Vos, at Lubeck in 1498, and professes to be written by Hinreck van Alkmar. It has been frequently translated. Goethe's version in High (or literary) German hexameters appeared in 1794. Jacob Grimm has shown that the subject-matter of this "*Thier-sage*" or "*beast-fable*" is very ancient, many incidents being found in Pilpay and other oriental writers. The early French had a "*Roman de Renart*," and "*Renart le Nouvel*." A poem, entitled "*der Reinaert*," in Flemish, was known in the 11th century; Caxton's translation in English prose was printed 1481; a poetic English translation of Goethe's version, by T. J. Arnold, appeared in 1855.

REZONVILLE, BATTLE OF, 18 Aug. 1870, see *Metz*.

RHÆTIA (or *RÆTIA*), an ancient Alpine country, comprising the modern Grisons, Tyrol, and part of Lombardy, inhabited by a wild rapa-

people, after a long struggle was conquered by *rusus* and *Tiberius*, B.C. 15.

HE, ISLE OF, see *Ré* and *Rochele*.

HEA, see *China Grass*.

HEGIUM (now Reggio), S. Italy, a Greek city, flourished in the 5th century, B.C. It was by the Campanian legion, 281-271, afterwards re-ly punished for its rebellion. Reggio was a by Garibaldi, Aug. 1860.

HEIMS (N. France). The principal church, built before 406, rebuilt in the 12th century, is very beautiful. The corpse of St. Remy, the bishop, is preserved behind the high altar, in a magnificent shrine. The kings of France were crowned at Rheims; probably because Clovis, the founder of the French monarchy, when converted to paganism, was baptized in the cathedral in Rheims. Several ecclesiastical councils have been held there. The city was taken and retaken several times in the last months of the French war, 1814. University founded by cardinal Lorraine, 1547, suppressed about 1790.

RHEOMETER, see under *Electricity*.

RHETORIC. Rhetorical points and accents were invented by Aristophanes of Byzantium, 200 B.C. Rhetoric was first taught in Latin at Rome by Marcus Terentius Varro, about 87 B.C. He taught Cicero, who said "We are first to consider what is to be said; secondly, how; thirdly, in what words; and finally, how it is to be ornamented." A professor of rhetoric was appointed in Edinburgh, April, 1762, when Dr. Blair became first professor.

RHINE (Latin, *Rhenus*; German, *Rhein*; French, *Rhin*), a river, about 760 miles long, rising in Switzerland, receiving the Moselle, Main, Meuse, Rhur, and other rivers, terminating in many places in Holland, and falling into the German Ocean. On its banks are Constance, Basel, Strasbourg, Spire, Mannheim, Cologne, Düsseldorf, Bonn, and Leyden. The possession of the banks of the Rhine has been the cause of many wars, and has been crossed by the French above twenty times in a century. In the beginning of the revolutionary war, Custine invaded Germany by crossing in 1792; and at the close of the war in 1815, France retained the left bank, but lost it at the close of the Franco-Prussian war, 1870-1 (which see). A navigation treaty with other powers was signed by France, 17 Oct. 1868. A central committee for the navigation exists, formed by members for Alsace, Lorraine, Baden, Bavaria, Hesse, Holland, and Prussia. Very great damage (about 4,000,000 l.) and loss of life, caused by the rising of the river through excessive rain, end of November and December, 1882; relieved by government grants.

A German song "They shall not have it, the free German Rhine;" and Alfred de Musset's reply, in French, "We have had it, your German Rhine," appeared in 1841. Max Schneckenburger, author of "The Watch on the Rhine," died 1851. All were popular during the war, 1870-71.

RHODE ISLAND (N. America), settled by Roger Williams about 1639, was taken in the war of independence by the British, 8 Dec. 1776; but was evacuated by them, 25 Oct. 1779. Population in 1880, 276,531; see *United States*.

RHODES, an island on the coast of Asia Minor, is said to have been peopled from Crete, as early as 916 B.C. The Rhodians were great navigators, and institutors of a maritime code after-

wards adopted by the Romans. The city was built about 432 and flourished 300-200 B.C.; see *Colossus*. Rhodes, long an ally of the Romans, was taken by the emperor Vespasian, A.D. 71. It was held by the Knights Hospitallers from 1309 to 1522, when it was conquered by the Turks, who still retain it. The knights retired to Malta (which see). Rhodes suffered severely by an earthquake on 22 April, 1863.

RHODIUM, a rare metal, discovered in platinum ore, by Dr. Wollaston in 1804. It has been used for the points of metallic pens.

RHODOPE MOUNTAINS (Turkish, *Des-poto Dag*), a plateau in Roumelia.

In these about 150,000 Mahometans took refuge during the Russo-Turkish war, on the approach of the Russians in Dec. 1877, and Jan. 1878; and resisted the invaders. The Russians were accused of killing and outraging thousands of men, women, and children. A European commission of inquiry; met 21 July; closed, 26 Aug.; confirmed the statements, but issued no united report; some members seceded.

The insurgents asserted that they were not resisting the sultan himself, but maladministration. They are governed by an English chief, col. St. Clair, who receives the taxes, &c., and is styled "commander-in-chief of the national army of the Rhodope" Sept. 1878. About 40,000 destitute; reported 18 Jan. 1879. The insurrection gradually subsided.

RHUBARB. This plant was first cultivated for its stalks to be used as food by Mr. Myall, of Deptford, about 1820, and soon after came into general use.

RHUDDLAN, statute of, see *Wales*, 1283.

RIALTO, BRIDGE OF THE, at Venice (mentioned by Shakespeare in his "*Merchant of Venice*"), built about 1590, consists of a marble arch across the Grand Canal, 90 feet wide and 24 feet high.

RIBBONISM, a term given to the principles of a secret society in Ireland, organised about 1820, to retaliate on landlords any injuries done to their tenants. To the ribbonmen are attributed many of the agrarian murders, 1858-71-79. An act was passed to repress them, 16 June, 1871.

RICE, the *Oryza sativa* of botanists, in the husk termed paddy; largely grown in intertropical regions, occupying the same place as wheat in the warmer parts of Europe. It was conveyed to South Carolina near the end of the 17th century, and its cultivation greatly increased.

The duty on foreign rice, 75s., on colonial rice, 1s. per cwt., was reduced by sir Robert Peel in 1842 to 6s. 3d. and 6s. 6d. respectively. Further reductions were made in 1846, and in 1860 the duty was totally abolished. Imported into Britain: 1846, 770,604 cwt.; 1856, 3,724,695 cwt.; 1866, 2,309,494 cwt.; 1856, 3,700,124 cwt.; 1866, 2,276,792 cwt.; 1877, 6,617,739 cwt.; 1879, 6,857,330 cwt.; 1881, 8,500,062 cwt.; 1883, 7,747,725 cwt.; 1885, 5,588,650 cwt.; 1887, 5,019,512 cwt.

RICHMOND (Surrey), anciently called Sheen, which in the Saxon tongue signifies *resplendent*. Here stood a palace in which Edward I. and II. resided, and Edward III. died, 1377. Here also died Anne, queen of Richard II., 1394. The palace was repaired by Henry V., who founded three religious houses near it. In 1497 it was destroyed by fire; but Henry VII. rebuilt it, and commanded that the village should be called Richmond, he having borne the title of earl of Richmond (Yorkshire) before he obtained the crown: and here he died in 1509. Queen Elizabeth was a prisoner in this palace for a short time during the reign of her sister. When she became queen it was one of her

favourite places of residence; and here she died 24 March, 1603. It was afterwards the residence of Henry, prince of Wales. The beautiful park and gardens were enclosed by Charles I. The observatory was built by sir W. Chambers in 1769. In Richmond, Thomson "sang the Seasons and their change;" and died 27 Aug. 1748.

The Star and Garter tavern burnt; W. Lever, the manager, perished 15 Jan. 1870
Mrs. Julia Martha Thomas was murdered at Richmond, her body cut up, put in bags and cast into river Thames, by Katherine Webster, aged 30, about 2 March; John Church, a publican, arrested on suspicion, discharged 17 April; Webster committed for trial, 16 May; convicted, 8 July; confessed; executed at Wandsworth 29 July, 1879

RICHMOND (Virginia, U.S.) became the capital of the southern confederate states. The congress adjourned from Montgomery, Alabama, to Richmond, where it met 20 July, 1861. After a siege of 1452 days and many desperate battles, Richmond was evacuated by the confederates, 2 April, 1865; see *United States*. By the fall of the flooring in the state capital building, about 60 persons were killed. 27 April, 1870. A statue of "Stonewall" Jackson (subscribed for by Englishmen), was unveiled here in presence of his wife and child, 26 Oct. 1875. Population 1880, 63,600.

RIGHTS, BILL OF. To the PETITION OF RIOTERS, preferred 17 March, 1627-8, Charles I. answered, "I will that right be done according to the laws and customs of the realm." Both houses addressed the king for a fuller answer to their petition of rights, whereupon he gave them an answer less evasive, "*Soit droit fait comme il est désiré*," 7 June, 1628. The petition thus became a statute 13 Car. I. c. 1. An important declaration was made by the lords and commons of England to the prince and princess of Orange on 13 Feb. 1689, in an act "declaring the rights and liberties of the subject, and settling the succession of the crown." The Bill of Rights, virtually the same as the declaration, was passed by parliament. It totally abolished the dispensing power of the crown, Oct. 1689. See *Claim of Right*.

RINDERPEST, German for cattle plague (which see).

RING DES NIBELUNGEN, see *Nibelunge Nôt*.

RINGS anciently had a seal or signet engraved on them, to seal writings, and they are so used to this day. In *Genesis* xli. 42, it is said that Pharaoh gave Joseph his ring. Rings are now put upon women's fourth finger at marriage; but the Jews used them at the espousal or contract before marriage. Wedding-rings are to be of standard gold by statute, 1855.

RINK (from the Gaelic *rian*, or Saxon *rean*, course), a term used in the Scotch game, "cutting." The Belgravia skating rink, London, S.W., was opened to the public 24 Dec. 1852. Others since at Brighton and other places. Skates with rollers (said to have been introduced in 1800 by Meyerbeer's "Prophète," at Paris, 10 April, 1849), are used. Mr. Plimpton, an American, patented roller-skates in 1865; his right was affirmed on a trial for infringement. 28 Jan. 1870. See *Glaciarium*.

RITCHIE'S ACT, see under *Local Government*.

RITUALISTS, a name given in 1866 to a party in the church of England, formerly termed Puseyites, for endeavouring to give a more imposing character to public worship, by the use of coloured vestments, lighted candles, incense, &c., professing to go back to the practices of the church in the time of Edward VI. An exhibition of these things was held during the church congress at York in Oct. 1866, but was not officially connected with it. The practices of the ritualists (said by Mr. Disraeli to be symbolical of doctrines they were bound to renounce), were censured in several episcopal charges in Dec. 1866; in two reports of the ritualistic commission, 19 Aug. 1867, and April, 1868, and by the judicial committee of the privy council on appeal, 23 Dec. 1868. See *Church of England and Trials*, 1867-9. At a general convocation of the American episcopal church at Philadelphia, 27, 28 Oct. 1868, after a warm discussion on ritualism, the discussion was adjourned. It was renewed at the convocation 10 Oct. 1874, and the ritualists were decidedly beaten by the evangelical party, a stringent canon on ceremonies being passed 27 Oct. The "Public Worship Regulation Act" was passed 7 Aug. 1874, for the repression of ritualism in England. See *Public Worship*.

RIVOLI (near Verona, N. Italy). Near here the Austrians defeated the French, 17 Nov. 1796; and were defeated by Bonaparte 14, 15 Jan. 1797. Massena was made duke of Rivoli for his share in the actions.

ROAD CLUB, established in the autumn of 1874 in London, by gentlemen interested in the revival of coaching.

ROAD MURDER. On the night of 29-30 June, 1860, Francis Savile Kent, four years old, was murdered, and his body hid in a garden water-closet at Road. His sister Constance Kent (aged sixteen), and the nurse Elizabeth Gough (the first suspected), were discharged for want

of evidence. The coroner was severely blamed for charging the jury improperly, but the court queen's bench, in Jan. 1861, refused to issue a writ for a new inquiry. Constance Kent, on 25 Apr. 1865, before sir Thomas Henry at Bow-street, at her trial at Salisbury, on 21 July following, confessed herself to be guilty of the murder. Her punishment was commuted to penal servitude for life. Let out on ticket-of-leave, 18 July, 1882. Road is near Frome, Somerset.

ROADS, see *Roman Roads*. The first general repair of the highways of this country was directed about 1285. Acts were passed for the purpose in 1524 and 1555, followed by others in Elizabeth and succeeding reigns. Roads through the Highlands of Scotland were begun by general Wade in 1726. Loudon M'Adam's roads were introduced about 1818. Wooden pavements were tried with partial success in the streets of London: at Whitehall in 1839, and in other streets in 1840; asphalt pavement soon after. An act "for the better management of the highways" was passed in 1836 after much opposition; another, 16 Aug. 1853, also regulated the use of locomotives on roads. Steam road-rollers were tried in 1867; used in London 18 March, 1868: see *Macadamising*, *Tolls*, and *Wooden Pavements*.

ROAD STEAMERS. Mr. R. W. Thomson, of Edinburgh, in 1868, by adding india-rubber to the tires of the wheels of locomotives is considered to have solved the question of steam traction on common roads. Road steamers have been successfully employed in Edinburgh and Leith for drawing heavy waggons up inclined planes, and are adaptable to any draught work. They were tried at Woolwich, 1 Oct. 1870, and reported successful by eminent authorities; and their application to ploughing by lord Dunmore was exhibited 1 Feb. 1871.

ROANOAKE, an island off N. Carolina, U.S. discovered by sir Walter Raleigh, 1584, and settled by him, 1585, without success. Other settlers also failed.

ROASTING ALIVE. An early instance is that of Boecchoris, king of Egypt, by order of Sabacon of Ethiopia, 737 B.C. *Longlet*. Sir John Oldcastle, lord Cobham, was thus put to death in 1418, and Michael Servetus for heresy at Geneva, 27 Oct. 1553; see *Burning Alive*, and *Martyrs*.

ROBBERS were punished with death by Edmund I.'s laws, which directed that the eldest robber should be hanged. Remarkable robbers in England were Robin Hood, 1189 (see *Robin Hood*), and Claud Du Val, "executed at Tyburn," says an historian quaintly, "to the great grief of the women," Jan. 1670. In Ireland, the famous Mac-Cabe was hanged at Naas, 19 Aug. 1691. Galloping Hogan, the rapparee, flourished at this period. Freney, the celebrated highwayman, surrendered himself, 10 May, 1749. The accomplished Barrington was transported, 22 Sept. 1790. See *Trials*.

ROBIN HOOD, captain of a band of robbers, in Sherwood forest, Nottinghamshire; traditionally reported to have been the earl of Huntingdon, disgraced and banished the court by Richard I. at his accession (1189). Robin Hood and Little John and their band are said to have continued their depredations till 1247, when Robin died. *Stow*.

"**ROBINSON CRUSOE**," by Daniel Defoe; the first part appeared in 1719. See *Juan Fernandez*. Three old ladies, Mary Ann, Jane

melia, and Sarah Frances De Foe, lineally descended from De Foe, pensioned by the queen, 1877.

ROBURITE, a new German explosive invented by Dr. Carl Roth, reported 1888.

ROCHEFORT (W. France), a seaport on the Gironde. The port was made by Louis XIV. in 1666. In Aix-roads or Basque-roads, near Rochefort, capt. lord Cochrane attacked the French fleet and destroyed four ships, 11-12 April, 1809. Near Rochefort, the emperor Napoleon surrendered himself to capt. Maitland of the *Bellerophon*, 15 July, 1815.

ROCHELLE (W. France), a seaport on the Atlantic, belonging to the English for some time, at last surrendered to the French leader, Du Ruesclin, in 1372. As a stronghold of the Calvinist party, it was vainly besieged by the duke of Anjou in 1573; and was taken after a siege of thirteen months by cardinal Richelieu in 1628. The duke of Buckingham was sent with a fleet and army to relieve it; but the citizens declined to admit him. He attacked the isle of Rhé, near Rochelle, and failed, 22 July, 1627. He was repulsed 8 Nov. following. A conspiracy here in 1822 caused loss of life to sergeant Bories and others.

ROCHESTER, in Kent, the Roman *Durobrivæ*. The bishopric, founded by Augustin, 604, is the next in age to Canterbury. The first cathedral was erected by Ethelbert, king of Kent. St. Justus was bishop in 604. Alterations were made in the diocese in 1845. Rochester is valued in the king's books at 35*l.* 3*s.* 2*d.* per annum. Present income 3,000*l.* The cathedral re-opened after repairs of the choir, 11 June, 1875. The old castle and grounds were purchased for the public by the Corporation, 1883. The "ten churches fund," begun by the bishop, 1884.

ROGATION WEEK. Rogation Sunday, the Sunday before Ascension-day, received its title from the Monday, Tuesday, and Wednesday following it, called Rogation days, derived from the Latin *rogare*, to beseech. Extraordinary prayers and supplications for these three days are said to have been appointed in the third century, as a preparation for the devout observance of our Saviour's ascension on the next day succeeding to them, denominated Holy Thursday or Ascension-day. The whole week in which these days happen is styled Rogation week; and in some parts it is still known by the other names of Crop week, Grass week, and Procession week. The perambulations of parishes have usually been made in this week.

ROHAN, an illustrious family, descended from the ancient sovereigns of Brittany. Henri de Rohan, son-in-law of the great Sully, after the death of Henry IV. (14 May, 1610), became head of the Protestant party, and sustained three wars against Louis XIII. He eventually entered the service of the duke of Saxe-Weimar, and died of wounds received in battle in 1638. Of this family was the cardinal de Rohan; see *Diamond Necklace*.

On the banishment of the Jews in 1290 the buildings now called the Rolls, and the chapel, were annexed by patent to the office of the keeper or master of the rolls of chancery, from which circumstance they took their name. A number of public records from the time of Richard III., kept in presses in this chapel, have been removed to the Record Office (*which see*).

ROMAGNA, a province of the papal states, comprised in the legations of Forlì and Ravenna. It was conquered by the Lombards; but taken from them by Pepin, and given to the pope, 753. Cæsar Borgia held it as a duchy in 1507, but lost it in 1503. In 1859 the Romagna threw off the temporal authority of the pope, and declared itself subject to the king of Sardinia, who accepted it in March, 1860. ROMAN LAW, see *Codes*; **ROMAN LITERA-
RE**, see *Latin*.

ROMAN ROADS IN ENGLAND. Our
torians maintain, but are mistaken, that there
re but four of these roads. *Camden*. "The
mans," says *Isidore*, "made roads almost all
r the world, to have their marches in a straight
e, and to employ the people;" and criminals were
quently condemned to work at such roads, as we
rn from *Suetonius*, in his life of *Caligula*. They
re commenced and completed at various periods,
ween the 2nd and 4th centuries, and the Roman
diery were employed in making them, that inac-
ity might not give them an opportunity to raise
turbances. *Bede*.

WATLING-STREET, so named from *Vitellianus*, who is
upposed to have directed it, the Britons calling him
n their language *Guelain* (from Kent to Cardigan
bay).

IKNIELD, or IKENILD-STREET, from its beginning
mong the *Iceni* (from St. David's to Tynemouth).
Fosse, or FOSE WAY, probably from its having
een defended by a fosse on both sides (from Cornwell
o Lincoln).

ERMIN-STREET, from *Irmensul*, a German word,
eaning Mercury, whom our German ancestors wor-
hipped under that name (from St. David's to South-
ampton).

ROMAN WALLS. One was erected by
icola (79 to 85) to defend Britain from the in-
ursions of the *Picts* and *Scots*; the first wall ex-
ded from the Tyne to the Solway frith (80 miles);
second from the frith of Forth, near Edinburgh,
the frith of Clyde, near Dumbarton (36 miles).
e former was renewed and strengthened by the
peror *Adrian* (121), and by *Septimius Severus*
(83). It commenced at *Bowness*, near *Carlisle*,
ended at *Wallsend* near *Newcastle*. It had
lements and towers to contain soldiers. The
re northern wall was renewed by *Lollius Urbicus*,
the reign of *Antoninus Pius*, about 140. Many
nains of these walls still exist, particularly of the
thern one; see *Bruce's "Roman Wall,"* pub-
lished 1853-1868.

ROMANCE, originally a composition in the
mance or Provençal idiom. The term in the
iddle ages was extended to narrative poetry in
veral. *Heliodorus*, a bishop of *Tricca*, in *Thessaly*,
out 398, was the author of *Æthiopica* (relating to
: loves of *Theagenes* and *Charicleia*), the first work
this species of writing. The first part of the
toman de la Rose" was written by *Guillaume de
res* (1226-70); the second, a separate poem, by
an de Meung (1285-1314), the *Decameron* of *Boc-
cio* was published, 1358; *Don Quixote*, by *Cer-
ntes*, 1605; *Gil Blas*, by *Le Sage*, 1715. *Dunlop's
History of Fiction*, published 1814. See *English
uthors*; "*Reynard the Fox*."

ROME. The foundation of the city, by

Varro, in the year 3961 of the Julian period (3551
years after the creation of the world, 753 years be-
fore the birth of Christ, 431 years after the Trojan
war, and in the fourth year of the sixth Olympiad.
Other dates given: *Cato*, 751; *Polybius*, 750;
Fabius Pictor, 747; *Cincius*, 728 B.C.) The Romans
conquered nearly the whole of the then known

was bounded by the *Euphrates*, *Taurus*, and *Armenia*
on the east; by *Æthiopia* on the south; by the
Danube on the north; and by the *Atlantic* on the
west. Numerous ecclesiastical councils have been
held at *Rome*, from 197 to 1869-70. Population,
1872, about 240,000; in 1877, 250,000; 1881, 300,467.
Chiefly through the exertions of *Mr. John Henry
Parker* of *Oxford*, the Roman exploration fund was
established, for the preservation of ancient archi-
tectural remains. His "Archeology of Rome" (with
many photographs) published, 1874-8. The Italian
government votes 1200*l.* a year for a similar pur-
pose. The early history of *Rome* is mythic, and
the dates purely conjectural.

RUBY MINES OF BURMAH, Tavernier (middle of the 17th century) describes it as a place where rubies and other precious stones are largely mined, in a country difficult of access. Similar accounts were given by Father Giuseppe d'Amato, about 1830. The largest stones were royal property. Bredemeyer had charge of these and others in 1868. Revenue about 1855, from 12,500*l.* 15,000*l.* per annum. These mines are now royal property (see under *Burmah*, 1885), and the use of them as a revenue is paid by the Shan States, 1887. An agreement respecting them was made between the Indian Government and Messrs. Carter & Co. of London, announced May, 1887; pending July, 1887. Working licences issued to sons on the spot, 1887. RUGBY SCHOOL (Warwickshire), was founded in 1567 by Lawrence Sheriff, a London tradesman; its arrangements were affected by the

Public Schools act 1868. Dr. Thomas Arnold, the historian, entered on the duties of head-master here in August, 1828, and under him the school greatly prospered. He died 12 June, 1842. See *New Rugby*.

Dr. H. Hayman, one of his successors, was opposed by the masters of the school, and after much dissension and discussion, was dismissed by the trustees, Dec. 1873, and Dr. Jex Blake elected in his room, Feb. 1874. Vice-Chancellor Mallins decided against Dr. Hayman in his attempt to set aside his dismissal, but expressed his own opinion on "the grievous hardship of Dr. Hayman's case," 21 March, 1874. Succeeded by Rev. J. Percival, Nov. 1886.

RUHMKORFF'S INDUCTION COIL, see *Induction*.

"**RULE, BRITANNIA.**" Nearly all the words are by James Thomson; the music, ascribed to Dr. Arne, is said by Scholcher (in his life of Handel) to have been taken from an air in Handel's "Occasional Oratorio" composed 1746, but the song and music were really printed in Dr. Arne's masque of "Alfred," 1740. *Grove*.

RULING MACHINES, used for ruling paper with faint lines, for merchants' account-books, &c. They were invented by an ingenious Dutchman, resident in London, in 1782, and were subsequently greatly improved by Woodmason, Payne, Brown, and others. They were improved in Scotland in 1803. An invention has lately rendered account-books perfect by the numbering of the pages with types, instead of the numbers being written by a pen, so that a page cannot be torn out from them without being discovered. The late Herr F. A. Nobert devised a ruling machine in 1845 for the production of microscopical test plates, diffraction gratings, and micrometers, specimens of which were exhibited in 1851. The test plates contain bands of lines in a graduated series of fineness from 1000 to 80000 of a Paris line.

RUM (French *rhum*), ardent spirit distilled from sugar lees and molasses, deriving its peculiar flavour from a volatile oil. Rum is principally made in the West Indies. The duty (since 1858) on colonial rum imported into the United Kingdom is 8*s.* 2*d.* per gallon. The duty on rum to be employed as methylated spirits was reduced in 1863.

When he requested to have some one near him to take notes, help his memory, he was answered, that any of his attendants might assist him; upon which he said, "My wife is here, and will do it for me." He was beheaded in Lincoln's-Inn-Fields, 21 Jan. 1683. Lady Russell survived him forty years, dying 29 Sept. 1723, in her eighty-seventh year. His attainder was reversed, 1 Will. III. 1689.

RUSSIA, the eastern part of ancient Sarmatia. The name is generally derived from the Roxolani, a Slavonic tribe. Ruric, a Varangian chief, appears to have been the first to establish a government, 862. His descendants ruled amid many vicissitudes till 1598. The progress of the Russian power under Peter the Great and Catherine II. is unequalled for rapidity in the history of the world. The established religion of Russia is the Greek church, with toleration of other sects, even Mahometans. By an imperial ukase, in 1802, six universities were established, viz., at St. Petersburg, Moscow, Wilna, Dorpat (in Livonia), Charcov, and Kasan; but literature made little progress till the present century, the native publications being very few, and the best books being translations. The Russian language, though not devoid of elegance, is, to a foreigner, of very difficult pronunciation: the number of letters and diphthongs, 44; the number of syllables, 187,482,159,630; in 1872, about 85,685,945; in 1882 (estimated), 86,952,347; in 1885, 108,843,102. In the first Russian budget (1862), the estimated revenue was 34,500,000*z.*; expenditure, 37,850,000*z.* Besides about 500 cathedrals, about 35,000 churches (Greek church, *which* see).

Russia invaded by the Huns. A.D. 754. Ruric the Norman or Varangian, arrives at Novgorod (or New City), and becomes grand duke (anniversary kept 20 Sept. 1865). Oleg successfully invades the Greek empire. Baptism of Olga, widow of duke Igor, at Constantinople, about 955. Vladimir the Great marries Anne, sister of the emperor Basil II., and is baptized. RUSSO-TURKISH WAR.* The Russian and French governments having each taken a side in the dispute between the Greek and Latin churches as to the exclusive possession of the *Holy Places* (which see) in Palestine, the Porte advised the formation of a mixed commission, which decided in favour of the Greeks, and a firman was promulgated accordingly, 9 March, 1853: to this decision the French acceded, although dissatisfied.

- The Russians make further claims, and prince Menschikoff (who arrived at Constantinople 28 Feb. 1853), by various notes (between 22 March and 18 May), demands that a convention should be signed by the sultan granting to the czar such a protectorate over the Greek Christians in Turkey, as the sultan considered inimical to his own authority.

* In 1844, when the czar was in England, he conversed with the duke of Wellington and lord Aberdeen (whom he had known many years) respecting the dissolution of the Turkish empire: and on his return he embodied his views in a memorandum drawn up by count Nesselrode, which was transmitted to London, but kept secret till March, 1854. In January and February of that year the czar had several conversations on the subject with the British envoy at St. Petersburg, sir G. H. Seymour, in one of which (Jan. 14) he compared Turkey to a "sick man" in a state of decrepitude, on the point of death, and made proposals to the British government as to the disposal of his property. He stated frankly that he would not permit the British to establish themselves at Constantinople; but said in another conversation, he would not object to their possessing Egypt. The purport of these conversations was conveyed in despatches to lord John Russell, who replied that the British government declined to make any provision for the contingency of the fall of Turkey. The czar made similar proposals to the French government with the same result.

RUTLAND, STATUTE OF, 10 or 12 Edw. I. 1282 or 1284.

RYE-HOUSE PLOT, a plot (some think pretended) to secure the succession of the duke of Monmouth to the throne in preference to the duke of York (afterwards James II.), a Roman catholic. Some of the conspirators are said to have projected the assassination of the king, Charles II., and his brother. This design is said to have been frustrated by the king's house at Newmarket accidentally taking fire, which hastened the royal party away eight days before the plot was to take effect, 22 March, 1683; see *Newmarket*. The plot was discovered 12 June following. Lord William Russell on 21 July, and Algernon Sidney on 7 Dec. following, suffered death for being concerned in this conspiracy. The name was derived from the conspirators' place of meeting, the Rye-house at Broxbourne, Hertfordshire.

SAALFIELD.

SAALFIELD (Saxony, N. Germany). Here the Prussians, under prince Louis of Prussia, were defeated and their leader slain by the French under Lannes, 10 Oct. 1806.

SAARBRÜCK, the Roman *Augusti Muri* or *Saracopons*, an open town on the left bank of the Saar, in Rhenish Prussia, founded in the tenth century, long subject to the bishops of Metz, afterwards ruled by counts (about 1237), and by the house of Nassau about 1380. It was captured by the French and retaken by the Germans 1676, reunited to France 1794-1814, and ceded to Prussia, 1815. On 2 Aug. 1870, it was bombarded by the French under Frossard (between 11 and 1 in the daytime), and the Prussians in small force were dislodged, and the town occupied by the French general Bataille. The mitrailleuses were said to be very effective. The emperor Napoleon, who was present with his son, said in a telegram to the empress, "Louis has gone through his baptism of fire. He has not been in the least startled. We stood in the foremost rank, and the rifle balls were dropping at our feet, and Louis picked up one that fell near him. His bearing was such as to draw tears from the soldiers' eyes." On the 6 Aug. the Prussian generals Goben and Von Steinmetz, with the first army, recaptured Saarbrück, after a sanguinary conflict at the village of Spicheren. The heights taken by the French on the 2nd are in Germany, those taken by the Germans on the 6th are in France, and both battles were fought between Saarbrück and the town of Forbach, which was captured and has given a name to the second conflict. The loss was great on both sides. The French general François was killed, and the 2nd corps under Frossard nearly destroyed. The French retreated to Metz. They were greatly superior in numbers at the beginning of the fight, but were badly commanded.

SABBATARIANS. Traces exist of Sabbatarii, or Sabbathaires, among the sects of the 16th century on the continent. Upon the publication of the "Book of Sports" in 1618, a violent controversy arose among English divines on two points: first, whether the Sabbath of the fourth commandment was in force among Christians; and secondly, whether, and on what ground, the first day of the week was entitled to be distinguished and observed as "the Sabbath." In 1628, Theophilus Brabourne, a clergyman, published the first work in favour of the Seventh-day or Saturday, as the true Christian Sabbath. He and several others suffered great persecution for this opinion; but after the restoration there were three or four congregations observing the last day of the week for public worship in London, and seven or eight in the country parts of England. In 1851 there were three Sabbatarian or Seventh-day Baptist congregations in England; but in America (especially in the New England states) they are more numerous.—Joseph Davis suffered imprisonment in 1670. He and his son bequeathed property to maintain the sect; and litigation respecting its disposal was settled by vice-chancellor Stuart in conformity with their intentions in June, 1870. Very few Sabbatarians then remained.

SACRAMENT.

SABBATH: ordained by God. Gen. i. *Exod.* xx. 8; *Isaiah* lviii. 13. Jews observe the seventh day in commemoration of the creation of the world, and of their redemption from the bondage of the Egyptians; Christians observe the first day of the week in commemoration of the resurrection of Christ from the dead, and the redemption of man; see *Sunday*.

SABBATH SCHOOLS, see *Sunday Schools*.

SABBATICAL YEAR: a Jewish institution. 1491 B.C. *Exodus* xxiii. During every seventh year the very ground had rest, and was not tilled; and every forty-ninth year all debts were forgiven, slaves set at liberty, and estates, &c., that were before sold or mortgaged, returned to their original families, &c.

SABELLIANISM, from Sabellius (of Psephis in Egypt), who flourished in the 3rd century, and who taught that there was but *one* person in the Godhead, the other persons of the Trinity being but different names of the same person. This doctrine was condemned at a council at Rome, 260.

SABINES, from whom the Romans, under Romulus, took away their daughters by force, having invited them to some public sports or show on purpose. When the Sabines determined to revenge this affront, the women became mediators to their fathers in behalf of their husbands, the Romans, and a lasting peace was made between them, 750 B.C. After many conflicts, the Sabines became a part of the Roman people, about 260 B.C. One of the ecclesiastical provinces is still called Terra Sabina; chief town, Magliano.

SACRAMENT (from *sacramentum*, an oath, obligation, also mystery). The Christian sacraments are baptism and the Lord's supper. The council of Trent, in 1547, affirmed the doctrine of the schoolmen that there are *seven* sacraments: baptism, the Lord's supper, confirmation, penance, holy orders, matrimony, and extreme unction. The name was given to the Lord's supper by the Latin fathers. The wine was restricted to the clergy about the beginning of the 12th century. Communion is one kind only was authoritatively sanctioned by the council of Constance, 15 June, 1415. Henry VIII. of Germany was poisoned by a priest by the consecrated wafer, 24 Aug. 1313. The sacramental wine was poisoned by the gravedigger of the church at Zürich, by which sacrilegious deed a number of persons lost their lives, 4 Sept. 1776. In 1874 members of both houses of parliament were ordered to take the sacrament, as a guard against the introduction of Roman Catholics. In 1673 the test act

as passed; repealed in 1828; see *Transubstantiation*.

Society of the Blessed Sacrament (English churchmen), London, founded, 1860; "Confraternity of the Blessed Sacrament," founded 1862; the two united, 1867. **ACRAMENTARIANS**, followers of Zwingle (1487-1531), who differed from the Romanists and Lutherans in regard to the sacrament.

SACRED HEART OF JESUS; a form of devotion said to have been instituted in England in the seventeenth century, and much promoted by Marguerite Marie Alacoque, an enthusiastic French nun, who asserted that Christ had appeared to her, and taken out her heart, placed it in his own, glowing in flame, and then returned it. She died in 1690.

They were conquered by Philip of Macedon, and their cities depopulated, 46. See *Crusades*.

SACRIFICE was offered to God by Abel, 3875 B.C. Sacrifices to the gods were introduced into Greece by Phoroneus, king of Argos, 1773 B.C. Human sacrifices seem to have originated with the Chaldeans, from whom the custom passed into other Eastern nations. All sacrifices to the true God were to cease with the sacrifice of Christ, 33 A.D. *Heb.* 12-14. Pagan sacrifices were forbidden by the emperor Constantine II. 341.

SACRILEGE. In 1835, the punishment (formerly death) was made transportation for life. By 24 & 25 Vict. c. 96, s. 50 (1861), breaking into a place of worship and stealing therefrom was made punishable with penal servitude for life.

SACRIPORTUS (Latium, Italy). Here Sylla defeated the younger Marius and Papirius Carbo with great slaughter, B.C. 82, and became dictator, 81.

SADDLES. In the earlier ages the Romans used neither saddles nor stirrups. Saddles were in use in the 3rd century, and are mentioned as made

of leather in 304, and were known in England about 600. Side-saddles for ladies were introduced by Anne, queen of Richard II. in 1388. *Stow*.

SADDUCEES, a Jewish sect, said to have been founded by Sadoc, a scholar of Antigonus, about 200 B.C., who, misinterpreting his master's doctrine, taught that there was neither heaven nor hell, angel nor spirit; that the soul was mortal, and that there was no resurrection of the body from the dead. The Sadducees rejected the oral law, maintained by the Pharisees. See *Matt.* xxii. 23; *Acts* xxiii. 8.

SADLER'S WELLS (N. London), so called after Mr. Sadler, who built an orchestra to entertain the invalids who used the waters medicinally, 1683. In time the orchestra was enclosed, and the building became a place for dramatic performances. The theatre was opened in 1765. Eighteen persons were trampled to death at this theatre, on a false alarm of fire, 18 Oct. 1807; see under *Theatres*. The theatre put up to auction and not sold, 31 Aug. 1875; and 30 July, 1878. Opened for miscellaneous entertainments, 6 Jan. 1877. Taken by Mrs. Bateman, Sept. 1878; partly rebuilt; opened as New Sadler's Wells on 9 Oct. 1879, with the opera "Rob Roy." Miss Isabella Bateman became manager after her mother's death, 13 Jan. 1881, but did not succeed. The house was opened with Shakespeare's "Twelfth Night," by Roze de Vane, 12 April, 1884.

SAFES. A National Safe Company, London, opened vaults for storage of valuables, 1876.

SAFETY LAMP. One was invented in 1815 by sir Humphry Davy, to prevent accidents which happen in coal and other mines. The safety-lamp is founded on the principle that flame, in passing through iron-wire meshes, loses so much of its heat as to be incapable of igniting inflammable gases. The father of all safety-lamps was Dr. Reid Clanny, of Sunderland, whose invention and improvements are authenticated in the *Transactions of the Society of Arts* for 1817. The "Geordy," constructed by George Stephenson, the engineer, in 1815, is said to be the safest. A miner's electric light, by M.M. Dumas and Benoit, was exhibited in Paris on 8 Sept. 1862. On 14 Aug. 1867, safety-lamps were rigidly tested by several mining engineers, and serious doubts thrown upon their complete efficacy. Col. Shakespear's safety lamp (light extinguished by opening) exhibited at Royal Institution, &c., May, 1879. Messrs. Fleuss and Foster's new safety mining lamp approved, Jan. 1884.

Mr. J. Wilson-Swan's electric safety lamp, weighing 6½ lb., exhibited at Aberdeen meeting of British Association, Sept. 1885.

Mr. Charles D. Aria's safety lamp reported successful; the supply of mineral oil is isolated from the burner, 1880.

SAFFRON (*saffran*, French; *saffrano*, Italian), the flower of crocus, was first brought to England in the reign of Edward III. by a pilgrim, about 1339, probably from Arabia, as the word is from the Arabic *saphar*. *Müller*. It was cultivated in England in 1582.

SAGE (*Sauge*, French; *Salvia*, Latin), a wholesome herb, comfortable to the brain and nerves. *Mortimer*. A species of this garden plant grew early in England, and some varieties were imported. The Mexican sage, *Salvia mexicana*, was brought from Mexico, 1724. The blue African sage, *Salvia africana*, and the golden African sage, *Salvia aurea*.

were brought to England from the Cape of Good Hope in 1731.

SAGUNTUM, or **ZACYNTHUS**, now Murviedro, in Valencia, E. Spain, renowned for the dreadful siege it sustained, 219 B.C. SALAMANCA (W. Spain), taken from the Saracens 861. The university was founded 1240, and the cathedral built 1513. Near here the British and allies, commanded by lord Wellington, totally defeated the French army under marshal Marmont, 22 July, 1812. The loss of the victors was most severe, amounting in killed, wounded, and missing, to nearly 6000 men. Marmont left in the victor's hands 7141 prisoners, 11 pieces of cannon, 6 stands of colours, and 2 eagles. This victory was followed by the capture of Madrid.

SALIQUE or **SALIC LAW**, by which females are excluded from inheriting the crown of France is said to have been instituted by Pharamond, and ratified in a council of state by Clovis I., the real founder of the French monarchy, in 507. *Hénault*. This law, introduced into Spain by the Bourbons 1700, was formally abolished by decree 29 March, 1830; and on the death of Ferdinand VII. his daughter succeeded as Isabella II., 29 Sept. 1833; see *Spain*. By this law also Hanover was separated from England, when queen Victoria ascended the English throne, 1837.

SALISBURY (Wilts), founded in the beginning of the 13th century, on the removal of the cathedral hither from Old Sarum. National councils or parliaments were repeatedly held at Salisbury, particularly in 1206, by Edward I.; in 1236, by Edward III.; and in 1384. Henry Stafford, duke of Buckingham, was executed here by order of Richard III., in 1483.—On **SALISBURY PLAIN** is Stonehenge (*which see*). This plain was estimated at 500,000 acres. On it were so many cross roads, and so few houses to take directions from, that Thomas earl of Pembroke, planted a tree at each milestone from Salisbury to Shaftesbury, for the traveller's guide. The autumn military manoeuvres took place on Salisbury Plain, Aug., Sept. 1872; see under *Army*.—The first seat of the BISHOPRIC was at Sherborne, St. Aldhelm being prelate, 705. Roman removed the seat to Old Sarum, about 1075, and the see was removed to Salisbury by a papal bull, in 1217. It has yielded to the church of Rome one saint and two cardinals. The building of the cathedral commenced 28 April, 1220, and was completed in 1258. This edifice is reckoned one of the finest ecclesiastical erections. Its spire, the loftiest in the kingdom, was considered in danger in April 1864, and subscriptions were begun for its immediate repair. The choir was re-opened, after restoration by sir G. G. Scott, 1 Nov. 1876. The bishopric is valued in the king's books at 1367 11s. 8d. Present income 5000l.

SALIENTINI, allies of the Samnites, the only Italian tribe not subject to Rome, were overcome in war in 267 and 266 B.C., and Brundisium, their port, taken.

SALMON FISHERIES. The laws relating to them were consolidated and amended in 1861, and the report of a commission of inquiry (including sir Wm. Jardine) was published, in Feb. 1862. An act restricting the capture of salmon at certain times, passed in 1863, was amended in 1869-1870, and 1873. During the "salmon fence," 14 Sept. to 1 Feb., it is unlawful to catch fish of the salmon kind. A salmon-fishery congress opened at South Kensington, 7 June, 1867. Salmon-eggs sent to New Zealand, Jan. 1878.

SALMON OVA, packed in boxes with moss, charcoal, and ice, to retard development—a plan suggested and proved practicable by Mr. E. H. Moscrop in 1863—adopted successfully by Mr. J. A. Youl, who sent ova to Australia in the "Norfolk," 1864.

SALONICA, see *Thessalonica*.

SALT (chloride of sodium, a compound of the gas chlorine and the metal sodium) is procured from the rocks in the earth, from salt-springs, and from sea-water. The famous salt-mines of Wielitzka, near Cracow in Poland, have been worked 600 years. The salt-works in Cheshire, called the **WICHES** (Nantwich, Northwich, and Middlewich), were of great importance in the time of the Saxon heptarchy. The salt-mines of Staffordshire were discovered about 1670. Salt duties were first exacted in 1702; they were renewed in 1732; reduced in 1823; and in that year were ordered to cease in 1825. During the French war the duty reached to 30s. per ton. For the salt-tax in France see *Gabelle*. The government salt monopoly in India was abolished in May, 1863, by sir C. Trevelyan. Since 1797 salt has been largely employed in the manufacture of chloride of lime or bleaching powder (by obtaining its chlorine), and soap (by obtaining its soda). On this are based the chemical works of Cheshire, Lancashire, and other places. See under *Alkalies*.

Much distress in the salt districts of Cheshire through the subsidence of land, 1887-8. The proprietors of the Cheshire salt mines combined to form a "trust" or syndicate in the autumn of 1888; central office, Northwich; the trade being nearly ruined by great competition, first meeting 27 Sept. 1888. Great advance in the price of salt Oct. 1888.

SALT LAKE, see *Mormonites*.

SALT-PETRE (from *sal petra*, salt of the rock), or **NITRE**, is a compound of nitric acid and potash (nitrogen, oxygen, and potassium), and hence is called nitrate of potash. It is the explosive ingredient in gunpowder, many detonating powders, and lucifer matches. Boyle in the 17th century demonstrated that salt-petre was composed of aqua fortis (nitric acid) and potash; the discoveries of Lavoisier (1777) and Davy (1807) showed

its real composition. Its manufacture in England began about 1625. During the French revolutionary war, the manufacture was greatly increased by the researches of Berthollet.

SALUTE AT SEA. It is a received maxim at sea, that he who returns the salute always fires fewer guns than he receives, which is done even between the ships of princes of equal dignity; but the Swedes and Danes return the compliment without regarding how many guns are fired to them. The English claim the right of being saluted first in all places, as sovereigns of the seas; the Venetians claimed this honour within their gulf, &c. The admiralty issued a code of rules for salutes, Dec. 1876. See *Flag*, and *Naval Salutes*.

It was previously called Guanahani, or Cat's Isle, and Columbus (in acknowledgment to God for his deliverance) named it San Salvador, 11 Oct. 1492. The capital, San Salvador, was destroyed by an earthquake, 16 April 1854, and is now abandoned.

SALVADOR, SAN, one of the republics of Central America, with a constitution established 24 Jan. 1859. General Barrios elected president 1 Feb. 1860, was compelled to flee in Oct. 1863; when Francis Dueñas became provisional president; his formal election took place April, 1865. The ex-president, Gerard Barrios, was surrendered by Nicaragua, tried and shot, Aug. 1865. A re-attempted revolution failed; Zaldívar fled; general Gonzales president, 1 Feb. 1872; R. Zaldívar, May, 1876; Gen. Menéndez, June, 1885; re-elected 1 March 1887 for four years. Population, 1886, 651,130. The capital, San Salvador, was nearly destroyed by an earthquake, 19 March, 1873, about 50 persons perished. The convulsion began 5 March and thus gave timely warning. A rebellion suppressed, 6–10 Sept. 1887.

"SALVATION ARMY," a name assumed by a body of persons terming themselves the "Christian Mission" (formed 1865), to deal with the lowest classes; Mr. William Booth, was general. A great "Hosanna" meeting to celebrate the formation of the 104th corps at Northampton, was held at the headquarters (with prayers, addresses, and singing), 272, Whitechapel-road, 30 June, 1879.

SAMAJ, or SOMAJ, see *Deism*.

SAMANIDE DYNASTY, began with Lerd Samani, who overcame the army of the Saffarids, and established himself in the government of Persia, 902; his descendants ruled till 999.

SAMARCAND (in Tartary) was conquered by the Mahometans, 707; by Genghis Khan, 1220, and by Timur, or Tamerlane, who ruled here in great splendour. Samarcand was occupied by the Russians under Kaufmann 26 May, 1868, after a conflict on the previous day. The garrison left, resisted a fierce siege till relieved by Kaufmann, 13–20 Jan. 1868.

SAMARITANS. Samaria was built by Omri, 925 B.C.; and became the capital of the kingdom of Israel. On the breaking up of that kingdom (721 B.C.), the conqueror Shalmaneser placed natives of other countries at Samaria. The descendants of these mixed races were abominable to the Jews, and much more so in consequence of the rival temple built on Mount Gerizim by Sanballat the Samaritan, 332 B.C., which was destroyed by John Hyrcanus, 130 B.C.; see *John* iv. & viii. 48, and *Luke* x. 33. The Samaritan Pentateuch (of uncertain origin) was published in his Polyglot by Morinus, 1622.

SAMOS, an island on the W. coast of Asia
 Minor. Colonised by Ionians about 1043 B.C. The
 city was founded about 986. Polycrates, ruler of
 Samos (532-22 B.C.), was one of the most able,
 fortunate, and treacherous of the Greek tyrants,
 and possessed a powerful fleet. He patronised
 Pythagoras (born here) and Anacreon. Samos was
 taken by the Athenians, 440; and, with Greece,
 became subject to Rome, 146. It was taken by the
 Venetians, A.D. 1125, who here made velvet (*samet*),
 and became subject to the Turks, about 1459.

It was made a principality by sultan Mahmoud in 1832;
 present prince, Constantine Adossides, born 23 Feb.,
 1822; appointed 4 March, 1879.

SAMPFORD COURTENAY (Devon).
 Here John, lord Russell, defeated the Cornish and
 Devonshire catholic rebels, the middle of Aug. 1549.

SANCTION, see *Pragmatic*.

SANCTUARIES, see *Asylums*. Privileged
 places for the safety of offenders are said to have
 been granted by king Lucius to churches and their
 precincts. St. John's of Beverley was thus pri-
 vileged in the time of the Saxons. St. Burian's,
 in Cornwall, was privileged by Athelstan, 935;
 Westminster, by Edward the Confessor; St. Mar-
 in's-le-Grand, 1529. Being much abused, the pri-
 vilege of sanctuary was limited by the pope in 1503
 at the request of Henry VII., and much reduced
 in 1540. In London, persons were secure from
 arrest in certain localities: these were the Minorities,
 Salisbury - court, Whitefriars, Fulwood's - rents,
 ditre-court, Baldwin's-gardens, the Savoy, Clink,
 Deadman's-place, Montague-close, and the Mint.
 This security was abolished 1697, but lasted in some
 degree till the reign of George II. (1727).

SANDALS, see *Shoes*.

SAND-BLAST. Gen. B. C. Tilghman, of
 Philadelphia, has invented a method of cutting stone
 or hard metal by a jet of quartz sand impelled by
 compressed air or steam. A hole of 1½ inch diameter
 and 1½ inch deep was bored through a block of
 orundum, nearly as hard as diamond, in 25
 minutes. The invention was submitted to the Frank-
 lin Institute, Philadelphia, 15 Feb. 1871. It may
 be employed in the arts, for etching, &c.; for this
 purpose a company was at work, 1874.

SANDEMANIANS, see *Glasites*.

**SANDHURST, ROYAL MILITARY
 COLLEGE**, founded, first at High Wycombe, in
 799; removed to Great Marlow in 1802, and to

Sandhurst in 1812. It consists of the staff college
 and cadets' college. Competitive examination for
 entrance into the latter began in Feb. 1858. A wing
 of the college was destroyed by fire, 21 Jan. 1868.

SANDWICH (*Portus Rutupensis*, Kent). It
 suffered by Danish invaders in 851, 993, and 1014,
 but was rebuilt by Canute, and became prosperous;
 it became chief of the cinque ports about 1066. It

 of these islands, he fell a victim to the sudden re-

 missionaries were settled among them. Population

 to be stationary. King Kamehameha IV. married
 Miss Emma Rooker, 1856. She came to England

SANITATION, the preservation of health. Strict cleanliness is enjoined in the law of Moses, 1400 B.C. Great attention has been paid to the public health in France since 1802. Tardieu published his "Dictionnaire de Hygiène," 1852-54. To Dr. Southwood Smith is mainly attributable the honour of commencing the agitation on the subject of public health in England about 1832; his "Philosophy of Health" having excited much attention. Since 1838 he has published numerous sanitary reports, having been much employed by the government. Professors of hygiene are now appointed.

Investigations of the Poor Law Commissioners and consequent disclosures and the reports of the registrar-general lead to legislation, 1834, & seq.

SANITAS (health), a new antiseptic and disinfectant, invented by Mr. C. T. Kingzett, about 1875.

Having discovered that the salubrity of the air surrounding certain trees, such as the *Eucalyptus globulus* and pines, is due to their volatile oils producing peroxide of hydrogen and camphoric acid, he devised a method for procuring these re-agents by the decomposition of common turpentine, and in 1877 they were manufactured and sold as "Sanitas."

SANSCULOTTES, a term of reproach applied to the leaders of the French republicans about 1795 on account of their negligence in dress, and afterwards assumed by them with pride. The complementary days of their new calendar were named the Mountain party *Sansculottides*.

SANSKRIT, the language of the Brahmins of India, spoken at the time of Solomon, has been much studied of late years. Sir Wm. Jones published a translation of the poem Sakuntala in 1783, discovered that a complete literature had been preserved in India, comprising sacred books (the Vedas), history and philosophy, lyric and dramatic poetry. Texts and translations of many works have been published by the aid of the East India Company, the Oriental Translation Fund, and private liberality. The professorship of Sanskrit at Oxford was founded by colonel Boden. The first professor, H. H. Wilson, appointed in 1832, translated part of the Rig-veda Samhitā, the sacred hymns of the Brahmins, and several poems, &c. Professor Monier Williams (elected 1860) published an English and Sanskrit dictionary, 1861. Professor Müller published his history of Sanskrit Literature in 1859, and has edited the original text of the Vedas. Philologists have discovered an intimate connection between the Sanskrit, Persian, Greek, Latin, Teutonic, Slavonian, Celtic, and Scandinavian languages.

SANTIAGO DE COMPOSTELLA (N.W. Spain), was sacked by the Moors in 995, and held by them till it was taken by Ferdinand III. in 1213. The order of Santiago, or St. James, was founded about 1170 to protect pilgrims to the shrine of St. James the Greater (Acts, xii. 2), said to be buried in the cathedral. The town was taken by the French in 1809, and held till 1814.—**SANTIAGO**, the capital of Chili, S. America, founded by Valdivia in 1541, has suffered much by earthquakes, especially in 1522 and 1829.

About seven o'clock in the evening of 8 Dec. 1863, the feast of the Immaculate Conception of the Virgin Mary, and the last day of a series of religious celebrations in the "month of Mary," the church of the Campanario, when brilliantly illuminated in a dangerous manner, was burnt down, the fire beginning amidst the combustible ornaments, and above 2000 persons, principally women, perished; the means of egress being utterly insufficient.

* Captain Fremantle, the friend of Nelson, and his companion in most of his brilliant achievements, was wounded in the arm immediately before Nelson had received his wound in the same limb. The following was addressed to the lady of Captain Fremantle (who was on board with her husband at the time he wrote), has been preserved, as being the first letter written by the hero with his left hand:—"MY DEAR MRS. FREMANTLE.—Tell me how Tom is, I hope he has saved his arm. Mine is, but, thank God! I am as well as I hope he is. Ever yours, "HORATIO NELSON."

20 Dec. the government ordered the church to be seized to the ground, and much public indignation was excited against the fanatical priesthood.

SAPPERS AND MINERS, a name given in 12 to the non-commissioned officers and privates the corps of Royal Engineers. *Brande.*

SAPPHIC VERSE, invented by Sappho, the lyric poetess of Mitylene. She was equally celebrated for her poetry, beauty, and a hopeless passion for Phaon, a youth of her native country, on which it is said she threw herself into the sea near Mount Leucas, and was drowned, about 590 B.C. The Lesbians, after her death, paid her divine honours, and called her the tenth muse. Some misread the story fabulous.

SAPPHIRE, a precious stone of an azure colour, and transparent; in hardness it exceeds the ruby, and is next to the diamond. One was placed on the Jewish high priest's breast-plate, 1491. Hamas Kouli Khan is said to have possessed a sapphire valued at 300,000*l.*, 1733. Artificial sapphires were made in 1857 by M. Gaudin. Equal parts of alum and sulphate of potash were heated in a crucible.

SARABAND. A stately dance invented by arabians, a dancer of Seville, in the 16th century.

SARACENS, a warlike people of Arabia, were employed as mercenaries by the emperor Valens, 366, against the invading Goths, whom they repelled from Constantinople, 378. They frequently troubled the eastern empire in the 6th century, and in the seventh, became ardent followers of Mahomet, see *Mahometans*. In 712 they conquered Spain, and under Abderrahman, established the caliphate of Cordova 755. The Moors became supreme in the 11th century.

SARAGOSSA (N.E. Spain), anciently Cæsarea Augusta, founded 27 B.C., was taken by the Goths, 469; by the Arabs, 712; by Alfonso of Spain, 1118. Here Philip V. was defeated by the archduke Charles, 20 Aug. 1710. On 17 Dec. 1778, 400 of the inhabitants perished in a fire at the theatre. Saragossa, after successfully resisting the French in 1808, was taken by them after a most heroic defence by general Palafox, 20 Feb. 1809. The inhabitants, of both sexes, resisted until worn out by fighting, famine, and pestilence.

SARATOGA (New York State, N. America). Here general Burgoyne, commander of a body of the British army, after a severe engagement with the Americans at Germanstown, in which he was victorious, 3, 4 Oct., being surrounded, surrendered all his army (5791 men) to the American general Gates, 17 Oct. 1777. This was the greatest check the British suffered in the war.

SARDINIA, an island in the Mediterranean, successively possessed by the Phœnicians, Greeks, Carthaginians (about 500 B.C.), Romans (238), Vandals (A.D. 456), Saracens (720-40), Genoese (1022), Pisans (1165), Aragonese (1352), and Spaniards. From settlers belonging to these various nations the present inhabitants derive their origin. Victor Amadeus, duke of Savoy, acquired Sardinia in 1720, with the title of king; see *Savoy*. Population of the Sardinian dominions in 1858, 5,104,807; of Sardinia alone, 1887, 723,833. The

SARMATIA, the ancient name for the country in Asia and Europe between the Caspian Sea and the Vistula, including Russia and Poland. The Sarmatæ or Sauromatæ troubled the early Roman empire by incursions. After subduing the Scythians they were subjugated by the Goths, in the 3rd and 4th centuries. They joined the Huns and other barbarians in invading Western Europe in the 5th century.

SARNO (S. Italy). Near this river, Teias, king of the Goths, was defeated and slain by Justinian's general Narses, March, 553.

SARUM, OLD (Wiltshire), an ancient British town, the origin of Salisbury (*which see*). Although completely decayed, it returned two members to parliament till 1832.

SASSANIDES, descendants of Artaxerxes or Artabazus, whose father, Babek, was the son of Sassan. He revolted against Artabanus, the king of Parthia; defeated him on the plain of Hormuz, 226; and re-established the Persian monarchy. This dynasty was expelled by the Mahometans, 652; *see Persia.*

SATIRE. About a century after the introduction of comedy, satire made its appearance at Rome in the writings of Lucilius, called the inventor of it, 116 B.C. *Livy*. The Satires of Horace (35 B.C.), Juvenal (about A.D. 100), and Persius (about A.D. 60), are the most celebrated in ancient times, and those of Churchill (1761) and Pope (1729), in modern times. Butler's "Hudibras," satirizing

the presbyterians, first appeared in 1663. *Menippus*, a celebrated satirical pamphlet, first in verse and partly in prose, attacking the power of the court of Spain and the league, written in the style of the biting satires of the cynic philosopher Menippus. The first part, "Catholicon d'Espagne," by Leroy, appeared in 1593; the second, "Abus des États de la Ligue," by Gillot, Pithou, Raynaud, and Passerat, appeared in 1594. *Bouillet*.

SATRAPIES, divisions of the Persian empire, formed by Darius Hystaspes about 516 B.C.

SATTARA (W. India) was long a flourishing state, founded by Sevajee about 1646; subjugated by the Marhattas about 1749; conquered by the British, 1818; ruled by a rajah under the protection of the company. The last rajah died without issue in 1848; when the country was annexed.

SATURDAY (the last, or seventh day of the week; the Jewish Sabbath; *see Sabbath*). It was so called from an idol worshipped on this day by the Saxons, and according to Verstegan, was named by them Saterne's day. *Pardon*. It is now probably from Saturn, *dies Saturni*. *Saturday Review*, an independent literary weekly journal, was first published, 3 Nov. 1855. *See Hospital.*

SATURN, the planet, ascertained to be 825,000 millions of miles distant from the sun, and its diameter to be about 77,230 miles. One of the eight satellites was discovered by Huyghens 25 March, 1655; four by Cassini (1672-84); two by sir William Herschel (1789), and one by Bond and Lassells (1848). The ring was observed by Galileo, about 1610; its annular form determined by Huyghens, about 1655; and discovered to be two-fold by Messrs. Ball, 13 Oct. 1665; an inner ring was detected in 1850 by Dawes in England (29 Nov.), and by Bond in America.

SATURNALIA, festivals in honour of Saturn, father of the gods, were instituted long before the foundation of Rome, in commemoration of the freedom and equality which prevailed on the earth in his golden reign. Some, however, suppose that the Saturnalia were first observed at Rome in the reign of Tullus Hostilius (673-640 B.C.), after a victory obtained over the Sabines: whilst others suppose that Janus first instituted them in gratitude to Saturn, from whom he had learned agriculture. Others assert that they were first celebrated after a victory obtained over the Latins by the dictator Posthumius, when he dedicated a temple to Saturn, 497 B.C. During these festivals no business was allowed, amusements were encouraged, and distinctions ceased. *Langlet*.

SAVAGE CLUB, instituted by various literary men, in 1857, facetiously terming themselves "savages," on account of their freedom from conventionalism. On some occasions they gave a war-whoop. *Sala*. Mr. W. E. Gladstone was present at the 22nd anniversary, 14 June, 1879, and the prince of Wales has been a visitor (1882).

SAVANDROOG (Mysore, S. India), a strong fortress, was captured by the British without loss, 21 Dec. 1791.

SAVINGS' BANKS. The first of these was instituted at Berne, in Switzerland, in 1787, by the name of *caisse de domestiques*, being intended for servants only; another was set up in Basel, in 1791, open to all depositors. The rev. Joseph Smith, of Wendover, began a Benevolent Institution in 1799, and in 1803-4, a "charitable bank" was instituted at Tottenham by Miss Priscilla Wakefield. The rev.

Henry Duncan established a parish bank at Ruthwell 1810. One was opened in Edinburgh in 1814. Benefit clubs, among artisans, having accumulated stocks of money for their progressive purposes, began to be adopted to identify these funds with the public debt of the country, and an extra rate of interest was held out as an inducement; hence were created savings banks to receive small sums, redeemable with interest on demand.

Hon. Geo. Rose developed the system, and brought it under parliamentary control, 1816.

1840 there were 550 banks; 766,354 depositors; amount, £2,060,904l.

Acts to consolidate and amend previous laws relating to savings banks were passed in 1828 and 1847; extended to Scotland in 1835; again consolidated and amended in 1863, 1880 and 1887.

20 Nov. 1851, the number of savings banks in Great Britain and Ireland was 574, besides above 20,000 friendly societies and charitable institutions. The depositors (in the banks) were 1,092,581, while the societies embraced a vast but unknown number of persons: the amount of deposits was 32,893,511l.

SAVONA (a manufacturing town, N. Italy, long held by the Genoese) was captured by the king of Sardinia in 1746; by the French in 1809, and annexed; restored to Sardinia at the peace. Pope Pius VII. was kept here by Napoleon I., 1809-12. Soap is said to have been invented here, and hence its French name *savon*.

SAVOY, the ancient *Sapaudia* or *Sabaudia*, formerly a province in N. Italy, east of Piedmont. It became a Roman province about 118 B.C. The Alemanni seized it in A.D. 395, and the Franks in 490. It shared the revolutions of Switzerland till about 1043, when Conrad, emperor of Germany, gave it to Humbert, with the title of count. Count

Thomas acquired Piedmont in the 13th century. Amadeus, count of Savoy, having entered his dominions, solicited Sigismund to erect them into a duchy, which he did at Cambray, 19 Feb. 1416. Victor-Amadeus, duke of Savoy, obtained the kingdom of Sicily from Spain, by a treaty, in 1713, but afterwards exchanged it with the emperor for the island of Sardinia, with the title of king, 1720. The French subdued Savoy in 1792, and made it a department of France, under the name of Mont Blanc, in 1800. It was restored to the king of Sardinia in 1814; but with Nice annexed to France in 1860, in accordance with a vote by universal suffrage, 23 April, 1860. Savoy was visited by the emperor and empress of the French in August, 1860. The annexation was censured in England.

SAVOY PALACE (London), was built by Peter of Savoy, uncle of Eleanor, queen of Henry III., in 1245; on land granted to him. He gave it to the fraternity of Mountjoy (Monte Jovis), from whom it was purchased by queen Eleanor for her son Edmund. Here resided John, king of France, when a prisoner, 1357 *et seq.* The Savoy was burnt by Wat Tyler and his followers, 1381. It was restored as an hospital of St. John the Baptist by Henry VII. about 1505. The fruitless CONFERENCE of bishops and eminent puritans for the revision of the liturgy was held at the Savoy, April-July, 1661. The hospital was dissolved in 1702, and the buildings (then used as a military prison) removed for Waterloo-bridge and its approaches, 1817-19. The ancient *Chapel* (which once possessed the privilege of sanctuary), after several restorations, was destroyed by fire, 7 July, 1864, and was rebuilt at the queen's expense, and re-opened 26 Nov. 1865. The bishop of Ely, ambassador from Mary of England to the court of Rome, describes a saw-mill there, 1555. The attempts to introduce saw-mills in England were violently opposed, and one erected by a Dutchman in 1663 was forced to be abandoned. Saw-mills were erected near London about 1770. The excellent saw-machinery in Woolwich dockyard is based upon the invention of the elder Brunel,

1806-13. The circular saw was introduced into England about 1790. The *saw-gin* for separating cotton wool from the pod, invented by Eli Whitney, an American, in 1793, led to the immense growth of cotton in the southern states of the Union. Powis and James's band-saw was patented in 1858.

SCOTTISH CORPORATION (charitable), established 1665. The old hall, Crane-court, Fleet-street, built by Wren, burnt 14 Nov. 1877 ; new hall inaugurated 21 July, 1880.

SCOURERS, see *Mohocks*.

SCOURING OF THE WHITE HORSE. See *Ashtown*.

SCREW, was known to the Greeks. Theumping-screw of Archimedes, or screw-cylinder or raising water, invented about 236 B.C., is still in use. It is stated that with the assistance of the crew, one man can press down or raise up as much as 150 men can do without it.—The **SCREW-PROPELLER** consists of two or more twisted blades, like the vanes of a windmill, set on an axis, running parallel with the keel of a vessel, and revolving beneath the water at the stern. It is driven by steam-engine. The principle was shown by Focke in 1681, and since by Du Quet, Bernouilli, and others. Patents for propellers were taken out by Joseph Bramah in 1784; by Wm. Lyttelton in 1791; and by Edward Shorter in 1799. But these led to no useful result. In 1836 patents were obtained by Francis Pettit Smith (knighted July, 87; died, 12 Feb. 1874) and captain John Ericsson (died, aged 86, March, 1889); and to them the successful application of the screw-propeller must be attributed. The first vessels with the screw were the *Archimedes*, built on the Thames in 1838 by I. Winshurst, and the *Rattler*, built in the United States (1844), and tried in England in 1845. Double screw-propellers are now employed. A new form of screw-propeller invented by col. W. H. Hallory, of U. S. A. army, was tried on the Thames and reported successful, Aug. 1878.

SCRIBLERUS CLUB, a literary club, founded by Swift in 1714, included amongst its members, Bolingbroke, Pope, Gay, and Arbuthnot.

SCRIPTURE KNOWLEDGE INSTITUTION, Bristol, was founded by George Müller, a Prussian (born in 1805). He came to Bristol as a minister of the "Brethren" in 1832, and on 5 March, 1834, founded this institution, the objects of which are: 1. Assistance of schools giving instruction on scriptural principles; 2. Circulation of the scriptures; 3. Assistance to missions; 4. Circulation of tracts; 5. Provision for destitute orphans, see *Orphan-houses*. Without application, Mr. Müller, since he began, up to 1868, had received by voluntary contribution, 430,000*l*.

SCROFULA, see *King's-evil*.

SCRUTIN (French for ballot). In *scrutin de liste* the voter writes on his paper as many names as there are persons to be elected, for instance for the whole department. In *scrutin d'arrondissement*, the members are elected separately. The adoption of one of these modes was much discussed in France in 1875. The conservatives prefer the latter, the radicals the former. See *France*, Nov. 1875. The *scrutin de liste* was adopted in the elections of 1848, 1849, 1871, and 1875.

M. Bardoux's bill for adopting the *scrutin de liste* (warmly advocated by M. Gambetta), was passed by the chamber of deputies (243-235), 18 May, 1881; rejected by the senate (148-114), 9 June, 1881; again rejected, Jan. 1882.

M. Weilbeck Rousseau's bill for the *scrutin de liste* passed by the deputies (412-99), 24 March, finally passed, 8 June, 1885.

The bill for the restoration of the *scrutin d'arrondissement* passed by the chamber 11 Feb. and senate 13 Feb. 1889.

The *scrutin de liste* was adopted by the Italian chamber, 14 Feb. 1882.

SCULLABOGUE, see *Massacres*, 1798.

SCULPTURE is said to have begun with the Egyptians. Bezaleel and Aholiab built the tabernacle in the wilderness, and made all the vessels and ornaments, 1491 B.C., and their skill is recorded as the gift of God. *Exod.* xxxi. 3. Dipneus and Seyllis, statuarys at Crete, established a school at

Sicyon. Pliny speaks of them as being the first who sculptured marble and polished it; all statues before their time being of wood, 568 B.C. Alexander gave Lysippus the sole right of making his statues, 326 B.C. He left no less than 600 pieces, some of which were so highly valued in the age of Augustus, that they sold for their weight in gold. Sculpture did not flourish among the Romans, and in the middle ages with some fine exceptions, was generally degraded. With the revival of painting, it revived also; and Donato di Bardi, born at Florence, A.D. 1383, was the earliest professor among the moderns. An institute of sculptors was established in 1861. See *Royal Academy*.

SCUTAGE or **ESCUAGE**. The service of the shield (scutum) is either uncertain or certain. Escuage uncertain is where the tenant by his tenure is bound to follow his lord; and is called *Castleward*, where the tenant is bound to defend a castle. Escuage certain is where the tenant is set at a certain sum of money to be paid in lieu of such uncertain services. The first tax levied in England to pay an army, 5 Hen. II. 1159. *Cowel*.

SCUTARI, Asiatic Turkey, opposite Constantinople, of which it is a suburb. It was anciently called *Chrysopolis*, golden city, in consequence, it is said, of the Persians having established a treasury here when they attempted the conquest of Greece. Near here Constantine finally defeated Licinius, 323. The hospital was occupied by the sick and wounded of the Anglo-French army, in 1854-5, whose sufferings were much alleviated by the kind exertions of Miss Florence Nightingale and a band of nurses under her, aided by a large fund of money (15,000*l*.)

subscribed by the public and placed in the care of the proprietors of the *Times* newspaper; see *Times*. Explosion of powder magazine by lightning, about 150 killed, 8 June, 1883.

SCYTHIA, situate in the most northern parts of Europe and Asia. The boundaries were unknown to the ancients. The Scythians made several irruptions upon the more southern provinces of Asia, especially 624 B.C., when they remained in possession of Asia Minor for twenty-eight years, and at different periods extended their conquests in Europe, penetrating as far as Egypt; see *Tartary*.

SEA. Lieut. Maury first published his "Physical Geography of the Sea" in 1854, and other important works since; he died Feb. 1873; see *Deep Sea*.

SEAL FISHERY ACT, passed 14 June, 1875.

SEALS or SIGNETS. Engraved gems were used as such by the Egyptians, Jews, Assyrians, and Greeks; see *Exod.* xxviii. 14. Ahab's seal was used by Jezebel, 899 B.C. (*1 Kings* xxi. 8.) The Romans in the time of the Tarquins (about 600 B.C.) had gemmed rings. They sealed rooms, granaries, bags of money, &c. The German emperor, Frederick I. (A.D. 1152) had seals of gold, silver, and tin. Impressions of the seals of Saxon kings are extant; and the English great seal is attributed to Edward the Confessor (1041-66). "A seal with armorial bearings before the 11th century, is certainly false." *Fosbrooke*. The most ancient English seal with arms on it is said to be that of Richard I. or John. White and coloured waxes were used. Our present sealing-wax, containing shellac, did not come into general use in Germany and England until about 1556. Red wafers for seals came into use about 1624; but were not used for public seals till the 18th century. A seal acquired by the British Museum made of black hematite, thought to be Hittite, found at Yuzgat in Asia Minor, announced Nov. 1886. *Seal Society*, for publication of fac-similes of ancient seals, was established in 1883.—For **SEALED LETTERS**, see *Great Seal and Lettres de Cachet*.

SEAMEN. In consequence of the great loss of life by wrecks of merchant vessels, attributed to bad ships and overloading, a commission of inquiry was agreed to by parliament on the motion of Mr. S. Plimsoll (who published "Our Seamen: an Appeal"), 4 March, 1873. The duke of Edinburgh was on the commission; the duke of Somerset, chairman. Mr. Plimsoll has been censured for exaggeration.

The report issued in September tended to justify the public apprehensions, but suggested no remedy. The report presented to parliament, 2 July, 1874, condemned the present insurance system, and recommended increased responsibility of owners and others, and strengthening the powers of the Board of Trade for investigation.

The Merchant Shipping Survey Bill was rejected (173-170) 24 June, 1874. After much excitement, an Act was passed to give further powers to the Board of Trade to stop unseaworthy ships 13 Aug. 1875.

Another Merchant Shipping Act (which see) passed 15 Aug. 1876.

Strong circular issued by the Board of Trade (Mr. Chamberlain); deaths of the employed in ships asserted to be 1 in 60; in coal mines 1 in 35; present system stated to be ineffectual. Jan. 1884.

SEAS, SOVEREIGNTY OF THE. The sea of England to rule the British seas is of very modern date. Arthur is said to have assumed it, and afterwards supported this right. It was maintained by Selden, and measures were taken by government in consequence, 8 Chas. I. 1633. The Dutch, at the death of Charles I., made some attempt to obtain it, but were roughly treated by Blake and other admirals. Russia and other powers of the north armed to avoid search, 1780; again, 1801. see *Armed Neutrality and Flag*. The international rule of the road at sea was settled in 1862; 25 rules were issued in 1879 and 19 Aug. 1884). yet Great Britain alone there have been 13,000 collisions in six years. Mr. Wm. Stirling Lacon proposed to reduce the rules from 749 words to 144, for simplicity and security. His form had been nine times before parliament, 1873. Revised rules issued by the admiralty in a "Fleet Circular," Nov. 1885.

SEASONS. The four natural divisions of the year.

In the north temperate regions in 1884, the spring quarter began 20 March, 5 a.m., the summer, 21 June, 1 a.m., the autumn, 22 Sept. 3 p.m., the winter, 21 Dec. 10 a.m. See *Lapland seasons under Year*.

James Thomson's "Seasons" published: "Winter, 1726; "Summer," 1727; "Spring," 1728; "Autumn," 1729. Haydn's "Seasons" first performed, 1801.

SEATS BILL, see under *Reform*.

SEBASTIAN, ST. (N. Spain), was taken by the French, under the duke of Berwick, in 1704. It was besieged by the British and allied army under Wellington. After a most heavy bombardment by which the whole town was laid nearly in ruins, it was stormed by general Graham (afterwards Lord Lynedoch), and taken 31 Aug. 1813.—On 5 May, 1836, the fortified works, through the centre of which ran the high road to Hernani, were carried by the English auxiliary legion under general Evans, after very hard fighting. The British naval squadron, off St. Sebastian, under lord John Hay, lent very opportune aid to the victors in this contest.—A vigorous assault was made on the lines of general De Lacy Evans, at St. Sebastian, by the Carlists, 1 Oct. 1836. Both parties fought with bravery. The Carlists were repulsed, after suffering severely. The loss of the Anglo-Spanish force was 376 men and 37 officers, killed and wounded. General De Lacy Evans was slightly wounded. See under *Leagues*. The queen regent of Spain made queen Victoria here, 27 March, 1889.

SEBASTOPOL or SEVASTOPOL, a town and once a naval arsenal, at S.W. point of the Crimean peninsula, formerly the little village of Akhtar. The buildings were commenced in 1784, by Catherine II. after the conquest of the country. The town is built in the shape of an amphitheatre on the rise of a large hill flattened on its summit, according to a plan laid down before 1794, which has been since adhered to. The fortifications and harbour were constructed by an English engineer, colonel Upton, and his sons, since 1830. The population in 1834 was 15,000. This place underwent eleven months' siege, by the English and French in 1854 and 1855. Immediately after the battle of the Alma, 20 Sept. 1854, the allied army marched to Sebastopol, and took up its position on the plateau between it and Balaklava, and the grand attack and bombardment commenced 17 Oct. 1854, without success.* After many sanguinary

* In consequence of the sufferings and disasters of the army in the winter of 1854-5, the Sebastopol Local Committee was appointed, and the Aberdeen administration resigned, Feb. 1855. The committee sat for

encounters by day and night, and repeated bombardments, a grand assault was made on 8 Sept. 1855, upon the Malakoff tower and the Redans, the most important fortifications to the south of the town. The French succeeded in capturing and retaining the Malakoff. The attacks of the English on the great Redan and of the French upon the little Redan were successful, but the assailants were compelled to retire after a desperate struggle with great loss of life. The French lost 1646 killed, of whom 5 were generals, 24 superior and 116 inferior officers, 4500 wounded, and 1400 missing. The English lost 385 killed (29 being commissioned and 42 non-commissioned officers), 1886 wounded, and 176 missing. In the night the Russians abandoned the southern and principal part of the town and fortifications, after destroying as much as possible, and crossed to the northern forts. They also sank or burnt the remainder of their fleet. The allies found a very great amount of stores when they entered the place, 1 Sept. The works were utterly destroyed in April, 1856, and the town was restored to the Russians in July; gen. Todleben, the able defender, died 1 July, 1884, and was buried here. See *Russo-Turkish War*.

SECRET SOCIETIES, *Assassins, Fenians, Ribbonism, Vehmische Tribunal, Rosicrucians, Illuminati, Carbonari, Mary-Anne, Nihilists.*

SECRETARIES OF STATE. The earliest authentic record of a secretary of state is in the reign of Henry III., when John Maunsell is described as "*Secretarius Noster*," 1253. *Rymer*. Towards the close of Henry VIII.'s reign, two secretaries were appointed; and upon the union with Scotland, Anne added a third as secretary for Scotch affairs; this appointment was afterwards laid aside; but in the reign of George III. the number was again increased to three, one for the American department. In 1782 this last was abolished by act of Parliament; and the secretaries were appointed or home, foreign, and colonial affairs. When there were but two secretaries, one held the *portefeuille* of the Northern department, comprising the Low Countries, Germany, Denmark, Sweden, Poland, Russia, &c.; the other, of the Southern department, including France, Switzerland, Italy, Spain, Portugal, and Turkey; the affairs of Ireland belonging to the elder secretary; both secretaries then equally directed the home affairs. *Beaton*. There are now six secretaries—home, foreign, colonial, war, (in 1858) India, and (in 1885) Scotland, all in the cabinet. Secretary of State for Scotland act passed 14 Aug. 1885, amended 1887. See *Administrations*, and separate articles.

SECTS, RELIGIOUS, see under *Worship*, and their respective titles.

March to 15 May, Lord Aberdeen being the last person examined. His report was presented 18 June. Mr. Roebuck, the chairman, moved on 17 July that the house should pass a vote of severe reprobation on every member of the Aberdeen administration. On 10 July his motion was lost by a majority of 107 against it. In 1855 the government sent Sir John M'Neill and Col. Tulloch to inquire into the state of the armies in the Crimea. Their report was presented to parliament in Feb. 1856. A commission was appointed to consider the statements in the report (which were very unfavourable to many officers), but the substance of the report was unshaken.

SECULAR GAMES (*Ludi Sæculares*), very ancient Roman games, celebrated on important occasions. Horace wrote his "*Carmen Sæculare*" for their celebration in the reign of the emperor Augustus (17). They took place again in the reign of Claudius (47), of Domitian (88), and for the last time, of Philip (248), believed to be 2000 years after the foundation of the city.

SECULARISM, a name given to the principles advocated by G. J. and Austin Holyoake, about 1846, and since by Mr. Bradlaugh.

Its central idea is free, not lawless thought, and it considers scepticism to be scrutiny. It advocates liberty of action without injury to others. It is not against Christianity, but independent of it. Its standard is utilitarian; it is the religion of the present life only; teaching men to seek morality in nature, and happiness in duty. Mr. Austin Holyoake and other secularists repudiated atheism; Mr. Bradlaugh and others profess it.

SECURITY FROM VIOLENCE ACT, passed in 1863, appointed whipping as part of the punishment for attempts at garroting.

SEDAN, an ancient fortified city in the valley of the Meuse, N.E. of France, the seat of a principality long held by the dukes of Bouillon. On 6 July, 1641, a victory was gained at La Marfée, near Sedan, by the count of Soissons and the troops of Bouillon and other French princes, over the royal army supporting Richelieu; but the count was slain on 23 June, 1642. The duke was arrested in the midst of his army, and was made to cede Sedan to the crown. The protestant university was abolished after the revocation of the edict of Nantes, 22 Oct. 1685. Around this place a series of desperate conflicts on 29, 30, and 31 Aug. between the French army of the north, under marshal MacMahon (about 150,000 men), and the greater part of the three German armies under the king and crown-prince of Prussia and the crown-prince of Saxony (about 250,000 men) was brought to a close on 1 Sept. 1870. The battle began with attacks on the French right and left about 5 a.m., and was very severe at 2 p.m. At 4 p.m. the Germans remained masters of the field, and the crown-prince of Prussia announced a complete victory, the chief part of the French army retreating into Sedan.

The emperor Napoleon was present during the battle, and, it is said, stood at Igles, near Sedan, exposed for four hours to the German grenades. The impossibility of further resistance was then evident. The Germans had contracted their circle close round Sedan; their formidable artillery held all the heights, from which they could at pleasure wholly destroy the town and the army, and only 2000 men were in a condition to respond to their commander's call, and to make a supreme effort to break through the enemy with the emperor and escape to Montmédy.

At first general de Wimpffen (called to the command when MacMahon was wounded) indignantly rejected the terms offered by the victor, and the emperor had a fruitless interview with count Bismarck to endeavour to mitigate them.

On 3 Sept. the emperor wrote in autograph to the king of Prussia, "*Mon frère, n'ayant pu mourir à la tête de mes troupes, je dépose mon épée au pied de votre majesté. NAPOLEON.*" A capitulation of Sedan and the whole army therein was signed by generals Von Moltke and De Wimpffen at the château of Bellevue, near Frenois, at 11:30 a.m., and at 2 p.m. an interview took place between the king and the emperor, who was downcast but dignified.

The conflict was principally carried on by the artillery, in which (according to the emperor) the Germans had the advantage, not only in number (600 to 500), but also in weight, range, and precision. The carnage was awful, and the field the next day was a mass of shattered bones, torn flesh, and coloured rags.

About 25,000 French prisoners were taken in the battle, and 83,000 surrendered the next day, together with

70 mitrailleuses, 400 field-pieces, and 150 fortress guns. About 14,000 French wounded were found lying in the neighbourhood, and about 3000 escaped into Belgium and laid down their arms. The great army of the north had ceased to exist. Among the killed was lieut.-col. Pemberton, a correspondent of the *Times*, who had approached too near the conflict.

The French emperor and his suite arrived at Wilhelms-höhe, a castle near Cassel appointed for his residence, (formerly inhabited by his uncle Jerome, when king of Westphalia), in the evening of 5 Sept.

On 7 Sept. the village of Bazeilles was stormed by the Bavarians and burnt, it was said, because the inhabitants fired on the ambulances; many women and children perished. The French denied the provocation. The place had been previously twice bombarded and stormed by the maddened combatants.

In a letter dated 12 May, 1872, the emperor Napoleon took upon himself the whole responsibility of the surrender of Sedan.

SEDAN CHAIRS (so called from Sedan), were first seen in England in 1581. One used in the reign of James I., by the duke of Buckingham, caused great indignation, and the people exclaimed that he was employing his fellow-creatures to do the service of beasts. Sedan chairs came into London in 1634, when sir Francis Duncomb obtained the sole privilege to use, let, and hire a number of such covered chairs for fourteen years. They came into very general use in 1649.

SEDGMOOR (Somersetshire), where the duke of Monmouth (natural son of Charles II. by Lucy Walters), who had risen in rebellion on the accession of James II., was completely defeated by the royal army, 6 July, 1685. The duke was made a prisoner in the disguise of a peasant, at the bottom of a ditch, overcome with hunger and fatigue. He was tried and beheaded on 15 July following.

SEDITION. Sedition acts were passed in the reign of George III. The proclamation against seditious writings was published May, 1792. The celebrated Sedition bill passed Dec. 1795. Seditious societies were suppressed by act, June, 1797. The Seditious Meetings and Assemblies' bill passed 31 March, 1817. In Ireland, during the Roman Catholic and Repeal agitation, acts or proclamations against seditious and seditious meetings were published from time to time until 1848.

SELEUCIDES, ERA OF THE, dates from the reign of Seleucus Nicator. It was used in Syria for many years, and frequently by the Jews until the 15th century, and by some Arabians. Opinions vary as to its commencement. To reduce it to others (supposing it to begin 1 Sept. 312 B.C.), subtract 311 years 4 months.

SELF-DENYING ORDINANCE, which ordained that no member of parliament should hold any civil or military office or command conferred either on both of the houses, or by authority derived from them, after much discussion, was passed 7 April, 1645, by the influence of Cromwell, who thus removed the earl of Essex and other Presbyterians out of his way. A somewhat similar ordinance was adopted by the parliament at Melbourne in Australia, in 1858. The name was given to an arrangement made respecting British naval promotions and retirements in 1870.

ENATE (*Senatus*). In the ancient republics government was divided between the *senatus in senis*, old; in Greek, *gerousia*, from *geron*, an assembly of elders, and the popular assembly (*comitia*, Latin; *ecclesia*, Greek), the *g* being merely the executive. The Roman senate, said to have originally been composed of 100 members, was raised to 300 by Tarquinius senus; to about 600 by Sylla, about 81 B.C.; and 900 by Julius Cæsar. It was reformed and reduced to 600 by Augustus; and gradually lost its power and dignity under the emperors. The mere *senatus* existed in the reign of Justinian. A second senate, formed at Constantinople by Constantine, retained its office till the 9th century. S.P.Q.R. on the Roman standard stood for "Senatus Populusque Romanus," "the Roman senate and people." A *senatus consultum* was a law enacted by the senate.

The French senate was created by the constitution of the year 8, promulgated 24 Dec. 1799, to watch over the administration of the laws. The number of senators was raised gradually from 60 to 137. The senate was replaced by the chamber of peers in 1814; re-established by Napoleon III. 14 Jan. 1852; and abolished, 5 Sept. 1870. Its re-establishment was proposed in 1873. Establishment of a senate of 300 voted; 225 to be elected for 9 years by the departments; 75 (for life) by national assembly, 22 Feb. 1875.

In 1875 elected, 9-21 Dec., 1875. In congress of 13 Aug. 1884, ordered the gradual abolition of life senators as vacancies occurred; new senators were to be elected for 9 years by the departments; enacted, 5 Nov.; bill passed by the deputies and senate, 4-9 Dec. 1884. See *France*.

SEPTEMBER, the seventh Roman month reckoned from March (from *septimus*, seventh). It became the ninth month when January and February were added to the year by Numa; 731 B.C. The Roman senate would have given this month the name of Tiberius, but the emperor opposed it; the emperor Domitian gave it his own name Germanicus; the senate under Antoninus Pius gave it that of Antoninus; Commodus gave it his surname, Hercules; and the emperor Tacitus his own name, Tacitus.—"September 4 government," see *France*, Sept. 1870.

The agents in this slaughter were named *Septembrizers*.

SEPTENNIAL PARLIAMENTS. Edward I. held but one parliament every two years. In the 4th Edward III. it was enacted, "that a parliament should be holden every year once." This continued to be the statute-law till 16th Charles I. 1641, when an act was passed for holding parliaments once in three years at least; repealed in 1664. The Triennial act was re-enacted in 1694. Triennial parliaments thence continued till the 2 Geo. I. 1716, when, in consequence of the allegation that "a popish faction were designing to renew the rebellion in this kingdom, and the report of an invasion from abroad," it was enacted that "the next parliament should continue for seven years." This *Septennial act*, entitled "an act for enlarging the continuance of parliaments" (1715 in the statutes, 4to, given as 1 Geo. I. stat. 2, c. 38), was passed 7 May, 1716; see *Parliaments*. Several unsuccessful motions have been made for its repeal; one in May, 1837.

 succession to the British throne, to the exclusion
 of Roman catholics, was passed in 1689. This name
 is also given to the statute by which the crown,
 after the death of William III. and queen Anne,
 without issue, was limited to Sophia, electress of
 Hanover, grand-daughter of James I., and her heirs
 being protestants, 1702. The Irish act of settle-

SEVEN BISHOPS, see *Bishops*, 1688.

SEVEN BROTHERS, martyrs at Rome,
 under Antoninus; their feast is kept 10 July.

SEVEN CHURCHES OF ASIA, to the
 angels (ministers) of which the apostle John was
 commanded to write the epistles contained in the
 2nd and 3rd chapters of his Revelation, viz., Ephesus,
 Smyrna, Pergamos, Thyatira, Sardis, Philadelphia,
 and Laodicea, 96.

1. *Ephesus* (which see). Paul founded the church here,
 57. In 59, he was in great danger from a tumult created
 by Demetrius; to the elders of this church he delivered

his warning address, 60 (Acts xix. xx.). Ephesus was in a ruinous state even in the time of Justinian (527), and still remains so.

2. *Smyrna*. An ancient Greek city, claiming to be the birth-place of Homer; was destroyed by the Lydians; about 627 a.c. rebuilt by Antigonos and Lysimachus. Its first bishop, Polycarp, was martyred here about 169. It has been frequently captured. It was sacked by Tamerlane in 1402; and finally taken by the Turks, 1424. It is now the chief city of Asia Minor, and the seat of the Levant trade. Earthquake, above 2000 perish, 12 May, 1875. Great fire; about 700 houses destroyed, 18 July, 1882.
3. *Pergamos*. Capital of the kingdom of the same name, founded by Philetærus, whom Lysimachus, one of Alexander's generals, had made governor, 283 a.c. He was succeeded by Eumenes I., 263; Attalus (who took the title of king), 241; Eumenes II. (who collected a great library), 197; Attalus II., 159; Attalus III., 138. He bequeathed his kingdom to the Romans, 133. It revolted, was subdued, and made the Roman province, Asia. Pergamos is still an important place, called Bergamo. Parchment is said to have been invented here. The explorations of the ancient citadel, instituted by the German government in 1878, resulted in the discovery of Greek marble statuary, which has been deposited in the museum at Berlin.
4. *Thyatira*. Now a mean town of 2000 houses, called Ak-hissar, "White Castle."
5. *Sardis*. Formerly the capital of Lydia, the kingdom of Croesus (560 a.c.); taken by Cyrus, 548; burnt by the Greeks, 499; it flourished under the Roman empire; was taken by the Turks; and destroyed by Tamerlane about 1462; it is now a miserable village, named Sart.
6. *Philadelphia* was built by Attalus (III.) Philadelphus, king of Pergamos (159-138 a.c.); was taken by Bajazet I., A.D. 1390. It is now called Allah Shehr, "The city of God," and is a miserable town of 3000 houses.
7. *Laodicea*. In Phrygia, near Lydia; has suffered much from earthquakes. It is now a deserted place, called Eske-hissar, "The old castle."

SEVEN DAYS' WAR, see *Army*, 1871.

SEVEN SAGES, see *Greece*, 590 B.C.

SEVEN-SHILLING PIECES in gold were authorised to be issued 29 Nov. 1797.

SEVEN SLEEPERS. According to an early legend seven youths, in 251, commanded to worship a statue set up in Ephesus by the emperor Decius, refused, and fled to a cavern in the mountain, where they were enclosed, and slept, according to Durandus, for 300 years. Other writers give shorter periods, and various accounts of the incidents which accompanied the awakening. A festival in their honour is kept by the Roman church on 27 July.

SEVILLE (S.W. Spain), the *Hispalis* of the Phœnicians, and the *Julia* of the Romans, was the capital until Philip II. finally established his court at Madrid, 1563. It opened its gates to the Saracens in 712, and was taken from them by the Christians in 1247, after an obstinate siege. The peace of Seville between England, France, and Spain, and also a defensive alliance to which Holland acceded, signed 9 Nov. 1720. In the peninsular war, Seville surrendered to the French, 1 Feb. 1810; and was taken

by assault by the British and Spaniards, after battle of Salamanca, 27 Aug. 1812. It was besieged but not taken by Espartero, July, 1843. Vis Prince of Wales, 20 April, 1876.

SEVRES, see *Porcelain*.

SEWERS, see *Cloaca Maxima*. An act passed in 1847 enforcing the conveyance of the sewage of houses in London into the public sewers. The commissioners of sewers in London were succeeded by the metropolitan commissioners of sewers nominated by the government. They abolished large brick sewers, introducing pipe drains, and turned the contents of 30,000 cesspools into the river Thames. The necessity for purifying the polluted river led to the construction of a new system of drainage, under the superintendence of the Metropolitan Board of Works (*which see*). The main drainage (the plan of Mr. J. W. Bazalgette) consists of the Northern High-level, Middle-level, and Low-level, and Southern High-level and Low-level. On 14 March, 1865, the works were said to be completed, except the low-level sewer at the north side, which was waiting for the completion of the Thames embankment, &c. On 4 April, 1865, the prince of Wales started the engines which commenced lifting the waters of the southern outfall at Crossness Point, near Erith.* The main drainage works of the metropolis (82 miles), were completed Aug. 1875. The sewage is carried 12 miles down the river. Total cost, 4,500,000. See *Carbolic Acid*.

Royal commission on the Metropolitan Sewage disposal (lord Bramwell, sir John Coode, prof. A. W. Williamson and others), appointed 22 June, 1882; reported the great contamination of the Thames at the outlet and need of change; approves of the combination of chemical precipitation with filtration through earth. June and Dec. 1884.

Mr. Wm. Webster's method of decomposing London sewage by electricity set up at Crossness; reported successful on inspection, March, 1889.

SEWING-MACHINE. It is said that Thomas Saint patented one for boots and shoes in 1790. Similar inventions are ascribed to DUNN (1804); Adams and Dodge (American, 1815); Thimonnier (French, 1834); and Walter Hunt (1834). The first really practical sewing-machine was the invention of Elias Howe, an American mechanic, of Cambridge, in Massachusetts, about 1841, who died at Brooklyn, 2 Oct. 1867, aged 47. It is now known under an improved form as Thomas's shuttle machine, by whom it was introduced into England in 1846. Many improvements have been since made.

SEXAGESIMA SUNDAY, see *Quinquagesima Sunday*, and *Week*.

SEXTANT, an instrument used like a quadrant containing sixty degrees, or the sixth part of a circle, invented by Tycho Brahe, at Augsburg, 1550. The Arabian astronomers are said to have had a sextant of fifty-nine feet nine inches radius about 995.

* The utilisation of disinfected sewage as manure is now much advocated. Great success is said to have been attained at Edinburgh, Carlisle, Croydon, and other places. Much hot controversy has arisen respecting the disposal of the London sewage. On 15 Nov. 1864, the Metropolitan board accepted a contract for its disposal from Messrs. Hope and Napier. Sewage Utilisation acts were passed in 1865 and 1867, and the Metropolitan Sewage and Essex Reclamation acts were passed in 1865. The sewage farm, near Barking, Essex, was reported to be flourishing in 1868: good grass and other crops raised.

SHAFTESBURY'S ACT, LORD, 18 & 19 iet. c. 86 (1855), relates to religious worship.

SHAFTESBURY MEMORIALS, relating to the earl of Shaftesbury, celebrated for his life-long exertions to ameliorate the condition of the working classes, the poor and destitute, women and children. He died 1 Oct. 1885, aged 84. A large urn was subscribed for two statues and a national infirmary home, Oct. 1885. A statue uncovered at Westminster Abbey by the baroness Burdett Coutts, 1 Oct. 1888.

SHAFTESBURY PARK ESTATE, near Wandsworth, London, S.W., a model village, and termed "a workman's city;" built here for clerks, artisans, and labourers, by a company, was opened by the earl of Shaftesbury, 3 Nov. 1873, and 18 July, 1874.

SHAKERS, an English sect, now chiefly found in America, arose in the time of Charles I., and derived its name from their voluntary convulsion. It existed for a short time only, but was revived by James Wardley in 1747, and still more by Ann Lee (or Standlee), expelled quakers, about 1757. The sect emigrated to America, May, 1772, and settled near Albany, New York, 1774. They denounce marriage as sinful, regard celibacy as holy, oppose war, disown baptism and the Lord's supper, and use dancing as part of their worship. *Marsden*. One of their elders, Fred. W. Evans, lectured in London, Aug. 1871.

Above a hundred of them settled in the New Forest, near Lymington, Hampshire, on property obtained for them by a Miss Wood; not paying the interest of a mortgage they were ejected in severe weather, and suffered much; end of Dec. 1874. They are called Girlingtons, from Mrs. Girling, a leader among them, who died 18 Sept. 1886. The community then gradually dispersed.

Goods seized for debt, about 27 July; expelled, 22 Aug.; permitted to remain in the neighbourhood, Oct. 1878. Miss Wood was confined as a lunatic, 27 Feb. 1875. 5 men and 40 women half-starved in the New Forest; will not work for hire, Jan. 1884.

SHAKSPEARE'S PLAYS. William Shakspeare was born at Stratford-upon-Avon, Warwickshire, 23 April, 1564, and died on his birthday, 1616. The first collected edition of his works is dated 1623 [a facsimile of this edition was published, 1862-5]; the second, 1632;* the third, 1664; the fourth, 1685; all in folio. Critical editions of the text, edited by Alexander Dyce, were published in 1857 and 1864-6; Boydell's edition, with numerous plates, was published in nine vols., folio, in 1802. Ayscough's Index to Shakspeare was published in 1790; Twiss's Index, in 1805, and Mrs. Cowden Clarke's Concordance, 1847; "Key to Shakspeare," 1879; Shakspeare-Lexicon, by Alexander Schmidt, 1874-5.

SHAKSPEARE'S GLOBE THEATRE, London, built by him and others, 1594, situated near the spot still called

* In 1849, Mr. J. P. Collier, editor of an edition of Shakspeare, purchased a copy of the second folio, on which was written in pencil, a number of corrections, supposed to have been made soon after the time of publication. At first he thought little of these marks; but in 1853 he was induced to publish "Notes and Emendations" derived from this volume. Much controversy ensued as to the authenticity of these corrections; and in 1859 it was generally agreed that they were of modern date, and consequently of little value. Mr. Collier died Aug. 94, 17 Sept. 1883.

Bankside. Shakspeare was himself part proprietor; here some of his plays were first produced, and he himself performed in them. It was of a horse-shoe form, partly covered with thatch. After it was licensed, the thatch took fire, through the negligent discharge of a piece of ordnance, and the whole building was consumed, 29 June, 1613. The house was crowded to excess, to witness the play of *Henry VIII.*, but the audience escaped unhurt; see *Globe*.

SHAKSPEARE'S JUBILEE, projected by David Garrick, was celebrated at Stratford-upon-Avon, 6-8 Sept. 1769. A similar festival was kept 23 April, 1836. The *tercentenary* of Shakspeare's birth was celebrated, with many festivities, at Stratford-upon-Avon, 23-29 April, 1864.

SHAKSPEARE'S HOUSE. In 1847, a number of persons of distinction interested themselves for the preservation of the house in which Shakspeare was born, then actually put up for sale: they held a meeting at the Thatched-House Tavern, London, 26 Aug. in that year, and took measures for promoting a subscription set on foot by the Shakspearian Club at Stratford-upon-Avon; and a committee was appointed to carry out their object. In the end Shakspeare's house was sold at the Auction Mart in the city of London, where it was "knocked down" to the United Committee of London and Stratford for the large sum of 3000*l.* 16 Sept. 1847. In 1856, a learned oriental scholar, John Shakspeare (no relation of the poet), gave 2500*l.* to purchase the adjoining house, that it might be pulled down, in order to ensure the poet's house from the risk of fire.

SHAKSPEARE FUND, established in Oct. 1861, to purchase Shakspeare's garden, birth-place estate, and to erect and endow a public library and museum at Stratford-upon-Avon. The catalogue of the library and museum was published, Feb. 1868.

SHAKSPEARE MEMORIAL ASSOCIATION established 1875; eleventh annual meeting at Stratford-upon-Avon 28 April, 1886. A monument surmounted by a statue of Shakspeare, including statues of Shakspearian characters, executed by Lord Ronald Gower, presented by him to the association, set up at Stratford-upon-Avon, unveiled by Lady Hodgson (the mayoress) 10 Oct. 1888. Bronze statue of Shakspeare (presented by Mr. William Knighton) erected in the boulevard Haussmann Paris, unveiled 14 Oct. 1888.

The hon. Ignatius Donnelly, an American, reports his discovery of a cryptogram of Francis Bacon in the text of one of the plays in the folio of 1623, and thereon asserts his belief that Bacon was the author of the Shakspeare plays, autumn 1887. His book entitled "The Great Cryptogram: Francis Bacon's cipher in the so-called Shakspeare Plays" was published in 1888.

SHEEP were exported from England to Spain, and, the breed being thereby improved, produced the fine Spanish wool, which proved detrimental to our woollen manufacture, 1467. *Anderson.* Their exportation was prohibited on pain of fine and imprisonment, 1522. The number of sheep in the United Kingdom has been variously stated—by some at 43,000,000, by others at 49,000,000, and by more at 60,000,000, in 1840. In 1851 there were imported into England 201,859 sheep and lambs; in 1858, 184,482; in 1864, 496,243. See under *Cattle*. In Aug. and Sept. 1862, many sheep in Wiltshire died of smallpox; and on Sept. 11, government declared its intention of enforcing the act for the prevention of contagion. The evil soon abated. In April, 1866, when the disease reappeared, the preventive regulations were re-issued.

The collection is rich in the works of Mulready, Landseer, and Leslie. He died 5 Oct. 1863.—On 2 Dec. 1858, the trustees of his brother, the late rev. Richard Sheepshanks, presented 10,000*l.* stock to Trinity college, Cambridge, for the promotion of the study of astronomy, meteorology, and magnetism.

SHERIFF, or *shire-reeve*, governor of a shire or county. London had its sheriffs prior to William I.'s reign; but some say that sheriffs were first nominated for every county in England by William in 1079. According to other historians, Henry Cornhill and Richard Reynere were the first sheriffs of London, 1 Rich. I., 1189. The nomination of sheriffs, according to the present mode, took place in 1461. *Stow.* Anciently sheriffs were hereditary in Scotland, and in some English counties, as Westmoreland. The sheriffs of Dublin (first called bailiffs) were appointed in 1308, and obtained the name of sheriff by an incorporation of Edward VI. 1548. Thirty-five sheriffs were fined, and eleven excused in one year, rather than serve the

SHILLING. The value of the ancient Saxon coin of this name was fivepence, but it was reduced to fourpence about a century before the conquest. After the conquest the French *solidus* of twelve pence, in use among the Normans, was called *shilling*. The true English shilling was first coined, some say, in small numbers, by Henry VII., 1504. *Ruding*. A peculiar shilling, value nine pence, but to be current at twelve, was struck in Ireland, 1560; and a large but very base coinage in England for the service of Ireland, 1598. Milled shillings were coined 13 Chas. II. 1662; see *Coins*.

SHILOH, see *Pittsburg*.

SHIP-BUILDING. The first ship (probably a galley) was brought from Egypt to Greece, by Danaus, 1485 B.C. *Blair*. The first double-decked ship was built by the Tyrians, 786 B.C. *Langlet*. The first double-decked one built in England was of 1000 tons burthen, by order of Henry VII., was called the *Great Harry*, and cost 14,000*l*. *Stow*. Port-holes and other improvements were invented by Descharges, a French builder at Brest, in the reign of Louis XII., about 1500. Ship-building was first treated as a science by Hoste, 1606. A 4-gun ship was put upon the stocks at Van Diemen's Land, to be sheathed with India-rubber, 1829. Iron is now greatly used in ship-building.

A prehistoric ship cut out of solid oak, 48 feet long, 4 feet 4 inches wide, and 2 feet deep, was found by the Brigg gas company while excavating near the river Ancholme in Lincolnshire, April, 1885. Mr. Justice Chitty decided 5 July, 1886, that the ship was the property of the owner of the land, Mr. Elwes.

SHIPKA, see *Schipka*.

SHIP-MONEY was first levied about 1007, to form a navy to oppose the Danes. This impost, levied by Charles I. in 1634-6, was much opposed, and led to the revolution. He assessed London in seven ships, of 4000 tons, and 1560 men; Yorkshire in two ships, of 600 tons or 12,000*l*; Bristol in one ship of 100 tons; Lancashire in one ship, of 100 tons. Among others, John Hampden refused to pay the tax; he was tried in the Exchequer in 1636. The judges declared the tax legal, 12 June, 1637. Ship-money was included in the grievances complained of in 1641. The five judges, who had given an opinion in its favour, were imprisoned. Hampden received a wound in a skirmish with prince Rupert, at Chalgrove, 18 June, and died 24 June, 1643.

SHIPPING, BRITISH. Shipping was first registered in the river Thames in 1786; and throughout the empire in 1787. In the middle of the 18th century, the shipping of England was but half-a-million of tons—less than London now. In 1830, the number of ships in the British empire was 22,785. The merchant shipping act of 1854 was amended in 1867; see *Merchant Shipping Act, Navy, and Navigation Acts*.

SHIRTS are said to have been first generally worn in the west of Europe early in the 8th century. *Du Fresnoy*. Woollen shirts were commonly worn in England until about 1253, when linen, but of a coarse kind (fine coming at this period from abroad), was first manufactured in England by Flemish artisans. *Stow*.

SHODDY, a kind of soft woollen goods, manufactured from old woollen rags, or the refuse, to which new wool is added, is stated to have been first manufactured about 1813, at Batley, near Dewsbury, Yorkshire.

SHOEBLACK SOCIETY Brigades (Blue, Red, and Yellow) were established at various times, especially in 1851, by the Ragged School Union (*which see*), founded 1844. In 1855, 108 boys had cleaned 544,800 pairs of boots and shoes, and thus earned 2270*l.*; of which 1235*l.* had been paid to the boys, 519*l.* to their bank, and 516*l.* to the society. The brigades earned 4548*l.* in 1859; 11,031*l.* in 1871; 10,936*l.* (in nine districts) in 1886. There were eleven shoebblack societies in the metropolis in 1888.

SHOEBURYNESSE (Essex). Some ground here, purchased in 1842 and 1855, by an act of parliament in 1862 was set apart as "ranges for the use and practice of artillery," and a school for gunnery was established; see *Cannon*, note. Experiments with Mr. Whitworth's projectiles on 12 Nov. 1862, showed their great improvement in form and material. Shells were sent through 5½ inch plate and the wood-work behind it. It was objected, that they might not do this with ships in motion. The National Volunteer Artillery Association began their annual meetings here in July, 1865.

During shell experiments with a new sensitive fuse, col. Francis Lyon (the inventor), col. Fox-Strangways, capt. Francis M. Goolld-Adams, and four others were killed, 26 Feb. 1885.

SHOES, among the Jews were made of leather, linen, rush, or wood. Moons were worn as ornaments in their shoes by Jewish women. *Isaiah* iii. 18. Pythagoras would have his disciples wear shoes made of the bark of trees; probably that they might not wear what were made of the skins of animals, as they refrained from the use of everything that had life. The Romans wore an ivory crescent on their shoes; and Caligula enriched his with precious stones. In England, about 1462, the people wore the beaks or points of their shoes so long that they encumbered themselves in walking, and were forced to tie them up to their knees; the fine gentlemen fastened theirs with chains of silver or silver gilt, and others with laces. This was prohibited, on the forfeiture of 20*s.* and on pain of being cursed by the clergy, 7 Edw. IV. 1467; see *Dress*. Shoes, as at present worn, were introduced about 1633. The buckle was not used till 1668. *Stow*; *Mortimer*. The buckle-makers petitioned against the use of shoe-strings in 1791. A strike of London shoemakers respecting wages, April, 1884.

SHOOTING STARS, see under *Meteors*.

SHOP HOURS' REGULATION ACT (Sir John Lubbock's), for the protection of young persons, passed, 1886.

SHOP-TAX enacted in 1785; caused so great a commotion, particularly in London, that it was deemed expedient to repeal it in 1789. The statute

whereby *shoplifting* was made a felony, with benefit of clergy, was passed 10 & 11 Will. III. 1714. This statute has been some time repealed.

SHORE, JANE, the mistress of Edward I. and afterwards of lord Hastings. She died penance in 1483, and was afterwards confined to Ludgate; but upon the petition of Thomas Hume, who agreed to marry her, king Richard III. in 1484, restored her to liberty; and sir Thomas Ymptions having seen her. *Harleian MSS.*

SHORT-HAND, see *Stenography*.

"SHORT - LIVED" ADMINISTRATION—that of William Pulteney, earl of Bath, lord Carlisle, lord Winchelsea, and lord Granville existed from 10 Feb. to 12 Feb. 1746.

SHOT. In early times various missiles were shot from cannon. Bolts are mentioned in 1411 and in 1418 Henry V. ordered his clerk of the ordnance to get 7000 stone shot made at the quarries of Maidstone. Since then chain, grape, and cannon shot have been invented, as well as shells, all which are described in Scoffern's work on "Projectile Weapons of War, and Explosive Compounds," 1858; see *Bombs and Cannon*.

SHREWSBURY ADMINISTRATION. Charles, duke of Shrewsbury, was made lord treasurer, 29 July, 1714, two days before the death of queen Anne. His patent was revoked soon after the accession of George I., 29 Oct. following, when the earl of Halifax became first lord of the treasury; see *Halifax*. The office of lord treasurer has been executed by commissioners ever since.

SHREWSBURY (Shropshire), arose after the ruin of the Roman town Uriconium (see *Warrington*), and became one of the chief cities of the kingdom, having a mint till the reign of Henry III. Here Richard II. held a parliament in 1397.—On 23 July, 1403, was fought a sanguinary battle at Hately Field near Shrewsbury, between the army of Henry IV. and that of the nobles, led by Percy (surname Hotspur), son of the earl of Northumberland, who had conspired to dethrone Henry. Henry was seen in the thickest of the fight, with his son, afterwards Henry V. The death of Hotspur by an unknown hand gave the victory to the king. *Hume*.—Shrewsbury grammar school was founded by Edward IV. in 1551, endowed by Elizabeth, and opened 1560. Its arrangements were modified by the public school act, 1868.

SHROPSHIRE, BATTLE OF, in which the Britons were completely subjugated, and Caractacus, the renowned king of the Silures, became, through the treachery of the queen of the Brigantes, a prisoner to the Romans, 50.

SIAM, a kingdom in India, bordering on the Burmese empire. Siam was governed by two kings, one inferior, till Jan. 1887, when the second king being dead, the dignity was abolished. Siam was re-discovered by the Portuguese in 1511, and a trade established, in which the Dutch joined about 1604. A British ship arrived about 1613. In 1683, a Cephalonian Greek, Constantine Phaulcon, became foreign minister of Siam, and opened a communication with France; Louis XIV. sent an embassy in 1685 with a view of converting the king, without effect. After several ineffectual attempts, sir John Bowring suc-

ded in obtaining a treaty of friendship and commerce between England and Siam, which was signed 30 April, 1855, and ratified 5 April, 1856. 6 ambassadors from Siam arrived in Oct. 1857, and had an audience with the queen; they brought with them magnificent presents, which they decried crawling, on 16 Nov. They visited Paris (June, 1861). By a treaty with France, the French protectorate over Cambodia was recognised; signed July, ratified 24 Oct. 1867. The king Khoulakorn, born 21 Sept. 1853, has reigned since Oct. 1868; the king was entertained at Calcutta, 2 Jan. 1872; a political constitution was decreed, May, 1874. Queen Victoria receives the order of the White Elephant from the Siamese minister at London, 2 July, 1880. Population of Siam (1885) 6,300,000.

19. Khoulakorn (born 21 Sept. 1853); succeeded his father Mongkoot, 1 Oct. 1868. Religious changes and political reforms were begun by the king, 16 Nov. 1873. On 9 Oct. 1874, he invited astronomers to Bangkok to view the eclipse of 5 April, 1875. 20th of the able ex-regent Somdet Chao, 19 Jan. 1883. Telegraphic communication with France opened, 14 July, 1883. Mutual abolition of slavery nearly completed Aug. 1886. JAMES TWINS. Two persons born about 1817, enjoying all the faculties and powers usually possessed by separate and distinct individuals, although united together by a short cartilaginous band at the pit of the stomach. They were named Chang and Eng, and were first discovered on the banks of the Siam river by an American, Mr. Robert Hunter, by whom they were taken to New York, where they were exhibited. Captain Coffin brought them to England. After having been exhibited for several years in Britain, they went to America, where they settled on a farm, and married two sisters. In 1865 they were in North Carolina in declining health. Their exhibition in London began again 8 Feb. 1869. Their death in America, within two hours of each other, took place 16, 17 Jan. 1874.

SIBERIA (N. Asia). In 1580 the conquest was won by the Cossacks under Jermak Timofejew. In 1801 Peter the Great began to send prisoners thither. Insurrection broke out among the Poles in Siberia June, 1866, and was soon suppressed. University founded, 1886.

SIBYLS, Sibyllæ, women believed to be inspired, who flourished in different parts of the world. Plato speaks of one, others of two, Pliny three, Ælian of four, and Varro of ten. An Erycanean sibyl is said to have offered to Tarquin II. nine books containing the Roman destinies, demanding for them 300 pieces of gold. He denied it; whereupon the sibyl threw three of them into a fire, and asked the same price for the other three, which being still denied, she burnt three more, and again demanded the same sum for those that remained; when Tarquin conferring with the pontiffs was advised to buy them. Two magistrates were created to consult them on all occasions, 531 B.C.; see *Quindecimvirs*.

SICILIAN VESPERS, the term given to the massacre of the French (who had conquered Sicily, 66), commenced at Palermo, 30 March, 1282.

1. Easter Monday conspirators assembled at Palermo; and while the French were engaged in festivities, a Sicilian bride passed by with her train. One Drochet, a Frenchman, used her rudely, under pretence of searching for arms. A young Sicilian stabbed him with his own sword; and a tumult ensuing, 200 French were instantly murdered. The populace ran through the city, crying out, "Let the French die!" and, without distinction of rank, age, or sex, slaughtered all of that nation they could find, to the number of about 8000. Even the churches proved no sanctuary, and the massacre became general throughout the island.

SICILY (anciently *Trinacria*, three-cornered). The early inhabitants were the Sicani, or Siculi, a people of Spain, and Etruscans, who came from Italy about 1204 B.C. A second colony, under Siculus, arrived eighty years before the destruction of Troy, 1284 B.C. The Phœnicians and Greeks settled some colonies here (735-582). It is supposed that Sicily was separated from Italy by an earthquake, and that the straits of the Charybdis were thus formed. Its government has frequently been united with and separated from that of Naples (*which see*); the two now form part of the kingdom of Italy. Population of Sicily in 1856, 2,231,020; 1871, 2,565,323; 1875, 2,698,672; 1887, 3,192,108.

SICYON, an ancient Grecian kingdom in Peloponnesus, founded, it is said, about 2050. Its people took part in the wars in Greece, supporting Sparta. In 252 it became a republic, and joined the Achaean league formed by Antioch. It was the country of the sculptors Polyclitus and Lysippus (328 B.C.).

SIDEROSTAT (from *siderus*, Latin for a star) an apparatus constructed by M. Leon Foucault shortly before his death, 11 Feb. 1868, for observing the light of the stars in precisely the same way which the light of the sun may be studied in the camera obscura. It consists of a mirror moving in clockwork, and a fixed objective glass for concentrating the rays into a focus.

SIDON or ZIDON (Syria), a city of Phœnicia to the north of Tyre. It was conquered by Cyrus about 537 B.C.; and surrendered to Alexander, 333 B.C.; see *Phœnicia*. The town was taken from the pacha of Egypt by the troops of the sultan and his allies, assisted by some ships of the British squadron, under commodore Charles Napier, 27 Sept. 1840; see *Syria*, and *Turkey*.

SIEGES. Azoth, which was besieged by Parmenichus the Powerful, held out for nineteen years. *Usher*. It held out for twenty-nine years. *Hierodotus*. This was the longest siege recorded in the annals of antiquity. The siege of Troy was the most celebrated, and occupied ten years, 1164 B.C. The following are the most memorable sieges since the 12th century; for details of many of them see separate articles.

SIENNA (formerly Sena Julia), Italy, in the middle ages a powerful republic rivaling Florence and Pisa, weakened through intestine quarrels, was subjugated by the emperor Charles V., and given to his son in 1555, who ceded it to Cosmo of Tuscany, 1557. It was incorporated with France, 1808-14.

SIERRA LEONE (W. Africa), discovered in 1460. In 1786, London swarmed with free negroes living in idleness and want; and 400 of them, with sixty whites, mostly women of bad character and in ill-health, were sent out to Sierra Leone, at the charge of government to form a settlement, 9 Dec. 1786. Capital, Freetown. The settlement was attacked by the French, Sept. 1794; by the natives, Feb. 1802. Sir Charles Macarthy, governor of the colony, was defeated and killed by the Ashantee chief, 21 Jan. 1824.—16 & 17 Vict. c. 16, relates to the government, &c., of this colony. It was made a bishopric in 1852; see *Ashantees and West Africa*.

Robarrie, the stronghold of the insurgent Yonnie tribe, captured by sir Francis De Winton, 21 Nov. 1887. Further towns and strongholds captured with great slaughter of the natives; the king was captured and the rebellion suppressed Nov-Dec. The Gambia territory isolated and made an independent colony 22 Dec. 1888. Largob, capital of the chief Macklah captured by the British under governor Hay; 700 prisoners liberated; announced 14 Feb. 1889.

SIGNALS are alluded to by Polybius. Elizabeth had instructions drawn up for the admiral and general of the expedition to Cadiz, to be announced to the fleet in a certain latitude; this is said to have been the first set of signals given to the commanders of the English fleet. A system for the navy was invented by the duke of York, afterwards James II. 1665. *Guthrie*; see *Fog-signals*.

SIGNBOARDS were used by the Greeks and Romans. A "History of Signboards," by Jacob Larwood and John Hotten, was published in 1866.

SIGNETS, see *Seals*.

SIGN MANUAL, ROYAL, a stamp, imitating the royal signature, employed when the sovereign was so ill as to be unable to write: in the case of Henry VIII. 1547; James I. 1625; and George IV., 29 May, 1830. *Rosse*.

SIKHS, originally a Hindu religious sect (about 1500) a people of N. India, invaded the Mogul empire, 1703-8; see *Punjab*, and *India*, 1849.

SIKKIM, a small Himalayan State, joining Tibet, allied to the Indian government since 1814. By a treaty in 1861 free trade and passage through the country were secured.

The erection of a fort by the Rajah under the influence of Tibetans in contravention of the treaty, led to a military demonstration; 1,000 troops sent ostensibly to repair the road to

Tibet, Jan.; the rajah proving contumacious, the viceroy intervened ineffectually, March; about 2,000 men concentrated at Pedong, March; Lingtu fort quickly captured; flight of the Tibetans, 20 March; destruction of the fort ordered 21 March; slight skirmishes with the Tibetans, 24 killed, May; col. SILCHESTER, Hants. Here are the remains of the Roman town Calleva (built on the site of the British *Caer Segeint* or Segont); including walls of excellent masonry, a basilica and forum, private dwellings, &c. Many discoveries have been made during excavations made under the patronage of the duke of Wellington, since 1863. Coins of Claudius I. and later emperors have been found.

SILESIA, formerly a province of Poland, was invaded by John of Bohemia, 1325, and ceded to him, 1355. It was taken by the king of Hungary, 1478, and added to the Austrian dominion, 1526. It was conquered and lost several times during the Seven years' war by Frederick of Prussia, but was retained by him at the peace in 1763. The emperor William was most enthusiastically received during his visit, Sept. 1875.

SILICON or **SILICIUM** (from *silex*, flint), a non-metallic element, next to oxygen the most abundant substance in the earth, as it enters into the constitution of many earths, metallic oxides, and a great number of minerals. The mode of procuring pure silicon was discovered by Berzelius in 1823. *Gmelin*. See *Water-glass*, and *Ransome's Stone*.

SILISTRIA, a strong military town in Bulgaria, European Turkey. It was taken by the Russians, 30 June, 1829, and held some years by them as a pledge for the payment of a large sum by the Porte; but was eventually returned. In 1854 it was again besieged by the Russians, 30,000 strong, under prince Paskiewitch, and many assaults were made. The Russian general was compelled to retire in consequence of a dangerous contusion. On 2 June, Mussa Pacha, the brave and skilful commander of the garrison, was killed. On 9 June, the Russians stormed two forts, which were retaken. A grand assault took place on 13 June, under prince Gortschakoff and general Schilders, which was vigorously repelled. On the 15th, the garrison assumed the offensive, crossed the river, defeated the Russians, and destroyed the siege works. The siege was thus raised, and the Russians commenced their retreat as Omar Pacha was drawing near. The garrison was ably assisted by two British officers, capt. Butler and lieut. Nasmyth, the former of whom, after being wounded, died of exhaustion. They were highly praised by Omar Pacha and lord Hardinge, and lieutenant Nasmyth was made a major.

SILK. Wrought silk was brought from Persia to Greece, 325 B.C. Known at Rome in Tiberius's time, when a law passed in the senate prohibiting the use of plate of massive gold, and also forbidding men to debase themselves by wearing silk, fit only for women. Hellogabalus first wore a garment of silk, A.D. 220. Silk was at first of the same value with gold, weight for weight, and was thought to grow in the same manner as cotton on trees. Silk-

worms were brought from India to Europe in the 6th century. Charlemagne sent Offa, king of Mercia, a present of two silken vests, 780. The manufacture was encouraged by Roger, king of Sicily, at Palermo, 1146, when the Sicilians only bred the silk-worms, but spun and wove the silk. The manufacture spread into Italy and Spain, and also into the south of France, a little before the reign of Francis I. about 1510; and Henry VIII. propagated mulberry-trees and silk-worms throughout the kingdom, about 1600. In England, silken mantles were worn by some noblemen's ladies, till ball at Kenilworth castle, 1286. Silk was worn by the English clergy in 1534. Manufactured in England in 1604; and broad silk wove from raw silk in 1620. Brought to perfection by the French refugees in London at Spitalfields, 1688. A silk-throwing mill was made in England, and first at Derby, by sir Thomas Lombe, merchant in London, modelled from the original mill then in the king of Sardinia's dominions, about 1714. He obtained a patent in 1718, and died 3 Jan. 1744. Six new species of silk-worm were rearing in France, 1861.*

SILKWORM DISEASE. In 1853 the annual production in South France was estimated at 4,680,000. Soon after a disease broke out among the worms, which reduced the value of the silk to about one-third that amount. In 1858 a commission was appointed to inquire into the nature of the disease then termed *pébrine*; and M. Quatrefages, who proved that it is hereditary, contagious, and infectious. M. Filippi discovered in the blood of the diseased worms a multitude of cylindrical corpuscles, named *parahistophyton*, which Pasteur, who took the study in 1865, has demonstrated to be parasitic and the cause of the disease. He has since devised a way by which, it is hoped, the organic germs may be got rid of, and the disease extirpated.

SILOTVOR, a new explosive invented by M. Rouckteshell, who asked 50,000*l.* for the patent, 1887.

SILURES, a British tribe, occupying the counties of Monmouth and Hereford, was subdued by the Roman general Ostorius Scapula, 50*l.* *Shropshire*. From this tribe is derived the geological term "Silurian strata," among the lowest of the paleozoic or primary series, from their occurrence in the above-mentioned counties. *Marchant*. "Siluria" was published 1849.

SILVER exists in most parts of the world, and is found mixed with other ores in various mines in Great Britain. The silver mines of South America are far the richest. A mine was discovered in the district of La Paz in 1660, which was so rich that the silver of it was often cut out with a chisel. In 1749, one mass of silver weighing 370 lbs. was sent to Spain. From a mine in Norway, a piece of silver was dug, and sent to the Royal Museum at Copenhagen, weighing 560 lbs., and worth 1680*l.* In England silver-plate and vessels were first used by Wilfrid, a Northumbrian bishop, a lofty and ambitious man, 709. *Tyrrill*. Silver knives, spoons, and cups, were great luxuries in 1300; see *Monasticon*. The act of 1816 restricted the use of silver as legal tender to 40*l.* In 1855, 561,906 oz., in 1857, 532,866 oz., in 1865, 724,856 oz., in 1870, 784,500 oz.; in 1876, 483,422 oz.; in 1882, 372,544 oz.; in 1887, 320,345 oz. were obtained from mines in Britain. Pattinson's process for obtaining silver

* In 1858, M. Guérin-Mèneville introduced into France a Chinese worm termed the *Cynthia Bombyx*, which he called the *Atlanthis glandulosa*, a hardy tree of the oak tribe. The *cynthia* yields a silk-like substance termed *Atlanthis*. It was brought to Turin by Fantoni in 1856.

n lead ore was introduced in 1829. See *Bullion, &c., Goldsmiths, Mirrors, Plate, India*, 1876, *ited States*, 1878.

SIMONIANIS, a sect named after the founder,
mon Magus, the first heretic, about 41. A sect of
cial reformers called ST. SIMONIANS sprang up in
rance in 1819, and attracted considerable attention ;
e doctrines were advocated in England, particu-
ly by Dr. Prati, who lectured upon them in
ondon, 24 Jan. 1834. St. Simon died in 1825,
id his follower, Père Enfantin, died 1 Sept. 1864.

SIMONY (trading in church offices), derives its
me from Simon desiring to purchase the gift of
e Holy Spirit (*Acts* viii. 18, 19). It is forbidden

England by the canon law, and by statute
Eliz. c. 6, "for the avoiding of simony and cor-
ruption in presentations, collations, and donations
and to benefices," &c., 1588-9; and by statute of
2 Anne 2, stat. 12 (1713). The rev. James John

SIMPLON, a mountain road, leading from
witzerland into Italy, constructed by Napoleon in
801-7. It winds up passes, crosses cataracts, and
asses by galleries through solid rock, and has eight
principal bridges. The number of workmen em-
ployed at one time varied from 30,000 to 40,000.

SINAI, MOUNT. Here the ten command-
ments were promulgated, 1491 B.C. *Erod. xx.*
After much investigation and discussion by many
persons, Dr. Beke stated that he had discovered the
true Sinai, Feb. 1874.

SINDE (N. W. India), was traversed by the
Greeks under Alexander, about 326 B.C.; conquered
by the Persian Mahometans in the 8th century A.D.;
tributary to the Ghaznevite dynasty in the 11th
century; conquered by Nadir Shah, 1739; reverted
to the empire of Delhi after his death, 1747; after
various changes of rulers, Sind was conquered by
the English, and annexed, March, 1843.

SINKING FUND. First projected by sir
Robert Walpole to redeem the debt to the bank of
England; act passed in 1716. The act establishing
the sinking fund of Mr. Pitt, devised by Dr. Price,
was passed in March, 1786. A then estimated sur-
plus of 900,000*l.* in the revenue was augmented by
new taxes to make up the sum of 1,000,000*l.* which
was to be invariably applied to the reduction of the
national debt. The fallacy of the scheme was
shown by Dr. Hamilton in 1813. In July, 1828,
the sinking fund was limited to one-fourth of the
actual surplus of revenue.

A new sinking fund was established by Act passed
2 Aug. 1875. The annual charge of the national debt
of the year ending 31 March, 1877 to be 27,700,000*l.* ;
subsequent years to be 28,000,000*l.*

SINOPE, an important Greek colony on the
Euxine, after resisting several attacks was con-
quered by Mithridates IV., king of Pontus, and
made his capital. It was the birth-place of
Diogenes, the cynic philosopher. On 30 Nov. 1853,
a Turkish fleet of seven frigates, three corvettes,
and two smaller vessels, was attacked by a Russian
fleet of six sail of the line, two sailing vessels, and
three steamers, under admiral Nachimoff, and
totally destroyed, except one vessel, which con-
veyed the tidings to Constantinople. Four thou-
sand lives were lost by fire or drowning, and Osman
Pacha, the Turkish admiral, died at Sebastopol of
his wounds. In consequence of this act (considered
treacherous) the Anglo-French fleet entered the
Black Sea, 3 Jan. 1854.

SION COLLEGE AND HOSPITAL, situated
on the site of a nunnery, which, having fallen to
decay, was purchased by William Elysnge, a citizen
and mercer, and converted into a college and hos-
pital, called from his name Elysnge Spital. In
1340 he changed it to an Austin priory, which was
afterwards granted by Henry VIII. to sir John
Williams, master of the jewel-office, who, with sir
Roland Hayward, inhabited it till its destruction
by fire. In 1623, Dr. Thomas White having be-
queathed 3000*l.* towards purchasing and building a
college and alms-house on the ancient site, his
executors erected the present college. It is held by
two charters of incorporation, 6 Chas. I. 1630 and 16
Chas. II. 1664. It contains a valuable library (easily
accessible to the public), and an almshouse for ten
men and ten women. New buildings erected on
the Thames Embankment; memorial stone laid 21
April, 1885; opened by the prince of Wales, 15
Dec. 1886.

SIRENE, an instrument for determining the
velocity of aerial vibrations corresponding to the
different pitches of musical sounds, was invented
by baron Cagniard de la Tour of Paris in 1819.
The principle was shown in an apparatus exhibited
by Robert Hooke before the Royal Society, 27 July,
1681.

SISTERHOODS in the English church were

Devonshire; she died, Nov. 1876.

SISTERS OF CHARITY, an order for the

named "Gagging Acts," 60 Geo. III. & 1 Geo. IV.

cc. 1, 2, 4, 6, 8, 9, passed in 1819-1820 to suppress sedition meetings and publications.

SIX ARTICLES, see *Articles*.

SIX CLERKS, officers of the court of chancery, who were anciently *clerici* or *clergy*. They were to conform to the laws of celibacy, and forfeit their places if they married; but when the constitution of the court began to alter, a law was made to permit them to marry; statute 24 & 25 Hen. VIII. 1533. The six clerks continued for many years officers of the chancery court, and held their offices in Chancery-lane, London, where proceedings by bill and answer were transacted and filed, and certain patents issued. *Lar. Dict.* The six clerks were discontinued by 5 & 6 Vict. c. 103, 1841.

SIXTEEN (seize), a large French political club, in the reigns of Henry III. and IV., sixteen members of which took charge of the sixteen quarters of Paris. They at first supported the catholic league, and attempted to overthrow Henry III. in 1587, but vacillating in their policy, and committing many crimes, their power was annihilated by Mayenne in 1591, and several of them were executed.

SKALITZ (Bohemia), was stormed by the Prussian general Steinmetz, 28 June, 1866; whereby the junction of the divisions of the Prussians was greatly facilitated.

SLAVERY. The traffic in men came from Chaldaea into Egypt, Arabia, and all over the East. In Greece, in the time of Homer, all prisoners of war were treated as slaves. The Lacedæmonian youths, trained up in the practice of deceiving and

butchering slaves, were from time to time let upon them to show their proficiency; and once, for amusement only, murdered, it is said, 3000 in a night, see *Helots*. Alexander, when he razed Thebes, sold the whole people for slaves, 335 B.C. There were 400,000 slaves in Attica, 317 B.C. In B.C. slaves were often chained to the gate of a man's house, to give admittance to the guests invited to the feast. By one of the laws of the XII Tables, creditors could seize their insolvent debtors and keep them in their houses, till by their service or labour they had discharged the sum they owed. C. Pollio threw such slaves as gave him the slightest offence into his fish-ponds, to fatten his lampreys, 42 B.C. Cæcilius Isidorus left to his heir 417 slaves, 12 B.C. The first Janissaries were Christian slaves, 1327.

It was decreed in Brazil in 1867 that all children born to slaves henceforth were to be free, and all slaves were to be free in 20 years from that time. In Nov. slaves of the state became free when made soldiers. Slavery was ordered to be abolished gradually (*Rio Branco*), 27 Sept. 1871.

SLAVERY IN ENGLAND. Laws respecting the sale of slaves were made by Alfred. The English peasantry were commonly sold for slaves in Sax and Norman times; children were sold in Bre market like cattle for exportation. Many were sent to Ireland and to Scotland. Under the Normans the vassals (termed villeins, of and pertaining to the *vill*) were devisable as chattels during feudal times.

Severe statutes were passed in the reign of Richard II., 1377 and 1385; the rebellion of Wat Tyler, 1381, arose partly out of the evils of serfdom.

A statute was enacted by Edward VI. that a runaway, or any one who lived idly for three days, should be brought before two justices of the peace, and marked V with a hot iron on the breast, and adjudged the slave of him who bought him for two years. He was to take the slave and give him bread, water, or small drink, and refuse meat, and cause him to work by beating, chaining, or otherwise; and, if within that space, he absented himself fourteen days, was to be marked on the forehead or cheek, by a hot iron, with an S, and be his master's slave for ever; second desertion was made felony. It was lawful to put a ring of iron round his neck, arm, or leg. A child might be put apprentice, and, on running away, become a slave to his master.

Queen Elizabeth ordered her bondsmen in the western counties to be made free at easy rates. Serfdom was finally extinguished in 1660, when tenures in capite, knights' service, &c., were abolished.

slave named Somerset, brought to England, was, because of his ill state, turned adrift by his master. By the charity of Mr. Granville Sharp he was restored to health, when his master again claimed him. SLAVE TRADE. The slave trade from Congo and Angola was begun by the Portuguese in 1481. The commerce in man has brutalised a tract fifteen degrees on each side of the equator, and forty degrees wide, or of 4,000,000 of square miles; and men and women have been bred for sale to the Christian nations during the last 250 years, and war carried on to make prisoners for the Christian market. The Abbé Raynal computed (1777) that, at the time of his writing, 9,000,000 of slaves had been consumed by the Europeans. The slave-trade is now approaching extinction.

In 1768 the slaves taken from Africa amounted to 104,100. In 1786 the annual number was about 100,000. In 1807 it was shown by documents, produced by government, that since 1792 upwards of 3,500,000 Africans had been torn from their country, and had either perished on the passage or been sold in the West Indies.

SLAVE TRADE OF ENGLAND: begun by sir John Hawkins. His first expedition, with the object of procuring negroes on the coast of Africa, and conveying them for sale at the West Indies, took place in Oct. 1562; see *Guinea*, and *Asiento*.

England employed 130 ships and carried off 42,000 slaves, 1786.

In June, 1857, the French government gave permission to M. Regis to convey free negroes from Africa to Guadeloupe and Martinico, French colonies.

This having led to abuses and consequent troubles (see *Charles et Georges*), was eventually given up in Jan. 1859.

It is said that about 40,000 slaves were landed at Cuba in 1860.

A species of slave trade has lately risen in the South Seas; the natives being enticed on board certain British vessels and shipped to Queensland, Australia, and the Fiji Isles; the subject was brought before parliament (see *Melanesia*), 1871-2.

The ship *Carl* (owner, Dr. James P. Murray; master, Joseph Armstrong) left Melbourne for South Sea Isles; it anchored off Malokolo, Solomon's and Bougainville Isles and kidnapped many natives as labourers for the Fiji Isles; while about 30 miles from land, the prisoners rose and attempted to set fire to the ship; were fired on; about 50 killed and 30 wounded were cast into the sea. At Melbourne Murray gave evidence, and Armstrong was committed for trial, 16 Aug.; the master and mate sentenced to death, Nov. 1872.

SLAVONIA or **SCLAVONIA**, a province of Austria, derives its name from the Slaves, a Sarmatian people who replaced the Avars in Pannonia early in the 9th century. In 864 Cyril and Methodius, Greek missionaries, preached here, and adapted the Greek alphabet to the Slavonian language; the letters of which have since been a little altered. The country, after having been held at times by the Greeks, Turks, and Hungarians, and the cause of sanguinary conflicts, was ceded finally to Hungary in 1699, at the peace of Carlowitz. Deputies from the Slavonian provinces of Austria were entertained at Moscow and St. Petersburg, May, 1867. The Croatian-Slavonian diet, at Agram, was dissolved, May, 1867. It protested against incorporation with Hungary. The Slavonian family of languages includes Russian, Polish, Servian, Bohemian, Bulgarian, Wendic, Slovak, and Polabie. For the war, see *Turkey*, 1875-6.

SLING. In *Judges* xx. 16, is mentioned the skill of the Benjamite slingers (about 1406 B.C.) and with a sling David slew Goliath 1063 B.C. (*1 Sam.* xvii.). The natives of the Balearic Isles (Majorca, Minorca, and Ivica) were celebrated slingers, and served as mercenaries in the Carthaginian and Roman armies. Slings are said to have been used by the Huguenots at the siege of Sancerre, in 1672, to economise their powder.

The emperor, apprehensive that the kings of France and England would join this league, signed the treaty of Passau, 31 July, 1532, allowing liberty of conscience.

SMALLPOX, *variola* (diminutive of *varus*, pimple), a highly contagious disease, supposed to have been introduced into Europe from the East by the Saracens. Rhazes, an Arabian, described it accurately, about 900. From Europe it was carried to America, soon after its discovery, and raged there with great severity, destroying the Indians by thousands. In 1694, queen Mary of England died of small pox, as did in 1711 and 1712 the emperor of Germany, the dauphin and dauphiness of France and their son, in 1730 the emperor of Russia, in 1741 the queen of Sweden, and in 1774 Louis XV. of France. It is stated that in the middle of the last century two millions perished by it in Russia. In London in 1723 one out of fourteen deaths was caused by small pox, and in France in 1754 the rate was one in ten. For the attempts to alleviate this scourge, see *Inoculation*, introduced into England in 1722, and *vaccination*, announced by Dr. Jenner in 1798. *Smallpox Hospital*, established 1740. Smallpox raged in parts of London, and thousands died, 1870-1; a temporary hospital was established at Hampstead (*which see*). The Anti-Vaccination society has been active, and many parents have been fined for opposing the vaccination of their children, 1870-6. In Sept. and Oct. 1862, a great many sheep died of smallpox in the West of England, till successful preventive measures were resorted to. Many cases in London, 1876-8; deaths principally of unvaccinated persons.

Smallpox prevalent in London, 88 deaths 1-7 May; 129 deaths 15-21 May; diminishing July, 1881.

SMALL TENEMENTS ACTS (59 Geo. III. c. 12, 1819); 1850 (13 & 14 Vict. c. 99), provided for owners paying rates of houses instead of the occupiers. This was annulled by the new Reform act, 30 & 31 Vict. c. 102, s. 7 (1867).

SMITH'S CHARITY (FOR POOR KIN). Alderman Henry Smith, by will dated 26 April, 1647, left 1000*l.* for relief of captives held by Turkish pirates, and 1000*l.* for his poor kinsmen.

The former object having become obsolete, an act was passed in 1772 to divert all the property to the poor kinsmen. In 1868 there were 412 in number. The value of the property is now 17,000*l.* a year (1889). The master of the rolls decided in Dec. 1877, that the funds should be applied to general charitable purposes. On appeal, the decision was in favour of the "poor Smiths," 12 Feb. 1878.

SMITHFIELD, WEST, in the heart of London, was once a favourite walk of the London citizens, outside the city walls. Sir W. Wallace was executed here, 23 Aug. 1305. On 15 June, 1381, Wat Tyler was met by Richard II. at this place, and was stabbed by Walworth the mayor. Many tournaments were also held here. In the reign of Mary (1553-8), many persons perished by fire; and Bartholomew Leggett, an Arian, was burnt here, 18 March, 1612.—Bartholomew fair was held here till 1853.—This place is mentioned as the site of a cattle market as far back as 1150. The space devoted to this purpose was enlarged from about three acres to four and a half, and in 1834 to six and a quarter. The ancient regulations were called the "statutes of Smithfield." In one day there were sometimes assembled 4000 beasts and 30,000 sheep. The annual amount of the sales was about 7,000,000*l.*

Sold here 226,132 beasts, 1,593,270 sheep and lambs, 26,356 calves, 33,531 pigs. (About 160 salesmen) 1846

The contracted space of the market, the slaughtering places adjoining, and many other nuisances, gave ground to much dissatisfaction, and after investigation, an act was passed appointing metropolitan market commissioners with powers to provide a new market, slaughtering places, &c.; and to close the market at Smithfield. 1 Aug. 1851

Smithfield was used as a cattle market for the last time on 11 June; and the new market in Copenhagen-fields was opened on 13 June (see Metropolitan Market) 1855

The Smithfield Club, to promote improvements in the breed of cattle, was established 17 Dec. 1798; first president, Francis, duke of Bedford; first secretary,

Arthur Young. The members established an annual cattle show, held first in Dolphin-yard, Smithfield, Dec. 1799; next in Barbican, 1805; in Goswell-street, 1806; removed to Baker-street, 1839; and to the new Agricultural hall, Liverpool-road, Islington, 1862.

The show, suspended in Dec. 1866, on account of the cattle plague, was partially resumed Dec. 1867; wholly, Dec. 1868.

Three of the highest prizes were awarded to the queen; 110,000 visitors, 10-14 Dec. 1883.

SMITHSONIAN INSTITUTION, "for the increase and diffusion of knowledge among men," a handsome building at Washington, U.S., was founded in 1846, by means of a legacy of above 100,000*l.* bequeathed for the purpose to the United States government by James Smithson, illegitimate son of air Hugh Smithson, who became duke of Northumberland in 1766. It publishes and freely distributes scientific memoirs and reports. The library was burnt on 25 Jan. 1865. Professor Joseph Henry, the first secretary, died, 13 May, 1878; succeeded by Mr. Spencer F. Baird, died, 19 Aug. 1887; succeeded by Professor S. P. Langley.

SMOKE NUISANCE. An act was passed in 1853 to abate this nuisance, proceeding from chimney shafts and steamers above London bridge. In 1856 another act, obtained for its further application to steamers below London bridge, and to potteries and glass-houses previously exempted, came into operation, 1 Jan. 1858; enactments have been made for all the kingdom.

Messrs. Ashworth and Kneen patent a furnace which saves about 35 per cent. of coal and consumes smoke, autumn, 1887.

SMOLENSKO (Russia). The French in most sanguinary engagements here were three times repulsed, but ultimately succeeded in entering Smolensko, and found the city, which had been bombarded, burning and partly in ruins, 16, 17 Aug. 1812. Barclay de Tolly, the Russian commander-in-chief, incurred the displeasure of the emperor Alexander because he retreated after the battle, and Kutusoff succeeded to the command.

SMUGGLERS. The customs duties, instituted to enable the king to afford protection to trade against pirates, afterwards became a branch of public revenue, and gave rise to much smuggling. The Smugglers' act was passed in 1736, and its severity was mitigated in 1781 and 1784. A revision of these statutes took place 1826 and 1835.

SMYRNA, see *Seven Churches*.

SNEEZING. The custom of saying "God bless you" to the sneezer originated, according to Strada, among the ancients, who, through an opinion of the danger attending it, after sneezing made a short prayer to the gods, as "Jupiter, help me." The custom is mentioned by Homer, the Jewish rabbis, and others, and is found among savages. Polydore Vergil says it took its rise at the time of the plague, 558, when the infected fell down dead sneezing, though seemingly in good health.

SNIDER GUN, see under *Firearms*.

SNUFF-TAKING took its rise in England

from the captures made of vast quantities of snuff by sir George Rooke's expedition to Vigo in 1702, and the practice soon became general. In 1839 there were imported 1,622,493 lbs. of snuff, of which 106,305 lbs. were entered for home consumption; the duty was 88,263*l.*; see *Tobacco*. In 1853, 2,573,925 lbs. of snuff and cigars, in 1861, 2,110,430 lbs.; in 1871, 3,852,236 lbs.; 1877, 3,762,831 lbs.; 1883, 3,121,174 lbs.; 1887, 3,595,071 lbs. were imported.

SOANE MUSEUM, &c. No. 13, Lincoln's-Inn-fields, was gradually formed by sir John Soane, the architect, who died in 1837, after making arrangements for its being open to the public by an act passed in 1833. It contains Egyptian and other antiquities, valuable paintings, rare books, &c. 150*l.* are distributed annually to distressed architects or their widows and children.

One of two sealed closets in the museum was opened 29 Nov. 1886; chiefly private legal documents discovered.

SOAP is a salt, a compound of a fatty acid with an alkali, soda or potash. The Hebrew *bôrith*, translated soap, is merely a general term for cleansing substances. *Job* ix. 30; *Jer.* ii. 22. Pliny declares soap to be an invention of the Gauls, though he prefers the German to the Gallic soap. Nausicaa and her attendants, Homer tells us, washed clothes by treading upon them with their feet in pits of water. *Odyssey*, book vi. The Romans used fuller's earth. *Savon*, the French word for soap, is ascribed to its having been manufactured at Savona, near Genoa. The manufacture of soap began in London in 1524, before which time it was supplied by Bristol at one penny per pound. The duty upon soap, imposed in 1711, after several reductions from 3*d.* per pound, was totally repealed in 1853. It then produced, according to the chancellor of the exchequer, Mr. Gladstone, about 1,126,000*l.* annually.

SOBRAON (N.W. India). The British army, 35,000 strong, under sir Hugh (afterwards viscount) Gough, attacked the Sikh force on the Sutlej, 10 Feb. 1846. The enemy was dislodged after a dreadful contest, and all their batteries taken; and in attempting the passage of the river by a floating bridge in their rear, the weight of the masses that crowded upon it caused it to break down, and thousands of Sikhs were killed, wounded, or drowned. The British loss was 2338 men.

SOCIALISM was warmly advocated in London, 24 Jan. 1834, by the celebrated Robert Owen. He had, beginning at New Lanark, in Scotland, about 1801, established a settlement at New Harmony in America in 1824. He died 17 Nov. 1858, aged 90. The French socialists, termed *Communists*, became a powerful political body in that country, were implicated in the revolution of 1848, and made an insurrection at Paris, 1871. See *France, Germany*, 1878 *et seq.* *Positive Philosophy*, and *Working-men* (who, in Great Britain, have received by legislation nearly all they require).

The Rev. Charles Kingsley, Mr. Thomas Hughes, and others, endeavoured to set up *Christian Socialism*, about 1855-60. P. J. Proudhon, an eminent socialist, to whom is ascribed the saying "*la propriété c'est le vol*"; died 30 Jan. 1865.

Its object was to promote improvements in the administration of law, in education, in public health, and in social economy. It held annual meetings, and published its proceedings.

Mr. Wm. Ellis and Mr. John Stuart Mill began to promote the study about 1823.

SOCIETY ISLANDS, Pacific Ocean, discovered by De Quiros in 1606; re-discovered by capt. Wallis, 1767, who gave Otaheite or Tahiti the name of King George's Island. Capt. Cook, who visited them in 1769 and 1777, named them Society Islands in honour of the Royal Society. See *Otaheite*.

SOCINIANS, persons who accept the opinions of Faustus Socinus (died 1562), and his nephew Lælius (died 1604), Siennese noblemen. They held—1. That the Eternal Father was the one only God, and that Jesus Christ was no otherwise God than by his superiority to all other creatures; 2. That Christ was not a mediator; 3. That hell will endure for a time, after which the soul and body will be destroyed; 4. That it is unlawful for princes to make war. *Hook*. The Socinians established a church at Rakow, in Poland, and made proselytes in Transylvania, 1563. They were expelled from Poland in 1658. The Rakovian catechism was published in 1754; see *Unitarians*.

SOCOTRA, (*Dioscoridis insula*), an island in the Indian ocean, belonging to the imam of Muscat, 120 miles E. of cape Guardafui, Eastern Africa. In the summer of 1878, it was said to have been given up to the British; formally annexed, Nov. 1886.

SODIUM, a remarkable metal, first obtained in 1807 by sir Humphry Davy, from soda (which was formerly confounded with potash, but proved to be a distinct substance by Duhamel in 1736). This metal, like potassium, was obtained by the agency of the electric battery. In consequence of Deville's improved processes, sodium manufactured by Bell Brothers, of Newcastle, at 10s. a pound (1868). It is an important agent in the modern production of aluminium. Common salt (chloride of sodium) is a compound of sodium and chlorine. Mr. H. Y. Castner's (of New York) new process for the enlarged production of sodium, and through sodium of aluminium and magnesium, announced in June, 1887. His works were set up at Oldbury, near Birmingham; the price of sodium in 1889 was about 4s. 4d. a pound. See *Alkalies* and *Aluminium*.

SODOM AND GOMORRAH (Palestine), with their inhabitants, were destroyed by fire from heaven 1808 B.C., *Gen.* xix.

SODOR, said to be derived from Sodor-eyes, or south isles (the Æbrides or Hebrides), in distinction from Orkneys, the north isles. The southern or western isles were made an episcopal diocese by Magnus, king of Norway, 1098, and joined to the isle of Man about 1113. See *Man*.

SOFIA, a manufacturing town in Bulgaria; founded by Justinian on the ruins of the ancient Sardica; became the capital of the new principality. A palace and other buildings were in course of erection, Aug. 1881. It contains 30 mosques and 10 churches.

SOFFABIDES DYNASTY reigned in Persia, 872-902.

SOFTAS, Mahometan students devoted to the Koran only. See *Turkey*, May, 1876.

SOHO BAZAAR AND THEATRE, *Bazaars and Theatres*.

SOISSONS (France), capital of the Gallie Suessiones, was subdued by Julius Cæsar, 57 B.C. It was held by Syagrius, after his father Ægidius, till his defeat by Clovis, A.D. 486. Several councils have been held at Soissons (in 744, 1098, 1122). Its academy was established in 1674. During the Franco-Prussian war, Soissons, after three weeks' investment and four days' bombardment, surrendered to the Germans under the grand-duke of Mecklenburg, 16 Oct. 1870. 99 officers, 4633 men, 128 guns, &c., were said to be taken. The Germans thus obtained a second line of railway from Châlons to Paris.

SOLAR SYSTEM, nearly as now accepted, is said to have been taught by Pythagoras of Samos, about 529 B.C. He placed the sun in the centre, and all the planets moving in elliptical orbits round it—a doctrine superseded by the Ptolemaic system (*which see*). The system of Pythagoras, revived by Copernicus (1543), is called the Copernican system. Its truth was demonstrated by sir Isaac Newton in 1687. See *Planets*.

SOLDIERS' DAUGHTERS' HOME was established at Hampstead, near London, in Aug. 1857, by the surplus of the money collected by the central association in aid of the wives and families of soldiers in active service during the Crimean war, and opened by the prince consort, 18 June, 1858. It has been much indebted to the exertions of miss Powys.

SOLEBAY or SOUTHWOLD BAY (Suffolk), where a fierce naval battle was fought between the fleets of England and France on one side, and the Dutch on the other, the former commanded by the duke of York, afterwards James II., 28 May, 1672. The English lost four ships, and the Dutch three; but the enemy fled, and were pursued to their coasts. The earl of Sandwich was blown up, and thousands were killed and wounded.

SOL-FA SYSTEM, see *Musie*.

SOLFÉRINO (in Lombardy), the site of the chief struggle on the great battle of 24 June, 1859, between the allied French and Sardinian armies, commanded by their respective sovereigns, and the Austrians under general Hess; the emperor being present. The Austrians, after their defeat at Magenta, gradually retreated across the Mincio, and took up a position in the celebrated quadrilateral, and were expected there to await the attack. But the advance of Garibaldi on one side, and of prince Napoleon and the Tuscans on the other, induced them to recross the Mincio and take the offensive, on 23 June. The conflict began early on the 24th, and lasted fifteen hours. At first the Austrians had the advantage; but the successful attack of the French on Cavriana and Solferino changed the fortune of the day, and the Austrians, after desperate encounters, were compelled to retreat. The French attribute the victory to the skill and bravery of their emperor and the general MacMahon and Niel; the Austrians, to the destruction of their reserve by the rifled cannon of their adversaries. The Sardinians maintained a fearful contest of fifteen hours at San Martino, it is said against double their number. Loss of the Austrians, 630 officers, and 19,311 soldiers; of the allies, 3 generals, 936 officers, and 17,305 soldiers killed and wounded. This battle closed the war; pre-

naries of peace being signed at Villa Franca, July. On 24 June, 1870, on the site of the 16, three ossuaries, containing the bones of 16,000 of the slain, were solemnly consecrated in the presence of representatives of Austria, France, Italy.

SOLWAY MOSS (Cumberland, bordering on Scotland). On 13 Nov. 1771, it swelled, owing to heavy rains. Upwards of 400 acres rose to such a height above the level of the ground, that at last rolled forward like a torrent above a mile, sweeping along with it houses, trees, &c. It covered 600 acres at Netherby, and destroyed about 30 small villages. Near Solway Moss the Scots were defeated by the English, 25 Nov. 1542.

SOMAJ, see *Deism*.

SOMBRERO (West Indies). On this desert isle, Robert Jeffery, a British man-of-war's man, was put ashore by his commander, the hon. captain Lake, for having tapped a barrel of beer when the ship was on short allowance. After sustaining for eight days on a few limpets and rain-water, he was saved by an American vessel, 13 Dec. 1807; and returned to England. Sir Francis Burdett advocated his cause in parliament, and he received £100 as a compensation from captain Lake, who was

tried by a court-martial, and dismissed the service, 10 Feb. 1810.

SOMERSET-HOUSE (London), formerly a palace, founded on the site of several churches and other buildings levelled in 1549, by the protector Somerset, whose residence fell to the crown after his execution, 22 Jan. 1552. Here resided at times queen Elizabeth, Anne of Denmark, and Catherine, queen of Charles II. Old Somerset-house, a mixture of Grecian and Gothic, was demolished in 1775, and the present edifice, from a design by sir William Chambers, was erected for public offices. The Royal Academy of Arts first assembled in the apartments given to the members by the king, 17 Jan. 1771. The Royal Society met here, 1780-1857; and apartments here were also held by the Society of Antiquaries and the Geological Society; all three now at Burlington House. Large suites of government buildings were erected in 1774. The Navy-office, Pipe-office, Victualling and other offices, were removed here in 1788, and various government departments since. The east wing forming the King's College (see *King's College*) was completed in 1833. By an act passed in 1854, the offices of the duchy of Cornwall were transferred to Fimlico.

SOMNATH GATES, the gates of an ancient Hindoo temple at Guzerat, which was destroyed by Mahmoud of Ghuznee in 1025. The priests wished to preserve the idol; but Mahmoud broke it to pieces and found it filled with diamonds, &c. He carried the gates to Ghuznee. When that city was taken by general Nott, 6 Sept. 1842, lord Ellenborough ordered the gates to be restored after an exile of 800 years, and issued a proclamation much censured at the time. The gates are made of sandal wood, and are described and figured in the *Archæologia of the Society of Antiquaries*, vol. xxx.

SOMOROSTRO, see *Spain*, 1874.

SONATA (Italian, sound-piece), the highest form of instrumental music, consisting of three or four movements, intending to express diverse kinds of human feelings.

It was developed from the *suite*, varied dance music (Tartini, 1624, and others). The form fixed by Corelli (1653-1713), was adopted and modified by Scarlatti, the Bachs, Handel, Mozart, Haydn, and culminated in the master-pieces of Beethoven (1770-1827). Fine sonatas have been composed by Dussek, M. Clementi, Weber, Schubert, Mendelssohn, Schumann, Wm. Sterndale Bennett, Chopin, Liszt, and Rubenstein.

They were quite subdued early in 1856, and many were removed to the newly-conquered province of Pegu.

SOPHIA, ST. (in Constantinople). The first church was dedicated to St. Sophia (holy wisdom) by Constantius II., 360; this having been destroyed, the second, the present edifice, was founded by Justinian, 531, and dedicated 537. Since the Mahometan conquest in 1453, it has been used as an imperial mosque. Its length is 269 feet, and its breadth 243 feet. Six of its pillars are of green jasper, from the temple of Diana, at Ephesus; and of porphyry, from the temple of the Sun, at Rome. Four minarets were added by Selim II., who reigned in 1566. The interior of the dome is beautifully ornamented with mosaic work.

They soon attained a European reputation as a faculty of theology, their judgment being frequently appealed to, from the 14th to the 17th centuries. The influence of the Sorbonne was declining when the society was broken up in 1789. The buildings are now devoted to education. The new Sorbonne Buildings are to be opened on 5 Aug. 1889.

These were bought for 11,000*l.* by 73 English gentlemen, with the view of first exhibiting them to the public, and afterwards selling them to the government (who gradually purchased them between 1858 and 1865). They formed part of the "Art Treasures" exhibited at Manchester in 1857.
SOUND, see Acoustics.
SOUND DUTIES. Till the year 1857 no merchant ship was allowed to pass the Sound (a narrow channel separating Zealand from Sweden) without clearing at Elsinore and paying toll. These duties had their origin in an agreement between the king of Denmark and the Hanse towns (1348), by which the former undertook to maintain lighthouses, &c., along the Cattagat, and the latter to pay duty for the same. The first treaty with England in relation to this was in 1450; other countries followed. In 1855 the United States determined to pay the dues no more; and in the same year the Danish government proposed that these dues should be capitalised; which was eventually agreed to, the sum being 30,476,325 rix-dollars. In Aug. 1857, the British government paid 10,126,855 rix-dollars (1,125,206*l.*) to the Danes as their proportion.—The passage of the Sound was effected, in defiance of strong fortresses, by sir Hyde Parker and lord Nelson, 31 March, 1801; see *Baltic Expedition*.
SOUNDINGS AT SEA. Captain Ross, of H.M.S. *Adipus*, in 1840, took extraordinary soundings at sea. One taken 900 miles west of St. Helena, extended to the depth of 5000 fathoms. In the latitude 33° S. and longitude 9° W. about 300 miles from the Cape of Good Hope, 2266 fathoms were sounded; the weight employed amounted to 450 lbs. On 13 July, 1857, lieutenant Joseph Dayman, in the North Atlantic Ocean, lat. 51° 9' N., long. 40° 2' W., in sounding, found a bottom at 2424 fathoms. The deepest sounding known (3875 faths.) was taken by the *Challenger*, capt. Nares, 24 March, 1873, in the North Atlantic, north of St. Thomas's.
SOUTH AFRICAN ASSOCIATION, established July, 1881, to promote the commercial and social interests of the South African colonies.

SOUTH AFRICAN CONFEDERATION: to comprise the three British colonies—Cape Town, Natal, and West Griqua Land (1873)—and the two Dutch republics, Orange River free state, and the South African or Trans-Vaal republic (1852). The formation was proposed by the earl of Carnarvon, colonial secretary, in a despatch to sir Henry Barkly, governor of Cape Town, 4 May, 1875, and advocated by the historian, J. A. Froude, on a visit. It was much opposed at the Cape. See *Cape*. A conference of delegates in London was opened, 5 Aug. 1876.

The South Africa Act "for the union under one government of such of the South African colonies and states as may agree thereto," was passed 30 Aug. 1877.

SOUTH AFRICAN REPUBLIC, name assumed by the Boers in the Transvaal (*which see*) in 1880-1, and adopted by treaty in Feb. 1884.

SOUTH AMERICA, *see America*.

SOUTHAMPTON, a seaport (S. England), a county of itself, near the Roman Clausentum and the Saxon Hamtune. It frequently suffered by Danish incursions: Canute, when king, occasionally resided here. The charter was granted by Henry I. and confirmed by Richard I. and John; and the free grammar school was founded by Edward VI. On 17 July, 1861, a monument to Dr. Isaac Watts, a native, was uncovered; and on 15 Oct. 1862, the Hartley institution was opened by lord Palmerston. The prince of Wales laid the foundation of the parish church of St. Mary, built as a memorial of Samuel Wilberforce, bishop of Winchester, 12 Aug. 1878; consecrated 19 June, 1879. The British Association met here 1846 and 1882.

SOUTH AUSTRALIA was visited by capt. Sturt in 1830, and explored shortly after by capt. Parker and Mr. Kent, the former of whom was killed by the natives. The boundaries of the province were fixed by 4 & 5 Will. IV. c. 95 (1834); and it was occupied 26 Dec. 1836, by capt. Hindmarsh, the first governor. It was colonised according to Mr. E. Gibbon Wakefield's scheme, which was carried out by the South Australian Colonisation Association. The colony for several years underwent severe trials through the great influx of emigrants, land-jobbing, building speculations, &c., which produced almost universal bankruptcy in 1839. In five years after, the energy of the colonists had overcome their difficulties, and the prosperity of the colony appeared fully established. In 1842 the highly productive Burra Burra copper mines were discovered, and large fortunes were suddenly realised; but in 1851 the discovery of gold in New South Wales and Victoria almost paralysed this province by drawing off a large part of the labouring population. Very little gold was found in South Australia; but a reaction took place in favour of the copper mines and agriculture, &c. Before the discovery of gold, little trade existed between Adelaide (the capital of South Australia) and Melbourne; but in 1852 gold was transmitted from the latter to the former to the amount of 2,215,167*l.* principally for breadstuffs, farm produce, &c. The bishopric of Adelaide was founded in 1847. Discovery of alluvial gold at Tatulpia, Waukaringa, Oct.; favourable report Dec. 1886. SOUTHCOTT, JOANNA, a fanatic, b. in 1750, came from Exeter to London, where followers at one period amounted to many thousands, the low and ignorant being her dupes. In 1792 she announced herself as a woman spoken of in *Revelation*, chap. xii. as a disease favoured the delusion that she would be the mother of the promised Shiloh. She died Dec. 1814. In 1851 there existed in England congregations, professing to expect her return. Her successor, Mrs. Peacock, died March 1855, aged 103 (P).

SOUTHERN CONFEDERATE STATES, *see Confederates*.

SOUTHERN CONTINENT. The Southern Ocean was first traversed by Magellan in 1522 and explored by Wallis and Carteret in 1769; and by Cook in 1773 and 1774. Of the southern continent little more is known than that it is bounded, and contains active volcanoes. It was discovered in the first instance by capt. John Biscoe on 27 Feb. 1831, in lat. 65° 57' S., long. 47° 20' E. extending east and west 200 miles,—this he named Enderby Land, after the gentleman who he equipped him for the voyage. Capt. Biscoe discovered Graham's Land on 15 Feb. 1831, situated in lat. 67° 1' S., long. 71° 48' W. Messrs. Enderby equipped three other expeditions in search of the southern continent, the last in connection with some other gentlemen) in 1839 when capt. Balleny had command, who, on 9 Feb. 1839, discovered the Balleny Islands, in lat. 65° S., long. 165° E., and in March, 1839, Sabr Land, in lat. 65° 10' S., long. 118° 30' E. In 1840 a French expedition, under the command of admiral D'Urville, and an American expedition, under the command of commodore Wilkes, greatly added to our knowledge in respect to the existence of the southern continent, and this was again increased by the expedition which sailed from England in 1839, under the command of capt. sir James Clark Ross, who discovered Victoria Land in 1841, and subsequently penetrated as far south as 78° 11'. Antarctic expedition proposed by the Argentine republic and the Genoese, Sept. 1881: the objects collected to be divided. Italian expedition under lieut. Boe, 1881-2.

A special exhibition of works of art, of immense value, lent for the occasion was opened here in the summer of 1862, and closed in November. In July, 1873, a testimonial to the (aft. sir) Henry Cole, C.B., was proposed for his exertions in organizing this museum, and in promoting its objects.

SOUTH-SEA BUBBLE commenced with establishment of the South-sea company in 1700, which was at first unwisely and afterwards honestly managed. It exploded in 1720, ruining thousands of families; and the directors' estates, the value of 2,014,000*l.*, were seized in 1721 and d. Mr. Knight, the cashier, absconded with 3,000*l.*; but he compounded the fraud for 3,000*l.* and returned to England in 1743. Almost the wealthy persons in the kingdom had become speculators; the artifices of the directors having raised the shares, originally 100*l.*, to the price of 100*l.*. A parliamentary inquiry took place in Nov. 1720, and Aislabie, chancellor of the exchequer, and several members of parliament were expelled the house in 1721; see *Law's Bubble*.

SOUTHWARK (S. London), was governed by its own bailiffs till 1327. The city, however, found great inconvenience from the number of malefactors who escaped thither, in order to be out of the reach and cognizance of the city magistrates; and a grant was made of Southwark to the city of London by the crown, for a small annuity. In Edward VI.'s reign it was formed into a city ward, and was named Bridge Ward Without, 1550.—*Southwark bridge* was designed by John Rennie, and built by a company, 1815-19, at an expense of 800,000*l.* It consists of three great cast-iron arches, resting on massive stone piers and abutments; the distance between the abutments is 708 ft.; the centre arch is 240 feet span, the two others 210 feet each; and the total weight of iron 108 tons. The bridge was freed from toll on 10 Nov. 1864, the company receiving a compensation on the city. An act for the payment of dividends to shareholders was passed in 1872.—*Southwark park* was opened, 19 June, 1869. By the Parks Act (1885), Southwark sends three members to parliament.

SOUTHWELL, Nottinghamshire, an ancient town, where a church was founded by Paulinus, bishop of York, 627; made collegiate before the conquest, refounded by Henry VIII., and made a bishopric by Henry VIII., 1541; dissolved by Edward VI. Collegiate church restored by Elizabeth, 1586. Near here Charles I. surrendered himself to the Scotch army in 1646. The bishopric act, authorizing the establishment of a college at Southwell, was passed, 16 Aug. 1878. Constituted to consist of the counties of Derby and Nottingham, 2 Feb. 1884. The restored minster reopened as cathedral, 2 Feb. 1888.

In 1542 sovereigns were coined in value 20*l.*, which afterwards, 1550 and 1552 (4 & 6 Ed. VI.), passed for 2*l.* and 3*l.*. "Sovereigns" of the new coinage were ordered to pass for 20*l.* 1 July, and half-sovereigns for 10*l.* 10 Oct. 1817; see *Corn*, and *Gold*. SPA-FIELDS (N. London). Here about 30,000 persons assembled to vote an address from the distressed manufacturers to the prince regent, 15 Nov. 1816. A second meeting, 2 Dec. following, terminated in an alarming riot; the shops of several gunsmiths were attacked for arms by the rioters; and in the shop of Mr. Beckwith, on Snow-hill, Mr. Platt was wounded, and much injury was done before the tumult was suppressed. For this riot, Cashman, a seaman, was hanged, 12 March, 1817. Watson, the ringleader, escaped to America.

Spafields Chapel, a dome building, originally a place of entertainment named the Pantheon, erected, 1770, was after several changes purchased by the countess of Huntingdon and used as a place of worship for her "connection," (see *Whitechapel*). This chapel was pulled down in 1887

SPANISH EXHIBITION of Arts and Industries, Earl's Court, Kensington, London, W., chairman, the duke of Wellington, a grandee of Spain.

The exhibition, although unfinished, was informally opened with a fine display of pictures, 1 June, 1889.

SPANISH GRANDEES, the higher nobility; at one time almost equal to the kings of Castile and Aragon, and often setting their authority at defiance, were restrained on the union of the crowns by the marriage of Ferdinand and Isabella in 1474, who compelled several to relinquish the royal fortresses and domains which they held. Charles V. reduced the grandees to sixteen families (Medina-Sidonia, Albuquerque, &c.), dividing them into three classes.

SPANISH LANGUAGE (*Lengua Castellana*), is a dialect of Latin largely intermingled with Arabic, which was the legal language till the 14th century. Spanish did not become general till the 16th century.

SPARTA, the capital of Laconia, or Lacedæmon, the most considerable republic of the Peloponnesus, and the rival of Athens. Though without walls, it resisted the attacks of its enemies by the valour of its citizens for eight centuries. Lelex is supposed to have been the first king. From Lacedæmon the fourth king, and his wife Sparta, who are also spoken of as the founders of the city, it obtained names. The Lacedæmonians were a nation of soldiers, and cultivated neither the arts, sciences, commerce, nor agriculture. The early history is traditional.

SPARTACUS'S INSURRECTION

Servile War). Spartacus was a noble Thracian who served in an auxiliary corps of the Roman army. Having deserted and been apprehended, he was reduced to slavery and made a gladiator. With some companions he made his escape, collected a body of slaves and gladiators, 73 B.C.; ravaged southern Italy; and defeated the Roman forces under the consuls sent against him. Knowing the impossibility of successfully resisting the republic, he endeavoured to conduct his forces into Sicily, but was defeated and slain by Crassus, 71 B.C.

"SPASMODIC SCHOOL" of poetry, name sarcastically given to Alex. Smith, Sydney Dobell (died in Aug. 1874), Gerald Massey, and others (precursors of Morris, Algernon Swinburne, and Rossetti, sarcastically termed the "Fleshly school"), ridiculed by professor Aytoun in his "Firmilian," published 1854.

SPEAKERS OF THE HOUSE OF COMMONS

Peter de Montford, afterwards killed at the battle of Evesham, was the first speaker, 45 Hen. III. 1260; Sir Thos. Hungerford is said to have been the first named "Speaker," 1372; Sir Peter de la Mare is supposed to have been the first regular speaker, 50 Edw. III., 1376. The king refused his assent to the choice of Sir Edward Seymour, as speaker, 6 March, 1678; and serjeant William Gregory was chosen in his room. Sir John Trevor was expelled the chair and the house for taking a gratuity after the act for the

benefit of orphans had passed, 12 March, 1694-5; a deputy speaker was appointed Aug. 1853.

SPEAKER'S COMMENTARY, a name given to an edition of the Bible with a revised text and a commentary by several bishops and other theologians edited by F. C. Cook. The undertaking originated, it is said, chiefly with Mr. John Evelyn Denison, speaker of the house of commons, with the view of opposing the interpretations of Dr. Olenso, and was announced in Nov. 1863. The publication, begun in 1871, was completed in 1881. The Apocrypha published in 1888.

SPEAKING-TRUMPET, used by ships at sea. One is said to have been used by Alexander, 35 B.C. One was constructed from Kircher's description by Saland, 1652; philosophically explained and brought into notice by Morland, 1670.

SPECIAL COMMISSION ACT, passed 13 Aug. 1888. A commission constituted to try certain charges and allegations against certain members of parliament. See *Parnellites and Ireland*, 1888.

SPECIAL CONSTABLES are sworn in for the preservation of the public peace when disturbances are feared. The laws relative to their appointment were amended in 1831 and 1835. Louis Napoleon, afterwards emperor, aided as a special constable in London, 10 April, 1848; see *Chartists*, and *London*, Dec. 1867. Instructions for their organisation were issued, 13 Jan. 1868. On 28 Jan. 52,974 in the metropolis, and 113,674 in the United Kingdom, had been sworn in. Their services were not required, and they were honourably dismissed by an order issued 31 March, 1868.

Special constables were sworn in in relation to the disturbances in Trafalgar Square (see *Riots*) 17 Nov. et seq.; 1,500 held Trafalgar Square, Sunday, 20 Nov. 1887; served till 18 Jan. 1888, and thanked.

SPECIES. Much controversy among naturalists arose in consequence of the publication, in 1859, of Mr. Charles Darwin's "Origin of Species," in which he suggests that all the various species of animals were not created at one time, but have been gradually developed by what he terms "natural selection," and the struggle for life in which the strong overcome the weak.

This preservation of favourable individual differences and variations, and the destruction of those which are injurious, I have called *natural selection*, or the survival of the fittest.—*Darwin*.

His idea was put forth by Lamarck in his "*Philosophie Zoologique*," 1809. Similar views appear in the "*Vestiges of Creation*," 1844. Mr. Darwin says, that he infers "from analogy that probably all the organic beings which have ever lived on the earth have descended from some one primordial form, into which life was first breathed by the Creator." See *Development and Evolution*.

Charles Darwin was born 12 Feb. 1809; and died 19 April, 1882.

Statue of Darwin by J. E. Boehm, paid for by universal subscription, received at the British Museum of

Natural History by the prince of Wales, and uncovered by professor Huxley, 9 June, 1885.

SPECIFIC GRAVITIES. See under *Weights*.

SPECTACLES, unknown to the ancients, are generally supposed to have been invented by Alexander de Spina, a monk of Florence, in Italy, about 1285. According to Dr. Plott, they were invented by Roger Bacon, about 1280. Manni attributes them to Salvino, who died 1317. On his tomb at Florence is the inscription, "Qui giace Salvino degli Armati, inventore degli occhiali: Dio gli perdoni le peccata" ("Here lies Salvino degli Armati, inventor of spectacles: May God pardon his sins").

SPECTATOR. The first number of this periodical appeared on 1 March, 1711; the last was No. 635, 20 Dec. 1714. The papers by Addison have one of the letters C L I O at the end. The most of the other papers are by sir Richard Steele, a few by Hughes, Budgell, Eusden, Miss Shephard, and others.—The *Spectator* newspaper (philosophical, whig), begun 5 July, 1828.

SPECTRUM, the term given to the image of the sun or any other luminous body formed on a wall or screen, by a beam of light received through a small hole or slit, and refracted by a prism. The colours thus produced are red, orange, yellow, green, blue, indigo, and violet. The phenomena were first explained by Newton, whose "*Optics*" was published in 1704. Several of these colours are considered to be compounds of three primary ones: by Mayer (1775), red, yellow, and blue;—by Dr. Thos. Young (1801), red, green, and violet;—by Prof. Clerk Maxwell (1860), red, green, and blue. As the colour of a flame varies according to the substance producing it or introduced into it, so the spectrum varies. This led to the invention of a method of chemical analysis by professors Bunsen and Kirchhoff (1860), by which they discovered two new metals, and drew conclusions as to the nature of the atmosphere of the sun and stars, and of the light of the nebula; by comparing the spectrum with that produced by flames into which iron, sodium, and other substances have been introduced. For the invisible rays of the spectrum, see *Calorescence*, *Fluorescence*, and *Bolometer*.

Fraunhofer's Lines. In 1802 Dr. Wollaston observed several dark lines in the solar spectrum: in 1815 Joseph Fraunhofer not only observed them, but constructed a map of them, giving 500 lines or dark bands. By the researches of Brewster and others the number observed is now above 2000.

Mr. Fox Talbot observed the orange line of strontium in the spectrum in 1826; and sir David Brewster observed other lines, 1833-42-3. In 1862-3 Mr. William Huggins analysed the light of the fixed stars and of the nebula; and in 1865 Dr. Bence Jones, by means of spectrum analyses, detected the presence of minute quantities of metals in the living body, introduced only a few minutes previously.

A spectroscopic society in Italy published a journal early in 1872.

H. Schellen's "*Spectralanalyse*" published 1870; new edition 1883.

Sir H. Roscoe's "*Spectrum Analysis*" published 1867-85. Lecoq de Boisbaudran's "*Spectres Lumineux*" 1874

Tylor, and Max Müller were among the members, 1879; another association formed in the United States; professor F. A. March, president, 1887. Mr. T. B. Sprague's article on a Marriage and Mortality Table, in the Journal of the Institute of Actuaries, is printed according to phonetic spelling July, 1879

SPHERES. The celestial and terrestrial spheres and sun-dials are said to have been invented by Anaximander, 552 B.C.; and the armillary sphere by Eratosthenes, about 225 B.C. The planetarium was constructed by Archimedes before 212 B.C. Pythagoras maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortals, which he called the music of the spheres.

SPINET, a clavichord or keyed instrument, used, in the 17th century, a modification of the virginals, *which see*. Bull, Gibbons, Purcell, and especially Domenico Scarlatti composed for this instrument.

SPINNING was ascribed by the ancients to Minerva, the goddess of wisdom. Arcas, king of Arcadia, taught his subjects the art about 1500 B.C. Tradition reports that Lucretia with her maids was found spinning, when her husband Collatinus paid a visit to her from the camp, that the wife of Tarquin was an excellent spinner, and that a garment made by her, worn by Servius Tullius, was preserved in the temple of Fortune. Till 1767, the spinning of cotton was performed by the hand spinning-wheel, when Hargreaves, an ingenious mechanic, near Blackburn, made a spinning jenny, with eight spindles, and also erected the first carding machine, with cylinders. Arkwright's machine for spinning by water was an extension of the principle of Hargreaves; but he also applied a large and small roller to expand the thread, for which he took out a patent in 1769. At first he worked his machinery by horses; but in 1771 he built a mill on the stream of the Derwent, at Cromford. In 1774-9, Crompton invented the mule (*which see*).

SPIRES (in Bavaria). The emperors held many diets at Spire since 1309, and it was the seat of the imperial chamber till 1688, when the city was burned by the French, and not rebuilt till after the peace of Ryswick, in 1697. The diet to condemn the reformers was held at Spire, called there by the emperor Charles V. 1529; see *Protestants*.

SPIRIT-LEVEL. The invention is ascribed to J. Melchisedec Thevenot, who died 1692.

SPIRIT-MOTOR. Mr. Yarrow explained the Institute of Naval Architects his method of employing vaporised spirit instead of steam in the propulsion of steam launches thus dispensing with the use of a boiler, &c., March, 1885. Petroleum is used as fuel.

SPIRITS, see *Distillation*. In all nations spirituous liquors have been considered as a proper subject of heavy taxation for the support of the state; see *Alcohol*, *Brandy*, *Methylated Spirit*, &c.

In 1840 England made about ten millions of gallons of spirits, Scotland about seven millions of gallons, and Ireland about nine millions of gallons.

In 1851 the number of gallons on which duty was paid for home consumption was 23,976,596. The amount paid was 6,017,818*l.*, of which 3,753,186*l.* was paid by England, 1,252,297*l.* by Scotland, and 1,012,335*l.* by Ireland.

The total duty on home consumption paid in 1851 was 6,760,421*l.*

In 1858, 9,195,154*l.* were paid as duty on 27,377,000 gallons.

In 1855, methylated spirits of wine, for use in the arts and sciences, were made duty free.

In 1859, 27,657,721 gallons of spirits were distilled in the United Kingdom. The uniform duty of 8*s.* per gallon was paid on 24,254,403 gallons for home consumption, producing 9,701,764*l.* In the year 1865-6 the tax produced about 13,955,000*l.*, being the largest sum that has been raised by indirect taxation. In 1871-2, 16,000,000*l.* (customs and excise); in 1875-6, 21,295,663*l.*; in 1879-80, 20,675,928*l.*; in 1883-4, 18,435,957*l.*; and in 1887-8, 17,252,550*l.*

In 1861 an act was passed repealing wholly or in part 26 previous acts, and embodying all regulations for the guidance of manufacturers and dealers in spirits.

In 1870, about 80,000,000*l.* spent in spirits; 58,000,000*l.* by working classes.

Proof spirits distilled in the United Kingdom in 1874, 36,479,648 gallons (England, 9,531,058; Scotland, 16,421,701; Ireland, 10,526,889); in 1874, 35,352,222 gallons; duty paid, 1*s.* a gallon.

SPIRITS ACT (43 & 44 Vict. c. 24), passed 26 Aug. 1880, consolidated and amended the acts relating to the manufacture and sale of spirits.

SPIRITUALISM OR SPIRIT-RAPPING. Spiritual manifestations (so called) began, it is said, in America about 1848, and attracted attention in this country about 1851, in the shape of rapping, table-turning, &c. Many inquisitive or credulous persons visited Mr. Daniel Douglas Hume or Hume and Mr. Foster, noted "spiritual mediums." Mr. Home, secretary of the Spiritual Athenæum, St. James-street, Chelsea, published, in 1863, "Incidents of my Life," in which he states that the only benefit he derived from the "gift" was the conviction that many unbelievers of the certainty of a life to come. The *Trials*, April, May, 1868. The "Spiritual Magazine," began Jan. 1860; the "Spiritualist," 9 Nov. 1869. The London Dialectical society published a report on spiritualism in Nov. 1871. Mr. W. Crookes, in 1871, investigated the phenomena, and ascribed them to "psychic force" ("Quarterly Journal of Science," July and Oct. 1871). Miss Kate Fox, said to be the earliest American medium (about 1852) was married to Mr. H. D. Jencken in London, Dec. 1872.

The impostures of the Davenport brothers exposed in 1865.

In 1874, Messrs. Maskelyne and Cooke, and Dr. Lenz, exhibited tricks by which they said they demonstrated the imposture of spiritualism.

Spiritualism discussed by a section of the British Association at Glasgow (supported by Messrs. Wm. Crookes, A. Russel Wallace, and other eminent men), with a result, 12 Sept. 1876.

o spiritualist journals publishing, 1876.

Dr. Henry Slade, a medium, and Geoffrey Simmons, his assistant, charged at Bow-street by prof. E. Ray Lankester and others, with "unlawfully using certain subtle and crafty means and devices to deceive"; dealt with under Vagrant Act; 2, 10, 20 Oct.; Simmons discharged, Slade sentenced to 3 months' imprisonment with hard labour, 31 Oct. 1876; appeal to sessions; sentence quashed for a technical error, 29 Jan. 1877.

M. Lawrence sentenced to 3 months' imprisonment for receiving money as a "medium," 16 Jan. 1877.

See *Trials*, 1881.

SPITALFIELDS (East London), so named from the priory of St. Mary Spittle, dissolved 1534. Here the French protestant refugees settled and established the silk manufacture in 1685. In consequence of commercial changes the weavers endured much distress about 1829.

SPITHEAD, a roadstead near the Spit, a sandbank between Portsmouth and the Isle of Wight. See *Naval Reviews*, under *Navy of England*.

SPITZBERGEN, an archipelago in the Arctic ocean, discovered in 1553 by sir Hugh Wiloughby, who called it Greenland, supposing it to be a part of the western continent. In 1595 it was visited by Barents and Cornelius, two Dutchmen, who pretended to be the original discoverers, and called it Spitzbergen, or sharp mountains, from the many sharp pointed and rocky mountains with which it abounds; see *Phipps*.

SPITZCAP, see *Majuba*.

SPONTANEOUS COMBUSTION of the human body, declared by most chemists to be impossible, although many cases have been recorded. The case of the countess of Görlitz, 1847, disproved by confession of her murderer, March, 1850.

SPONTANEOUS GENERATION. The origin of the germs of infusorial animalcules developed during putrefaction, &c., has been warmly debated by naturalists. Spallanzani (about 1766), and especially M. Pasteur and others assert that these germs are really endowed with organic life existing in the atmosphere. Needham (about 1747), and especially M. Pouchet and his friends in our day, assert that these germs are spontaneously formed out of organic molecules.—Pouchet's "*Hétérogénie*" appeared in 1859. Bastian's "Beginnings of Life," 1872. The researches of professor Tyndall, supporting Pasteur, and opposing Bastian, were published 1876-8.

"Spontaneous generation" (also termed *generatio equestris* and *epigenesis*), has been still further disproved by the laborious microscopic investigations of the Rev. W. H. Dallinger, 1875-8. He found germs to stand a much greater heat than perfect organisms.

SPORTING NEWSPAPERS: Bell's Life in London, began 1820; Sporting Life, 16 March, 1859; Sporting Gazette, 1862; Sporting Times, 1865; Sportsman, Aug. 1865; The Field, 1853; Illustrated Sporting and Dramatic News, 1874; Referee, 1877.

SPORTS. The first "Book of Sports," under the title of "The King's Majestie's Declaration to his Subjects concerning Lawful Sports to be used" on Sundays after evening prayers, was published by king James I., 24 May, 1618. The second "Book of Sports," with a ratification by his majesty Charles I., is dated 18 Oct. 1633. On the publication of the first "Book of Sports," there arose a long and violent controversy among English divines on certain points; see *Sabbatarians*, *Sunday*, &c.—The book was ordered to be burnt by the hangman, and the sports were suppressed by the parliament. The

sportsman's annual exhibition, at the Agricultural Hall, London, began in 1882.

SPOTTSYLVANIA (Virginia), see *United States*, May, 1864.

SPRINGFIELD (Missouri), near which was fought the desperate battle of Wilson's Creek, in which the federals had the advantage over the confederates, but lost their brave general, Nathaniel Lyon, 10 Aug. 1861.

SPURS. Anciently the difference between the knight and esquire was, that the knight wore gilt spurs (*eques auratus*), and the esquire silver ones. Two sorts of spurs seem to have been in use at the time of the Conquest, one called a pryk, having only a single point, the other a number of points of considerable size. Spurs nearly of the present kind came into use about 1400; see *Plating*.

SPURS, BATTLE OF. Henry VIII. of England, the emperor Maximilian, and the Swiss, in 1513, entered into an offensive alliance against France. Henry VIII. landed at Calais in the month of July, and soon formed an army of 30,000 men. He was joined by the emperor with a good corps of horse and some foot, the emperor as a *mercenary* to the king of England, who allowed him a hundred ducats a day for his table! They invested Teroüenne with an army of 50,000 men; and the duc de Longueville, marching to its relief, was signally defeated on the 16th of August, at Guinegate. This battle was called the battle of *Spurs*, because the French used their *spurs* more than they did their *swords*. The English king laid siege to Tournay, which submitted in a few days. *Hénault*. See *Courtrai*, for another "battle of spurs."

STABAT MATER, a Latin hymn, by Jacopone, 14th century, sung during Passion week in Catholic churches. Rossini's music to this hymn (1842) is often performed.

STADE DUES. At a castle near the town of Stade, in Hanover, certain dues on goods were charged by the Hanoverian government. The British government settled these dues in 1844. They were resisted by the Americans in 1855, and were abolished in June, 1861. Great Britain paid 160,000*l.* as her share of the compensation (3,000,000*l.*).

These coaches were made subject to salutary provisions for the safety of passengers, in 1810; to mileage duties, 1815. The acts were consolidated in 1832, and amended in 1833 and 1842. See *Mail Coaches*, &c.

STAMFORD BRIDGE (York). In 1066 Tostig, brother of Harold II., rebelled against his brother, and joined the invading army of Harold Hardrada, king of Norway. They defeated the northern earls and took York, but were defeated at Stamford-bridge by Harold, 25 Sept., and were both slain. The loss by this victory no doubt led to his defeat at Hastings, 14 Oct. following.

STAMP-DUTIES. By 22 & 23 Charles II. (1670-1) duties were imposed on certain legal documents. In 1694 a duty was imposed upon paper, vellum, and parchment. The stamp-duty on newspapers was commenced in 1711, and every year added to the list of articles upon which stamp-duty was made payable.

Many alterations made in 1853 and 1857. In June, 1855, the stamp-duty on newspapers as such was totally abolished; the stamp on them being henceforth for postal purposes.

In July and Aug. 1854, 19,115,000 newspaper stamps were issued; in the same months, 1855, only 6,870,000.

Drafts on bankers to be stamped 1858

Additional stamp duties were enacted in 1860 (on leases, bills of exchange, dock warrants, extracts from registers of births, &c.); in 1861 (on leases, licences to house-agents, &c.).

STANDARD for gold and silver in England fixed by law, 1300. Standard gold is 22 parts out of 24 of pure gold, the other two parts or carats being silver or copper. The standard of silver is 11 oz. 2 dwts. of fine silver alloyed with 18 dwts. of copper, or 37 parts out of 40 pure silver, and three parts copper. In 1300 these 12 oz. of silver were coined into 20 shillings; in 1412 they were coined into 30 shillings; and in 1527 into 45 shillings. In 1545 Henry VIII. coined 6 oz. of silver and 6 oz. of alloy into 48 shillings; and the next year he coined 4 oz. of silver and 8 oz. of alloy into the same sum. Elizabeth, in 1560, restored the old standard in 60 shillings; and in 1601 in 62 shillings. The average proportions of silver to gold at the royal mint are 15 to 1. The standard of plate and silver manufactures was affirmed, 6 Geo. I. 1719 *et seq.*; see *Gold, Goldsmiths, Silver, Coinage, and Currency*.

STANDARD, BATTLE OF THE, see *Northallerton*.

STANDARD MEASURES. In the reign of Edgar a law was made to prevent frauds arising from the diversity of measures, and for the establishment of a legal standard measure to be used in every part of his dominions. The standard vessels made by order of the king were deposited in the city of Winchester, and hence originated the well-known term of "Winchester measure" of the

time of Henry VII. (1487). The bushel so made is still preserved in the museum of that city. Henry I. also, to prevent frauds in the measurement of cloth, ordered a standard yard of the length of his own arm to be made and deposited at Winchester, with the standard measures of king Edgar. The Guildhall contains the standard measures of succeeding sovereigns. *Camden*.—The standard weights and measures were settled by parliament in 1824. The pound troy was to be 5760 grains, and the pound avoirdupois 7000 grains. The "Standard yard of 1760," in the custody of the clerk of the house of commons, was declared to be the Imperial Standard yard and the unit of measures of extension. This standard having been destroyed by the fire in 1834, a new commission was appointed to reconstruct it, and researches for this purpose, in conformity with the act, which directed the comparison of the standard with a pendulum vibrating seconds of time in the latitude of London, were begun by Francis Baily (died in 1844), continued by the rev. R. Sheepshanks till his death in 1855, and completed by G. B. Airy, astronomer royal. In 1855 was passed "an act for legalising and preserving the lost standards of weights and measures." The parliamentary copies of the standard pound and yard are deposited at the Royal Observatory, Greenwich. The standard weights and measures act was passed Aug. 1860. The Standard Commission published reports, 1860 *et seq.*

"**STANDARD**," conservative newspaper; begun, morning, 1827; evening, 29 June, 1857.

STANDARDS, see *Banners, Flags, &c.* The practice in the army of using a cross on standards and shields is due to the asserted miraculous appearance of a cross to Constantine, previously to his battle with Maxentius; Eusebius says that he received this statement from the emperor himself. 312. The standard was named *LABARUM*. For the celebrated French standard, see *Auriflamme*.—**STANDARD OF MAHOMET**; on this ensign no infidel dared look. Christians have been massacred by the Turkish populace for looking on it.—The British **IMPERIAL STANDARD** was first hoisted on the Tower of London, and on Bedford Tower, Dublin, and displayed by the Foot Guards, on the union of the kingdoms, 1 Jan. 1801.

STANFORD COURT, Worcestershire, the ancient mansion of sir Francis Winnington, burnt 5-7 Dec. 1832; valuable portraits, books, MSS. &c., destroyed.

STANHOPE ADMINISTRATION was formed by James (afterwards earl) Stanhope and the earl of Sunderland, 15 April, 1717. Stanhope was premier and chancellor of the exchequer; lord (afterwards earl) Cowper, lord chancellor; earl of Sunderland and Joseph Addison, secretaries of state, &c. In March, 1718, Addison resigned, and the earl of Sunderland became premier.

STANHOPE DEMONSTRATOR. See *Logic*.

STANNARY COURTS of Devon and Cornwall for the administration of justice among the tin miners, whose privileges were confirmed by 33 Edw. I. 1305. They were regulated by parliament in 1641, and at many times since. A "Stanneries act" was passed in 1869; another act in 1887.

STAPLE (literally that which is fixed). The chief English staple commodities which were traded in by privileged merchants, and on which customs were levied, were wool, skins, leather, tin, lead,

nd sometimes cloth, butter, and cheese; certain owns were appointed for the collection of the uties; statutes relating to the staple were passed y Edward III., Richard II., and Henry VI. Edward III.'s "ordinacio stapularum" (ordinance f the staple) was enacted in 1353.

STARCH is a sediment produced at the bottom f vessels wherein wheat has been steeped in water: t is soft and friable, easily broken into powder, nd is used to stiffen and clear linen, with blue; s powder is employed to powder the hair. The art f starching linen was brought into England by Mrs. Dingheine, a Flemish woman, i Mary, 1553. *Stow*. Patents for obtaining starch from other substances ave been taken out: from potatoes by Samuel ewnton and others in 1707; from the horse-chest- ut by Wm. Murray in 1796; from rice by Thomas Vickham in 1823; from various matters by Orlando ones in 1839-40.

STAR-CHAMBER, COURT OF. So called aply from its roof being garnished with stars. *Coke*. This court of justice was called Star-Chamber, not rom the stars on its roof (which were obliterated ven before the reign of queen Elizabeth), but from he *Starra*, or Jewish covenants, deposited there by rder of Richard I. No star was allowed to be alid except found in those repositories, and here hey remained till the banishment of the Jews by Edward I. The court was instituted or revived, ; Hen. VII. 1486, for trials by a committee of the rivy council, which was in violation of Magna Charta; as it dealt with civil and criminal causes unfettered by the rules of law. In Charles I.'s eign it exercised its power upon several bold inno- rators, who gloried in their sufferings, and con- tributed to render government odious and com- temptible. It was abolished in 1640. There were n this court from 26 to 42 judges, the lord chan- cellor having the casting voice. The judicial com- mittee of the privy council is the Star-chamber revived under another name.

STAR OF INDIA, a new order of knight- hood for India, instituted by letters patent 23 Feb., gazetted 25 June, 1861, and enlarged in 1866. It comprised the sovereign, the grand master, 25 knights (Europeans and natives), and extra or onorary knights, such as the prince consort, the prince of Wales, &c. The queen invested several knights on 1 Nov. 1861. The prince of Wales held a grand chapter at Calcutta, 1 Jan. 1876.

STARS, THE FIXED. They were classed into constellations, it is supposed, about 1200 B.C. Hicetas, of Syracuse, taught that the sun and the stars were notionless, and that the earth moved round them, about 344 B.C. (this is mentioned by Cicero, and perhaps gave the first hint of this system to Copernicus). Job, Hesiod, and Homer mention several of the constellations. The Royal Library at Paris contains a Chinese chart of the heavens, made about 600 B.C., in which 1460 stars are correctly inserted. The aberration of the stars was discovered by Dr. Bradley, 1727; see *Astronomy*, and *Solar System*. Maps of the stars were published by the Society for the Diffusion of Useful Knowledge in 1839, and a set of Celestial Maps, issued under the superintendence of the Royal Prussian Academy, was completed in 1859.

Bessel discovered the annual parallax of star 61 Cygni (hence he calculated its distance from the earth to be about 60 billions of miles) 12 Feb. 1841. Struve made it 40 billions (supported by Brünnow and R. S. Ball) 1853. The calculations of T. Henderson (at the Cape) 1832 supported by D. Gill and others showed that probably a Centauri, is the star nearest to the earth 1883-4.

STATE MEDICINE, see under *Sanitation*, 2 May, 1888.

STATE PAPER OFFICE was founded in 1578, now merged into the Public Record Office. In 1856 the British government began the publica- tion of Calendars of State Papers, invaluable to future historians.

STATES-GENERAL OF FRANCE. An ancient assembly of France, first met, it is said, in 1302 to consider the exactions of the pope. Pre- vious to the Revolution, it had not met since 1614. The states consisted of three orders, the clergy, nobility, and commons. They were convened by Louis XVI., and assembled at Versailles, 5 May, 1789 (308 ecclesiastics, 285 nobles, and 621 deputies or *tiers état*, third estate). A contest arose whether the three orders should make three distinct houses, or but one assembly. The commons insisted upon the latter, and assuming the title of the National Assembly, declared that they were competent to proceed to business, without the concurrence of the two other orders, if they refused to join them. The nobility and clergy found it expedient to con- cede the point, and they all met in one hall; see *National Assembly*. Centenary, see *France*, 5 May, 1889.

STATES OF THE CHURCH, see *Pope*, and *Rome*.

STATIONERS. Books and papers were formerly sold only at stalls; hence the dealers were called stationers. The company of stationers of London is of great antiquity, and existed long before printing was invented, yet it was not in- corporated until 3 Philip & Mary, 1557. Their old dwelling was in Paternoster-row.

STATISTICS, the science of the state, political knowledge, is said to have been founded by sir Wm. Petty, who died in 1687. The term is said to have been invented by professor Achenwall of Göttingen in 1749. The first statistical society in England was formed at Manchester in 1833; the Royal Statistical Society of London, which pub- lishes a quarterly journal, was established 15 March, 1834, for the purpose of procuring, arranging, and publishing "facts calculated to illustrate the condi- tion and prospects of society." Jubilee kept, 22, 23, 24 June, 1885; incorporated, 1887. Similar societies have been established on the continent. International Statistical Institute constituted in 1885, met at Rome, 12-16 April, 1887. International Statistical Congresses are now held occasionally. The 1st at Brussels, chiefly through the agency of M. Quetelet, in 1853; 2nd at Paris, 1855; 3rd at Vienna, 1857; 4th at London, under the presidency of the prince consort, 16-21 July, 1860; 5th at Berlin; 6th at Florence; 7th at the Hague; 8th at St. Petersburg, was opened 22 Aug. 1872; 9th at Pesth, 31 Aug. 1876. The eminent statis- tician, Dr. Wm. Farr, died 14 April, 1883. *Sta- tistical Abstracts* have been published annually by the government for many years.

STATUES, see *Sculpture*, &c. Phidias, who's statue of Jupiter passed for one of the wonders of the world, was the greatest statuary among the ancients, 440 B.C. He had previously made a statue of Minerva at the request of Pericles, which was placed in the Parthenon. It was made of ivory and gold, and measured 39 feet in height. Acilius raised a golden statue to his father, the first that

appeared in Italy. Lysippus invented the art of taking likenesses in plaster moulds, from which he afterwards cast models in wax, 326 B.C. Michael Angelo was the greatest artist among the moderns. The first equestrian statue erected in Great Britain was that of Charles I. in 1678.* By 17 & 18 Vict. c. 10 (10 July, 1854), public statues were placed under the control and protection of the Board of Works. During the civil war, the parliament sold it to John River, a brazier, in Holborn, with strict orders to break it to pieces; but he concealed it underground till the Restoration, when it was erected, in 1678, on a pedestal executed by Grinling Gibbons. The first equestrian statue of bronze, founded at one cast, was that of Louis XIV. of France, 1699; it was elevated about 1724.

She withdrew during the examination, and the prosecution ceased; but Chaffers was severely censured by the magistrate, and by the attorney-general in parliament March 47.

STEAM CARRIAGE (for ordinary roads, invented by the earl of Caithness, was said to be successful in 1860. It travels over rough roads at the rate of 8 miles an hour, at a cost of less than 1d. per mile. His lordship made a journey of 140 miles in two days; see *Road Steamers*.

STEAM ENGINE* AND NAVIGATION. Hero of Alexandria, in his "Pneumatics," describes various methods of employing steam as a power; and to him is ascribed the *Æolipile*, which, although a toy, possesses the properties of the steam-engine: he flourished about 284-241 B.C. Roger Bacon appears to have foreseen the application of steam-power; see *Railways, Locomotives, Road Steamers, &c.*

Mr. Ruthven patented his system in 1840, and exhibited his machinery at the International Exhibition in 1851. His object is to increase speed and save fuel. In the *Water-witch* a steam-engine gives the power of absorbing and expelling the water, and no screw or paddle is required. The water-wheel is 14½ feet in diameter.

GREAT EASTERN, for a short time

(1857-8) called *Leviathan* 692 feet 83 feet
Horse Power:—Paddles, 1000; screw, 1600;
 Weight of ship, 12,000 tons; ordinary light draught, 12,000 tons; said to have cost 732,000l.
 She was designed by Mr. I. K. Brunel [who died 15 Sept. 1859], and built by Messrs. Scott Russell and Co., at Millwall; launching lasted from 3 Nov. 1857, to 31 Jan. 1858.

The capital subscribed having been all expended, a new company was formed to fit her for sea.

On 7 Sept. 1859, she left her moorings at Deptford for Portland-roads. On the voyage an explosion took place (off Hastings), through some neglect in regard to the casing of one of the funnels, when ten firemen were killed and many persons seriously injured. After repairs she sailed to Holyhead, arriving there 10 Oct.; she endured the storm of 25-26 Oct. well; and proceeded to Southampton for the winter, 4 Nov.

She was fitted up to convey 5000 persons from London to Australia, a distance of 22,500 miles, with accommodation for 800 1st class passengers, 2000 2nd class, and 1200 3rd class. Her able captain (Harrison) was drowned in the Solent 22 Jan. 1860, deeply regretted. She sailed for New York 17 June, under command of captain Vine Hall, and arrived there 28 June. After being exhibited she left New York 16 Aug. and returned to England 26 Aug.

Owing to a lawsuit in April, the ship came into the hands of sheriff's officers; but was released and sailed for New York on 1 May, 1861. On 12 Sept. she suffered much loss through a violent gale.

In 1862 she performed several voyages to and from New York; but in Aug. ran on a rock near Long Island and injured her bottom.

She was repaired and arrived at Liverpool 17 Jan. 1863, and sailed to New York (16-27 May).

She was bought by Glass, Elliot, and Co. in March or April, 1864, and was chartered to convey the Atlantic telegraph cable; sailed from Sheerness 15 July; and returned 19 Aug. 1865; see under *Electric Telegraph*.

She sailed for New York, prepared for 2000 passengers, 26 March, and returned with 191. She was seized by the seamen, claiming their wages, May, 1867; and the case was carried into Chancery in July.

At the meeting of the shareholders 10 Feb. 1868, no dividend was declared.

She conveyed the French Atlantic telegraph cable, successfully laid Oct. 1869

STEAM GUN; suggested by Wm. Murdoch 1803. One patented by Messrs. Perkins, in 1824, was ineffectual.

In Oct. 1870, Mr. H. Bessemer proposed the application of steam power to artillery.

STEAM HAMMER, invented by Mr. James Nasmyth in 1838, and patented by him 18 June, 1842. Its main feature is the absolutely direct manner by which the elastic power of steam is employed to lift up and let fall the mass of iron constituting the hammer, which is attached direct to the end of a piston-rod passing through the bottom of an inverted steam cylinder placed immediately over the anvil.

In 1842, Mr. Nasmyth applied his steam-hammer to driving piles, which has importantly assisted in the execution of great public works. Owing to its vast range of power, forged iron-work can now by its means be executed on a scale, and for a variety of purposes, with an ease and perfection not previously possible. Parts of gigantic marine steam-engines, anchors, and Armstrong guns, as well as the most minute details of machinery, as in Enfield rifles, are executed by the steam-hammer.

A steam-hammer, said to be the then largest in the world, completed at Woolwich: the falling portion weighs 40 tons, and when used with top steam (52 tons) has the force of 91 tons, April, 1874. One at Schneider's works, Creuzot, France; weight between 75 and 80 tons, Dec. 1877.

STEAM-MAN. A figure constructed to drag a phaeton received this name in New York in March, 1868.

STEAM NAVIGATION, see under *Steam*.

STEAM-PLOUGHS were patented by G. Callaway and R. A. Purkes, 1849; H. Cowing, 1850; and others. John Fowler's of 1854 is much approved.

STEAM-RAM (to be used in naval warfare), was invented by Mr. James Nasmyth in 1836, and communicated to the Admiralty in 1845. Steam-rams built by Mr. James Laird of Birkenhead for the Confederates in N. America, were stopped and eventually bought by the British government, 1864.

STEAM-WHISTLES and **STEAM-TRUMPETS**, used in factories to summon or dismiss workmen, prohibited by an act passed Aug. 1872.

STEARINE (from *stear*, suet), that part of oils and fats which is solid at common temperature. The nature of these substances was first made known by Chevreul, in 1823, who showed that they were compounds of peculiar acids, with a base termed *glycerine*; of these compounds the chief are stearine, margarine, and elaine; see *Candles*.

STEEL, metal, a compound of iron and carbon, exists in nature, and has been fabricated from the

earliest times. It was certainly used by the Egyptians, Assyrians, and Greeks. It now largely replaces cast iron in ship building, &c.

teaumur discovered the direct process of making steel by immersing malleable iron in a bath of cast iron.

A manufacture for cast steel is said to have been
set up by Benjamin Huntsman at Handsworth,
near Sheffield.

The manufacture of shear steel began in Sheffield, about 1800.

German steel was made at Newcastle previously by Mr. Crawley.

The inventions of Mushat (1800), Lucas (1804), and Heath (1839), were important steps in this manufacture: see *Engraving*.

Reipe patented his "puddled steel" . . . 1850

Mr. H. Bessemer made steel by passing cold air through liquid iron, 1856. By this method 20 tons of crude iron have been converted into cast steel in 23 minutes.*

Tungsten steel was made in Germany, 1859; and **M. Fremy** made steel by bringing red-hot iron in contact with carbonate of ammonia 1861

M. Alfred Krupp exhibited an ingot of steel weighing 4500 lbs. in 1851, and one weighing 20 tons in 1862 [about 15,000 men are employed at his works at Essen, 1887]

The subject much investigated by M. Caron, 1861-5 ; much attention was excited by cutlery made from a metallic sand, brought from Taranaki or New Plymouth, in New Zealand 1860

STEEL PENS. "Iron pens" are mentioned by Chamberlayne in 1685. Steel pens, made long before, began to come into use about 1820, when the first gross of three-elit pens was sold wholesale for 7*l.* 4*s.* In 1830 the price was 8*s.*, and in 1832, 6*s.* A better pen is now sold for 6*d.* a gross. Birmingham in 1838 produced about 1,000 million pens per annum. Women and children are principally employed in the manufacture. Perry, Mitchell, and Gillott are eminent makers. Joseph Gillott, originally a mechanic, made a large fortune by steel-pen making. He died 5 Jan. 1872, aged 72.

STEEL-YARD. An ancient instrument, the same that is translated *balance* in the Pentateuch. The *Statera Romana*, or Roman steel-yard, is mentioned in 315 B.C.—The **STEEL-YARD** or **STILL-YARD COMPANY**, London merchants, who had the steel-yard in Thames-street assigned to them by

STEREOCH
which water-glass
silex) serves as the

colour and the substratum. Its invention is ascribed to Von Fuchs, who died at Munich on 5 March, 1856. Fine specimens of this art by Kaulbach and Echter exist in the Museum at Berlin, and also at Munich.

STEREOMETER, by which is compassed the art of taking the contents of vessels of liquids by gauging, invented about 1350. *Anderson*. M. Say's stereometer, for determining the specific gravity of liquids, porous bodies, and powders as well as solids, was described in 1797.

STEREOSCOPE (from *stereos*, solid, and *skopein*, to see), an optical instrument for representing in apparent relief natural objects, &c., by uniting into one image two plane representations of these objects as seen by each eye separately. The first stereoscope by reflection was constructed and exhibited by professor Charles Wheatstone in 1838, who had announced its principle in 1833. Since 1854 stereoscopes have been greatly improved.

STEREOTYPE, a cast from a page of movable printing-types, so named by the Parisian printer, Didot, 1798. It is said that stereotyping was known in 1711. It was practised by Wm. Ged of Edinburgh, about 1730. Some of Ged's plates are at the Royal Institution, London. A Mr. James attempted to introduce Ged's process in London, but failed, about 1735. * *Nichols*. Stereotype printing was in use in Holland, in the last century; and a quarto Bible and a Dutch folio Bible were printed there. *Phillips*. It was revived in London by Wilson in 1804. Since 1850 the durability of stereotypes has been greatly increased by electrotyping them with copper or silver. Stereotyping used for printing the *Times*, 1856, *et seq.*

In the library of the Royal Institution is an edition of Ballust, with this imprint: "Edinburgi, Gulielmus Ged, auri faber Edinensis, non typis mobilibus, ut vulgo fieri solet, sed tabellis seu lamina fusa, excudebat. 1744." (Printed at Edinburgh by William Ged of Edinburgh, goldsmith, not with moveable types, as is commonly done, but with cast tablets or plates.)

STERLING (money). Ducange says (1733), "Esterlingus, sterlingus, are English words relating to money, and hence familiar to other nations, and applied to the weight, quality, and kind of money." "Denarius Anglia, qui vocatur sterlingus," stat. Edw. I. (The penny of England, which is called sterling.) Camden derives the word from *easterling* or *esterling*, observing that the money brought from Germany, in the reign of Richard I., was the most esteemed on account of its purity, being called in old deeds "*nummi easterling*." Others derive the word from the Easterlings, the first moneyers in England.

STETHOSCOPE. In 1816 Laënnec, of Paris, by rolling a quire of paper into a kind of cylinder, and applying one end to the patient's chest and the other to his own ear, perceived the action of the heart in a much more distinct manner than by the immediate application of the ear. This led to his inventing the stethoscope, or "breast-explorer," the principle of which, now termed "auscultation," was known by Hippocrates (357 B.C.), and by Robert Hooke, 1681.

STETTIN (Pomerania), an ancient city, formerly held by the Sidini and Venedes, was taken by Boleslas of Poland in 1121. After being conquered by the Swedes, Russians, and French, it was awarded to Prussia in 1814.

Visited by emperor William during military manoeuvres, 12 Sept. 1887.

* It was hotly opposed by the journeymen printers.

STEWARD OF ENGLAND, LORD HEE. The first grand officer of the crown. This office was established prior to the reign of Edward the Confessor, and was formerly annexed to the bishop of Hincley, Leicestershire, belonging to the family of Montfort, earls of Leicester, who were right thereof, lord high stewards of England: Simon de Montfort, the last earl of this family having raised a rebellion against his sovereign Henry III., was attainted, and his estate forfeited to the king, who abolished the office, 1265. It is now revived only *pro hac vice*, at a coronation, at the trial of a peer. The first afterwards appointed was Thomas, second son of Henry IV. The first at the trial of a peer was Edward, earl of Devon, at the arraignment of the earl of Huntingdon, in 1405. The last was lord Denman at the trial of the earl of Cardigan, 16 Feb. 1841. The duke of Hamilton was lord high steward at the coronation of William IV. 1831, and Victoria, 1838.

STEWARD OF THE HOUSEHOLD, LORE (an ancient office), has the sole direction of the king's house below-stairs; he has no formal part of his office, but receives his charge from the sovereign in person, who, delivering to him a wand, the symbol of his office, says, "*Sewards, tenex le bâton de notre maison*." This office has been called lord steward since 1540; previously to the 31st of Henry VIII. he was styled grand master of the household. His function as a judge was abolished in 1849.

STICKLESTADT (Norway). Here Olaf II. aided by the Swedes, was defeated in his endeavours to recover his kingdom from Canute, king of Denmark, and slain, 29 July, 1030. He was afterwards sainted, on account of his zeal for Christianity.

STIPENDIARY MAGISTRATES, *see Magistrates*.

STIRLING (S. Scotland). The strong castle was taken by Edward I. of England, 1304. Here James II. stabbed the earl of Douglas, 13 Feb. 1432, and here James VI. was crowned, 24 July, 1567. Stirling surrendered to Monk, 14 Aug. 1661. The statue of king Robert Bruce unveiled, 24 Nov. 1871. A gigantic bronze statue of sir William Wallace unveiled at the National Wallace Monument 25 June, 1887.

STIRRUPS were unknown to the ancients. Gracchus fitted the highways with stones to enable the horsemen to mount. Warriors had projections on their spears for the same purpose. Stirrups were used in the 5th century, but were not common even in the 12th.

STONEHENGE (on Salisbury Plain, Wiltshire) is said to have been erected on the counsel of Merlin, by Aurelius Ambrosius, in memory of 460 Britons, who were murdered by Hengist the Saxon about 450. *Geoffrey of Monmouth*. Erected as a sepulchral monument of Ambrosius, 500. *Polydore Vergil*. An ancient temple of the Britons, in which the Druids officiated. *Dr. Stukeley*. The Britons are said to have held annual meetings at Abury and Stonehenge, when laws were made and justice administered. The cursus near Stonehenge was discovered by Dr. Stukeley, 6 Aug. 1723. The origin and object of these remains are still very obscure. See W. M. Flinders Petrie's "Stonehenge: Plans, Description, and Theories." 1880. The thorough preservation of Stonehenge strongly advocated Aug. 1886.

STORM-WARNINGS, see under *Meteorology*.

STORMS, see *Meteorology, Cyclones, and Waterports*. The following are recorded:—

In London a storm raged which destroyed 1500 houses, 944.

In several parts of England, the sky being very dark, the wind coming from the S.W.; many churches were destroyed; and in London 500 houses fell, 5 Oct. 1091. On the coast of Calais, when Hugh de Beauvais and several thousand foreigners, on their voyage to assist king John against the barons, perished, 1215. *Hollinshed*.

It thundered 15 days successively, with tempests of rain and wind, 1233.

Storm with violent lightnings; one flash passed through a chamber where Edward I. and his queen were conversing, did them no damage, but killed two of their attendants, 1285. *Hoveden*.

Violent storm of hail near Chartres, in France, which fell on the army of Edward III. then on its march. The hail was so large that the army and horses suffered very much, and Edward was obliged to conclude a peace, 1339. *Matt. Paris*.

When Richard II.'s queen came from Bohemia, on her settling foot on shore an awful storm arose, and her ship and a number of others were dashed to pieces in the harbour, Jan. 1382. *Hollinshed*.

Richard's second queen also brought a storm with her to the English coasts, in which the king's baggage was lost, and many ships cast away, 1396. *Hollinshed*.

Hurricane, throughout Europe, which did very considerable damage, on 3 Sept. 1658, the day that Cromwell died. *Mortimer*.

Storm on east coast of England: 200 colliers and coasters lost, with most of their crews, 1666.

The "Great Storm," one of the most terrible that ever raged in England. The devastation on land was immense; and in the harbours and on the coasts the loss in shipping and in lives was still greater, 26-27 Nov. 1703. The loss sustained in London alone was calculated at 2,000,000. sterling. The number of persons drowned in the floods of the Severn and Thames, and lost on the coast of Holland, and in ships blown from their anchors and never heard of afterwards, is thought to have been 8000. Twelve men-of-war, with more than 1800 men on board, were lost within sight of their own shore. Trees were torn up by the roots, 17,000 of them in Kent alone. The Eddystone light-house was destroyed, and in it the ingenious contriver of it, Winstanley, and the persons who were with him. The Bishop of Bath and Wells and his lady were killed in bed in their palace in Somersetshire. Multitudes of cattle were also lost: in one level 15,000 sheep were drowned.

Snow-storm in Sweden, when 7000 Swedes, it is said,

perished upon the mountains, in their march to attack Drontheim, 1719.

One in India, when many hundreds of vessels were cast away, a fleet of Indiamen greatly damaged, and 5000 ships lost, and 30,000 persons perished, 11 Oct. 1777.

Dreadful hurricane at the Havannah: many public edifices and 4248 houses were destroyed, and 200 inhabitants perished, 25 Oct. 1768.

Awful storm in the north of England, in which many vessels were destroyed, and four Dublin packets foundered, 29 Oct. 1775.

One at Surat, in the East Indies; destroyed 7000 of the inhabitants, 22 April, 1782.

One hundred and thirty-one villages and farms laid waste in France, 1785.

One general throughout Great Britain: several hundred sail of shipping destroyed or damaged, 6 Oct. 1794.

STOVES. The ancients used stoves which concealed the fire, as the German stoves yet do. They lighted the fire also in a large tube in the middle of the room, the roof being open. Apartments were warmed by portable braziers. Stoves on this old principle, improved, continue in use in many houses and public establishments in England, and generally on the continent. Dr. Franklin and count Rumford (who invented a stove) pointed out the waste of fuel in our open fires; and Dr. Neil Arnott patented his "improvements in the production and agency of heat," 14 Nov. 1821. Dr. C. William Siemens described his smokeless stove in "*Nature*" for 11 Nov. 1880. See *Chimneys*, and *Cottager's Stove*.

Mr. T. Pridgin Teale publishes his inventions, in which he revives the principles of count Rumford with additions, 1885-6.

STRASBURG, the Roman *Argentoratum*, the capital of Alsace. Here Julian defeated the Alemanni, 357, who captured it, 455. It was annexed to Germany, 870. Louis XIV. seized it 28 Sept. 1681, and retained it by the treaty of Ryswick, 1697. The citadel and fortifications, which he constructed, have been so much augmented that Strasburg may be considered one of the strongest places in Europe. It was confirmed to France by the peace of Ryswick in 1697, but captured by the Germans, 28 Sept. 1870, and retained at the peace, May, 1871. The cathedral, an epitome of Gothic art, was founded in Clotvia, and reconstructed by Pepin and Charlemagne. After destruction by lightning, 1007, it was principally rebuilt by Erwin de Steinbach and his son in the 14th century. The lofty tower was completed in 1439. The celebrated astronomical clock, after a long stoppage, was repaired by M. Schlegel, and inaugurated 1 Jan. 1843.

An attempt at insurrection in the city was made by prince Louis Napoleon (afterwards president of the French republic, and emperor), aided by two officers and some privates 30 Oct. 1870. It was instantly suppressed by their arrest, and the prince was shipped off to America by the French government.

STYRIA (Austria), part of the ancient Sarmatia and Pannonia, was held successively by the Romans, Ostrogoths, and Avars. It was conquered by Charlemagne, and divided among his followers, seven counts, among whom the count of Styria, about 876, was the most powerful. The count became margrave about 1030; and Ottocar VI., in 1180, was made duke. At his death, 1192, Styria was annexed to the duchy of Austria. In 1246 it was acquired by Bela IV. of Hungary; in 1253, by Ottocar II. of Bohemia; after whose defeat and death, at Marchfeld, in 1278, it reverted to Rudolph of Austria, and was annexed to his possessions.

SUEZ CANAL. The caliph Omar about 640 proposed cutting the isthmus. A plan for a canal between the head of the Red Sea and the bay of Pelusium was brought forward by M. Ferdinand de Lesseps in 1852. He undertook to cut a canal through 90 miles of sand, to run out moles into the Mediterranean; to deepen the shallow waters; to create ports to receive the ships from India and Australia, and to adapt the canal to irrigation. The consent of the Egyptian, Turkish, Russian, French, and Austrian governments was gradually obtained, but not that of the British. A company was formed for the purpose, and the work commenced in 1858 by Mr. Daniel Lange (knighted 1870). The cost was estimated at 8,000,000*l*. Engineer, M. L. Montet.

SUGAR* (*Saccharum officinarum*) is supposed to have been known to the ancient Jews. Found in the East Indies by Nearchus, admiral of Alexander, 325 B.C.—*Strabo*. An oriental nation in alliance with Pompey used the juice of the cane as a common beverage.—*Lucan*. It was prescribed as a medicine by Galen, 2nd century. Brought into Europe from Asia, A.D. 625;—in large quantities, 1150. Attempted to be cultivated in Italy; not succeeding, the Portuguese and Spaniards carried it to America about 1510.

The sugar-cane transported from Syria to Cyprus about 1148; from Madeira about 1420; and to the West Indies about 1506

It is not known at what date sugar was introduced into England, but it seems to have been prior to the reign of Henry VIII. Mr. Whitaker, in the History of Whalley, p. 109, quotes an instance in A manuscript letter from sir Edward Wotton to lord Cobham, dated Calais, advertises him that sir Edward had taken up for his lordship twenty-five sugar-loaves at six shillings a loaf, "whiche is eight pence a pounde" 6 March, 1546

SUICIDE (from *sui*, self; *cadere*, to kill), the slayer of himself. The first instances recorded in Jewish history are those of Samson, about 1150, and Saul, 1055 B.C. The Greek and Roman philosophers deemed it a crime, and burned the offenders hand apart from the rest of the body. In the reign of Tarquin I., the Roman soldiers, thinking themselves disgraced by being ordered to make common sewers, destroyed themselves, 606 B.C. Cato committed suicide, 46 B.C.* In the Roman catholic church, in the 6th century it was ordained that no commemoration should be made in the Eucharist for such as committed self-murder. This ecclesiastical law continued till the Reformation, when it was admitted into the statute law of England by the authority of parliament, with the confiscation of land and goods. Till 1823 the body of the suicide was directed to be buried in a cross-road, and a stake to be driven through it. A new act, suppressing the barbarous customs, was passed in 1832. It is now usually buried in consecrated ground without a religious ceremony. Dr. Henry Morelli published "Suicides: an Essay," 1881. There were 7,572 suicides in France in 1887.

MEMORABLE RECENT CASES OF SUICIDE.

* Three instances of self-destruction by fire: the philosopher Empedocles threw himself into the crater of Mount Etna; a Frenchman threw himself, in 1860, into the crater of Vesuvius; and an Englishman, who jumped into the furnace of a forge about the year 1821. Plutarch relates that an unaccountable passion for suicide seized the Milesian virgins, from which they could not be prevented by the tears and prayers of their friends; but a decree being issued that the body of every young man who did self-murder should be drawn naked through the streets, a stop was soon put to the extraordinary frenzy.

SULPHUR has been known from the earliest times. Basil Valentine mentions its production from green vitriol. Sulphuric acid (vitriol), produced by him from burning sulphur, was introduced into England about 1720. Sulphur has been the object of research of many eminent chemists during the present century, and many discoveries have been made, such as its allotropic condition, &c. It is the inflammable constituent in gunpowder, and a deleterious ingredient in coal gas. The sulphur mines of Sicily have been wrought since the 16th century, but the exportation was considerable till about 1820; in 1838 the trade increased so much that Great Britain alone imported 38,654 tons. In that year the Neapolitan government was induced to grant a monopoly of the trade to a French company; but a firm remonstrance from the British government led to a discontinuance of this impolitic restriction in 1841, which, however, gave a great and lasting impetus to the British sulphur manufacture. In 1871, only 937,049 tons were imported into the United Kingdom.

SULTAN, or ruler, a Turkish title, from the Arabic, given to the grand signior or emperor of Turkey. It was first given to the Turkish princes, Angrolpeiz and Musgad, about 1055.—*Vatfir*. It was first given, according to others, to the emperor Mahmoud, in the 4th century of the Hegira.

SULU, Sooloo or Soluk Archipelago, a group of above 60 islands in the Malay Archipelago. The Spanish under colonel Arolas, the governor, defeated the rebels at Maiburg, and burnt the town, announced 1 May, 1887.

SUMATRA, an island in the Indian ocean, called Java Minor by Marco Polo, and visited by Nicolo di Conti prior to 1449. Mainly on account of the pepper trade, the Dutch formed a settlement at Padang about 1649, and the British at Bencoolen about 1685. The Dutch possessions with Java were acquired by the British in 1811; but were restored in 1816. In 1824 the Dutch acquired all the British settlements in Sumatra, in exchange for Malacca and some possessions in India. Restrictions on their progress in Sumatra were removed by treaty Feb. 1872. Severe fighting between the Dutch and the Achinese natives with varying results, mostly in favour of the Dutch, April 1873 to 1879. Dutch successful in war, peace announced, Aug. 1879. New war; great victory of the Dutch, 13 Sept. 1882. Sumatra suffered much by the volcanic eruptions and earthquakes of 26-27 Aug. 1883. See *Java*.

SUMMARY JURISDICTION ACT, 42 & 43 Vict. c. 49, 11 Aug. 1879. It amends the law respecting the jurisdiction of magistrates, in regard to fines, imprisonments, &c. It came into operation 1 Jan. 1880. Amended 1881 and 1884.

SUMPTUARY LAWS restrain excess in dress, furniture, eating, &c. The laws of Lycurgus were severe against luxury, probably about 881 B.C. Those of Zaleucus ordained that no sober woman should go attended by more than one maid in the street, or wear gold or embroidered apparel, 450 B.C.—*Diog. Laert*. The *Lex Orchia* among the Romans (181 B.C.) limited the guests at feasts, and the number and quality of the dishes at an entertainment; and it also enforced that during supper, which was the chief meal among the Romans, the doors of every house should be left open. The English sumptuary laws, chiefly of the reigns of

Edward III. and Henry VIII., were repealed 1856; see *Dress*.

SUN. Pythagoras taught that the sun was one of the twelve spheres, about 529 B.C. The distances of the sun and moon were first calculated geometrically by Aristarchus, who also maintained the stability of the sun, about 280 B.C. Numerists were ventured during fifteen centuries, and astronomy neglected till about A.D. 1200, when it was brought into Europe by the Moors of Barbary in Spain. The Copernican system was made known 1543; see *Copernican System*, and *Solar System*. Galileo and Newton maintained that the sun was an igneous globe. The transit of Mercury was observed by Gassendi. For recent discoveries, see *Eclipse Spectrum*, and *Venus*.

By the observations of Dr. Halley on the spot which darkened the sun's disc in July and August, 1706, he established the certainty of its motion round its own axis.

Solar spots were observed by Fabricius and Harriot in 1610. A macula three times the size of the earth passed the sun's centre, 21 April, 1766, and frequently since.

Dr. Wilson observed the motion of a spot. Herschel measured two spots, whose length together exceeded 50,000 miles. 19 Apr.

Schwabe discovered that a cycle of changes (from maximum to minimum and minimum to maximum) in the number of spots occurs in 11 years, confirmed by Wolf and others.

The observations of the eclipse of 22 Dec. 1870 and 12 Dec. 1871 led to the opinion that an unknown substance (represented in the spectrum by line 1474) existed in the sun.

SUPERANNUATION ACTS for the Civil Service were passed in April, 1859, and Aug. 1866.

SUPPER, see *Lord's Supper*.

SUPREMACY over the church was claimed by pope Gelasius I. as bishop of Rome, 494. On 15 Jan. 1535, Henry VIII. by virtue of the act 26 Hen. VIII. c. 1, formally assumed the style of "on earth supreme head of the church of England," which was retained by Edward VI., Mary I. (for a time), but was refused by Elizabeth, and has never been revived by succeeding sovereigns. The bishop of Rochester (Fisher) and the ex-lord chancellor (sir Thomas More) and many others were beheaded for denying the king's supremacy in 1535; and in 1578, John Nelson, a priest, and Thomas Sherwood, a young layman, were executed at Tyburn for the same offence. The "act of Supremacy," repealed by 1 & 2 Phil. and Mary, c. 8 (1554), was re-enacted 1 Eliz. c. 1 (1559).

SUPREME COURT OF JUDICATURE was constituted by the Judicature Act 36 & 37 Vict. c. 66, passed 5 Aug. 1873, to come into operation 1 Nov. 1874. In 1874 this was deferred to 1 Nov. 1875.

The existing courts were to be united into one Supreme Court, divided into the High Court of Justice and the Court of Appeal. The High Court to consist of the lord chancellor, the two lord chief justices, the vice-chancellors, and the other judges; (hereafter the court to consist of 21 judges.)

Five divisions: 1. Chancery, 2. Queen's Bench, 3. Common Pleas, 4. Exchequer, and 5. Probate, Divorce, and Admiralty; subject to alteration.

The Court of Appeal to consist of five ex-officio judges (viz., lord chancellor, two lord chief justices, lord chief baron, master of the rolls), and such others as may be appointed (§§ 20, 21, 22).

Appeals to the house of lords or the judicial committee of the privy council to be discontinued.

Law and equity to be concurrently administered; law terms abolished; and sittings in vacation provided for. See under *Terms*.

The act passed 11 Aug., 1875, suspended §§ 20, 21, and 22, converted the proposed court of appeal into an intermediate court till 1 Nov., 1876. (See below).

The Supreme Court of Judicature (comprising the High Court of Justice, Chancery division, Queen's Bench, Common Pleas, and Exchequer subdivisions, Probate, Divorce, and Admiralty division (all which see) began 2 Nov. 1875

After one term, it was said in the *Times*, "Its operation has tended to economise judicial power and to prevent delay of justice" 29 Nov. "

By the Appellate Jurisdiction Act (1876) the house of lords retains its powers as a court of ultimate appeal; the court to consist of the lord chancellor, two lords of appeal (to be created peers for life, with 6000*l.* salary) and any peers who are or have been lawyers. Act to come into operation 1 Nov. 1876

The court may sit during prorogation of parliament. The statute relating to the judicial committee of the privy council and to the intermediate court of appeal is amended "

By this act also the Queen's Bench, Common Pleas, and Exchequer divisions of the Supreme Court are converted into 15 courts of first instance or primary courts.

Additional judge for chancery division appointed. Style of ordinary judges:—of the court of appeal to be, "lord justices of the appeal;" other judges, "justices of the high court;" by act passed 24 April, 1877

An amendment act (42 & 43 Vict. c. 78), relating to offices, fees, &c., passed 15 Aug. 1879
At a meeting of the judges it was resolved to recommend the abolition of the exchequer and common pleas, and their consolidation into one, termed the "queen's bench division," under the lord chief

justice of England, 30 Nov.; order in council 10 Dec.

Carried into effect; old divisions at an end; jurisdiction act carried out for the first time 7 March 1880
Further changes made by the act 44 & 45 Vict. c. 68, passed 27 Aug. 1881, by it the master of the rolls was made a judge of appeal only, and the chief justice of England was endowed with the powers of the chief justice of common pleas and the chief baron of the exchequer.
New code of rules of procedure issued about 9 July; came into force 24 Oct. 1883. See *Circuit Amendment act* passed (combining other acts) 14 Aug. 1883

SUPREME COURT OF JUDICATURE FOR IRELAND constituted by act passed 14 Aug. 1877. Amended by an act passed 23 May, 1887, by which the titles of chief baron of the exchequer and chief justice of the common pleas are to be abolished at the next vacancies.

SURAT (E. Indies). Before the English East India company obtained possession of Bombay, the presidency of their affairs on the coast of Malabar was at Surat; and they had a factory here established under captain Best in 1611. The Great Mogul had here an officer who was styled his admiral. An attack of the Mahratta chief Sivaji on the British factory, was defeated by sir George Oxenden, 1664. The English were again attacked in 1670 and 1702, and often subsequently. The East India company, in 1759, fitted out an armament, which dispossessed the admiral of the castle, and, soon after, the possession of this castle was confirmed to them by the court of Delhi. Surat was vested in the British in 1800 and 1803. A fourth part of Surat was destroyed by fire 14 April, 1889.

SURGEONS. Barbers and surgeons were united in one company in 1540; but it was enacted that no person using any shaving or barbering in London should occupy any surgery, letting of blood, or other matter excepting only the drawing of teeth." In 1754 the surgeons and barbers of London were made distinct corporations. The college of surgeons obtained charters in 1745, 1800, and 1843 (when it was styled the "Royal College of Surgeons of England"), 1852, and 1859. Since that period, various legislative and other important regulations have been adopted to promote their utility and respectability; and no person is legally entitled to practise as a surgeon in the cities of London and Westminster, or within seven miles of the former, who has not been examined at this college. The college in Lincoln's-inn-fields was re-modelled in 1836, and the interior completed in 1837. The premises were enlarged in 1852-3. The museum began with the Hunterian collection, 1800; and the library was founded in 1801. Mrs. Mary Emily Dowson, the first lady surgeon duly qualified to act, was invested with the letters testimonial of the Irish college of surgeons, June, 1886. See *Anatomy, Physic, and Medical Council*.

states; part of Swabia is included in Würtemberg and Switzerland. Swabia was made a circle of the empire in 1387 and 1500. A league, composed of Swabian cities and states, about 1254, was the germ of the great Swabian league, formed for the preservation of the peace of Germany, under the auspices of the emperor Frederick, in 1488.

SWEABORG, a strong fortress in Finland, the Gibraltar of the north, $\frac{3}{4}$ miles south of Helsingfors; it is situated on seven rocky islands; the fortifications were commenced by the Swedes in 1748, and completed after Finland was united to Russia in 1809. On 6 Aug. 1855, the English and French fleet anchored off Sweaborg, and bombarded it by mortar and gun-boats from the 9th to the 11th, causing the destruction of nearly all the principal buildings, including the dockyard and arsenal. Few casualties and no loss of life ensued in the allied squadron, but this success was not followed up.

SWEARING ON THE GOSPELS, first used about 528, and introduced in judicial proceedings about 600.—*Rapin*. **PROFANE SWEARING** made punishable by fine; a labourer or servant forfeiting 1s., others 2s. for the first offence; for the second offence, 4s.; the third offence, 6s.; 6 Will. III., 1695; see *Oaths*.

SWEATING SICKNESS, see *Plague*.

SWEATING SYSTEM, a term applied, especially in the east end of London, to the practice carried on by large tradesmen of entrusting orders to middlemen termed "sweaters," who employ men, women, and children (principally foreigners) to make up clothes, boots, and furniture in their own houses at excessively low wages with many evil consequences. Lord Dunraven's motion for a select committee of inquiry was carried in the lords, 28 Feb.; archbishop of Canterbury, earl of Derby, and others appointed 9 March, 1888. Painfully distressing evidence was obtained. The origin of the evil is attributed to the great competition in producing extreme cheapness. The new and foreign workmen are termed "greeners." It is stated that about 3s. are sometimes paid for a week of days of 14 hours, May. First session of committee closed, 27 July; report issued, Sept. 1888. The sufferings of the Cradley Heath chainmakers, nailmakers, and others, were disclosed to the committee

SWEDEN (N. Europe). The ancient inhabitants were the Fins, now the modern inhabitants of Finland, who retired to their present territory on the appearance of the Scandinavians or Goths, who have ever since been masters of Sweden; see *Scandinavia*. The internal state of this kingdom is little known previous to the 11th century. By the union of Calmar in 1397, Sweden became a province of Denmark, and was not wholly rescued from this subjection till 1521, when Gustavus Vasa recovered the kingdom from the Danish yoke. He became king in 1523, and his descendants ruled till 1809. The government of Sweden is a limited monarchy. The diet consists of four orders, the nobles, the clergy, the peasants, and the burghers,

SWEDENBORGIAN. or New Jerusalem Church, are those who adopt the theological teachings of Emanuel Swedenborg (born at Stockholm, 29 Jan. 1688; died in London, 29 March, 1772).

He claimed to have had his spiritual sight opened, and to have been introduced into heaven and hell by the Lord that he might disclose their true nature and the science of correspondences by which the internal sense of Scripture, which is the Word as it exists in the heavens, may be known to men: this he did in the *Arcana Cœlestia* and other works.

His disciples first meet as an organized body in London in 1788.

There were 70 churches in Great Britain in 1870.

Their belief is that the sole deity is centred in Jesus Christ, in whom is a trinity of essentials; that salvation is effected by faith and works combined; that as man's soul is a spiritual body he will never resume the material body; that the Last Judgment was effected in the spiritual world during Swedenborg's lifetime; and that the Lord's Second Coming has taken place through the revelation of a new system of truth from the inner sense of Scripture.

SWITHIN'S DAY, ST., 15 July. St. Swithun lived in the 9th century; and, having been the preceptor to king Ethelwulf, was made bishop of Winchester in 852, and died 2 July, 862. The tradition states that it rained forty days in consequence of the proposed removal of his remains from the churchyard to the cathedral.

SWITZERLAND, the ancient Helvetia, was conquered by the Romans, 15 B.C.; and was successively subject to the Burgundians, Germans, and Franks. The canton of Schweitz was peopled by the Cimbrians, who, leaving their original habitation in Scandinavia, invaded Italy, and were defeated by the Roman general Marius; and fled into Helvetia, about 100 B.C. This canton has given name to the whole confederacy.—The present national council is elected every third year, at the rate of one member for 2000 persons. The revised federal constitution was voted 19 April, 1874.—Population, Dec. 1860, 2,507,170; 1870, 2,669,147; 1880, 2,846,102; June 1887, 2,957,527.

The tabernacle set up at Shiloh by Joshua, 1444 B.C. was replaced by the temple erected by Solomon, 1004 B.C. The chapel erected for George Whitefield in Moorfields in 1741, being of a temporary nature, received the name of Tabernacle, which was afterwards given to their chapels by the Calvinistic Methodists. Whitefield's Tabernacle in Tottenham-court-road was erected in 1756, and enlarged in 1760. His lease expired in 1828; and the chapel was opened by the Independents in 1830. A large metropolitan tabernacle, erected for the ministrations of Mr. C. H. Spurgeon, a Baptist, near the "Elephant and Castle," Kennington-road, Surrey, was opened on 31 March, 1861.

army commanded by marshals Victor and Sebastiani. After a conflict on the 27th, both armies remained on the field during the night, and the French at break of day renewed the attack, and were again repulsed by the British with great slaughter. At noon Victor charged the whole British line, was repulsed at all points, and retreated with a heavy loss. As Soult, Ney, and Mortier were in the rear, the British retired after the victory.

TALLY OFFICE in the Exchequer took its name from the French word *tailleur*, to cut. A tally is a piece of wood written upon both sides, containing an acquittance for money received; which, being cloven asunder by an officer of the exchequer, one part, called the stock, was delivered to the person who paid, or lent, money to the government; and the other part, called the counter-stock, or counter-foil, remained in the office, to be kept till called for, and joined with the stock. This manner of striking tallies is very ancient. — *Beaumont*. The practice was ordered to be discontinued in 1782. See *Exchequer*. On 16 Oct. 1834, the houses of parliament were burnt down by too many of these tallies being used in heating the stoves in the house of lords.

TALMUD (from *lamad*, to teach), the compendium of ancient Jewish oral or unwritten law, as distinguished from the Pentateuch, or written law; its origin is coeval with the return from the Babylonish captivity, 536 B.C. Its compilation in Hebrew was begun by the Scribes, and by their successors the work was carried on till 220 B.C. It is composed in prose and poetry, and contains two elements, legal and legendary. The morality resembles that of the New Testament, and the philosophy is rather Platonic than Aristotelian.

The Mishna, comprising the work of the rabbis, termed *Thanaim*, was compiled by Jehuda Hanassi, in the middle of the second century, A.D., and forms the Jerusalem Talmud, written at Tiberias, in Palestine, about 230. The Babylonian Talmud contains also the Gemara or Ghemara, the work of the rabbis termed *Amoraim*, criticisms and comments on the Mishna. The part named *Halacha*, is dogmatic, legal, and doctrinal; the *Agaba*, is illustrative, narrative, and legendary.

After being almost universally condemned, and the MSS. often burnt, the defence of the Talmud was undertaken by the German reformer Reuchlin, in the 16th century, and between 1520 and 1523, the "Talmud Babylonicum," in 12 vols. fol., and the "Talmud Hierosolitanum," in one vol. fol., were printed at Venice. A discourse on the Talmud was given at the Royal Institution, 15 May, 1868, by Mr. Emanuel Deutsch, whose article in the "Quarterly Review," Oct. 1867, had attracted much attention.

Vol. I. of the first English translation of the Jerusalem Talmud by Dr. Moise Schwab, appeared in 1835; he had published part of a French translation.

TANDY ARREST. James Napper Tandy proposed a plan of reform in 1791. In the French expedition against Ireland he acted as a general, Aug. 1798. After its failure he fled to Hamburg, and was there delivered up to the English, 24 Nov.; for which Bonaparte declared war upon Hamburg, 15 Oct. 1799. Tandy was liberated after the peace of Amiens in 1802.

TANGIER (Morocco, N. W. Africa), besieged by prince Ferdinand of Portugal, who was beaten and taken prisoner, 1437. It was conquered by Alfonso V. of Portugal in 1471, and given as a dowry to princess Catherine, on her marriage with Charles II. of England, 1662; who, in 1683, caused the works to be blown up, and the place abandoned. Tangiers afterwards became a piratical station.

TANISTRY (in Ireland), the equal division of lands, after the decease of the owner, amongst his sons, legitimate or illegitimate. If one of the sons died, his son did not inherit, but a new division was made by the tanist or chief. Abolished 1604. *Davies.*

TANJORE (W. India). About 1678, Vencajee, a Mahatta chief, brother of the great Sevajee, made himself rajah. In 1749 a British expedition endeavoured to restore a deposed rajah without success; the reigning prince bought them off by the cession of territories. Much intervention ensued. In 1799 the company obtained possession of the country, engaging to support the rajah with nominal authority. The last is said to have died in 1855.

TANNENBERG (E. Prussia). Here Ladislaus V. Jagellon of Poland defeated the Teutonic knights with great slaughter, the grand master being among the slain, 15 July, 1410. The order never recovered from this calamity.

TANNING leather with the bark of trees was early practised. Tan was introduced into Great Britain from Holland by William III. for raising orange trees about 1689. It was discontinued until about 1719, when bananas were first brought into England. Great improvements have been recently made in tanning by means of chemical knowledge.

TANTALUM, a rare metal, discovered in an American mineral by Hatchett, in 1801, and named by him columbium; and in a Swedish mineral by Ekeberg, who gave it its present name. Wollaston pointed out the identity of the two metals in 1809; and Berzelius prepared pure metallic tantalum in 1824. In 1846 Rose discovered that tantalum was really a mixture of three metals, which he named tantalum, niobium, and pelopium.—*Gmelin.*

TANZIMAT, see *Turkey*, 1839-44.

TAPESTRY. An art of weaving borrowed from the Saracens, and hence its original workers in France were called *Sarazinois*. The invention of tapestry hangings belongs [the date is not mentioned] to the Netherlands.—*Guiscardini.* Manufactured in France under Henry IV. by artists invited from Flanders, 1606. The art was brought into England by William Sheldon; and the first manufactory of it was established at Mortlake by sir Francis Crane, 17 James I. 1619.—*Salmon.*

Under Louis XIV. the art of tapestry was much improved in France; see *Gobelin Tapestry*. Very early instances of making tapestry are mentioned by the ancient poets, and also in Scripture; so that the Saracens' manufacture is a revival of the art. For the tapestry said to have been wrought by Matilda, queen of England, see *Bayeux Tapestry*.

Tapestry manufactory established at Windsor by Mr. H. Henry, supported by the royal family, and others; exhibition opened in the town-hall, 6 December, 1878. Manufacture revived by Messrs. Trollope of London, 1882-3.

TAPIR, the American water-hog, a pachydermatous animal. The first born in England at Zoological Gardens, London, 12 Feb. 1882.

TAR. The chemist Becher first proposed to make tar from pit-coal—the earl of Dundonald's patent, 1781. The mineral tar was discovered at Coalbrookdale, Shropshire, 1779; and in Scotland, Oct. 1792. Tar-water was first recommended for its medicinal virtues by the good Dr. Berkeley, bishop of Cloyne, about 1744. From benzole, discovered in coal-tar, many brilliant dyes are now produced; see *Aniline*.

TARA, a hill in Meath, Ireland, where the early kings of Ireland were inaugurated. Near here, on 26 May, 1798, the royalist troops, 400 strong, defeated the insurgent Irish (4000 men), 500 killed. On 15 Aug. 1843, Daniel O'Connell held a monster meeting here (250,000 persons said to have been assembled).

TARBES (S. France, near the Pyrenees), capital of Bigorre, the property of the English kings in the middle ages. The French, under Soult, were forced from their position at Turbes, with considerable loss, by the British army commanded by Wellington, 20 March, 1814. See *Toulouse*.

TARENTUM (now *Taranto*, S. Italy), was founded by the Greek Phalantus, B.C. 708. The people of Tarentum assisted by Pyrrhus, king of Epirus, supported a war which had been undertaken B.C. 281 by the Romans, to avenge the insults the Tarentines had offered to their ships when near their harbours; it was terminated after ten years; 300,000 prisoners were taken, and Tarentum became subject to Rome. Except the citadel, Tarentum was captured by the Carthaginians, 212, but recovered by Fabius, 209 B.C. Tarentum has shared in the revolutions of Southern Italy, and only ruins remain.

TARGUMS or **EXPLANATIONS**, names given to certain ancient Chaldee paraphrases of the Old Testament. The most remarkable are those of Onkelos, Jonathan-ben-Uzzel, and Joseph the Blind. The Targum of Onkelos is referred by some writers to the first century A.D.

TARIFA (S. Spain), the ancient Joza and Julia Traducta, where Muza landed when invading Spain, 712. It was taken from the Moors by Sancho IV. of Castile, 1291 or 1292; and was relieved, when besieged by them, after a great victory over the kings of Morocco and Granada, by Alfonso XI. of Castile and Alfonso IV. of Portugal, 28 or 30 Oct. 1340. The conflict is called the battle of Salado, having been fought on the banks of that river. Tarifa was taken by the French in 1823.

TARIFF (said to have been derived from Tarifa, where duties were formerly collected), a book of duties charged on goods exported or imported. Our tariff in 1840 comprised 1042 articles; the number was reduced (by sir Robert Peel) in 1845 and 1847. It comprised 439 articles in 1857; this number was greatly reduced in 1860.

TARPEIAN ROCK (Rome), owed its name to the tradition that Tarpeia, daughter of the keeper of the Roman citadel, was here crushed to death by the shields cast on her by the Sabines, whom she treacherously admitted, having bargained for the gift of what they wore on their left arms, meaning their bracelets; about 750 B.C.

TARRAGONA (N.E. Spain), occupied as a naval station by the British before their capture of Gibraltar in 1704. It was stormed and sacked by the French under Suchet, 29 Jan. 1811, and the inhabitants put to the sword.

TARTAN or **HIGHLAND PLAID**, the dress of the Scottish Highlanders, said to have been derived from the ancient Gauls, or Celts, the *Galli non braccati*.

TARTARIC ACID is said to have been the first discovery of the eminent chemist, Scheele, who procured it in a separate state by boiling tar with lime, and in decomposing the tartrate of lime thus formed by means of sulphuric acid, about 1770. In 1859 baron Liebig formed tartaric acid from other sources.

TARTARY (Asia). The Tatars, or Tartars, or Mongols, or Moguls, were known in antiquity as Scythians. During the decline of the Roman empire, these tribes began to seek more fertile regions; and the first who reached the frontier of Italy were the Huns, the ancestors of the modern Mongols. The first acknowledged sovereign of this vast country was the famous Genghis Khan. His empire, by the conquest of China, Persia, and all central Asia (1206-27), became one of the most formidable ever established; but it was split into parts in a few reigns. Timur, or Tamerlane, again conquered Persia, broke the power of the Turks in Asia Minor (1370-1400), and founded the Mogul dynasty in India, which began with Baber in 1525, and formed the most splendid court in Asia till the close of the 18th century; see *Golden Horde*. The Calmucks, a branch of the Tartars, expelled from China, settled on the banks of the Volga in 1672, but returned in 1771, and thousands perished on the journey.

TASIMETER, see *Micro-tasimeter*.

TASMANIA, the name now given to the British settlement in Van Diemen's Land (*which see*).

TATTERSALL'S, see *Race*.

TAUNTON (Somerset), was taken by Perkin Warbeck, Sept. 1497; and here he was surrendered to Henry VII. 5 Oct. following. The duke of Monmouth was proclaimed king at Taunton, 20 June, 1685; and it was the scene of the "bloody assize" held by Jeffreys upon the rebels in August.

TAVERNS may be traced to the 13th century. "In the reign of king Edward the Third, *only three taverns* were allowed in London: one in Chepe, one in Walbrook, and the other in Lombard-street."—*Spelman*. The *Boar's Head*, in Eastcheap, existed in the reign of Henry IV., and was the rendezvous of prince Henry and his dissolute companions. Shakespeare mentions it as the residence of Mrs. Quickly, and the scene of Falstaff's merriment.—*Shakespeare*, "Henry IV." The *White Hart*, Bishopsgate, established in 1480, was rebuilt in 1829. Taverns were licensed in 1752.

Taverns were restricted by 7 Edward VI. 1552-3, to 40 in London, 8 in York, 4 in Norwich, 3 in Westminster, 6 in Bristol, 3 in Lincoln, 4 in Hull, 3 in Shrewsbury, 4 in Exeter, 3 in Salisbury, 4 in Gloucester, 4 in Chester, 3 in Hereford, 3 in Worcester, 3 in Southampton, 4 in Canterbury, 3 in Ipswich, 3 in Winchester, 3 in Oxford,

4 in Cambridge, 3 in Colchester, 4 in Newcastle-upon-Tyne.

TAXES were levied by Solon, the first Athenian legislator, 540 B.C. The first class of citizens paid an Attic talent of silver, about 55*l.* of our money. Darius, the son of Hystaspes, levied a land-tax by assessment, which was deemed so odious that his subjects styled him, by way of derision, Darius the Trader, 480 B.C.—*D'Eon*. Taxes in specie were first introduced into England by William I., 1067, and he raised them arbitrarily; yet subsidies in kind, as in wool, leather, and other products of the country, continued till the accession of Richard II., 1377.—*Canden*; see *Revenue and Income Tax*. "**TAXES ON KNOWLEDGE**" (see *Advertisements*, *Duty*, *Newspaper Stamp*, and *Paper Duty*). For exertions in repealing these, a testimonial was presented to Mr. T. Milner Gibson in 1861. The assessed taxes now include *land tax*, *house duty*, and *property and income tax*. The Taxes Management Act, 43 & 44 Vict. c. 19, passed 6 Aug. 1880 (see below). Mr. Stephen Dowell's "History of Taxation and Taxes in England," published in 1884. Receipts from general taxation, 1887-8, 75,600,000*l.*

TAY BRIDGE at Dundee, above two miles across the Tay; act passed 1870, work begun June, 1871; Mr. De Bierge, first contractor, died, succeeded by Messrs. Hopkins, Gilke & Co., of Middlesborough. Engineer, sir Thomas Bouch. It was much injured by a gale, 4 Feb. 1877; completed 30 Aug.; tried, 25 Sept. 1877; opened, 31 May, 1878. Length, 10,612 feet; it consisted of 8 spans, some above 90 feet above water level; cost said to be 350,000*l.* Above 20 lives lost during its construction.

The bridge was partly destroyed by a gale, while a N. British mail-train was passing over it; a gap of about 3,000 feet was made; between 75 and 90 persons perished; about 7.15 P.M. Sunday, 26 Dec. 1880, 46 bodies were recovered up to 27 April, 1881. Liberal collections were made for sufferers by the loss of relatives.

After the Board of Trade inquiry, Mr. H. C. Bothery, in the report, stated "that the bridge had been badly designed, badly constructed, and badly maintained" 3 July.

TCHERNAYA, a river in the Crimea. On 16 Aug. 1855, the lines of the allied army at this place were attacked by 50,000 Russians under prince Gortschakoff, who was repulsed with the loss of 3329 slain, 1658 wounded, and 600 prisoners. The brunt of the attack was borne by two French regiments under general D'Herbillion. The loss of the allies was about 1200; 200 of these were from the Sardinian contingent, which behaved with great gallantry, under the command of general La Marmora. The Russian general Read, and the Sardinian general Montevecchio, were killed. The object of the attack was the relief of Sebastopol, then closely besieged by the English and French.

TELEGRAPHS (from the Greek, *tele*, afar, and *grapho*, I write). *Æschylus*, in his *Agamemnon* (B.C. 500), describes the communication of intelligence by burning torches as signals. *Polybius*, the Greek historian (who died about 122 B.C.), calls the different instruments used by the ancients for communicating information, *pyrsie*, because the signals were always made by fire. In 1663, a plan was suggested by the marquis of Worcester, and a telegraph was suggested by Dr. Hooke, 1684. M. Amontons is also said to have been the inventor of telegraphs about this period. James II., while duke of York, originated a set of navy signals, which were systematised by *Kempenfeldt* in 1780; and a dictionary was compiled by *sir Home Popham*. M. Chappe then invented the telegraph first used by the French in 1792, and two were erected over the Admiralty-office, London, 1796. The semaphore was erected there 1816. The naval signals by telegraph enabled 400 previously concerted sentences to be transmitted from ship to ship, by varying the combinations of two revolving crosses. *Baron Reuter's* telegraph agency founded at *Aix la Chapelle*, 1851. Acts relating to telegraphs were passed in 1863 and 1866. The telegraph act, passed 31 July, 1863, enabled the postmaster-general to purchase existing electric telegraphs (not less than 1s. for a telegram, 20 words). Mr. *Scudamore* was appointed director, Jan. 1872. The principle of a 6d. telegram adopted by the Commons, 29 March, 1883, and enacted to come into operation 1 Oct. 1883; deferred; bill introduced by Mr. *Shaw-Lefevre* 30 March; act passed 14 Aug.; came into operation 1 Oct. 1885. Great destruction of telegraph posts and wires by gale and snowstorm; London streets blocked by fallen wires 26-27 Dec. 1886. The Society of Telegraph Engineers founded 1871; held first general meeting, 28 Feb. 1872, Chas. Wm. Siemens, president; incorporated 1883. Present title "Institution of Electrical Engineers," (1886). See *Electric Telegraph*, under *Electricity*, and *Telegraphs*, under *Post Office*, 1866, *et seq.* The *Telegraph Journal* began 15 Nov. 1873.

TELEKOUFONON, or speaking telegraph, consisted of piping of gutta percha, caoutchouc, glass, or earthenware, with a terminal mouthpiece of ivory, bone, wood, or metal. It was used for dockyards and large establishments. It was described by Mr. Francis Whishaw at the meeting of the British Association at Swansea, August, 1848.

TEL-EL-KEBIR, Egypt, the site of the entrenched camp of the rebel general, Arabi Pasha, his force being about 17,500 regular infantry, 2,500 cavalry, 6000 Bedouins and other irregulars, and 70 guns; captured by the British 13 Sept. 1882.

Sir Garnet Wolseley broke up his camp at Ismailia on the night of 12 Sept. and began his advance at 1.30 a.m., his force being about 11,000 infantry, 2000 cavalry, and 40 guns; the troops marched rapidly in the dark, each regiment endeavouring to be first. At daybreak they arrived at the camp. The surprised Egyptians filled the trenches and fought well under cover; but when the British scaled the parapets, they at first resisted bravely, but afterwards fled, being hotly pursued by the British cavalry, leaving all their guns, ammunition, &c. in the hands of the victors. Thousands were killed or made prisoners. Arabi Pasha fled towards Cairo. Among our killed were majors Colville, Underwood, and Somervell, and lieut. McNeill. The British general's masterly plans of the campaign were thus successfully carried out by his efficient staff and gallant army, which included many young soldiers. The Irish and Highland regiments and the Guards being specially distinguished. Arabi Pasha's army was completely broken up, and the British entered Cairo the next day, 14 Sept. British killed about 52,

and 380 wounded; Egyptian killed and wounded about 1500. The Highlanders bore the brunt of the action.

TELEMETER, &c., an instrument for determining the distance between a gun and the object fired at. Lieut. von Ehrenberg and major Montaudon, in Baden, constructed a telemeter the size of a watch, by which the distance is determined as shown on a dial by the action of sound, 1878-82. *Telepometer*, another apparatus for ascertaining the distance from point to point, invented by Dr. Luigi Cerebotani, was announced in Sept. 1885; two telescopes are employed.

TELEPATHY, "the supersensory transfer of thoughts and feelings from one mind to another," the principal subject of "Phantasms of the Living," edited by Messrs. Edmund Gurney, Frederic Myers, and Frank Podmore, and issued by the Society for psychical research about 30 Oct. 1886.

TELEPHONE (from Greek, *tele*, afar, *phō*, voice, sound), a name now given to apparatus for transmitting articulate and musical sounds, by means of wire, vibrating rods, threads, or magnetic electricity. See *Electrophone*, in article *Electricity*, *Phonograph*, *Microphone*, *Phonopore*.

Robert Hooke conveyed sounds to a distance by distended wire.

Elisha Gray improved Reis's telephone, and is said to have anticipated prof. Bell's discovery.
Professor A. Graham Bell's articulating telephone produced: (he employs a thin disk of iron vibrating in front of a permanent magnet, surrounded by a coil of insulated copper wire; the sound or voice causes the vibration of the disk, thereby generating a current of electricity which, sent round a similar coil on a distant magnet, sets vibrating another disk, and thus the sound is reproduced; sound is converted into electricity and electricity reconverted into sound); experiments at Boston and Salem, United States (13 miles apart); speech, music, singing, laughing, &c., distinctly heard. 12 Feb. 1877.

This telephone exhibited by Mr. W. H. Preece before the British Association, Plymouth, 23 Aug. 1877; before the queen at Osborne, Isle of Wight 14, 15 Jan. 1879.

TEMPLARS. The military order of "soldiers of the Temple," to protect pilgrims, was founded about 1118 by Baldwin II., king of Jerusalem, confirmed by pope Honorius II., 1128. The Templars were numerous in several countries, and came to England before 1185. Their wealth having excited the cupidity of the French kings, the order was suppressed by the council of Vienne, and part of its revenues was bestowed upon other orders about 1312. Numbers of the order were tried, condemned, and burned alive or hanged in 1308-10, and it suffered much persecution throughout Europe; 68 knights were burnt at Paris, 1310. Pope Clement V. abolished the order, April, 1312. The grand master Molay was burnt alive at Paris, 18 March, 1314. Their property in England was given to the Hospitalers, and the head of the order in England died in the Tower. See *Good Templars*.

was called the Outer Temple, because it was situated without Temple-bar.

TEUTONES, a people of Germany, who with the Cimbri made incursions upon Gaul, and out to pieces two Roman armies, 113 and 105 B.C. The order was confirmed by a bull of pope Celestine III. On their return to Germany, the knights were invited to subdue and christianise the country now called Prussia and its neighbourhood, which they gradually accomplished. Their territories were invaded, and their army was defeated, with great slaughter, near Tannenberg, in East Prussia, by Jagellon, duke of Lithuania, 15 July, 1410, when the grand master and many of the knights were slain. A large part of their possessions was incorporated into Poland in 1466, and into Brandenburg about 1521. In 1525, the grand master was made a prince of the empire, and the order much weakened. Its remaining possessions were seized by Napoleon I. in 1809. See *Prussia*, &c.

the Jews; by death at Athens, by the laws of Draco; see *Draco*. The Anglo-Saxons nominally punished theft with death, if above 12d. value; but the criminal could redeem his life by a ransom. In the 9th of Henry I. this power of redemption was taken away, 1108. The punishment of theft was very severe in England, till mitigated by Peel's acts 9 & 10 Geo. IV. 1829. The laws respecting theft were consolidated in 1862.

THEINE, see *Caffeine*.

THEISTS (*Theos*, God), a name given to deists about 1660.—*Dean Martin*. See *Deism*, *Unitarians*, and *Voysey*.

THELLUSSON'S WILL, a most singular document. Mr. Peter Isaac Thellusson, a Genevese and an affluent merchant of London, left 100,000*l.* to his widow and children; and the remainder of his property, more than 600,000*l.*, he left to trustees, to accumulate during the lives of his three sons, and the lives of their sons; then the estates, directed to be purchased with the produce of the accumulated fund, were to be conveyed to the eldest lineal male descendant of his three sons, with the benefit of survivorship. Should no heir then exist, the whole was to be applied, by the agency of the sinking fund, to the discharge of the national debt. It is said that Mr. Thellusson held much property in trust, and that he desired a sufficient interval of time to elapse for the appearance of just claimants. He died 21 July, 1797. His will incurred much public censure, and was contested by the heirs-at-law, but finally established by a decision of the house of lords, 25 June, 1805. The last surviving grandson died in Feb. 1856. A dispute then arose whether the eldest male descendant or the male descendant of the eldest son should inherit the property. The question was decided on appeal by the house of lords (9 June, 1859), in favour of the latter, lord Rendlesham and Charles S. Thellusson confirming the decision of the Master of the Rolls in 1858. In consequence of the legal expenses the property is said not to exceed greatly its value in the testator's lifetime. On 28 July, 1800, the Thellusson act was passed, restraining testators from devising their property for purposes of accumulation for longer than 21 years after death; any other direction to be void.

THEOCRACY, government by God, existed among the Israelites till Saul was made king, about 1095 B.C. (*Sam.* viii. 7-).

THEODOLITE, an instrument for measuring horizontal angles, used in surveying, consists of a telescope and a divided circle. It was probably first constructed in the 17th century. Jesse Ramsden, in 1787, completed the great theodolite employed in the trigonometrical survey of England and Wales by general Roy.

THEODOSIAN CODE, see *Codes*.

"THEOLOGIA GERMANICA," or "Teutsche Theologie" (printed 1528; Latin and French editions, 1558), a German mystical work, written about the 14th century. In it the "good man," disgusted with the corruptions in church and state, is led to seek for God in the temple of the heart. Luther is said to have placed the work next to the Bible and St. Augustine.

THEOLOGY (from the Greek *Theos*, God), the science which treats of the nature and attributes of God, of his relations to man, and of the manner in which they may be discovered. It is generally divided into two heads. 1. *Inspired*, including the

Holy Scriptures, their interpretation, &c. 2. *Natural*; which lord Bacon calls the first part of philosophy.—Butler's "Analogy of Religion" (1736) and Paley's "Natural Theology" (1802) are eminent books on the latter subject.—Abelard (died 1142) wrote "Theologia Christiana." The "Summa Totius Theologie" by Thomas Aquinas (born about 1224), a standard Roman catholic work, was printed with commentaries, &c., in 1596.

THEOPHILANTHROPISTS (lovers of God and man), a sect formed in France in 1796; and headed by one of the five directors, Lepaux, in 1797; was dissolved in 1802.

THEOSOPHISTS, followers of Paracelsus in the 16th century.

The *Theosophical Society* was founded in America by Madame Blavatsky, aided by colonel Olcott, about 1875-6. Aims at universal brotherhood and the study of Eastern philosophy. It has a station in London, and many branches in India and other parts. Mrs. Anna Kingsford, M.D., president in 1883, died 22 Feb. 1888.

THERMIDOR REVOLUTION. On the 9th Thermidor of the 2nd year (27 July, 1794), the Convention deposed Robespierre, and on the next day he and twenty-two of his partisans were executed.

THERMO-ELECTRICITY, see under *Electricity*, and *Heat*.

THERMOMETER. Freezing point: *Fah.* 32°; *R.* 0°; *C.* 0°. Boiling point: *Fah.* 212°; *R.* 80°; *C.* 100°.

Invented by Sanctorio in 1610. *Borelli*.

Fahrenheit's thermometer invented about 1726: Réaumur's and Celsius's (the latter now termed centigrade) soon after. [Fahrenheit's scale is usually employed in England, and Réaumur's and the centigrade on the continent.]

The mode of construction by substituting quicksilver for spirits was invented some years subsequently. *Hall's* proposed it in 1697.

Mr. L. M. Casella issued a minimum thermometer in Sept. 1861. It registers degrees of cold by means of mercury.

Negretti and Zambra's registering minimum thermometers, adapted for deep sea purposes, made known early in 1874.

THERMOPHONE, in which sonorous vibrations are produced by the expansion of heated bodies connected with an electro-magnet. The apparatus was constructed by Theodor Wieselndanger, and described by him in October, 1878.

THERMOPYLÆ (Doria, N. Greece). Leonidas, at the head of 300 Spartans and 700 Thespians, at the defile of Thermopylæ, withstood the whole force of the Persians during three days, 7, 8, 9 Aug. 480 B.C., when Ephialtes, a Trachinian, perfidiously leading the enemy by a secret path up the mountains, brought them to the rear of the Greeks, who, thus placed between two assailants, perished gloriously on heaps of their slaughtered foes. One Greek only returned home, and he was received with reproaches for having fled.* Here Antiochus the Great, king of Syria, was defeated by the Romans, 191 B.C.

THERMUM, **THERMUS**, or **THERMA** (Greece), a strong city, the Acropolis of Ætolia, N.

* The distich, in the Greek Anthology, by Simonides their contemporary, is thus translated by Bowles:—

"Go, tell the Spartans, thus that passed by,
That here, obedient to their laws, we lie."

Greece, was captured and ravaged by Philip V. of Macedon, 218 and 206 B.C., on account of its favouring the Romans.

THESAURUS (treasury), a title given in the 17th and 18th centuries to large collections of small works on history and archæology. The most celebrated are—

- "Thesaurus Antiquitatum Græcorum," by J. Gronovius. 13 vol. fol. 1697-1702
- "Thesaurus Antiquitatum Romanorum," by J. G. Grævius. 12 vol. fol. 1694
- "Thesaurus Antiquitatum et Historicum Italia, Siciliæ," &c., by G. Grævius and P. Burmannus. 45 vol. fol. 1725
- "Thesaurus Antiquitatum Sacrarum," by B. Ugo-
linus. 34 vol. fol. 1744-69

THESSALÆ, a city of Bœotia, N. Greece. 700 of its citizens perished with Leonidas at Thermopylæ, Aug. 480 B.C. It suffered through the jealousy of the Thebans, who destroyed its walls in 372 B.C.

THESSALONICA (now Salonica), a city in Macedonia, N. Greece, originally Therme, but rebuilt by Cassander, and said to have been named after his wife, Thessalonica, daughter of Philip, after 315 B.C. Here Paul preached, 53; and to the church here he addressed two epistles in 54. In consequence of seditions, a frightful massacre of the inhabitants took place in 390, by order of the emperor Theodosius. Thessalonica partook of the changes of the Eastern empire. Thessalonica was taken by the Saracens, with great slaughter, 30 July, 904; by the Normans of Sicily, 15 Aug. 1185; and after various changes was taken from the Venetians by the Turks under Amurath, 1430.

A young Bulgarian Christian girl, said to be an unwilling convert to Mahometanism, was rescued from the Turks and taken to the American consul's, 6 May; riots ensued on 6 May; the German and French consuls, Abbott and Moulin, were murdered; the Western powers intervened; reparation was ordered by the Sultan; several murderers were executed 16 May; other persons were imprisoned; and 40,000*l.* said to be paid to the families of the victims, Aug. 1876.

THESSALY (N. Greece), the seat of many of the adventures described by the poets. The first king of whom we have any certain knowledge was Hellen, son of Deucalion, from whom his subjects were called Hellenists, a name afterwards extended to all Greeks. From Thessaly came the Achæans, the Ætolians, the Dorians, the Hellenes, &c. The two most remarkable events in the early history of this country are the deluge of Deucalion, 1548 B.C., and the expedition in the Argonauts, 1263 B.C.; see *them severally*. Thessaly long aimed at neutrality in Grecian affairs, but became involved through its rulers, the tyrants of Phæris;—Lycophron, about 404 B.C.; his son Jason, 374, assassinated 370; Alexander, the most eminent, defied Athens and Thebes; assassinated 359. Philip of Macedon, after a defeat (353 B.C.), gained a victory over the tyrants, 352; and subjugated the country wholly, 343. The Romans gave a nominal freedom to Thessaly after their victory at Cynoscephalæ, 197. It is now included in the kingdom of Greece by the treaty of 24 May, signed 2 July, and occupied Aug.—Sept. 1881. Railway from Volo to Larissa opened by the king, 4 May, 1884. See *Inundations*, 1883.

THETFORD (Norfolk), said to have been the Roman Sitomagus, and an important Saxon town, was a bishopric from 1075 to 1091, when the see was removed to Norwich. It was made a suffragan bishopric by Henry VIII.; the power given him 1534.

THIBET or **TIBET** (central Asia), is said to

have been a kingdom 313 B.C., conquered by Genghis Khan 1206, and gradually subdued by and annexed to China, 1255-1720. Buddhism became the dominant religion about 905; and the Lamas have absolute power in religious and temporal affairs. Thibet was visited by Marco Polo, 1278; by Jesuits about 1661-2; Bogle and Hamilton, 1774; and Thomas Manning, 1810. An astronomical survey was carried on surreptitiously by two pundits of semi-Thibet origin, under the superintendence of capt. Montgomerie, 1865-7. War with Nepaul, May; peace, June, 1884. Hon. Colman Macaulay's expedition to Lachen valley, to promote commerce; well received, announced 30 Nov. 1884.

A mission to Thibet, including Mr. Macaulay with scientific assistance, organised in India; scheme suspended July, 1886. See *Sikkim*.

THIEVES' ISLAND, see *Ladrones*.

THIEVES' SYNOD, at Ephesus, 349 or 449, where the doctrines of Eutyches respecting Christ's incarnation were approved, received the name because his opponents were silenced or excluded.

THIMBLES are said to have been found at Herculaneum, and long ago used by the Chinese. The bi-centenary of their invention in Europe by Nicolas van Beuschoten was celebrated at Amsterdam, Dec. 1884. The art of making them was brought to England by John Lofting, a mechanic, from Holland, who set up a workshop at Islington, near London, and practised the manufacture in various metals with profit and success, about 1695.

A *Thimble League* patronised by the queen 1886; the object being to provide employment for distressed needlewomen; there was a sale of the work at lady Winchilsea's house, 23, Emslinmore Gardens, 24-25 Oct. 1888.

THIONVILLE, the ancient *Theodonis villa*, a fortified city on the Moselle, N. E. France. It was the occasional residence of Charlemagne and his successors, and on the extinction of his race it was successively held by private lords, the counts of Luxemburg, the dukes of Burgundy, the house of Austria, and the kings of Spain. It was taken by the duke of Guise, 23 June, 1558, after an obstinate defence, and returned to Philip II. by the peace of Chateau Cambresia. It successfully resisted the marquis de Feuquières in 1637, but was taken after four months' siege by the duc d'Enghien, 10 Aug. 1643, and remained with France. It successfully resisted the Austrians in 1792, and the Prussians in 1814. It was invested by the Germans in Aug. 1870, and after bombardment, being in flames, surrendered 24 Nov. following.

THIRTY-NINE ARTICLES, see *Articles*.

THIRTY TYRANTS, a term applied to the governors of Athens, in 404 B.C., who were expelled by Thrasybulus, 403; and also to the numerous aspirants to the imperial throne of Rome during the reigns of Gallienus and Aurelian, A.D. 259-274.

THIRTY YEARS' WAR, in Germany, between the catholics and protestants. It began in Bohemia in 1618, and ended with the peace of Westphalia in 1648. It is renowned for the victories of Wallenstein and Gustavus Adolphus of Sweden, and for its history by Schiller, published 1790-93. See *Battles*, 1618-48.

THISTLE,* **ORDER OF THE, SCOTLAND**,

* Some Scottish historians make the origin of this order very ancient. The abbot Justinian says it was instituted by Achaius I. of Scotland, 809, when that

founded by James V. 1540. It consisted originally of himself, as sovereign, and twelve knights, in imitation of Christ and his twelve apostles. In 1542, James died, and the order was discontinued, about the time of the Reformation. The order was renewed by James VII. of Scotland and II. of England, by making eight knights, 29 May, 1687; increased to twelve by queen Anne in 1703; to sixteen by George IV. in 1827. The original knights of 1687 were

George, duke of Gordon.
John, marquis of Athol.
James, earl of Arran, afterwards duke of Hamilton; killed in a duel, 1712.
Alexander, earl of Moray.
James, earl of Perth; attainted.
Kenneth, earl of Seaforth; attainted.
George, earl of Dumbarton.
John, earl of Melfort; attainted.

THOMAS'S HOSPITAL, ST. (Southwark), was founded as an almshouse by Richard, prior of Bermondsey, in 1213, and surrendered to Henry VIII. in 1538. In 1551 the mayor and citizens of London, having purchased of Edward VI. the manor of Southwark, including this hospital, repaired and enlarged it, and admitted into it 260 poor, sick, and helpless objects; upon which the king, in 1553, incorporated it, together with Bethlehem, St. Bartholomew's, &c. It was rebuilt in 1693. In 1862, the site was sold to the South-eastern railway company, and the patients were removed to the Surrey music hall. The foundation stone of the new hospital, erected at Stangate, near the Surrey side of Westminster-bridge, was laid by the queen, 13 May, 1868; and the new hospital was opened by her majesty, 21 June, 1871.

The appointment of a paid resident treasurer, instead of an honorary one, and other changes recommended by committees, were negatived by the general committee, Nov. 1877.

THOMAS, ST., see *Virgin Isles*.

THOMISTS, see *Scotists*.

THOMITES or **TOMITES**, a body of enthusiasts who assembled at Boughton, near Canterbury. An insane Cornish publican named John Nicholls, called Thom, or Tom, assumed the name of sir W. Courtenay, knight of Malta and king of Jerusalem, came into Kent, was an unsuccessful candidate for parliament, and incited the rabble against the Poor Law act. On 31 May, 1838, a farmer of the neighbourhood, whose servant had joined the crowd which attended Thom, sent a constable to fetch him back; but on his arrival on the ground he was shot dead by Thom. The military were then called out, and lieutenant Bennett proceeded to take the murderer into custody; but Thom advanced, and, firing a pistol, killed the lieutenant on the spot. One of the soldiers fired at Thom, and laid him dead by the side of lieutenant Bennett. The people then attacked the military, who were compelled to fire, and eight more persons were killed before the mob dispersed.

monarch made an alliance with Charlemagne, and then took for his device the thistle. It is stated that the king Hungus, the Pict, had a dream, in which St. Andrew made a midnight visit, and promised him a sure victory over his foes, the Northumbrians; and that the next day St. Andrew's Cross (X) appeared in the air, and the Northumbrians were defeated. On this story, it is said, Achaillus framed the order more than 700 years before James V.

THORACIC DUCT, discovered first in a horse, by Eustachius, about 1563; in the human body, by Ol. Rudbeck, a Swedish anatomist. Thomas Bartholine, of Copenhagen, and Dr. Joliffe, of England, also discovered it about 1654. See *Lacteals*.

Many protestants were slain here (after a religious riot) at the instigation of the Jesuits, 7 Dec. 1724. Thorn was acquired by the Prussians in 1793; taken by the French in 1806; restored to Prussia at the peace in 1815.

Ray Lankester, Mr. F. Galton, and others; he was successful with some persons, and failed with others (*Nature*, No. 608).

In 1883 he was challenged by Mr. Labouchere, M.P., to operate under certain conditions, at St. James's Hall on 12 June, but virtually declined the tests. (After experiments by Mr. Bishop, 3, 4 June, 1884; source doubted.)

Mr. Bishop sentenced to pay 10,000*l.* damages to Mr. Maskelyne for libel in *Truth* (23 July, 1884), 15 Jan. appeal disallowed, 28 Jan.; damages reduced to 500*l.* 2 July, 1885. He died of catalepsy at New York, 5 May, 1889.

TIDES. Homer is the earliest profane author who speaks of the tides. Posidonius of Apamea accounted for the tides from the motion of the moon, about 79 B.C.; and Caesar speaks of them in his fourth book of the Gallic war. The theory of the tides was first satisfactorily explained by Kepler, 1598; but the honour of a complete explanation of them was reserved for sir Isaac Newton, about 1683; see *Thames*. Sir Wm. Thomson, at the Royal Institution, 9 April, 1875, described a valuable tide-calculating machine.

Recent discoveries have shown that the country is not so inhospitable and the natives not so degraded as was formerly supposed.

TIMBER. The annual demand of timber for the royal navy, in war, was 60,000 loads, or 40,000 full-grown trees, a ton each, of which 35 will stand on an acre; in peace, 32,000 tons, or 48,000 loads. A 74 gun ship consumed 3000 loads, or 200 tons of trees, the produce of 57 acres in a century. —*Allyn.* Iron is now largely used in preference to timber. In 1843 we imported 1,317,445 loads of timber (cut and uncut); in 1857, 2,495,000 loads; in 1866, 3,638,344 loads; in 1871, 4,497,150 loads; in 1875, 5,092,394 loads; in 1877, 6,788,720 loads; in 1883, 6,609,942 loads; in 1887, 5,653,700 loads. TIMES NEWSPAPER. On 1 Jan. 1785, Mr. John Walter published the first number of the *Daily Universal Register*, price 2d., printed on the logographic system (invented by Henry Johnson, a compositor), in which types containing syllables and words were employed instead of single letters. On 1 Jan. 1788, the paper was named the *Times*.

In 1803, when Mr. John Walter gave up the paper to his son John, the circulation was about 1000; that of the *Morning Post* being 4500.

Mr. John Walter (1) died 16 Nov. 1812.

Dr. Stoddart (satirised as Dr. Slop by Moore the poet) became editor in 1812, but five years after retired and set up in opposition the *New Times*, an unprofitable speculation. Thomas Barnes became next editor. He died 7 May, 1841, and was succeeded by his assistant John Thaddeus Delane (son of W. F. A. Delane, financial manager) who retired in 1877, and died 22 Nov. 1879.

On 28 Nov. 1814, the *Times* was first printed by steam power (the invention of F. König), 1200 per hour, afterwards increased to 2000 and 4000.

It is asserted that the *Times* was termed the "*Thunderer*" in consequence of an article by Edward Sterling in which are the words, "We thundered forth articles on reform, &c." when Barnes was editor.

On 19 Jan. 1829, the first double number appeared.

In July, 1834, an attack of Mr. O'Connell in the house of commons on the correctness of the reports of the debates in the *Times* was signally defeated.

Shortly after began the convenient summary of the debates, written in the first instance by Mr. Horace Twiss.

In 1841 the *Times* was instrumental in detecting and exposing a scheme organised by Allan George Bogle and others, to defraud by forgery all the influential bankers of Europe. This brought on the proprietors an action for libel (in the case Bogle v. Lawson). The jury found the charge to be true, giving a verdict of one farthing damages, but the judges refused costs. Subscriptions were set on foot at the Mansion-house and in all parts of Europe to reimburse the proprietors for the immense outlay in defending the action. This they firmly declined; and the money was expended in establishing *Times Scholarships* at Oxford and Cambridge, and at Christ's Hospital, and other schools; a marble tablet also, commemorating the event, was set up in the Royal Exchange and at the *Times* office. These were the greatest honours ever conceded to a newspaper.

In Oct. 1845, the *Times* express was for the first time conveyed to India overland, by the agency of Lieut. Waghorn.

Of the number of the *Times* containing the life of the duke of Wellington for 19 Nov. 1852, 70,000 were sold—the ordinary number being then 36,000; the circulation is stated to vary from 50,000 to 60,000 (1868).

The *Times* (a slip) announcing permission to relax restriction of issue of bank-notes, published 24 Oct. 1847.

Mr. John Walter (2) died 28 July, 1847; Mr. John Walter (3) born in 1818.

In 1854, the proprietors sent Mr. W. H. Russell as their special correspondent to the seat of war in the Crimea; in 1857 to India.

Times Fund.—On the 12th of Oct. 1854, sir Robert Peel originated by a letter in the *Times* a subscription for the sick and wounded in the Crimean war, and in less than a fortnight 15,000*l.* were sent to the *Times* office to be thus appropriated. Mr. MacDonald was sent out by the proprietors as special commissioner to administer the fund, from which large quantities of food and clothing were supplied to the sufferers, with inestimable advantage; see *Scutari*, and *Nightingale*.

In Dec. 1858, the *Times* drew attention to the state of the houseless poor of London; and in a few days 8000*l.* were subscribed for their relief.

In 1851, 13,000,000 copies were sold; in 1857, 16,100,000; in 1859, 16,000,000; in 1860, 16,670,000.

The *Times* of 21 June, 1861, contained 4076 advertisements (about 1810 it contained 150 advertisements). Stereotypes from papier-mâché moulds introduced, 1856; much improved 1860.

The "Walter press" invented by John Cameron MacDonald (aft. Manager) & Joseph Calverley, prints about 15,000 an hour, perfected, 1862-71.

A list of the contents, inserted over the first leader, appeared first, 3 Feb. 1869.

11 pages tables of metropolitan charities appeared 11 Feb. 1869.

Special train for conveying the *Times*, North-Western Railway, began to run, 4.55 a.m., 16 Feb. 1875.

12,000 perfect sheets per hour printed by "Walter Press," Jan. 1876.

Weekly issue, price 2*d.*, began, 5 Jan. 1877.

The Rapieff electric lamp adopted in the machine-room, Nov. 1878.

Mr. Palmer's "Index to the *Times*" begun 1867; now printing for *Times* before 1846 and continuing 1889. *Summary of the Times* published daily, 1*d.* about 26 July, 1883; stopped, Oct. 1884.

Death of Thomas Chenery, six years editor, long correspondent, 11 Feb.; succeeded by G. E. Buckle, Feb. 1884.

The *Times* consisted of 24 pages 21, 26 June, 1861; 14 June, 1884; 5 times in 1886; 3 times in 1887; 6 times in 1888; 11, 18, 25 May, 1, 22, 29 June, 1889.

For the trial by the special commission see under Parnellism.

Rev. lord Sidney G. Osborne (B.G.O.), long a philanthropic writer to the *Times*, died 9 May, 1889.

TIN. The Phœnicians traded with England for more than 1100 years before the Christian era. Under the Saxons, our tin mines appear to have been neglected; but under the Normans, they produced considerable revenues to the earls of Cornwall, particularly to Richard, brother of Henry III. A charter and various immunities were granted by Edmund, earl Richard's brother, who framed the Stannary Laws (*which see*), laying a duty on the tin. Edward III. confirmed the tinners in their privileges, and erected Cornwall into a dukedom, with which he invested his son, Edward the Black Prince, 1337. Since that time the heirs-apparent to the crown of England, if eldest sons, have enjoyed it successively. Tin mines were discovered in Germany, which lessened the value of those in England, till then the only tin mines in Europe, 1240.—*Anderson*. Discovered in Barbary, 1640; in India, 1740; in New Spain, 1782. Of tin plates we exported in value, in 1847, 484,184*l.*; in 1854, 1,075,531*l.*; in 1860, 1,500,812*l.*; in 1864, 1,263,246*l.*; in 1866, 1,896,192*l.*; in 1871, 2,900,625*l.*; in 1873, 3,953,042*l.*; in 1877, 3,033,126*l.*; in 1879, 3,507,977*l.*; in 1883, 4,705,403*l.*; in 1887, 4,792,854*l.*

TINCHEBRAY (N. W. France), where a battle was fought between Henry I. of England and his brother Robert duke of Normandy. England and Normandy were reunited under Henry, at the decease of William Rufus, who had already possessed himself of Normandy by a mortgage from his brother Robert, at his setting out for Palestine. Robert, on his return, recovered Normandy by an accommodation with Henry; but having afterwards quarrelled, Robert was defeated in the battle of Tinchebray, 28 Sept. 1106, and Normandy was annexed to the crown of England.—*Hénault*.

TRYNS, an ancient city of Greece, S.E. of Argos, with massive cyclopean remains. Excavations of Dr. Schliemann in 1884 led to the discovery of what he termed "the Prehistoric Palace of the kings of Tryns." His book on Tryns was published in 1886. As Byzantine remains are also found some of his conclusions are disputed by eminent antiquaries.

TITANIUM, a rare metal, discovered by Grégor in menaccanite, a Cornish mineral, in 1791, and in 1794 by Klaproth.

TITHES or **TENTHS**, were commanded to be given to the tribe of Levi, 1490 B.C. (*Lev. xxvii. 30*). Abraham returning from his victory over the kings (*Gen. xiv.*), gave tithes of the spoil to Melchisedek, king of Salem, priest of the most high God (1913 B.C.). For the first 800 years of the Christian church they were given purely as alms, and were voluntary.—*Wickliffe*. "I will not put the title of the clergy to tithes upon any divine right, though such a right certainly commenced, and I believe as certainly ceased, with the Jewish theocracy."—*Blackstone*. They were established in France by Charlemagne, about 800, and abolished 1789. Tenths were confirmed in the Lateran councils, 1215.—*Rainalds*. The payment of tithes appears to have been claimed by Augustin, the first archbishop of Canterbury, and to have been allowed by Ethelbert, king of Kent, under the term "God's fee," about 600.

The first mention of them in any English written law is a constitutional decree made in a synod strongly enjoining tithes, 786.

Offa, king of Mercia, gave unto the church the tithes of all his kingdom, to expiate the death of Ethelbert, king of the East Angles, whom he had caused to be basely murdered, 794.

Tithes were first granted to the English clergy in a general assembly held by Ethelwold, 844. *Henry*.

In England, in 1545, tithes were fixed at the rate of 2s. *qd.* in the pound on rent; since then, many acts have been passed respecting them.

The Tithe Commutation act, passed 13 Aug. 1836. It was amended in 1837, 1840, 1846, 1860, and 1878.

A rector is entitled to all the tithes; a vicar to a small part only, frequently to none.

Several acts relating to tithes in Ireland have been passed in 1832-47, altering and improving the tithe system.

TITHING. The number or company of ten men with their families knit together in a society, all of them being bound to the king for the peaceable and good behaviour of each of their society; of these companies there was one chief person, who, from his office, was called (toothingman) tithingman; but now he is nothing but a constable, formerly called the headborough. *Cowel*.

TITLES ROYAL. Henry IV. had the title of "Grace" and "My liege," 1399. Henry VI., "Excellent Grace," 1422. Edward IV., "Most High and Mighty Prince," 1461. Henry VII., "Highness," 1485; Henry VIII. the same title, and sometimes "Grace," 1509 *et seq.* Francis I. of France addressed Henry as "Your Majesty" at their

interview in 1520; see *Field of the Cloth of Gold*. Henry VIII. was the first and last king who was styled "Dread Sovereign." James I. coupled to "Majesty" the present "Sacred," or "Most Excellent Majesty." "Majesty" was the style of the emperors of Germany; the first king to whom it was given was Louis XI. of France, about 1453.

TITLES TO LAND CONSOLIDATION ACT (Scotland), passed 31 July, 1868, and amended in 1869.

TOBACCO, * *Nicotiana tabacum*, received its name from Tabacco, a province of Yucatan, New Spain; some say from the island of Tobago, one of the Caribbees; others from Tobasco, in the Gulf of Florida. It is said to have been first observed at St. Domingo, in Cuba, 1492; and to have been used freely by the Spaniards in Yucatan in 1520. Tobacco was either first brought to England in 1565, by sir John Hawkins; or by sir Walter Raleigh and sir Francis Drake, in 1586. It was manufactured only for exportation for some years. *Stow's Chron.* The Pied Bull inn, at Islington, is said to have been the first house in England where tobacco was smoked. In 1584 a proclamation was issued against it. James I. published "A Counter-blaste against Tobacco," and the star-chamber ordered the duties to be 6s. 10d. per pound, 1611. Its cultivation was prohibited in England by Charles II., 1684. Act laying a duty on the importation was passed 1684. The cultivation was allowed in Ireland, 1779. The tax was increased and put under the excise, 1789. *Anderson*; *Ashe*. Various statutes have passed relative to tobacco. Act to revive the act prohibiting the culture of tobacco in Ireland passed 2 Will. IV., Aug. 1831. Act directing that tobacco grown in Ireland be purchased in order to its being destroyed, 24 Mar. 1832. The quantity consumed in England in 1701 was nine millions and a half of pounds, and in 1820 about fifteen millions of pounds. We imported in 1850, 35,166,358 lbs., and 1,557,558 lbs. manufactured (cigars and snuff); in 1855, 36,820,846 lbs., and 2,651,544 lbs. manufactured; in 1860, 48,937,471 lbs., and 2,110,430 lbs. manufactured; in 1864, 61,042,667 lbs., and 6,578,707 lbs., manufactured; in 1866, 54,374,800 lbs., and 3,171,906 lbs. manufactured; in 1871, 73,042,305 lbs., and 3,852,236 lbs. manufactured; in 1876, 76,814,974 lbs., and 3,818,682 lbs. manufactured; in 1879, 38,861,220 lbs., and 3,591,558 lbs. manufactured; in 1883, 56,475,199 lbs., and 3,121,174 lbs. manufactured; in 1887, 72,178,994 lbs. and 3,595,071 manufactured. The tobacco duties were modified in 1863; raised April, 1878. 2d. a lb. extra duty on cigars added, April, 1879. Net customs duties paid for tobacco and snuff in the year 1875-6, 7,744,977l.; 1877-8, 8,006,870l.; 1883-4, 8,991,205l.; 1886-7, 9,367,186l.; 1887-8, 8,713,944l.

TORBANEHILL MINERAL. Mr. Gillespie, of Torbanehill, granted a lease of all the coal in the estate to Messrs. Russell. In the course of working, the lessees extracted a combustible mineral of considerable value as a source of coal-gas, and realised a large profit in the sale of it as gas-coal. The lessor then denied that the mineral was coal, and disputed the right of the lessees to work it. At the trial in 1853 there was a great array of scientific men and practical gas engineers, and the evidence was most conflicting. One side maintained the mineral to be coal, the other that it was a bituminous schist. The judge set aside the scientific evidence, and the jury pronounced it to be coal. The authorities in Prussia have since pronounced it *not* to be coal. *Ferry*.

TORIES, a term given to a political party about 1678; see *Whig*. Dr. Johnson defines a Tory as one who adheres to the ancient constitution of the state, and the apostolical hierarchy of the church of England. TORPEDO SHELLS, a name given to explosives placed under ships, an invention ascribed to David Bushnell, an American, in 1777. His attempt to destroy H.M.S. *Cerberus* failed. The action of Fulton's torpedoes was successful in Britain 1805; but their use was declined by the government. Torpedo shells ignited by electricity were successfully employed in the war in the United States, 1861-5. On 4 Oct. 1865, Messrs. McKay & Beardslee tried them at Chatham before the duke of Somerset and others. An old vessel, the *Terpsichore*, was speedily sunk. Torpedoes, made by professor (aft. sir Frederick) Abel, of Woolwich, were tried in May, 1866. A torpedo invented by Mr. Wightman and an Austrian, tried and reported successful at Sheerness; an old hulk was sunk, 8 Oct. 1870. Torpedoes to be ignited from a distance by an electric battery are now made at Woolwich. A Turkish monitor in the Danube was blown up by a torpedo (see *Russo-Turkish war*, II.), 30 May, 1877. Whitehead's fish torpedoes, projected by compressed air from a boat; very destructive if skilfully directed; described Nov. 1884.

It was applied to heretics by the Roman catholic clergy, and was used in England so late as 1640 (when Archer, who took part in an attack on Laud's palace, was racked), and in Scotland until 1690. The trial by torture was abolished in Portugal, 1776; in France,

by Louis XVI. tavus III., 178 allowing the t deron, in Trin of the island, June, 1808.

It enjoyed great prosperity till the dreadful war of the Albigenses (*which see*), when the count Raymond VI. was expelled, and Simon de Montfort became count. At his death, in 1218, Raymond VII. obtained his inheritance. His daughter Jane and her husband, Alphonse (brother of Louis IX. of France), dying without issue, the county of Toulouse was united to the French monarchy in 1271. A large part of Toulouse destroyed by an inundation of the Garonne; St. Cyprien like a sepulchre; 23 June, 1875.

TOURAINÉ, the garden of France, was conquered by the Visigoths about 480. It was ceded to Geoffroy count of Anjou, 1044, and thus became the property of the Plantagenet kings of England. It was seized by Philip Augustus in 1203, and was made a duchy by John, 1360. It was finally united to the crown on the death of the duke of Anjou, 1584.

TOURNAMENTS, or **JOUSTS**, were martial sports of the ancient cavaliers. Tournament is derived from the French word *tourner*, "to turn round." Tournaments were frequent about 890; and were regulated by the emperor Henry I., about 919. Tournaments were introduced into England early in the 12th century; prohibited by Henry II., but revived by Richard I., his son. Solemn tournaments were held by Edward III., 25 Sept. 1329, in London; and 19 Jan. 1344, at Windsor; and by Richard II. in Smithfield, London, 10 Oct. 1319; and also by Henry VIII., in May 1513. The Lateran council published an article against their continuance in 1136. Henry II. of France, in a tilt with the comte de Montgomerie, had his eye struck out, an accident which caused the king's death in a few days, 29 June, 1559. Tournaments were then abolished in France.—A magnificent feast and tournament, under the auspices of Archibald, earl of Eglintoun, took place at Eglintoun castle, 29 Aug. 1839, and the following week: many of the visitors (among whom was the late emperor of the French) assumed the characters of ancient knights, lady Seymour, aft. duchess of Somerset, being the "Queen of Beauty." She died 14 Dec. 1883. Among the festivities at the marriage of prince Humbert, at Turin, was a tournament, 24 April, 1868. Tournaments held at the Agricultural hall, London, N. (for benefit of soldiers' widows, &c.), 21 June *et seq.* 1880; (8th) 11 June, 1887; (9th) 14 June, 1888; (10th) 20 June, 1889. Amount received by the charities 1880-8 about 21,000*l.* The "Royal Military Tournament," as an institution for development of skill in arms in the army, was organised Oct. 1883.

TOURNAY (S. Belgium) was very flourishing till it was ravaged by the barbarians in the 5th century. It has sustained many sieges. Taken by the allies in 1709, and ceded to the house of Austria by the treaty of Utrecht; but the Dutch were allowed to place a garrison in it, as one of the barrier towns. It was taken by the French under general La Bourdonnaye, 8 Nov. 1792. Several battles were fought near Tournay in May, 1793, and May, 1794.

TOURNIQUET (from *tourner*, to turn), an instrument for stopping the flow of blood into a limb, by tightening the bandage employed in amputations, is said to have been invented by Morelli at the siege of Besançon, 1674. J. L. Petit, in France, invented the screw tourniquet in 1718.

TOURS, an ancient city, central France, near which Charles Martel gained a great victory over the Saracens, and saved Europe, 10 Oct. 732, and

from which he acquired the name of *Martel*, signifying *hammer*. This conflict is also called the battle of Poitiers. When Paris was invested by the Germans, M. Crémieux and several of the members of the French government of defence went to Tours, together with the representatives of foreign powers, 18 Sept., 1870. On 9 Oct. these were joined by Gambetta, minister of the interior, afterwards of war (who escaped from Paris by a balloon, 7 Oct.). In consequence of the defeat of the army of the Loire near Orleans, the government removed to Bordeaux, 11 Dec.

TOWERS. That of Babel, the first of which we read, built in the plains of Shinar (*Gen. xi.*) 22*l.* B.C.; see *Babel*. The Tower of the Winds at Athens, built 550 B.C. The Tower of Pharos (*see Pharos*), 280 B.C. The *round towers* in Ireland were the only structures of stone found at the arrival of the English, 1169, except some buildings in the maritime towns founded by the Danes. These towers are tall hollow pillars, nearly cylindrical, but narrowing towards the top, pierced with lateral holes to admit the light, and covered with conical roofs. Fifty-six of them still remain, two 50 to 130 feet high; see *Pisa*.

TOWER OF LONDON. The tradition that Julius Cæsar founded a citadel here (about 54 B.C.) is very doubtful. A royal palace, consisting of more than what is now called the White Tower, which appears to have been first marked out by William the Conqueror, 1076, was commenced in 1078, and completed by his son, William Rufus, who, in 1098, surrounded it with walls and a deep ditch. Several succeeding princes made additions to it, and king Edward III. built the church. In 1638, the old White Tower was rebuilt; and under king Charles II., it was thoroughly repaired, 1680-5, and a great number of additional buildings made to it. Here are the Armoury, Jewellery office, and various other divisions and buildings of peculiar interest. Here took place many executions of illustrious persons, and many murders (*see Henry VI.*, 1471; king Edward V. and his brother, 1485; sir Thomas Overbury, 1613). The armoury and 280,000 stand of arms, &c., were destroyed by fire, 30 Oct. 1841. The "New Buildings" in the Tower were completed in 1850. *See Blood; for Tower-Subways, see Thames*. The more recent constables of the Tower have been the duke of Wellington, lord Combermere, and sir John Burgoyne. Sir George Pollock, constable Oct. 1871, died 15 Oct. 1872; sir Wm. Gomm, 31 Oct. 1872, died 15 March, 1875; sir Charles Yorke, April, 1875, died 20 Nov. 1880; sir W. Fenwick Williams, April, 1881; gen. sir R. J. Dacres, Aug. 1881, died 6 Dec. 1886; lord Napier of Magdala, Dec. 1886.

TOWTON (Yorkshire), where a sanguinary battle was fought, 29 March, 1461, between the houses of York (Edward IV.) and Lancaster (Henry VI.), to the latter of whom it was fatal, and on

whose side more than 37,000 fell. Edward issued orders to give no quarter, and the most merciless slaughter ensued. Henry and his queen, Margaret, fled to Scotland; and Edward IV. was settled on the throne.

TOXOPHILITES (from *toron*, a bow, and *philos*, a lover), a society established by sir Aston Lever in 1781. The Toxophilites formed a division of the Artillery Company about 1784-1803. In 1834 they took grounds in the inner circle of Regent's-park, and built the archery lodge. They possess a very curious piece of plate, given by Catherine, queen of Charles II., to be shot for by the Finsbury archers, of whom the Toxophilites are the representatives.

TRACTARIANISM, a term applied to certain opinions on church matters propounded in the "Tracts for the Times," of which ninety numbers were published, 1833-41. The principal writers were the revs. Dr. E. Pusey, J. H. Newman, J. Keble, J. Froude, and I. Williams—all of the university of Oxford; see *Puseyism*. The tracts (specially No. 90) were condemned by the authorities at Oxford, 15 March, 1841.

TRACTION-ENGINES were used on common roads in London in 1860, but afterwards restricted. In Aug. 1862 one of Bray's traction-engines conveyed through the city a mass of iron which would have required 29 horses; see *Road-steamers*, and *Railways*.

Earls of Idleslegh and Dunraven, Mr. G. Selater Booth, prof. Bonamy Price, and twenty others. First meeting 7 Oct. 1885; final report issued Feb. 1887. The majority refer to over-production, rise in value of gold, and in regard to agriculture, fall of prices, as probable causes; improved condition of the working classes noted, Jan. 1887.

TRADE AND PLANTATIONS, BOARD OF. Cromwell seems to have given the first notions of a board of trade: in 1655 he appointed his son Richard, with many lords of his council, judges, and gentlemen, and about twenty merchants of London, York, Newcastle, Yarmouth, Dover, &c., to meet and consider by what means the trade and navigation of the republic might be best promoted. *Thomas's Notes of the Rolls*. Charles II., on his restoration, established a council of trade for keeping a control over the whole commerce of the nation, 1660; he afterwards instituted a board of trade and plantations which was remodelled by William III. This board was abolished in 1782; and a new council for the affairs of trade on its present plan was appointed, 2 Sept. 1786.

The parliamentary recommendation in 1880 to appoint a "minister of trade and commerce," was dropped by Mr. Gladstone in March, 1887.

TRADES' MUSEUMS. The formation of one was undertaken in 1853, jointly by the commissioners of the Great Exhibition of 1851, and the Society of Arts. The animal department was opened 17 May, 1855, when a paper on the mutual relations of trade and manufactures was read by professor E. Solly. The contents of this museum were removed to the South Kensington Museum, which was opened 24 June, 1857. The French "Conservatoire des Arts et Métiers," was established 1795.

TRADES' UNIONS. The steam engine makers' society, Manchester, established in 1824. By 6 Geo. IV. c. 129 (1825), the combination laws were repealed, and other provisions made. As trades' unions formed for maintaining the rate of wages, &c., are not recognised by law, a commission (including lord Elcho, Thomas Hughes, and others, with sir Wm. Erle as chairman) was appointed to inquire into their constitution, 14 Feb. 1867, and an act to facilitate their proceedings was passed 5 April following. Their reports were issued during the year, disclosing the existence of murderous practices, with great intimidation; see *Sheffield*, and *Manchester*. An act to protect union funds from embezzlement was passed in 1869. A trade union act passed 29 June, 1871, amended by act passed 30 June, 1876. To counteract the influence of trades' unions, the National Federation of Employers was formed Dec. 1873; see *Employers*, and *Working men*.

TRAFALGAR (Cape S. Spain), off which a great naval victory was gained by the British, under Nelson, over the combined fleets of France and Spain, commanded by admiral Villeneuve and two Spanish admirals, 21 Oct. 1805. The enemy's force was eighteen French and fifteen Spanish vessels, all of the line: that of the British, twenty-seven ships. After a protracted fight, Villeneuve and the other admirals were taken, and nineteen of their ships captured, sunk, or destroyed. Nelson was killed, and admiral Collingwood succeeded to the command. Nelson's ship was the *Victory*; and his last signal was, "England expects every man will do his duty;" see *Nelson*. **TRAFALGAR-SQUARE**, London, begun 1829; completed 1845. Act passed in 1844, declaring that the square is Crown property, the charge of it placed in the hands of the Commissioners of Woods and Forests and under police regulations. In 1851, the charge was transferred to the Commissioners of Works. The right of preventing public meetings in the square by the executive affirmed by the Commons (316-224), 2 March, 1888. Grand Hotel opened by Lord Mayor, 29 May, 1880. See *Riots*.

Tufnell; the latter, who was then in the Poor Law Commission, devoting a year's salary towards the expenses. Mr. Mann stated, in 1855, that there were about forty of these schools in different parts of the country.

TRAJAN'S COLUMN (in Rome), erected 114, by the Roman senate and people, to commemorate his victories, and executed by Apollodorus. It was built in the square called the *Forum Trajanum*; it is of the Tuscan order, and from its base, exclusive of the statue and pedestal, is 127½ feet high.

TRAM-ROADS: as Mr. Benjamin Outram, father of sir James, the Indian general, in 1800, made improvements in the system of railways for common vehicles in the north of England, the name is ascribed to him, but it is said to have existed in Derbyshire before, a coal waggon having been called a tram. The iron tram-road from Croydon to Wandsworth was completed on 24 July, 1801. Street railways or tramways for omnibuses drawn by horses, previously established by Mr. Train in New York, were opened by him at Birkenhead, Cheshire, 30 Aug. 1860, and at Bayswater, London, 23 March, 1861. (See *Ireland*, 1868.) A street railway bill was rejected by the house of commons in April, 1861. Several of these railways existed for a time in various parts of the metropolis in 1861, but were all taken up in 1862. An act to facilitate the construction of tramways passed 9 Aug. 1870. Tramways from Brixton to Kennington, and from White-chapel to Bow, were opened 9 May, 1870; and others since. Their introduction into the city was much recommended but opposed, March-May, 1873. Dividend of the North Metropolitan tramways company, 8 per cent. Aug. 1876. The use of steam locomotives proposed: approved in Paris, July, 1876.

TRANSFIGURATION. The change of Christ's appearance on Mount Tabor, in the presence of Peter, James, and John, A.D. 32 (*Matt.* xvii.). The feast of the Transfiguration, kept on 6 Aug., was instituted in the East before 700, and seems to have been observed in the West as early as 450. Pope Calixtus III. in 1456 issued a bull making it a "feast of obligation" to be generally observed in honour of the defeat of the Turks at Lepanto in that year.

TRANSLATION TO HEAVEN. The translation of Enoch to heaven at the age of 365 years, 3017 B.C. The prophet Elijah was translated to heaven in a chariot of fire, 866 B.C.—The possibility of translation to the abode of eternal life has been maintained by some extravagant enthusiasts. The Irish house of commons expelled Mr. Asgill from his seat, for his book asserting the possibility of translation to the other world without death, 1793.

TRANSPADANE REPUBLIC, comprising Lombardy and part of the Venetian territories, was established by Bonaparte after his victory at Lodi, 10 May, 1796. With the Cispadane republic, it merged into the Cisalpine republic, Oct. 1797.

TRANSPORTATION, see *Banishment*. Judges were given the power of sentencing offenders to transportation "into any of his majesty's dominions in North America," by 18 Charles II. c. 5 (1666), and by 4 Geo. I. c. 11 (1718). Transportation ceased in 1775, but was revived in 1786. The reception of convicts was successfully refused by the Cape of Good Hope (in 1849) and by the Australian colonies (1864). Transportation, even to West Australia, where labour is wanted, ceased after a few years, through the fierce opposition of the eastern colonies. In consequence of the difficulty then experienced in transporting felons, 16 & 17 Vict. c. 99 was passed to provide other punishment, namely, penal servitude, empowering her majesty to grant pardon to offenders under certain conditions, and licences to others to be at large: such licences being liable to be revoked if necessary, and many have been. These licences are termed "tickets of leave." The system is said to have originated in Australia under the superintendence of captain Maconochie. It was much assailed in Oct. and Nov. 1862, on account of violent crime being traced to *ticket-of-leavers*; and was modified by the Penal Servitude Act, 1864; and the Prevention of Crimes Acts, 1871 and 1879. It is now considered successful. See *Crime*.

John Eyre, esq., a man of fortune, was sentenced to transportation for stealing a few quires of paper. —Phillips 1 Nov. 1771

The Rev. Dr. Halloran, tutor to the earl of Chesterfield, was transported for forging a frank (lost postage) 9 Sept. 1814

The first transportation of felons to Botany Bay was in May, 1787; where governor Phillip arrived with about 800 on 20 Jan. 1788; convicts were afterwards sent to Van Diemen's Land, Norfolk Island, &c.

Returning from transportation was punishable with death until 5 Will. IV. c. 67, Aug. 1834, when an act was passed making the offence punishable by transportation for life.

A shipment of convicts to West Australia (which had already received 10,000) in 1867.

TRANSUBSTANTIATION, the doctrine of the "real presence." That the bread and wine in the Eucharist are changed into the very flesh and blood of Christ by the consecration, was broached in the days of Gregory III. (731), and accepted by Amalarius and Radbertus (about 830), but rejected by Rabanus Maurus, Johannes Scotus Erigena, Berengarius, Wicliffe, and others. In the Lateran council, held at Rome by Innocent III., the word "Transubstantiation" was used to express this doctrine, which was decreed to be incontrovertible: and all who opposed it were condemned as heretics.

This was confirmed by the council of Trent, 18 Jan. 1562. John Huss, Jerome of Prague, and other martyrs of the reformation, suffered for denying his dogma, which is renounced by the church of England (28th article), and by all protestant dissenters. The declaration against transubstantiation, invocation of the saints, and the sacrifice of the mass, on taking any civil office, was abolished by an act passed 25 July, 1867; see *Sacrament*.

Luther maintained the doctrine of *con-substantiation*, viz., that after consecration the body and blood of Christ are substantially present in the bread and wine. He was opposed by Bucer, Carlstadt, Zwingle, and others (termed sacramentarians), who asserted that the Lord's supper is only a commemorative rite.

TRANSYLVANIA, an Austrian province, was part of the ancient Dacia (*which see*). In 1526, John Zapoly rendered himself independent of the emperor Ferdinand I. by the aid of the Turks. His successors ruled with much difficulty till Jan. 1699, when the emperor Leopold I., by the treaty of Carlowitz, finally incorporated Transylvania into the Austrian dominions. The Transylvanian deputies did not take their seat in the Austrian parliament till 20 Oct. 1863. A decree for the convocation of the Transylvanian diet was issued 12 Sept. 1865. The inhabitants are about 1,100,000 ignorant Roumans, 1,500,000 Saxon colonists, and 550,000 Magyars, the last being the ruling class. The union of Transylvania with Hungary in 1848, which has caused much discontent, was ratified by the Transylvanian diet, 25 Dec. 1866.

Serious agrarian riots at Földvár suppressed with bloodshed, 27 June, 1883.

TRAPPISTS. The first abbey of La Trappe in Normandy was founded, in 1140, by Rotrou, comte de Perche. The present order of Trappists owes its origin to the learned Jean le Bouthillier de la Rancé (editor of *Anacreon* when aged 14), who renounced the world, and sold all his property, giving the proceeds to the abbey of La Trappe, to which he retired in 1662, to live there in great austerity. After several efforts he succeeded in reforming the monks, and in establishing a new rule, which commands silence, prayer, reading, and manual labour, and which forbids study, wine, fish, &c. Rancé was born in 1620, and died in 1700. The Trappists' new building was consecrated in Aug. 1833.

A number of these monks, driven from France in the revolution of 1790, were received by Mr. Weld, of Lutworth, Dorsetshire, who gave them some land to cultivate and a habitation, where they remained till 1815. This order was charged with rebellion and conspiracy in France, and sixty-four English and Irish Trappists were shipped by the French government at Palmbeuf, 19 Nov., and were landed from the *Hebé*, French frigate, at Cork, 30 Nov. 1831. They established themselves at Mount Mellerey, county of Waterford.

TRASIMENE, see *Thrasymene*.

TRAUTENAU (Bohemia). On 27 June, 1866, the first corps of the army of the crown-prince of Prussia seized Trautenau, but was defeated and repulsed by the Austrians under Gablenz; on the 28th, the Prussians defeated the Austrians with great loss.

TRAVELLERS' CLUB (Pall-mall), established in 1815. A member must have "travelled out of the British islands to a distance of at least 500 miles from London, in a direct line."

TRAVELLING IN ENGLAND. In 1707 it took in summer one day, in winter nearly two days, to travel from London to Oxford (55 miles). In 1817 the journey was accomplished in six or seven hours. By the Great Western Railway express (63 miles) it is done in 1½ hour. In 1828, a gentleman travelled from Newcastle to London (273 miles) inside the best coach in 35 hours, at an expense of 6*l.* 15*s.* 3*d.* or 6*d.* per mile (including dinner, &c.). In 1857, the charge of the Great Northern railway (275½ miles) first-class express (6 hours) was 50*s.* 9*d.*

TRAWLING. Deep-sea fishing with a boat (sometimes driven by steam) having a very large net attached to it, and thereby catching the fish which mostly live at the bottom of the sea; principally practised on the N.E. coast of Britain.

Commissions reported in 1864 and since, that trawling was not injurious to the supply of fish as suggested; but another commission, with scientific advice, reported in Feb. 1885, that there was some ground for the fishermen's complaints.

TREAD-MILL, an invention of the Chinese, to raise water for the irrigation of the fields. The complicated tread-mill introduced into the prison of Great Britain is the invention of Mr. (afterwards Sir William) Cubitt, of Ipswich. It was erected at Brixton gaol, 1817, and soon afterwards in other large prisons.

TREASON, see *High Treason*. **PETTY TREASON** (a term abolished in 1828, defined by the statute of 25 Edw. III. 1352) was a wife's murder of her husband; a servant's murder of his master; and an ecclesiastical person's murder of his prelate or other superior.

TREASON-FELONY. By the Crown and Government Security Act, 11 Vict. c. 12 (1848), certain treasons heretofore punishable with death were mitigated to felonies, and subjected to transportation or imprisonment. The Fenians in Ireland were tried under this act; see *Irish* 1865.

TREASURER OF ENGLAND, LORD HIGH. The third great officer of the crown, a lord by virtue of his office, having the custody of the king's treasure, governing the upper court of exchequer, and formerly sitting judicially among the barons. The first lord high treasurer in England was Otto, earl of Kent, in the reign of William I. This great trust is now confided to a commission, and is vested in five persons, called "lords commissioners for executing the office of lord high treasurer," and of these the chancellor of the exchequer is usually one; the first lord being usually the premier; see *Administrations*, for a succession of these officers. Sir Stafford Northcote (aft. Earl of Iddesleigh) was first lord of the treasury and not premier, 24 Jan. 1885, as was Mr. W. H. Smith, 26 July, 1886; see *Salisbury Administrations*. A third lord of the treasury (Mr. Stanfeld) was appointed, Dec. 1880, succeeded by Mr. W. H. Gladstone, Dec. 1869.

The first of this rank in IRELAND was John de St. John Henry III. 1217; the last, William, duke of Devonshire, 1766; vice-treasurers were appointed till 1770, then commissioners till 1816, when the revenues of Great Britain and Ireland were united.

The first lord high treasurer of SCOTLAND was Sir Walter Ogilvie, appointed by James I. in 1420; the last, 1641, John, earl of Traquair, afterwards commissioner were appointed.

TREASURER OF THE CHAMBER, formerly an officer of great consideration, and always a member of the privy council. He discharged the bills of all the king's tradesmen, and had his office in Cleveland-row, in the vicinity of the royal palace. His duties were transferred and the office suppressed at the same time with the offices of master of the great wardrobe and cofferer of the household in 1782. *Beaton*.

TREATIES. The first formal and written treaty made in England with any foreign nation was entered into at Kingston between Henry III. and the dauphin of France (then in England and leagued with the barons), 11 Sept. 1217. The first commercial treaty was with Guy, earl of Flanders, 2 Edw. 1274; the second with Portugal and Spain, 1308. *Anderson*. The chief treaties of the nations of Europe will be found described in their respective places: the following forms an index; see *Coalitions, Commerce, Leagues, &c.* Hertie's "Commercial Treaties," 16 vol. 1820-85.

TREBIA, now *Trebbia*, a river in North Italy, near which Hannibal defeated the Roman consul Sempronius, 218 B.C.; and Suvarrow, after a struggle, defeated the French marshal Macdonald and compelled him to retreat, 17-19 June, 1799.

TREBIZOND, a port of Asia Minor in the Black Sea, was colonised by the Greeks, and became subject to the kings of Pontus. It enjoyed self-government under the Roman empire, and when the Latins took Constantinople in 1204, it became the seat of an empire which endured till 1461, when it was conquered by the Turks under Mehmet I.

TREES in London. Many were planted by John Evelyn in the Mall, St. James's, &c. He recommended this in his "Fumifugium," published 1661. The planting of rows of trees in suburban roads began in 1875.

TREES OF LIBERTY were planted in Paris and other parts of France during the revolutionary wars, 1790 and 1848. These trees were cut down in Paris in Jan. 1850, when riots ensued, put down by the military. The celebrated tree *Février*, planted in 1789 near the National Library, Paris, was felled early in 1884.

TRENT (the ancient Tridentum), in the Tyrol, belongs to Austria. The council held here is reckoned in the Roman catholic church as the 18th general council. Its decisions have been implicitly received as the standard of faith, morals, and discipline in that church. It first sat 13 Dec. 1545, and continued (with interruptions) under pope Paul III., Julius III., and Pius IV. to 4 Dec. 1563; its last sitting (the 25th). A jubilee in relation to this council was celebrated in June, 1863. Trent was several times taken during the French war.

At this council was decreed, with anathemas: the canon of scripture (including the apocrypha), and the church its sole interpreter; the traditions to be equal with scripture; the seven sacraments (baptism, confirmation, the Lord's supper, penance, extreme unction, orders, and matrimony); transubstantiation; purgatory; indulgences; celibacy of the clergy; auricular confession, &c.

TRENT STEAMER, see *United States*, Nov.-Dec. 1861.

TREVECCA, see *Cheshunt*.

TREVES, or **TRIER**, the Roman Treviri, in Rhenish Prussia, was a prosperous city of the Gauls 12 B.C. The emperor Gallienus held his court here A.D. 255. The church of St. Simcon dates from the 4th century. Trèves was made an electorate in the

14th century, and became subject to the archbishop in 1585. Councils held here, 385-1423. The archbishopric is said to have been founded before the 7th century and to be the oldest in Germany. After various changes, Trèves was acquired by Prussia, June 1815. In 1844 much excitement was occasioned by miracles said to have been wrought by a "Holy Coat."

"**TRIA JUNCTA IN UNO**" (three joined in one), the motto of the knights of the military order of the Bath, signifying "faith, hope, and charity;" see *Bath*.

TRIAL AT BAR, signifies by the whole court or a plurality of judges. This plan was adopted at Bristol after the riots in 1832; also at O'Connell's trial, 1844; and arranged for the trial of the claimant of the Tichborne estates for perjury, in April, 1873. See *Juries*.

TRIALS. Regulations for conducting trials were made by Lothaire and Edric, kings of Kent, about 673 to 680. Alfred the Great is said to have begun trial by jury; but there is good evidence of such trials before his time. Arrangements were made for more speedy trials by "the Winter Assizes Act," 1876. See *Appeal*.

Gorham v. the bishop of Exeter; ecclesiastical case; judgment given in the court of Arches against the plaintiff 2 Aug.
 [The bishop had refused to institute the rev. Mr. Gorham into the living of Brampton-Speke, in Devonshire, alleging want of orthodoxy in the plaintiff, who denied that spiritual regeneration was conferred by baptism; the court held that the charge against the plaintiff of holding false doctrine was proved, and that the bishop was justified in his refusal. Mr. Gorham appealed to the Judicial Committee of the Privy Council, which pronounced its opinion (8 March, 1850) that "the doctrine held by Mr. Gorham was not contrary or repugnant to the declared doctrine of the church of England, and that Mr. Gorham ought not, by reason of the doctrine held by him, to have been refused admission to the vicarage of Brampton-Speke." This decision led to subsequent proceedings in the three courts of law, successively, for a rule to show cause why a prohibition should not issue, directed to the judge of the Arches court, and to the archbishop of Canterbury, against giving effect to the judgment of her majesty in council. The rule was refused in each court, and in the end Mr. Gorham was instituted into the vicarage in question, 7 Aug. 1851.

TUNNAGE AND POUNDAGE were ancient duties levied on every tun of wine and pound of other goods, imported or exported, and were the origin of our "customs." They commenced in England about 1346, and were granted to the kings for life, beginning with Edward IV. Charles I. gave great offence by levying them on his own authority, 1628. They were granted to Charles II. for his lifetime, 24 June, 1660. By the act 27 Geo. III. c. 13, these and other duties were repealed, 1787, and a new arrangement of excise and customs was introduced.

TUNNELS, for drainage, are ancient. The earliest tunnel for internal navigation was executed by M. Riquet, in the reign of Louis XIV., at Bezieres in France. The first in England was by Mr. Brindley, on the duke of Bridgewater's canal, near Manchester, about 1766. Project of the Gravesend tunnel, 1800—the report upon it, 1801. The Thames Tunnel was projected by Mr. Brunel in 1823, and opened for foot passengers, 25 March, 1843; see *Thames Tunnel*. Innumerable tunnels have been made for railways. The railway tunnel at Liverpool was completed in the middle of 1829, lit up with gas, and exhibited once a week. On the London and Birmingham railway there are eight tunnels (the Primrose-hill, Watford, Kilsby, &c.), their total length being 7336 yards. *Smiles*. It was computed by Mr. Fowler, that there were 80 miles of tunnels in the United Kingdom in 1865, which cost about 6,500,000*l.*, at the average of 45*l.* a yard; see *Alps and Thames*.

TURIN, the ancient Augusta Taurinorum in Piedmont, capital of the Sardinian States, and of the kingdom of Italy, till 1864, when it was superseded by Florence. Its importance dates from the permanent union of Savoy and Piedmont in 1416. The French besieged this city; but prince Eugene defeated their army, and compelled them to raise the siege, 7 Sept. 1706. In 1798, the French republican army took possession of Turin, seized all the strong places and arsenals of Piedmont, and obliged the king and his family to remove to the island of Sardinia. In 1799, the French were driven out by the Austrians and Russians; but the city and all Piedmont surrendered to the French, June 1800. In May 1814, it was restored to the king of Sardinia; see *Italy*, 1864. Here prince Humbert was married to his cousin Margherita amidst great rejoicing, 22 April, 1868. The monument to Cavour was inaugurated, 8 Nov. 1873. An exhibition opened by the king, 25 April, 1880. See *Treaties*, and *Italy*, 1884.

TURKESTAN, called by the Persians Turan, Independent Tartary, the original country of the Turks, in Central Asia, was reached by Alexander, 331 B.C. The Russians are gradually encroaching on this country; on 14 Feb. 1865, a new province, Turkestan, was created by decree, and gen. Kauffmann made governor, 26 July, 1867; died 16 May,

1882. The rule of the czar accepted by the chief tribes at Merv, (*which see*), announced 8 Feb. 1884.

TURKEY. The Turks were originally a tribe of Tartars; but, by incorporation with the peoples they have conquered, have become a mixed race. About 760, they obtained possession of a part of Armenia, called from them Turcomania. They gradually extended their power; but in the 13th century, being harassed by other Tartar tribes, they returned to Asia Minor. The Turkish empire till 1878 comprehended the almost independent principalities of Moldavia and Wallachia, Servia, and Montenegro, the hereditary vice-royalty of Egypt, and Tunis. The Turkish quadrilateral fortresses were Shumla, Varna, Silistria, and Rustchuck. The population of the empire was estimated in 1887 at 32,978,100. (Immediate Possessions, 21,633,000; tributaries and protectorates, 11,345,100; in Europe, 8,087,000; Asia, 16,174,100; Africa, 7,817,000. By the treaty of Berlin (13 July, 1878) Turkey is said to have

TURNER'S ACT, 13 & 14 Vict. c. 35 (1850), relates to the court of chancery.

TURNER'S LEGACIES. Joseph M. W. Turner, a great landscape painter, was born in April, 1775, and died 19 Dec. 1851. He bequeathed to the nation all the pictures and drawings collected by him and deposited at his residence, 47, Queen Anne-street, London, on condition that a suitable gallery should be erected for them within ten years; and directed his funded property to be expended in founding an asylum at Twickenham for decayed artists. The will was disputed by his relatives, but a compromise was made. The oil-paintings (100 in number) and the drawings (1400) were obtained by the nation, and the engravings and some other property were transferred to the next of kin. The drawings were cleaned and mounted under the careful superintendence of Mr. Ruskin, and the pictures were sent to Marlborough-house for exhibition. In 1861, many of the pictures were removed from the South Kensington Museum to the National Gallery, others in 1869. The sketches, plates, &c., of *Turner's Liber Studiorum*, were sold for about 20,000*l.* 28 March, 1873.

TURNING, see *Laths*. In our dockyard blocks and other materials for our ships of war are now produced by an almost instantaneous process, from rough pieces of oak, by the machinery of Mr (afterwards sir Mark Isambard) Brunel (died 1849; see *Blocks*).

TUSCAN ORDER OF ARCHITECTURE, a debased Doric, used in Tuscany for buildings in which strength is chiefly required. *Wotton*.

TUSCANY, formerly a grand duchy in Central Italy, the northern part of the ancient Etruria (which see). It formed part of the Lombard kingdom, after the conquest of which by Charlemagne, 774, it was made a marquisate for Boniface about 828. His descendant, the great countess Matilda, bequeathed the southern part of her domains to the pope (1115). In the northern part (then called Tuscia), the cities, Florence, Pisa, Sienna, Lucca, &c., gradually became flourishing republics. Florence became the chief under the government of the Medici family; see *Florence*. The duchy in that family began in 1531; and the grand-duchy in 1569. After the extinction of the Medicis in 1737, Tuscany was given by the treaty of Vienna (1737) to Francis, duke of Lorraine (married to Maria Theresa of Austria in 1736), who had ceded his hereditary estates to France. TYRANT. In early Greek history, the term was applied to any man who governed with irresponsible power. Solon objected to the term, and chose the name Archôn (ruler), 594 B.C. The earliest tyrants were those at Sicyon, beginning with Cleisthenes, in the 7th century B.C. Tyranny declined in Greece about 490 B.C., and revived after the close of the Peloponnesian war, 404 B.C.; see *Thirty Tyrants*.

TYRE (Phœnicia), a great city, said to have been first built by Agenor. Another city was built 1257 (about 2267, *Hales*) B.C. It was besieged by the Assyrians, who retired from before it, after a siege of upwards of five years, 713 B.C. Taken by Nebuchadnezzar, 572 B.C., and the city demolished, when the Tyrians removed to an opposite island, and built a new and magnificent city. It was taken by Alexander with much difficulty, after a siege of seven months, July, 332 B.C. He joined the island to the continent by a mole. *Strabo*. Tyre was captured by the Crusaders, 7 July, 1124; by the French, 3 April, 1799; and by the allied fleet, during the war against Mehemet Ali, 1841.

TYRE, ERA OF, began on 19 Oct. 125 B.C., with the month of Hyperbeteus. The months were the same as those used in the Grecian era, and the year is similar to the Julian year. To reduce this era to ours, subtract 124; and if the

given year be less than 125, deduct it from 125, and the remainder will be the year before Christ.

TYROL, the eastern part of ancient Rætia, now a province of the Austrian empire, was ceded to the house of Hapsburg in 1359 by Margaret, the heiress of the last count. It became an appanage of the younger (or Tyrol) branch of the imperial house, which came to the throne in the person of Maximilian II., in 1618. The French conquered the Tyrol in 1805, and united it to Bavaria; but in 1809 an insurrection broke out, headed by Andre Hofer, an innkeeper, who drove the Bavarians out of the Tyrol, thoroughly defeated some French detachments, but laid down his arms at the treaty of Vienna. He was subsequently accused of corresponding with the Austrians, captured and sent to Mantua, and there shot by order of the French government, 20 Feb. 1810. The Austrian emperor ennobled his family in 1819, and erected his statue in Innsbruck in 1834. The Tyrolean riflemen were very effective in the Italian war in 1859. The Arlberg tunnel railway from Innsbruck to Bregenz inaugurated by the emperor 20 Sept. 1884.

TYRBONE (near Ulster, N. Ireland), formerly the territories of the O'Neills, and the seat of the insurrection in 1641.

UNCTION, EXTREME, see *Anointing*.

UNDULATORY THEORY OF LIGHT, supposes a progressive wave-like motion between the eye and the luminous body seen. It is said to have been suggested by Francesco Grimaldi about 1665, and was propounded by Robert Hooke and Huyghens, about 1672; opposed by Newton; but confirmed by Thomas Young by experiments in 1801, and is now generally adopted; see *Emission and Light*.

UNEMPLOYED, see under *Riots*, 1886-7, and *Mansion House Funds*, 1886.

A plan for providing work proposed by the bishops of London, Rochester and Bedford, cardinal Manning, Mr. Spurgeon and Mr. Reaney Nov. 1886. A conference of poor-law guardians at Exeter Hall declare that there is no exceptional distress in the country 8 Dec. 1886.

The Gardens and Pleasure Grounds Fund started (see under *Mansion House*) about 24 Dec. 1887.

The scheme in action reported partially successful Aug. 1888.

UNIFORMITY ACTS. That of 2 & 3 Edward VI., 15 Jan. 1549, ordained that the order of divine worship, drawn up by Cranmer and others, "with the aid of the Holy Ghost," should be the only one used after 20 May. The penalties for refusing to use it were fine and imprisonment. This act was confirmed in 1552; repealed by Mary, 1554; and re-enacted by Elizabeth in 1559. The act of Uniformity, 14 Charles II. c. 4, was passed in 1662. It enjoined uniformity in matters of religion, and obliged all clergy to subscribe to the thirty-nine articles, and use the same form of worship, and same book of common prayer. Its enforcement on 24 Aug. 1662, termed Black Bartholomew's day, caused, it is said, upwards of 2000 ministers to quit the church of England. This day was commemorated by dissenters in 1862. The Act of Uniformity Amendment act, whereby shortened services were authorised, and other changes made, was passed 18 July, 1872. The *Uniformity of Process* act, which made many law changes, was passed 23 May, 1832.

UNIFORMS. Military uniforms were first used in France, "in a regular manner" by Louis XIV. about 1668. In England the uniform was soon afterwards adopted in the military service, but with little analogy to the modern dress. See under *Navy*.

UNIGENITUS, see *Bull*.

UNION OF CALMAR, 1397; of Utrecht, 1579.

UNION OF ENGLAND AND SCOTLAND by the accession of James VI. of Scotland as James I. of England, 24 March, 1603. The legislative union of the two kingdoms (as Great Britain) was attempted, but failed in 1604 and 1670; in the reign of Anne, commissioners were appointed, the articles discussed, and, notwithstanding a great opposition made by the Tories, every article in the union was approved by a great majority, first in the house of commons, and afterwards by the peers, 22 Jan. 1706; was ratified by the Scottish parliament, 16 Jan. 1707, and became law, 1 May, same year.

UNION OF GREAT BRITAIN AND IRELAND effected, 2 July, 1800.

Proposed in the Irish parliament 22 Jan. 1790. Rejected by the commons of Ireland, the votes being 105 for, to 106 against the union, 24 Jan. The English house of commons on the same question divided, 140, 141, and 149 for the union; against it, 15, 25, and 28 respectively. Lord Castlereagh detailed his plan of the union, in the Irish house of lords, founded on the resolutions of the British parliament thereon 5 Feb. 1800. Votes of the commons agreeing to it, 161 against 115, 17 Feb.; and again, 152 against 108 21 Feb. The houses of lords and commons wait on the lord lieutenant with the articles of union, 27 March. The act passed in the British parliament 2 July. The imperial united standard first displayed at the tower of London, and upon Bedford Tower, Dublin Castle, on the act of legislative union becoming an operative law 1 Jan. 1801. For attempts to dissolve this union, see *Repeal, Ireland* 1886. National Union Club, Albemarle Street, London, established 18 Jan. 1837.

UNION JACK. The original flag of England was the banner of St. George, i.e., white with a red cross, which, 12 April, 1606 (three years after James I. ascended the throne) was incorporated with the banner of Scotland, i.e., blue with a white diagonal cross. This combination obtained the name of "Union Jack," in allusion to the union with Scotland, and the word Jack is considered a corruption of the word Jacobus, Jacques, or James. This arrangement continued until the union with Ireland, 1 Jan. 1801, when the banner of St. Patrick, i.e., white with a diagonal red cross, was amalgamated with it, and forms the present Union flag.

UNION CHARGEABILITY ACT, providing for the better distribution of the charge for relieving the poor in unions, was passed in June, 1865. One object of the act is the improvement of the dwellings of agricultural labourers.

UNION RELIEF ACT, passed in 1862, continued in 1863, to enable boards of guardians of certain unions to obtain temporary aid to meet the extraordinary expenditure for relief occasioned by the distress in the cotton manufacturing districts.

UNITARIANS, termed Socinians from Lælius Socinus, who founded a sect in Italy about 1540. They profess to believe in and worship one only

self-existent God, in opposition to those who worship the Trinity in unity. They consider Christ to have been a mere man; and do not admit the need of an atonement or of the complete inspiration of the scriptures. Michael Servetus printed a tract in disparagement of the doctrine of the Trinity. In 1553, proceeding to Naples through Geneva, Calvin induced the magistrates to arrest him on a charge of blasphemy and heresy. Servetus, refusing to retract his opinions, was condemned to the flames, which sentence was carried into execution, 27 May, 1553. Servetus is numbered among those anatomists who made the nearest approach to the doctrine of the circulation of the blood, before Harvey established that doctrine. Matthew Hamont was burnt at Norwich for asserting Christ not to be the Son of God, 1 June, 1579. The Unitarians were numerous in Transylvania in the 17th century; they came to England about 1700, and many of the original English presbyterian churches became Unitarians about 1730. They were not included in the Toleration act till 1813. There were 229 congregations in England in 1851. Their tenets resemble those of the Arians and Socinians (*which see*). The Unitarian marriage bill was passed, June, 1827. In Dec. 1833, by a decision of the vice-chancellors the Unitarians (as such) lost the possession of lady Hewley's charity; the decision was affirmed on appeal in 1842. *British and Foreign Unitarian Association* founded, to promote Unitarianism, 1825; meeting in London, 64th anniversary kept in London, 12 June, 1889. There were 320 Unitarian churches in the United Kingdom in Feb. 1884.

UNITED IRISHMEN, a political society which met secretly, to establish a republic, became active in 1795. He anticipated his punishment by suicide in prison Nov. 1798.

UNITED KINGDOM. England and Wales were united in 1283; Scotland to both in 1707; and the British realm was named the United Kingdom on the union of Ireland, 1 Jan. 1801; see *Union*.—The **UNITED KINGDOM ALLIANCE**, for the total suppression of liquor traffic, was founded, 1 June, 1853. See *Permissive Bill*. The subscribed manifesto of this alliance occupied a page of the *Times*, 11 Dec. 1871. He had arranged for the successful issue of the insurrection above mentioned, so far as to devise a provisional government and a new constitution. On 16 Oct. he and his band, aided by a mob, seized the arsenal at Harper's Ferry, a town on the borders of Virginia and Maryland, stopped the railway trains, and cut the telegraph wires; a conflict with the military ensued, when many of the insurgents were killed. UNIVERSALISTS, who believe in the final salvation of all men. This doctrine, declared in the Talmud, and ascribed to Origen, about 230, was advocated by other early fathers, but opposed by St. Augustine, about 420; and condemned by the 5th general council at Constantinople, May, June, 553. It was received by the Unitarians in the 17th century, and avowed by numerous clergymen of the church of England. James Reilly, who published his "Union" in 1760, founded the sect of Universalists in Britain; and John Murray, in America, about 1770. The sect barely exists in Britain, but flourishes in America.

UNIVERSAL REVIEW, edited by Mr. Harry Quilter, devoted to fine art, literature, &c., first published 15 May, 1888.

UNIVERSAL SUFFRAGE (*Plebiscitum*), one of the six points of the charter (see *Chartists*), was adopted by the French in their constitution of 1791; and used in the election of their president in 1851, and of their emperor in 1852; and by the Italian States in voting for annexation to Sardinia in 1860, 1861, 1866, and 1870.

USES, STATUTE OF, 27 Hen. VIII. c. 10 (1535-6); see *Charitable Uses*.

USHANT, an island near Brest, N.W. France,

near which two naval battles were fought between the British and French fleets.

(1.) On 27 July, 1778, after an indecisive action of three hours, the French, under cover of the night, withdrew into the harbour of Brest. Admiral Keppel commanded the English fleet; the count d'Orvilliers the French. The failure of a complete victory was attributed to admiral sir Hugh Palliser's non-compliance with the admiral's signals. Palliser preferred articles of accusation against his commander, who was tried and acquitted, and the charge against him declared to be "malicious and ill-founded."

(2.) Lord Howe with 25 ships signally defeated the French fleet (26 ships, under Villaret-Joyeuse), taking six ships of the line, and sinking one (the *Vengeur*), 1 June, 1794. While the two fleets were engaged in this action, a large fleet of merchantmen, on the safety of which the French nation depended for its means of prosecuting the war, got safely into Brest harbour, which gave occasion to the enemy to claim the laurels of the day, notwithstanding their loss in ships, and in killed and wounded, which was very great. The day was long termed in England the "glorious first of June."

USURY from a stranger was permitted to the Jews, but forbidden from their brethren, 1491 B.C. (*Exod.* xxiii. 25, *Deut.* xxiii. 13.) This law was enforced by Nehemiah, 445 B.C. (*Neh.* v.) Usury was prohibited by the English parliament, 1341. Until the 15th century, no Christians were allowed to receive interest of money, and Jews were the only usurers, and therefore often banished and persecuted; see *Jews*. By the 37th of Henry VIII. the rate of interest was fixed at 10 per cent., 1545. This statute was repealed by Edward VI., but re-enacted 13 Eliz. 1570. For later legislation, see *Interest*.

UTAH, a western territory of North America, was organised 9 Sept. 1850; the capital, Salt Lake City, became the chief seat of the *Mormonites* (which see). Population in 1880, 143,963.

UTICA (N. Africa), an ancient Tyrian colony, an ally of Carthage, named in the treaty with the Romans 348 B.C. Here Cato the younger, after the defeat of the partisans of Pompey at Thapsus, committed suicide, 46 B.C. Utica flourished greatly after the fall of Carthage, and was made a Roman city by Augustus on account of its favouring Julius Caesar. It suffered by the invasion of the Vandals, 439; and of the Saracens, about 700.

UTILITARIANISM, termed the "greatest happiness principle," the philosophy which proposes the attainment of the greatest happiness of the greatest number; a doctrine ascribed to Priestley by Bentham. The doctrine is found in the writings of Locke, Hartley, Hume, and Paley; but was chiefly propounded by Jeremy Bentham in his "Introduction to the Principles of Morals and Legislation," 1780-89, and by John Stuart Mill, who died 9 May, 1873. Mill founded a small "utilitarian society," in 1822. He took the name from an expression in Galt's "Annals of the Parish."

UTRAQUISTS, see *Calistines*.

UTRECHT (the Roman *Trajectum ad Rhenum*) became the seat of an independent bishopric about

* Various French histories, on the authority of the French demagogue Barrère, state that the English had 36 ships of the line, and the French only 26, and that the crew of the *Vengeur* sang the *Marseillaise* while the ship sank, displaying the tricolor flag. All this was denied in 1802, and disproved by rear-admiral Griffith in Nov. 1838. The *Vengeur* surrendered to the British, who exerted themselves to save the crew. The French statement was accepted by Alison, and at first by Carlyle, but afterwards contradicted by both.

695. The last prelate, Henry of Bavaria, weary of his turbulent subjects, sold his temporal government to the emperor Charles V. in 1528. The union of the Seven United Provinces began here (see *United Provinces*); signed 23 Jan. 1579; 300th anniversary celebrated 23 Jan. 1879. The *treaty of Utrecht*, which terminated the wars of queen Anne, was signed by the ministers of Great Britain and France, and all the other allies, except the ministers of the empire, 11 April, 1713. This treaty secured the Protestant succession in England, the separation of the French and Spanish crowns, the destruction of the works of Dunkirk, the enlargement of the

British colonies and plantations in America, and a full satisfaction for the claims of the allies. Utrecht surrendered to the Prussians, 9 May, 1787; was acquired by the French, 18 Jan. 1795, and restored at the peace, 1814.

UXBRIDGE (W. Middlesex). On 30 Jan. 1645, commissioners met here to discuss terms of peace between Charles I. and the parliament; they separated without effect, 22 Feb. The latter required absolute control of the army and navy, the abolition of the episcopacy, liturgy, &c. *Uxbridge* murder, see *Trials*, Dec. 1884.

VACATIONS.

VACATIONS, see *Terms*.

VACCINATION (from *Variola Vaccina*, the cow-pox), discovered by Dr. Edward Jenner. He was born in 1749, and educated for the medical profession, partially under John Hunter. Having heard that milkmaids who had had the cow-pox never took the small-pox, he, about 1780, conceived the idea of vaccination. He made the first experiment by transferring to a healthy child on 14 May, 1796, the pus from the pustule of a milkmaid who had caught the cow-pox from the cows. He announced his success in a memoir published 1798, and vaccination, begun 21 Jan. 1799, soon became general, after much opposition. For this Dr. Jenner received 10,000*l.* from parliament, 2 June, 1802, and 10,000*l.* in 1807. The first national institution for vaccination, the Royal Jennerian Institution, was founded 19 Jan. 1803. The emperor Napoleon valued Dr. Jenner so highly, that he liberated Dr. Wickham, when a prisoner of war, at Jenner's request, and subsequently whole families of English, making it a point to refuse him nothing that he asked. Vaccination, although much opposed, was practised throughout all Europe previously to 1816. Dr. Jenner died suddenly, 26 Jan. 1823.

VACUUM, is produced by reducing the pressure of the atmosphere, whereby its power of absorbing moisture is greatly increased, this power has been utilised by M. Emil Passburg, of Breslau, in his drying apparatus which has been successfully employed for drying grains by Messrs. Guinness, of Dublin since the spring of 1888.

VALENTINE'S DAY.

VADIMONIS LACUS, the Vadimonian lake, Umbria, central Italy, near which the Etruscans were totally defeated in two severe engagements by the Roman consuls: 1, by Fabius Maximus, 309 B.C.; 2, by Cornelius Dolabella, 283.

VAGRANTS. By law, after being whipped, a vagrant was to take an oath to return to the place where he was born, or had last dwelt for three years, 1530. A vagrant a second time convicted was to lose the upper part of the gristle of his right ear, 1535; a third time convicted, death. A vagabond to be branded with a V, and be a slave for two years, 1547. If he absconded and was caught, he was to be branded with S, and be a slave for life. Vagrants were punished by whipping, gaoling, boring the ears, and death for a second offence, 1572. The milder statutes were those of 17 Geo. II.; 32, 35, and 59 Geo. III. The present Vagrant Act (5 Geo. IV. c. 83) was passed in 1824. There were about 33,000 tramps in England and Wales in 1865. For vagrants in London, see under *Poor*.

VALDENSES, see *Waldenses*.

VALENÇAY, a château near Châteauroux, central France, where Napoleon I. imprisoned Ferdinand of Spain from 1808 to 1813. His kingdom was restored to Ferdinand by a treaty signed 8 Dec. 1813.

VALENCIA (E. Spain), the *Valentia Edetanorum* of the Romans, became the capital of a Moorish kingdom, 1000; annexed to Aragon 1238. Its university, founded, it is said, in the 13th century, was revived in the 15th. Valencia was taken by the earl of Peterborough in 1705, but submitted to the Bourbons after the unfortunate battle of Almanza, in 1707. It resisted the attempts made on it by marshal Monecy, but was taken from the Spaniards with a garrison of more than 16,000 men, and immense stores, by the French under Suchet, 9 Jan. 1812.

VALENCIENNES (N. France). This city (the Roman *Valentiane*), after many changes, was taken by Louis XIV. in 1677, and annexed 1678. It was besieged from 23 May to 28 July, 1793, when the French garrison surrendered to the allies under the duke of York. It was retaken, together with Condé, by the French, 27-30 Aug. 1794; on capitulation, the garrison and 1100 emigrants were made prisoners, with immense stores.

VALENTIA, a Roman province, including the country between the walls of Severus and Adrian, was reconquered from the Picts and Scots by Theodosius, and named after Valentinian I. the reigning emperor, 368.

VALENTINE'S DAY (14 Feb.). Valentine is said to have been a bishop, who suffered martyrdom under Claudius II. at Rome; others say under Aurelian, in 271. 618,000 letters passed through the post-office on 14 Feb. 1856. 530,300 was the estimated number of valentines delivered in 1864; in 1870, 1,545,755. The origin of the ancient custom of "choosing a valentine" has been much controverted; see *Poet*.

VALENTINIANS, followers of Valentine, a priest, who, on being disappointed of a bishopric, forsook the Christian faith, declaring there were thirty gods and goddesses, fifteen of each sex, which he called *Eones*, or *Agas*. He taught in the 2nd century, and published a gospel and psalms: his followers added other errors.

VALLADOLID (Spain), the Roman *Pintia* and the Moorish *Belad Walid*: was recovered for the Christians by Ordoño II., the first king of Leon, 914-23. It became capital of Castile in the 15th century. It was taken by the French Jan. 1808; and captured by the English, 4 June, 1813. Here died Christopher Columbus, 20 May, 1506.

VALLOMBROSA (Central Italy). A Benedictine abbey was founded here by John Gualbert, about 1038. The monks were termed *Vallambrosians*.

VALMY (N.E. France). Here the French, commanded by Kellermann, defeated the Prussians, commanded by the duke of Brunswick, 20 Sept. 1792. The victory was of immense moral advantage to the republicans; and Kellermann was made duke of Valmy in 1808.

VALOIS, a county (N. France) given by Philip III. to his younger son Charles, whose son Philip became king as Philip IV. in 1328; see *France*.

VALOR ECCLESIASTICUS, a report of the annual value of church property, made by order in 1534, was published by the Record Commission in 1810-34.

VALPARAISO, principal port of Chili, South America, was bombarded by the Spanish admiral Mendez Nuñez, on 31 March, 1866, when much property was destroyed. It suffered by earthquakes in 1822, 1829, and 1851.

VALTELLINE (N. Italy), a district near the Rhetian Alps, seized by the Grison league, 1512, and ceded to it, 1530. At the instigation of Spain, the catholics rose and massacred the protestants, 19-21 July, 1620. After much contention between the French and Austrians, the neutrality of the Valtelline was assured in 1639. It was annexed to the Cisalpine republic in 1797; to Italy, 1807; to Austria, 1814; to Italy, 1860.

VALUATION OF PROPERTY ACT, to provide for the uniform assessment of rateable property in the metropolis, was passed 9 Aug. 1869.

VALVASOR (or "**VAVASOR**"). Camden holds that the "*Vavasor*" was next below a baron. Du Cange maintains that there were two sorts of *vavasors*: the greater, who held of the king, such as barons and counts; and the lesser, called "*valvasini*," who held of the former, such as vassals holding land under a nobleman himself a vassal.

VANADIUM (from *Vanadis*, the Scandinavian *Venus*), metal discovered by Sefström, in 1830, combined with iron ore. A similar metal, discovered in lead ore by Del Rio in 1801, and named *Erythronium*, was proved by Wöhler to be Vanadium. Vanadium was discovered in the copper-bearing beds in Cheshire, in 1865, by Mr. (aft. Sir) H. E. Roscoe, by whom its peculiarities were further studied, and published in 1867-8. It is useful in photography and dyeing.

VANCOUVER'S ISLAND, North Pacific ocean, near the main land. Settlements were made here by the English in 1781, which were seized by the Spaniards in 1789, but restored. By a treaty

between the British government and that of the United States in 1846, this island was secured to the former. It has become of much greater importance since the discovery of gold in the neighbouring main land in 1858, and the consequent establishment of the colony of British Columbia (*which see*). Victoria, the capital, was founded in 1838. The island was united with British Columbia by an act passed in Aug. 1866; and on 24 May, 1868, Victoria was declared the capital. Lord Dufferin, governor-general of Canada, was warmly received here, 15 Aug. 1876. See *Juan, San*. Chinese immigrants are virtually excluded by a poll-tax, 1878.

Vancouver nearly destroyed by fire, about 15 June; again 6 July, 1878.
Wellington colliery explosion; 76 lives lost, Jan. 1878.

VANCOUVER'S VOYAGE. Captain Vancouver served as a midshipman under captain Cook, and was appointed to command during a voyage of discovery, to ascertain the existence of any navigable communication between the North Pacific and North Atlantic oceans. He sailed 7 Jan. 1791, and returned 24 Sept. 1795. He compiled an account of this voyage of survey of the north-west coast of America, and died in 1798.

VANDALS, a Germanic race, attacked the Roman empire in the 3rd century, and began to ravage Germany and Gaul, 406-14; their kingdom in Spain was founded in 411; under Genseric they invaded and conquered the Roman territories in Africa, 429, and took Carthage, Oct. 439. They were subdued by Belisarius in 534. They were driven out by the Saracen Moors. The dukes of Mecklenburg style themselves princes of the Vandals.

VARANGIANS, OR **VARAGIANS**, a name given to northern pirates, who invaded Flanders, about 813; France, about 840; Italy, 852. Their leader, Ruric, invited by the Novgorodians to help them, founded the Russian monarchy, 862.

VARENNES, a town in N.E. France, is celebrated for the arrest of Louis XVI., his queen, sister, and two children. They fled from the

Tuileries on 21 June, 1791; were taken here the next day, and conducted back to Paris, mainly through Drouet, the postmaster, who, at an intermediate town, recognised the king.

VARIABLE STARS. The variation of brightness in certain stars is said to have been first observed in a small star of Cetus, or the Whale, by Daniel Fabricius, 13 Aug. 1596. In Oct. of same year the star had vanished. Since then many similar variations have been observed by Goodricke, Herschel, and other astronomers; and Mr. Pogson has constructed a table of 38 variable stars. No satisfactory explanation has yet been given of the phenomena. *Eng. Cyc.*

VARNA, a fortified seaport in Bulgaria, formerly European Turkey. A great battle was fought near this place, 10 Nov. 1444, between the Turks under Amurath II. and the Hungarians under their king Ladislaus and John Hunniades. The latter were defeated with great slaughter: the king was killed, and Hunniades made prisoner, who had opposed the Christians breaking the truce for ten years, recently made at Szegedin. The emperor Nicholas of Russia arrived before Varna, the headquarters of his army, then besieging the place, 5 Aug. 1828. The Turkish garrison made a vigorous attack on the besiegers, 7 Aug.; and another on the 21st, but were repulsed. Varna surrendered, after a sanguinary conflict, to the Russian arms, 11 Oct. 1828. It was restored at the peace in 1829; its fortifications were dismantled, but have since been restored. The allied armies disembarked at Varna, 29 May, 1854, and sailed for the Crimea, 3 Sept. They suffered severely from cholera. In conformity with the treaty of Berlin, Varna was evacuated by the Turks, and occupied by Russians, autumn, 1878.

VASSALAGE, see *Feudal Laws*, and *Slavery*.

VASSAR COLLEGE (on the east bank of the Hudson, United States), for the higher education of women, was founded by Matthew Vassar in 1861.

VASSY (N.E. France). The massacre of the protestants at this place by the duke of Guise on 1 March, 1562, led to desolating civil wars.

VATICAN (Rome), the ancient Mons Vaticanus, a hill of Rome. The commencement of the palace is ascribed to Constantine, Liberius, and Symmachus. It became the residence of the pope at his return from Avignon, 1377. The palace is said to contain 7000 rooms, rich in works of art, ancient and modern. The library, founded by pope Nicholas V., 1448, is exceedingly rich in printed books and MSS.—Pistolesi's description of the Vatican, with numerous plates, was published 829-38.—The phrase "Thunders of the Vatican" was first used by Voltaire, 1748.—The ancient Vatican Codex of the Old and New Testament in Greek was published at Rome in 1857. For "Vatican Decrees," see *Councils*.

VAUD, a Swiss canton, after having been successfully held by the Franks, the kings of Burgundy, emperors of Germany, dukes of Zähringen, and dukes of Savoy, was conquered by the Bernese, Jan. 536, and annexed, 1554. Vaud, made independent in 1798, joined the confederation in 1815. A new constitution was obtained in 1830, after agitation.

VAUXHALL BRIDGE, constructed of iron under the direction of Mr. Walker, at an expense of 50,000*l.* (to be defrayed by a toll). The first stone was laid 9 May, 1811, by prince Charles, eldest son

of the duke of Brunswick; and the bridge was opened on 4 June, 1816; freed from toll, 24 May, 1879.

VAUXHALL GARDENS (London), were so denominated from the manor of Vauxhall, Falkeshall, Fox-hall, or Faukeshall, said to have been the property of Fulke de Breaté about 1282. The tradition that this house or any other adjacent was the property of Guy Fawkes is erroneous. The premises were the property of Jane Vaux in 1615, and the mansion-house was then called Stockden's. From her it passed through various hands, till it became the property of Mr. Tyers in 1732. There is no certain account of the time when these premises were first opened for the entertainment of the public; but the New Spring Gardens at Vauxhall are mentioned by John Evelyn in his diary 2 July, 1661, Pepys 29 May, 1662, Wycherley 1672, and in the *Spectator* 1711, as a place of great resort. The gardens were opened for a "ridotto al fresco" 7 June, 1732, by Jonathan Tyers, who spared no pains or expense to maintain his success. The greatest season was in 1823, when 133,279 persons visited the gardens, and the receipts were 29,500*l.* The greatest number of persons in one night was 2 Aug. 1833, when 20,137 persons paid for admission. The number on the then supposed last night, 5 Sept. 1839, was 1089 persons. Vauxhall was sold by auction, 9 Sept. 1841, for 20,200*l.*, and again 20 Aug. 1859. The last performances at Vauxhall took place on 25 July, 1859. The ground has been sold for building purposes. Six persons killed and many injured by fall of stack of wood at Buckley's saw-mills, 25 Feb. 1880.

VEDAS, the sacred books of the Hindoos, in Sanskrit, were probably written about 1000 B.C. Veda means knowledge. These books comprise hymns, prayers, and liturgical formulae. The edition by professor Max Müller, printed under the patronage of the East India Company, appeared in 1849-74. Four volumes of a translation by H. H. Wilson appeared in 1850-67.

Vol. V. & VI, edited by professor Cowell & W. F. Webster, completing the work, appeared in 1880. In 1887 the Maharajah of Vizianagram proposed to bear the expense of a new edition of the text, edited by professor Max Müller.

VEGETABLES for the table were brought from Flanders about 1520; see *Gardening*.

VEGETARIAN SOCIETY, founded 1847, whose members restrict themselves to a vegetable diet, held their fifteenth anniversary in London, 4 Sept. 1862.

Meetings held at Manchester, 14 Oct. 1874 & seq.; 22 Oct. 1879; 36th meeting at Manchester, 17 Oct. 1883. "Fraterna," a settlement of vegetarians, existed in California in 1880.

VEHMIC TRIBUNALS: *Vehmgerichte*, *Fehmgerichte*, or *Femgerichte*, secret tribunals established in Westphalia to maintain religion and the public peace, had their origin in the time of Charlemagne, and rose to importance in 1182, when Westphalia became subject to the archbishop of Cologne. Persons of the most exalted rank were subjected to their decisions, being frequently seized, tried, and executed. The emperors endeavoured to suppress them, but did not succeed till the 16th century. Their last court, it is said, was held in 1568. Sir W. Scott has described them in "Anne of Geierstein." A remnant of these tribunals was abolished by Jerome Bonaparte, king of Westphalia, in 1811.

VEIL, an independent Latin city near Rome. Between the Romans and Veientes frequent wars occurred, till Veil was utterly destroyed, after ten years' siege, 396 B.C. The Roman family, the Fabii, who had seceded from Rome for political reasons, were surprised and destroyed at the river Cremera, by the Veientes, 477 B.C.

VELLORE (S.E. India) became the residence of the family of the dethroned sultan of Mysore, and was strongly garrisoned by English troops, 1799. The revolt of the sepoys, in which the family of the late Tippoo took an active part, took place 10 July, 1806. The insurgents were subdued by colonel Gillespie, and mostly put to the sword; about 800 sepoys were killed.

VELOCIPEDES. A machine of this kind was invented by Blanchard the aeronaut, and described in the *Journal de Paris*, 27 July, 1779; and one was invented by Nicéphore Niepce in 1818. The "dandy-horse" or "Draisena, a machine called a velocipede," was patented for the Baron von Draiss, in Paris and London in 1818, and described in "Ackermann's Repository," Feb. 1819. These machines came again into use in 1861; and since 1867 have been very common under various forms, termed bicycles and tricycles; the chief inventor of which, James Starley, an ingenious mechanic of Albourne, Sussex, was buried at Coventry, June, 1881. The popular "Otto" bicycle, first patented in 1881, much improved since. Velocipede races took place at the Crystal Palace, 26 May, 1869, and frequently since. Mr. John Mayall and two friends travelled to Brighton on velocipedes, 17 Feb. 1869.

Mr. Stanton went from London to Bath, 106 miles, on a bicycle, in 8 h. 28 min. 17 Aug. 1874
 Similar feats since performed. Ordinary speed with bicycles 8 (now 10) miles an hour; with tricycles 10 miles may be attained.—*Field*. Oct. "

Dr. Hales, and described to the Royal Society of London, May, 1741; and the ventilator for the use of ships was announced by Mr. Triewald, in November, same year. The marquis of Chabannes' plan for warming and ventilating theatres and houses for audiences was applied to those of London about 1819. The systems of Dr. Reid (about 1834) and others followed, with much controversy. Dr. Arnott's work on this subject was published in 1838. A commission on warming and ventilation issued a report in 1859.

VENUS, the Roman goddess of love and beauty (the Greek Aphrodité). The transit of the planet Venus over the sun was predicted by Kepler, but not observed. The first transit observed, was by the rev. Jeremiah Horrox, or Horrocks, and his friend, Wm. Crabtree, on 24 Nov. 1639, as predicted by Horrox in 1633. The astronomer-royal Maskelyne observed her transit at St. Helena, 6 June, 1761. Capt. Cook made his first voyage in the *Endeavour*, to Otaheite, to observe a transit of Venus, 3 June, 1769; see *Cook's Voyages*. The diurnal rotation of Venus was discovered by Cassini in 1667. See *Sun*, note. *Statues*: Venus de Medicis, found near Tivoli and removed to France, 1680; the Venus found at Milo or Melos, 1820, placed in the Louvre, Paris, 1834.

Halley suggested the observation of the transit as a means of estimating the distance of the earth from the sun, and devised a method for this purpose.

Another method was invented by Delisle about 1716
Both plans were used in Dec. 1743
Expeditions for the accurate observation of the phenomena, on 8 Dec. astronomical day; ordinary day, 9 Dec. 1874, were sent to different parts of the globe by all the great powers, and favourable results have been reported. 1875-6

VERDUN (the ancient Verodunum), a first-class fortress on the Meuse, N.E. France, made a magazine for his legions by Julius Cæsar. It was acquired by the Franks in the sixth century, and formed part of the dominions of Lothaire by the treaty of Verdun, 843, when the empire was divided between the sons of Louis I. It was taken and annexed to the empire by Otho I. about 939. It surrendered to France in 1552; and was formally ceded in 1648. It was taken and held by the Prussians 43 days, Sept.—Oct. 1792. Gen. Beaupaire, the commandant, committed suicide before the surrender, and 14 ladies were executed on 28 May, 1794, for going to the king of Prussia to solicit his clemency for the town. Verdun surrendered to the Germans 8 Nov. 1870, after a brave defence; two vigorous sallies being made 28 Oct. Above 4000 men were captured, with a large number of arms and ammunition. It was the last place held by the Germans; and was given up 15, 16 Sept. 1873, and the troops retired.

The French at first were successful; but some Lombard auxiliaries, who had taken the English camp, commenced pillaging. Two thousand English archers came then fresh to the attack; and the French and Scots were totally defeated, and their leaders killed.

VERNON GALLERY. The inadequate manner in which modern British art was represented in the National Gallery was somewhat remedied in 1847 by the munificent present to the nation, by Mr. Robert Vernon, of a collection of 157 pictures, all but two being by first-rate British artists. They were first exhibited at Mr. Vernon's house in Pall-mall, next in the vaults beneath the National Gallery, afterwards at Marlborough House, and are now at the South Kensington Museum. In 1857, Mr. John Sheepshanks followed Mr. Vernon's example; see *Sheepshanks' Donations*.

VERONA (N. Italy) was founded by the Gauls or Etruscans; see *Campus Raudius*. The amphitheatre was built by Titus, A.D. 82. Verona has been the site of many conflicts. It was taken by Constantine 312; and on 27 Sept. 489 Theodoric defeated Odoacer, king of Italy. Verona was taken by Charlemagne 774. About 1260 Mastino della Scala was elected podestà, and his descendants (the Scaligeri) ruled, till subdued by the Visconti, dukes of Milan, 1387. Verona was conquered by the Venetians 1405, and held by them with some intermissions till its capture by the French general Massena, 3 June, 1796. Near to it Charles Albert of Sardinia defeated the Austrians 6 May, 1848. Verona is one of the four strong Austrian fortresses termed the Quadrangle, or Quadrilateral (*which see*), and here the emperor Francis Joseph, on 12 July, 1859, in an order of the day, announced to his army that he must yield to circumstances unfavourable to his policy, and thanked his people and army for their support. It was surrendered to the Italian government, 16 Oct. 1866; and the king was received by 70,000 persons in the amphitheatre, 18 Nov. 1866. Above 50,000 coins of Gallienus and other emperors, chiefly bronze, discovered near Verona, Jan. 1877.

VERSAILLES (near Paris) was a small village, in a forest thirty miles in circuit; where Louis XIII. built a hunting-seat about 1632. Louis XIV. between 1661 and 1687 enlarged it into a magnificent palace, which became the usual residence of the kings of France. By the treaty between Great Britain and the revolted colonies of British North America, signed at Paris, the latter power was admitted to be a sovereign and independent state, 3

Sept. 1783. On the same day a treaty was signed at Versailles between Great Britain, France, and Spain, by which Pondicherry and Carical, with other possessions in Bengal, were restored to France, and Trincomalee restored to the Dutch. Here was held the military festival of the royal guards 1 Oct. 1789, which was followed (on the 5th and 6th) by the attack of the mob, who massacred the guards and brought the king back to Paris. Versailles became the residence of Louis-Philippe in 1830. The historical gallery was opened in 1837. Versailles, with the troops there, surrendered to the Germans 19 Sept. 1870, and the crown prince of Prussia entered the next day; and on 26 Sept. he awarded the iron cross to above 30 soldiers at the foot of the statue of Louis XIV. The palace was converted into an hospital. The royal head-quarters were removed here from Ferrières 5 Oct. After the peace, Versailles became the seat of the French government (see *France*) March, 1871. Removed to Paris 27 Nov. 1879. The congress for the revision of the constitution met here 4-13 Aug. 1884. See *France*, 1889.

VERSE, see *Poetry, Hexameter, Elegy, Iambic*, &c. Surrey's translation of part of *Virgil's Æneid* into *blank verse* is the first English composition of the kind, omitting tragedy, extant in the English language (published in 1547). The verse previously used in our grave compositions was the stanza of eight lines, the *ottava rima* (as adopted with the addition of one line by Spenser in his *Faery Queene*), who probably borrowed it from Ariosto and Tasso. Boccaccio introduced it into Italy in his *Teseida*, having copied it from the old French *chansons*. Trissino is said to have been the first introducer of blank verse among the moderns, about 1508. *Vossius*.

VESTALS, virgin priestesses, took care of the perpetual fire consecrated to Vesta. The mother of Romulus was a vestal. Numa is said to have appointed four, 710 B.C., and Tarquin added two. Minutia was buried alive for breaking her virgin vow, 337 B.C.; Sextilia, 273 B.C.; and Cornelia Maximiliana, A.D. 92; see *Chastity*. The order was abolished by Theodosius, 389.

of progressive development as a hypothetic history of organic creation, ascribed to Robert Chambers, and other persons, first appeared in 1844, and occasioned much controversy. See *Origin of Species*.

VESUVIUS. By an eruption of Mount Vesuvius, the cities of Pompeii and Herculaneum (*which see*) were overwhelmed 24 Aug. 79 A.D., and more than 200,000 persons perished, among them Pliny the naturalist. Numerous other disastrous eruptions have occurred. Torre del Greco, with 4000 persons, was destroyed, 17 Dec. 1631. There was a dreadful eruption took place suddenly, 24 Nov. 1759, and another 8 Aug. 1767. The violent burst in 1767 was the 34th from the time of Titus. One in June, 1794, was most destructive: the lava flowed over 5000 acres of rich vineyards and cultivated land, and Torre del Greco was a second time burned; the top of the mountain fell in, and the crater is now nearly two miles in circumference. A great eruption in Oct. 1822, and others in May, 1855, May and June, 1858, caused great destruction. A series of violent eruptions causing much damage occurred in Dec. 1861, and in Feb. 1865. Torre del Greco was again destroyed in Dec. 1861. Another eruption began 12 Nov. 1867, and continued increasing in grandeur and danger, March, 1868. The phenomena were observed by professors Tyndall and Miller, sir John Lubbock, and other scientific men, in April, 1868. A great eruption began 8 Oct. 1868, and continued, causing much destruction, 19, 20 Nov. A severe eruption began 23 April and ended about 3 May, 1872; above 60 lives were lost. The mountain was disturbed in 1876; and another eruption began about 20 Sept. 1878; lava was spouted to the height of 300 feet; an eruption began 11 June, 1879; an intermittent eruption 2 May, 1885. Professor John Phillips' "Vesuvius" was published 1860.

Vigo was taken by lord Cobham in 1719, but relinquished after raising contributions. It was again taken by the British, 27 March, 1809.

The *Lochearn*, beginning to sink, 28 Nov., was abandoned by her crew, who were rescued by the *British Queen*, and brought to Plymouth 7 Dec. VINCENT, **CAPE ST.** (S. W. Portugal). See *Cape St. Vincent*, and *Rodney's Victories*.

VINCENT, ST. (West Indies), long a neutral island; but at the peace of 1763, the French agreed that the right to it should be vested in the English. The latter soon after engaged in a war against the Caribs, on the windward side of the island, who were obliged to consent to a peace, by which they ceded a large tract of land to the British crown. In 1779 the Caribs greatly contributed to the reduction of this island by the French, who, however, restored it in 1783. In 1795 the French landed some troops, and again instigated the Caribs to an insurrection, which was not subdued for several months. The great eruption of the Soufriere mountain, after the lapse of nearly a century, occurred in 1812. Population in 1861, 31,755; in 1881, 40,548.

Some think that vines are aborigines of Languedoc, Provence, and Sicily, and that they grew spontaneously on the Mediterranean shores of Italy, France, and Spain. The vine was carried into Champagne, and part of Germany, by the emperor Probus, about A.D. 279. The vine and sugar-cane were planted in Madeira in 1420. In the gardens of Hampton-court palace is an old and celebrated vine, said to surpass any known vine in Europe; see *Grapes*, and *Wine*. The Tokay vines were planted in 1350.

Vine Disease. In the spring of 1845, Mr. E. Tucker, of Margate, observed a fungus (since named *Oidium Tuckeri*) on grapes in the hot-houses of Mr. Slater, of Margate. It is a whitish mildew, and totally destroys the fruit.

The spores of this *oidium* were found in the vineries at Versailles in 1847. The disease soon reached the trellised vines, and in 1850 many lost all their produce.

In 1852, it spread over France, Italy, Spain, Syria, and in Zante and Cephalonia attacked the currants, reducing the crop to one-twelfth of the usual amount.

Through its ravages, the wine manufacture in Madeira ceased for several years.

Many attempts have been made to arrest the progress of this disease, but without much effect. Sulphur dust is the most efficacious remedy.

The disease had much abated in France, Portugal, and Madeira, in 1863. In 1862 Californian vines were introduced into the two latter.

VINEGAR. The ancients had several kinds, which they used for drink. The Roman soldiers were accustomed to take it in their marches. The Bible represents Boaz, a rich citizen of Bethlehem, as providing vinegar for his reapers (1312 B.C.), a custom still prevalent in Spain and Italy.

VINEGAR-HILL (near Enniscorthy, in Wexford, S. E. Ireland). Here the Irish rebels, headed by father John, a priest, encamped and committed many outrages on the surrounding country. They were gradually surrounded by the British troops, commanded by Lake, 21 June, 1798, and after a fierce struggle, with much slaughter, totally dispersed.

VINTNERS, see *Victuallers*.

VIOL AND VIOLIN. The lyre of the Greeks became our harp, and the viol of the middle ages became the violin. The violin is mentioned as early as 1200, in the legendary life of St. Christopher. It was introduced into England, some say, by Charles II. Straduarus (or Stradivarius) of Cremona, was a renowned violin-maker (1700 to 1722). The eminent violinist Paganini visited England, 1831; died at Nice, 27 May, 1840.

VIRGINALS; an early keyed instrument of the kind termed clavicorder; used in the 16th and 17th centuries; played on by queen Elizabeth and Mary queen of Scots. According to Johnson, it owed its name to young women being the usual performers. Tallis, Morley, Purcell, Gibbons, and all composed for this instrument.

VIRGINIA, see *Rome*, 449 B.C.

VIRGINIA, the first British settlement in North America, was discovered by John Cabot in 1497, and was taken possession of and named by Raleigh, after the virgin-queen Elizabeth, 13 July, 1584. Vain attempts were made to settle it in 1585. Two expeditions were formed by patent in 1606, and others in 1610. In 1626 it reverted to the crown; and a more permanent colony was established soon afterwards. George Washington was delegate for Virginia in the congress of 1774. Eastern Virginia seceded from the Union, 25 April, 1861, but Western Virginia declared for the Union, 13 Feb. and elected a governor, 20 Feb. 1861. Virginia was a chief seat of the war. The state was readmitted to the congress, Jan.-Feb. 1870; see *United States*, and *Richmond*. Population in 1880, 1,512,565; capital, Richmond. Western Virginian, population, 618,457; capital, Wheeling.

VIRGINIA CITY, see *Nevada*.

VIRGIN ISLANDS (West Indies), an eastern group discovered by Columbus, (1494): Virga Gorda, Tortola, Anegada, &c., and the Danish Isles, St. Thomas, Santa Cruz, and St. John.

Tortola settled by Dutch buccaneers about 1642; expelled by the English (who have held it since) 1666

St. Thomas settled by Danes 1672, and St. John a few years after; held by the British 1801-2;

1807-15; proposed sale to the United States for 1,500,000l. to be made a "territory." Danish proclamation, 25 Oct. 1867; purchase declined by U. S. senate 23 March, May, 1870

By a dreadful hurricane off St. Thomas, the Royal Mail steamers *Rhone* and *Wye* were entirely wrecked; the *Conway* and *Derwent*, and above 50 other vessels, driven ashore; about 1000 persons said to have perished 29 Oct. 1869

Much suffering was occasioned in Tortola; houses blown down or unroofed, &c. (a report reached London that the isle was submerged).

Earthquake at St. Thomas's and other isles; much damage; few lives lost Nov. "

Santa Cruz. A negro insurrection, in which M. Fontaine, a planter, was killed; Frederikstadt and 56 out of 50 sugar plantations were burnt, and about 3000 whites rendered homeless. During the suppression by col. Garde, the governor, about 200 negroes were killed 1-5 Oct. 1875

VIRGINIUS, American blockade-runner, see *Cuba*, 1873.

VIRGIN MARY. The Assumption of the Virgin is a festival in the Greek and Latin churches, in honour of the miraculous ascent of Mary into heaven, according to their belief, 15 Aug. A.D. 45. The Presentation of the Virgin is a feast celebrated 21 Nov., said to have been instituted among the Greeks in the 11th century; its institution in the West is ascribed to pope Gregory XI. 1372; see *Annunciation*, and *Conception*, *Immaculate*.

VIRTUE, LEAGUE OF, see *Tugendbund*.

VISCONTI, the name of a noble Italian family, which ruled in Milan from about 1277 to 1447; the heiress of the family was married to Francesco Sforza, who became duke 1450.

VISCOUNT (*Vice Comes*), anciently the name of the deputy of an earl. The first viscount in England created by patent was John, lord Beaumont, whom Henry VI. created viscount Beaumont, giving him precedence above all barons, 10 Feb. 1440. *Ashmole*. This title is of older date in Ireland and France. John Barry, lord Barry, was made viscount Buttevant, in Ireland, 9 Rich. II. 1385. *Beaton*.

VISIBLE SPEECH, a term applied by Mr. Alex. Melville Bell to his "Universal Self-Interpreting Physiological Alphabet," comprising thirty symbols representing the conformations of the mouth when uttering sounds. He stated that about fifty different types would be required to print all known languages with these symbols. He expounded his system to the Society of Arts, London, 14 March, 1866; and published a book in 1867.

VISIGOTHS, separated from the Ostrogoths about 330; see *Goths*. The emperor Valens, about 369, admitted them into the Roman territories upon the condition of their serving when wanted in the Roman armies; and Theodosius the Great permitted them to form distinct corps commanded by their own officers. In 400, under Alaric, they invaded Italy, and in 410 took Rome. They founded their kingdom of Toulouse, 414; conquered the Alani, and extended their rule into Spain, 414; expelled the Romans in 468; and finally were themselves conquered by the Saracens under Muza, in 711, when their last king, Roderic, was defeated and slain; see *Spain* for a list of the Visigothic kings. Their rule in France ended with their defeat by Clovis at Vouglé, in 507.

VISITATIONS, see *Heralds*.

VITAL FORCE, defined by Humboldt "as an unknown cause preventing the elements from obeying their primitive affinities." This theory is now opposed by many physiologists, and animal motion is attributed to muscular and nervous irritability, illustrated by the researches of Galvani, Humboldt, sir Charles Bell, Marshall Hall, and others. The subject has been much discussed recently by Huxley and other eminent physiologists.

VITI ISLES, see *Fiji*.

VITTORIA (N. Spain), the site of a victory obtained by Wellington over the French army commanded by Joseph Bonaparte, king of Spain, and marshal Jourdan, 21 June, 1813. The hostile armies were nearly equal, from 70,000 to 75,000 each. After a long and fearful battle, the French were driven, towards evening, through the town of Vittoria, and in their retreat were thrown into irretrievable confusion. The British loss was 22 officers and 479 men killed; 167 officers and 2640 men wounded. Marshal Jourdan lost 151 pieces of cannon, 451 waggons of ammunition, all his baggage, provisions, cattle, and treasure, with his bâton as a marshal of France. Continuing the pursuit on the 25th, Wellington took Jourdan's only remaining gun.

VIVARIUM, see *Aquavivarium*.

VIVISECTION. Physiological experiments upon living animals having much increased, the societies for the prevention of cruelty to animals in Dresden and Paris in 1859 requested the opinion of a committee of eminent scientific men on the merits of the knowledge thus acquired. Their judgment was not unanimous. The London society took up the question in 1860; and printed a pamphlet by Mr. G. Macilwain against vivisection. In Aug. 1862 an international conference to discuss the question was held at the Crystal Palace, Sydenham. The subject was discussed in 1866, and a prize awarded by the London society. Sir Charles Bell's opinion of vivisection was, that it either obscured the subject it was meant to illustrate, or misled men into practical errors of the most serious character. Discussion revived in consequence of the prosecution of Dr. Schiff in Florence, who justified vivisection when chloroform or any other anæsthetic is used.

Rival societies: 1. Society for the abolition of vivisection, 1875; 2. International Association for total suppression of vivisection.

Commission (viscount Cardwell, professor Huxley and others) to inquire into the practice, appointed 23 June, 1875; report signed, 8 Jan.; published, March, 1876; a bill to regulate vivisection (cruelty to animals act) brought into parliament; strongly opposed by the medical profession in general, June, July; passed, 15 Aug. 1876. Vivisectionists are to have a licence or certificate.

Resolution in favour of vivisection passed by the International Medical Congress, London 9 Aug. 1881. The prosecution of prof. Ferrier (who had experimented on the brains of monkeys under anæsthetics) and others failed.

Dr. Koch, of Berlin, demonstrates that tubercular disease can be propagated by organisms termed *bacilli*.

Mr. R. T. Redd's bill to prohibit vivisection, talked out.

Report for 1883: Great Britain, 44 licences; 535 experiments; Ireland, 8 licences; 34 experiments; anæsthetics employed when required.

441 experiments in Great Britain in 1884. Report for 1886 and 1887: Great Britain 64 licences. In 1888 55 licences and 1,069 experiments.

Instructed by Dr. Ferrier's vivisection experiments, Dr. Hughes Bennett localized in a man's brain a tumour, which was removed by Mr. Godlee 25 Nov. 1884.

VIZIANAGRAM, a town in Madras presidency, formerly a kingdom, among the last bulwarks against the Mahomedan invasion, and a refuge for Hindoo learning. The sovereigns date from the 14th century. See *Vedas*.

VIZIER, GRAND, an officer of the Ottoman Porte, said to have been first appointed by Amurath I., about 1386. The office was abolished in 1838; but since been frequently revived and suppressed.

VLADIMIR (central Russia), a city founded in the 12th century, and the capital of a grand duchy from 1157 to about 1328.

VOCALION, a new musical instrument in which tones are produced from strings made to vibrate by currents of air, the joint invention of Mr. James Baillie Hamilton and Mr. John Farmer assisted by Mr. Hermann Smith, described and illustrated by Mr. Hamilton at the Royal Institution, 21 May, 1875, and tried successfully at Harrow, 23 March, 1882, and soon after at Westminster Abbey; and at other places.

VOIRON, see *Vesuvius*.

VOLAPÜK (from 'world' and 'speak'), universal commercial language invented by M. Schleyer, who taught it in Paris in Feb. 1886. The Philological Society of London advocated its use in diplomacy and science, in 1887. The roots chiefly borrowed from Rumanian, Germanic, and especially English languages shortened. There is a Volapük Academy at Munich, and about 500,000 people are using or learning it.

Mr. C. E. Sprague's handbook of Volapük published Jan. 1888. Volapük reported successful and spreading in Europe and America. Mr. P. Hoinix publishes his "Anglo France" in opposition to Volapük March, 1889.

VOLCANOES. In different parts of the earth there are above 200 volcanoes which have been active in modern times; see *Etna*, *Vesuvius*, *New Zealand*, *Owhyhee*, and *Iceland*. In Mexico, a plain was filled up into a mountain more than a thousand feet in height by the burning lava from a volcano, in 1759. A volcano in the isle of Ferro broke out

13 Sept. 1777, which threw out an immense quantity of red water, that discoloured the sea for several leagues. A new volcano appeared in one of the Azore islands, 1 May, 1808.

VOLHYNIA, a Polish province, annexed to Russia 1793.

VOLSCI, an ancient Latin people, frequently at war with the Romans. From their capital, Corioli, Caius Marius (who defeated them about 490 B.C.) derived his name Coriolanus. The story of his banishment by his ungrateful countrymen; of his revenge on them by bringing the Volsci to the gates of Rome, yet afterwards sparing the city at the entreaties of his mother, Volumnia (487 B.C.), is considered by many as a poetical legend. The Volsci and their allies were totally defeated at Sutrium by the consul Valerius Corvus (346), and incorporated with the Roman people about 338.

VOLSINII, the inhabitants of an Etrurian city, who, after a sharp contest, were completely overcome by the Roman consul Titus Coruncanius, 280 B.C.

VOLTAIC PILE or BATTERY, was constructed by Galvani; see *Galvanism* in article *Electricity*. The principle was discovered by Alessandro Volta, of Como (born 1745), for thirty years professor of natural philosophy at Pavia, and announced by him to the Royal Society of London in 1793. The battery was first set up in 1800. Volta was made an Italian count and senator by Napoleon Bonaparte, and was otherwise greatly honoured. While young he invented the electrophorus, electric pistol, and hydrogen lamp. He died in 1826, aged 81. The form of the Voltaic battery has been greatly improved by the researches of modern philosophers. The nitric acid battery of sir W. R. Grove was constructed in 1839; Alfred Smee's battery in 1840; the carbon battery of professor Robert Bunsen in 1842. The first is very much used in this country; that of Bunsen on the continent, see *Copper-Zinc Couple*.

VOLTURNO, a river in S. Italy, near Capua, near to which Garibaldi and his followers held a strong position. This was furiously assailed by the royal troops on 1 Oct. 1860, who were finally repulsed after a desperate struggle, the fiercest in which Garibaldi had yet been engaged. He was aided greatly by a band of Piedmontese from Naples. On 2 Oct. general Bixio completed the victory by capturing 2500 fresh Neapolitan troops and dispersing others.

VOLUNTARY CONTRIBUTIONS. Public contributions for the support of the British government against the policy and designs of France amounted to two millions and a half sterling in 1798. About 200,000*l.* were transmitted to England from India in 1799. Sir Robert Peel, of Bury, among other contributions of equal amount, subscribed 10,000*l.* *Annual Register*; see *Patristic Fund*. In 1862 nearly a million pounds were subscribed in the British empire for the relief of the Lancashire cotton spinners; see *Cotton and Mansion House*, where voluntary contributions for beneficent purposes are continually received.

VOLUNTEERS were enrolled in England for the American war, 1778, and especially in consequence of the threatened invasion of revolutionary France, 1793-4. Besides our large army, and 85,000 men voted for the sea, we subsidised 40,000 Germans, raised our militia to 100,000 men, and armed the citizens as volunteers; the yeomanry formed cavalry regiments. Between 1798 and 1804,

when this force was of greatest amount, it numbered 410,000, of which 70,000 were Irish; * Yeomanry in 1884, 11,400. On 26 Oct. 1803, king George III. reviewed in Hyde Park 12,401 London volunteers, and on 28 Oct. 14,676 more. The English volunteers were, according to official accounts, 241,600 on 1 Jan. 1804; see *Naval Volunteers*. In May, 1859, in consequence of the prevalence of the fear of a French invasion, the formation of volunteer corps of riflemen commenced under the auspices of the government, and by the end of the year many thousands were enrolled in all parts of the kingdom. The volunteers were said to be "a force potentially the strongest defence of England." 19 April, 1870; see *Artillery Association*, and *Naval Artillery Volunteer Force*.

YEOMANRY were enrolled by lord Chatham in 1761.

The present 49 regiments of cavalry (about 300 each), cost 80,000*l.* 1870

[The first Middlesex volunteers were formed in 1803 as the duke of Cumberland's sharpshooters. They retained their organisation as a rifle club, when other volunteers were disbanded. In 1835 they were permitted by the duchess of Kent to take the name of the Royal Victoria Rifle Club.]

* The first regiment of Irish volunteers was formed at Dublin, under command of the duke of Leinster, 12 Oct. 1779. They armed generally to the amount of 20,000 men, and received the unanimous thanks of the houses of lords and commons in Ireland, for their patriotism and spirit, for coming forward and defending their country. At the period when the force appeared, Irish affairs bore a serious aspect: manufactures had decreased, and foreign trade had been hurt by a prohibition of the export of salted provisions and butter. No notice of the complaints of the people had been taken in the English parliament, when, owing to the alarm of an invasion, ministers allowed the nation to arm, and an immense force was soon raised. The Irish took this occasion to demand a free trade, and government saw there was no trifling with a country with arms in its hands. The Irish parliament unanimously addressed the king for a free trade, and it was granted, 1779.

VOUGLÉ or VOULLÉ, S.W. France (near Poitiers), where Alaric II., king of the Visigoths was defeated and slain by Clovis, king of France, 507, who subdued the whole country from the Loire to the Pyrenees. A peace followed between the Franks and Visigoths, who had been settled about one hundred years in that part of Gaul called Septimania. Clovis soon afterwards made Paris his capital.

VOYAGES. By order of Pharaoh-Necho, of Egypt, some Phœnician pilots sailed from Egypt down the Arabian Gulf, round what is now called the Cape of Good Hope, entered the Mediterranean by the Straits of Gibraltar, coasted along the north of Africa, and at length arrived in Egypt, after a navigation of about three years, 604 B.C. *Herodotus*. The first voyage round the world was made by a ship, part of a Spanish squadron which had been under the command of Magellan (who was killed at the Philippine Islands in a skirmish) in 1519-20; see *Circumnavigators*, and *North-West Passage*.

VOYSEY ESTABLISHMENT FUND. The Rev. Charles Voysey having been deprived of his rectory (see *Church of England*, 1871), began a series of services at St. George's hall, Langham-place, 10-11, 1871. The fund for their maintenance was supported by Bp. Hinds of Norwich (retired), Sir John Bennet, and other eminent liberals. He termed his congregation a "Theistic Church."

VULCAN, see *Planets*. The Greek god Hephaestus answered to the Roman Vulcan.

VULCANITE (vulcanised india-rubber), also termed *Ebonite*.

VULGATE (from *vulgatus*, published), a term applied to the Latin version of the Scriptures which is authorised by the council of Trent (1546), and which is attributed to St. Jerome, about 344. The older version, called the *Italic*, is said to have been made in the beginning of the 2nd century. A critical edition was printed by order of pope Sixtus V. in 1590, which, being considered inaccurate, was superseded by the edition of pope Clement V. in 1592. The earliest printed vulgate is without date, by Gutenberg and Fust, probably about 1455, the first dated (Fust and Schœffer) is 1462.

WAGES IN ENGLAND. The wages of sundry workmen were first fixed by act of parliament 25 Edw. III. 1350. Haymakers had but one penny a day. Master carpenters, masons, tilers, and other coverers of houses, had not more than 3d. per day (about 9d. of our money); and their servants, 14d. *Viner's Statutes*.

By the 23 Henry VI. the wages of a balliff of husbandry was 23s. 4d. per annum, and clothing of the price of 5s. with meat and drink; chief hind, carter, or shepherd, 20s., clothing, 4s.; common servant of husbandry, 15s., clothing, 40d.; woman-servant, 10s., clothing, 4s. 1444

By the 11 Henry VII., a like rate of wages with a little advance: as, for instance, a free mason, master carpenter, rough mason, bricklayer, master tiler, plumber, glazier, carver or joiner, was allowed from Easter to Michaelmas to take 6d. a

WAGHORN'S NEW OVERLAND ROUTE TO INDIA. Lieut. Waghorn devoted a large portion of his life to connect India with England. On 31 Oct. 1845, he arrived in London, by a new route, with the Bombay mail of the 1st of that month. His despatches reached Suez on the 19th, and Alexandria on the 20th, whence he proceeded by steamboat to a place twelve miles nearer London than Trieste. He hurried through Austria, Baden, Bavaria, Prussia, and Belgium, and reached London at half-past four on the morning of the first-mentioned day. The authorities of the different countries through which he passed eagerly facilitated his movements. The ordinary express, *via* Marseilles, reached London 2 Nov. following. Mr. Waghorn subsequently addressed a letter to the *Times* newspaper, in which he stated that in a couple of years he would bring the Bombay mail to London in 21 days. He died 8 Jan. 1850. On 3 Feb. 1884, at a meeting at the Mansion-house,

In 1866 the annual amount of wages paid in the United Kingdom was estimated by Mr. Gladstone at 250,000,000l.; by Mr. Bass at 350,000,000l.; and by professor Leone Levi at 418,300,000l., earned by 10,697,000 workers, ages 20 to 60.

In 1872-3 many trades struck for increase of wages, and frequently were successful; in 1877-9, unsuccessful.

In 1878 professor Levi estimated that 503,000,000l. were earned (by men, 390,000,000l.; by women, 113,000,000l.); after deducting for holidays, &c., 422,700,000l.

He says, that "In no other country are wages more liberal, but in no other country are they more wastefully used." See *Strikes*.

London, it was determined to erect a national monument to his memory.

The Overland Mail, which had left Bombay on 1 Dec. 1845, arrived early on the 30th in London, by way of Marseilles and Paris. The speedy arrival was owing to the great exertions made by the French government to show that the route through France was shorter and better.

WAGNERISM, see under *Music*.

WAGRAM, a village near Vienna, where Napoleon I. totally defeated the archduke Charles, 5, 6 July, 1809. The slaughter on both sides was dreadful; 20,000 Austrians were taken by the French, and the defeated army retired to Moravia. An armistice was signed on the 12th; and on 24 Oct., by a treaty of peace, Austria ceded all her sea-coast to France; the kingdoms of Saxony and Bavaria were enlarged at her expense; part of Poland in Galicia was ceded to Russia; and Joseph Bonaparte was recognised as king of Spain.

WAHABEES OR **WAHABITES**, a warlike Mahometan reforming sect, considering themselves the only true followers of the prophet, established themselves in Arabia about 1750, under the rule of Abd-el-Wahab, who died 1787. His grandson, Saoud, in 1801, defeated an expedition headed by the caliph of Bagdad. In 1803 this sect seized

Mecca and Medina, and continued their conquests, although their chief was assassinated in the midst of his victories. His son, Abdallah, long resisted Mahommed Ali, pacha of Egypt, but in 1818 was defeated and taken prisoner by Ibrahim Pacha, who sent him to Constantinople, where he was put to death. The sect, now flourishing, is well described by Mr. W. Gifford Palgrave, in his "Journey and Residence in Arabia in 1862-3," published in 1865. It is influential in India, and is suspected of a tendency to insurrection.

WAHLSTATT, see *Katzbach*.

WAITS, the night minstrels who perform shortly before Christmas. The name was given to the musicians attached to the king's court. We find that a company of waits was established at Exeter in 1400 to "pipe the watch." The waits in London and Westminster were long officially recognised by the corporation.

WAKEFIELD (W. Yorkshire), an ancient town. Near it a battle was fought between the adherents of Margaret, the queen of Henry VI., and the duke of York, in which the latter was slain, and 3000 Yorkists fell upon the field, 31 Dec. 1460. The earl of Warwick supported the cause of the duke's son, the earl of March, afterwards Edward IV., and the civil war was continued. An art and industrial exhibition was opened at Wakefield, 30 Aug. 1865. The Bishopton act, authorising the establishment of a see at Wakefield, was passed 16 Aug. 1878. The required funds subscribed Jan. 1888.

Bishopton founded by the queen, 17 May, 1888; the Rev. W. W. How (suffragan bishop of Bedford) appointed first bishop Feb. 1888

WAKES, the ancient parish festivals on the saint's day to commemorate the dedication of the church; regulated in 1536, but gradually became obsolete.

WALBROOK CHURCH (London), a masterpiece of sir Christopher Wren, completed in 1679. There was a church here in 1135, and a new church was erected in 1429.

WALCHEREN (an island at the mouth of the Scheldt, Holland). The unfortunate expedition of the British to this isle in 1809 consisted of 35 ships of the line, and 200 smaller vessels, principally transports, and 40,000 land forces, the latter under the command of the earl of Chatham, and the fleet under sir Richard Strachan. For a long time the destination of the expedition remained secret; but before 28 July, 1809, when it set sail, the French journals had announced that Walcheren was the point of attack. Flushing was invested in August; a dreadful bombardment followed, and the place was taken 15 Aug.; but no suggestion on the part of the naval commander, nor urging on the part of the officers, could induce the earl to vigorous action, until the period of probable success was gone, and necessity obliged him to return with as many of the troops as disease and an unhealthy climate had spared. The place was evacuated, 23 Dec. 1809. The house of commons instituted an inquiry, and lord Chatham resigned his post of master-general of the ordnance, to prevent greater disgrace; but the policy of ministers in planning the expedition was, nevertheless, approved. The following epigram, of which various readings exist, appeared at the time:—

"Lord Chatham [or the warrior earl] with [his] sabre drawn,

Stood waiting for sir Richard Strachan;

Sir Richard, longing [or eager] to be at 'em,

Stood waiting for the earl of Chatham."

WALDECK and PYRMONT, united German principalities, established in 1682. The late reigning family claim descent from the Saxon bar. Witikind, who flourished about 772. Prince George Victor, born 14 Jan. 1831, succeeded his father, George, 15 May, 1845. Heir: Frederic, son, b. 20 Jan. 1865. On 22 Oct. 1867, the states approved a treaty of annexation, and the administration was transferred to Prussia, 1 Jan. 1868.

WALDENSES (also called Valdenses, Vallenses, and Vaudois), a sect inhabiting the Cottian Alps, derives its name, according to some authors, from Peter de Waldo, of Lyons (1170). They had a translation of the Bible. The Waldenses settled in the valleys of Piedmont about 1375, but were frequently dreadfully persecuted, especially in the 17th century, when Charles I. of England interdicted them (1627-9) and Oliver Cromwell by threats (1655-6) obtained them some degree of toleration. All the Waldensian Barbes or pastors, save two, died in the great plague of 1630. Gilles and Gruent went to Geneva and Lausanne for Swiss Calvinist ministers to fill the vacancies. The new ministers were no sooner inducted than they deposed the surviving Barbes and abolished all the distinctive teaching and usages of the community, substituting the Genevese model. They were permitted to have a church at Turin, Dec. 1853. In March, 1868, it was stated that there were in Italy 28 ordained Waldensian ministers, and 30 other teachers.

WALES, Cambria, Cymru, the land of the Cymry, called by the Romans *Britannia Secunda*. Welsh and Wales are corruptions of Teutonic epithets applied to foreigners, especially Gauls. After the Roman emperor Honorius gave up Britain, Vortigern was elected king of South Britain. He invited over the Saxons to defend his country against the Picts and Scots; but the Saxons perfidiously sent for reinforcements, consisting of Saxons, Danes, and Angles, by which they made themselves masters of South Britain. Many of the Britons retired to Wales, and defended themselves against the Saxons, in their inaccessible mountains, about 447. In this state Wales remained unconquered till Henry II. subdued South Wales in 1155; and in 1282 Edward I. entirely reduced the whole country, an end being put to its independence by the death of Llewelyn, the last prince. In 1284 the queen gave birth to a son at Caernarvon, whom Edward styled prince of Wales, now title of the heir to the crown of Great Britain. Wales was united and incorporated with England by act of parliament, 1536; see *Britain and Bards*.

The ancient laws were to be preserved in civil causes; but the law of inheritance was to be changed, and the English criminal law to be put in force. *Annals of England*.

 "Life given by God;" the third was left blank. The

 princess of Wales in her own right; a rank she enjoyed
 until the birth of a son to Henry, who was afterwards
 Edward VI., born in 1537. This is denied by Parke.

WAR, called by Erasmus "the malady of princes." Osymandias of Egypt, the first warlike king, passed into Asia, and conquered Bactria, 2100 B.C. *Usher*. He is supposed by some to be the Osiris of the priests. It is computed that, up to the present time, no less than 6,860,000,000 of men have perished on the field of battle; see *Battle: Secretaries; Neutral Powers*. An international conference on "usages of war" began at Brussels, 27 July, 1874, and closed without important results. See *Brussels Conference*. In 1880, about 4,000,000 men in arms, annual cost, 500,000,000*l*.

War Office act, passed 20 June, 1870, appoints a financial secretary (who may sit in parliament) and other officers. An act for the protection of war department stores was passed in 1867. * Near Welwyn, in Hertfordshire, there was the largest walnut-tree on record; it was felled in 1627, and from it were cut nineteen loads of planks; and as much was sold to a gunsmith in London as cost 2*l*. carriage; besides which there were thirty loads of roots and branches. When standing it covered 76 poles of ground; its space equal to 2599 square yards, statute measure.

WAR, GAME OF (German, *Kriegspiel*), based on the game of chess, was described in a pamphlet in 1780, and rules for it laid down by Dominenath von Reisswitz about 1820, and published by his son in 1824-8. Capt. (now sir) Evelyn Baring published a translation of works on the subject in 1872. A society (including von Moltke) was formed at Magdeburg to study it. Prince Arthur (now duke of Connaught) lectured on this game at Dover, 13 March, 1872.

WARBECK'S INSURRECTION. Perkin Warbeck, the son of a Florentine Jew, to whom Edward IV. had stood godfather, was persuaded by Margaret, duchess of Burgundy, sister to Richard III., to personate her nephew Richard, Edward V.'s brother, which he did first in Ireland, where he landed, 1492. The imposture was discovered by Henry VII. 1493. Some writers consider that Warbeck was not an impostor.

Warbeck attempted to land in Kent, with 600 men, 169 were taken prisoners, and executed, July, 1495. Recommended by the king of France to James IV. of Scotland, who gave him his kinswoman, lord Huntley's daughter, in marriage, when he assumed the title of Richard IV. James IV. invaded England in his favour, 1496.

Left Scotland, and went to Bodmin, in Cornwall, where 3000 joined him, Sept. 1497.

On the approach of Henry took sanctuary at Beaulieu; surrendered; taken to London, Oct. 1497.

Said to have been set in the stocks at Westminster and Cheapside, and sent to the Tower, June, 1499. Accused of plotting with the earl of Warwick to escape out of the Tower, by murdering the lieutenant, Aug.; the plot failed, and he was hanged at Tyburn, 23 Nov.; the earl beheaded, 28 Nov. 1499.

WARBURG (N. Germany). Here the French were defeated by the duke of Brunswick and the allies, 31 July, 1760.

WARDIAN CASES. In 1829, Mr. N. B. Ward, from observing a small fern and grass growing in a closed glass bottle, in which he had placed a chrysalis covered with moist earth, was led to construct his well-known *closely glazed cases*, which afford to plants light, heat, and moisture, and exclude deleterious gases, smoke, &c. They are particularly adapted for ferns. In 1833 they were first employed for the transmission of plants to Sydney, &c., with great success, and professor Faraday lectured on the subject in 1838.

WARDMOTES, meetings of the citizens of London in their wards, where they elect annually their common councilmen. The practice is said to have begun in 1386. They had previously assembled in Guildhall.

WASHING MACHINES. Several have been invented by Americans. At an hotel in New York hundreds of garments are washed in a few minutes by steam, and dried by a centrifugal machine (1862). The ingenious machines of Messrs. Hornaby, of Norwich, appeared in the great exhibition of London, 1862.

WATERFORD (S. Ireland), built about 879, was totally destroyed by fire in 981. Rebuilt and considerably enlarged by Strongbow in 1171, and still under in the reign of Henry VII., who granted considerable privileges to the citizens. Richard II. landed and was crowned here in 1399; in 1690, James II. embarked from hence for France, after the battle of the Boyne; and William III. resided here twice, and confirmed its privileges. Memorable storm here, 18 April, 1792. The cathedral of Waterford, dedicated to the blessed Trinity, was first built by the Ostmen, and by Malchus, the first bishop of Waterford, after his return from England from his consecration, 1096. This see was united with that of Lismore in 1363. It was valued in the king's books, by an extent returned 29 Henry VIII., at 72*l.* 8*s.* 1*d.* Irish per annum. By stat. & 4 Will. IV., c. 37 (the Irish Church Temporalities act), the see of Waterford and Lismore was united with the see of Cashel and Emly, 14 Aug. 1833. The interior of the cathedral, organ, &c., were destroyed by fire, 25 Oct. 1815.

WATER-GLASS, a name given to a liquid mixture of sand (silice) and one of the alkalies (potash or soda). Glauber (*De Lithiase*) mentions a similar mixture in 1644. Dr. Von Fuchs, the modern inventor, gave an account of his process in 1825; and Mr. Frederick Ransome, of Ipswich, ignorant of Von Fuchs's discovery, patented a mode of preparing water-glass in 1845, which he has since greatly improved upon. In 1857, M. Kuhlmann, of Lille, published a pamphlet setting forth the advantageous employment of water-glass in hardening porous stone and in stereochromy (*which see*). It has been applied to the exterior of many buildings in France and England. The memoirs of Von Fuchs and Kuhlmann were translated and printed in England, in 1859, by direction of the prince consort.

WATERING STREETS. Mr. Cooper's plan or using solutions of chloride of lime or of sodium which dry slowly and attract moisture and ammonia and other gases, and combine them with the material of the road) was partially used in the parish of St. Mary-le-bone in 1868, and also in Liverpool, Boston, and other towns. The plan was ordered to be tried in Westminster in July, 1870.

WATERLOO, in Belgium, the site of the great battle, on Sunday, 18 June, 1815, between the French army, of 71,947 men and 246 guns, under Napoleon, and the allies, commanded by the duke of Wellington; the latter, with 67,661 men and 56 guns, resisted the various attacks of the enemy from about ten in the morning until five in the afternoon. About that time, 16,000 Prussians reached the field of battle; and by seven, the force under Blücher amounted to above 50,000 men, with 104 guns. Wellington then moved forward his whole army. A total rout ensued, and the carnage was immense. Of the British (23,991), 93 officers and 1916 men were killed and missing, and 363 officers and 4560 men wounded—total, 6932; and he total loss of the allied army amounted to 4206 killed, 14,539 wounded, and 4231 missing, making 22,976 *hors de combat*. Napoleon, quitting the wreck of his army, returned to Paris; and, finding it impossible to raise another, abdicated. *P. Nicolas.*

Napoleon attributed his defeat to the failures of marshal Grouchy, Wellington said unjustly.

Proposed monument over the British officers and men who died of their wounds, 7 Jan. 1888.

By the side of the chapel of Waterloo, which was uninjured by shot or shell on 18 June, 1815, Marlborough cut off a large division of the French forces, 17 Aug. 1795. The conquerors on the same field are the only British commanders whose career brought them to dukedoms.

WATERLOO BRIDGE, LONDON. A bridge over this part of the Thames was repeatedly suggested during the last century, but no actual preparations to carry it into effect were made till 1806, when Mr. G. Dodd procured an act of parliament, and gave the present site, plan, and dimensions of the bridge; but, in consequence of some disagreement with the committee, he was superseded by Mr. John Rennie, who completed this noble structure. It was commenced 11 Oct. 1811, and opened 18 June, 1817, on the anniversary of the battle of Waterloo, when the prince regent, the duke of Wellington, and other distinguished personages, were present. Its length within the abutments is 1242 feet; its width within the balustrades is 42 feet; and the span of each arch, of which there are nine, is 120 feet. Bought for 475,000*l.* by metropolitan board of works; opened toll free, 5 Oct. 1878; lit by electric light from 10 Oct. 1879.

On Oct. 9, 1857, two youths, named Kilsby, found on one of the abutments of the bridge a carpet bag, containing human bones and flesh, which had been cut up, salted, and boiled, and some foreign clothes. No clue could be found respecting these remains, which were interred in Woking cemetery.

WATERLOO CUP, *see Dogs.*

WATER-MILLS, used for grinding corn, are said to have been invented by Belisarius, the general of Justinian, while besieged in Rome by the Goths, 555. The ancients parched their corn, and pounded it in mortars. Afterwards mills were invented, which were turned by men and beasts with great labour; yet Pliny mentions wheels turned by water. *See Telo-dynamic transmitter.*

WATERSPOUT. Two waterspouts fell on the Glatz mountains in Germany, and caused dreadful devastation to Hautenbach and many other villages; many persons perished, 13 July, 1827. A waterspout at Glanlesk, near Killarney, in Ireland, passed over a farm of Mr. John Macarthy, destroying farm-houses and other buildings; seventeen persons perished, 4 Aug. 1831. The estimated length of one seen near Calcutta, 27 Sept. 1855, was 1000 feet. It lasted ten minutes, and was absorbed upwards. One seen on 24 Sept. 1856, burst into heavy rain. The town of Miskolcz, Hungary, destroyed by a waterspout; great loss of life and property, 30 Aug. 1878. 61 persons said to have been killed by a waterspout in Algeria, Oct. 1881. A waterspout at Arequipa, Peru, caused immense damage, several persons drowned, 14 Feb.; one at Pachuca, Mexico, 30 deaths, 27 Sept. 1884; another near Lagos, very destructive, 6 or 7 June, 1885. Destructive waterspout at Swansea 4 Sept. 1886; another on Batcombe hills, Dorsetshire, greatly damaged the villages of Chatnoles, Cerne, and Mintern, 7 June, 1889.

WAVE PRINCIPLE (in accordance with which the curves of the hull of a ship should be adapted to the curves of a wave of the sea) formed the subject of experiments begun by Mr. John Scott Russell in 1832, with the view of increasing the speed of ships. Colonel Beaufoy is said to have spent 30,000*l.* in researches upon this matter. It was also taken up by the British Association, who have published reports of the investigations. The principle has been adopted by naval architects; see *Undulatory Theory*, and *Yacht*.

WAVERLEY NOVELS. The publication of the series began with "Waverley; or, 'Tis Sixty Years since," in 1814, and closed with "Tales of my Landlord," fourth series, in 1831. The authorship was acknowledged by Sir Walter Scott, at a dinner, 23 Feb. 1827. The original MSS. of several of Scott's poems and novels were sold by auction by Christie and Manson for 1255 guineas, 6 July, 1867.

WAWZ or WAWER (Poland). The Poles under Skrzyniecki attacked the Russians at Wawz, and after two days' hard fighting, all the Russian positions were carried by storm, and they retreated with the loss of 12,000 men and 2000 prisoners, 31 March, 1831. The loss of the Poles was small, but their triumph was soon followed by defeat and ruin.

WAX came into use for candles in the 12th century; and wax candles were esteemed a luxury in 1300, being but little used. In China, candles of vegetable wax have been in use for centuries; see *Candleberry*. The wax tree, *Ligustrum lucidum*, was brought from China before 1794.—**SEALING-WAX** was not brought into use in England until about 1556. Its use has been much superseded by the introduction of adhesive envelopes, about 1844.

WAXWORK.—Exhibition of models in wax were popular in the 17th and 18th centuries. The collection of wax figures exhibited by Mrs. Salmon at Aldgate, early in the last century, were removed to Fleet-street and shown there till 1812, when they were sold, it is said, for 50*l.* Madame Tussaud, a skillful modeller, exhibited her remarkable collection of models and casts of eminent persons with costumes and other interesting relics in the boulevard du Temple, Paris, 1785. In 1802 she exhibited her collection at the Lyceum, Strand, London, and afterwards at other places. The interest of the exhibition has been energetically sustained for many years at Baker-street, London, W., and latterly at Marylebone-road, by Madame Tussaud and her family; she died 15 April, 1850, aged 90. Early in 1889 the collection was purchased by a company, Mr. John Tussaud being engaged as manager.

WE. Sovereigns generally use *we* for *I*, which style began with King John, 1199. *Coke*. The German emperors and French kings used the plural about 1200.

WEALD of Kent and Sussex, the site of very large, ancient forests; St. Leonard's still remaining; near which, in the Wealden formation, Dr. G. A. Mantell discovered the remains of huge extinct animals, 1825 *et seq.* Mr. R. Furley published an exhaustive "History of the Weald of Kent," 1871-4.

WEATHER, see *Meteorology*.

WEAVING appears to have been practised in China more than a thousand years before it was known in Europe or Asia. The Egyptians ascribed the art to Isis; the Greeks to Minerva; and the Peruvians to the wife of Manco Capac. Our Saviour's vest, or coat, had not any seam, being woven from the top throughout, in one whole piece.

The print of a frame for weaving such a vest may be seen in *Calmet's Dictionary*, under the word *Vestments*. Two weavers from Brabant settled at York, where they manufactured woollens, which, says King Edward, "may prove of great benefit to us and our subjects" (1331). Flemish dyers, cloth drapers, linen-makers, silk-throwsters, &c., settled at Canterbury, Norwich, Colchester, Southampton, and other places, on account of the duke of Alva's persecution, 1567; see *Loom*, and *Electric Loom*.

WEDDINGS. Silver weddings are celebrated after a union of 25 years; golden weddings after a union of 50 years; and diamond weddings after a union of 60 years, some apply it to 75 years. John, king of Saxony, celebrated his golden wedding, 10 Nov. 1872.

WEDDING-RINGS were used by the ancients, and put upon the wedding finger, from a supposed connection with a vein there with the heart. According to Pliny they were made of iron; in the time of Tertullian of gold. Wedding-rings are to be of standard gold, by statute, 1855; see *Adriatic*.

WEDGE-LIKE CHARACTERS, see *Cuneiform*.

WEDGWOOD WARE, pottery and porcelain produced by Mr. Josiah Wedgwood, of Staffordshire, in 1762. His potteries, termed *Etruria*, were founded in 1771. Previously to 1763, much earthenware was imported from France and Holland.

WEEDON INQUIRY (Northamptonshire). Commissioners were appointed to inquire into the accounts of Mr. Elliot, superintendent of the great military clothing establishment at this place, in July, 1858, and commenced sitting in September. Many of the statements were afterwards disputed, and caused much dissatisfaction.

WEEK, the space of seven days, supposed to be first used among the Jews, who observed the sabbath every seventh day. They had three sorts of weeks—the common one of seven days; the second of years, seven years; the third of seven times seven years, at the end of which was the jubilee. WEIGHTS AND MEASURES. These and the stamping of gold and silver money, are attributed to Pheidon, tyrant of Argos, 895 *a.c.*; see *Ara-*

delian Marbles. Weights were originally taken from grains of wheat, the lowest being still called a grain. *Chalmers.* See *Critch.*

Much information is given by Mr. H. W. Chisholm in his work "On the Science of Weighing and Measuring," 1877.

The Jews ascribed weights and measures to Cain; the Egyptians to Theuth, or Thoth; the Greeks, to Hermes (the Roman Mercury).

The basis of ancient measures was the natural proportions of the human body; the digit, or breadth of the middle part of the first joint of the fore finger, being the lowest unit of the scale.

The Egyptian cubit (six palms), under the Pharaohs, was about 18.24 English inches; the cubit of Ptolemy about 21.87 inches; he determined the length of a stadium, and of a degree.

The sacred cubit of the Jews (Newton), 24.7 inches. Assyrian weights are described by Mr. Layard in his "Nineveh."

The standard measure was originally kept at Winchester by the law of king Edgar.

Standards of weights and measures were provided for the whole kingdom of England by the sheriffs of London, 9 Rich. I.

A public weighing-machine was set up in London, and all commodities ordered to be weighed by the city-officer, called the weigh-master, who was to do justice between buyer and seller, stat. 3 Edw. II. (*Sime*)

WELLS were dug by Abraham, 1802 B.C., and Isaac, 1804 (*Gen.* xxi. 30, and xxvi. 19). Danaus is said to have introduced well-digging into Greece from Egypt. Norton's "tube-well," patented Oct. 1867, is said to be the invention of Hiram J. Messenger, Stephen Brewer, and Byron Mudge, Americans of the state of New York. The apparatus consists of an iron tube perforated with holes at the lower end, and shod with a steel point, which readily enters the hardest soil when forcibly driven. It was used with great advantage during the civil war 1861-4; by the British in their campaign in Abyssinia in 1867-8; and by the Russians in Khiva, 1873.

WESLEYAN METHODISTS, a sect founded by John Wesley (born 1703, died 1791) and his brother Charles, who in 1727 with a few other students formed themselves into a small society for the purpose of mutual edification by religious exercises. From their strictness of life they were called *Methodists*, in 1729. John Wesley went to Georgia in America, in 1735, with a view of converting the Indians. On his return to England, in 1738, he commenced itinerant preaching, and gathered many followers. On finding many churches shut against him, he built spacious meeting-houses in London, Bristol, and other places. The Wesleyan Methodist society, as such, began in 1739. For some time he was united with George Whitefield; but differing with him respecting the doctrine of election, they separated in 1741; see *Whitefield*. Wesley was almost continually engaged in travelling through the United Kingdom. His two leading doctrines were the instantaneousness of conversion, and Christian perfection, or deliverance from all sin. His society was well organised, and he preserved his influence over it to the last. "His genius for government was not inferior to that of Richelieu." *Macaulay*. The deed of declaration, establishing the conference, is dated 28 Feb. 1784. In 1851 there were 428 circuits in Great Britain, with between 13,000 and 14,000 local or lay preachers, and about 920 itinerant preachers, and 6579 chapels.

The Conference, the highest Wesleyan court, till lately, composed of 100 ministers, who meet annually. It was instituted by John Wesley in 1734. At the centenary of the existence of Methodism 216,000*l*. were collected, to be expended on the objects of the society 1859

WESTERN AUSTRALIA, formerly SWAN

RIVER SETTLEMENT, which was projected by colonel Peel in 1828. Regulations issued from the colonial office, and Captain Stirling, appointed Lieutenant-governor, Jan. 17, 1829, arrived at the appointed site in August following. The three towns of Perth, Freemantle, and Guildford were founded same year. In March, 1830, fifty ships, with 2000 emigrants, with property amounting to 1,000,000^l, had arrived before hardly any dwellings had been erected or land surveyed. The more energetic settlers left for home, or the neighbouring colonies, and the colony languished for twenty years for want of suitable inhabitants—the first settlers, from their previous habits and rank in life, proving unfit for the rough work of colonisation. In 1848, the colonists requested that convicts might be sent out to them, and in 1849 a band arrived, who were kindly received and well treated. The best results ensued. By 1853, 2000 had arrived, and the inhabitants of Perth had requested that 1000 should be sent out annually. The reception of convicts is to cease in after-years, in consequence of the energetic opposition of the other Australian colonies (1865).—The settlement of King George's Sound was founded in 1826 by the government of New South Wales. It was used as a military station for four years. In 1830, the home government ordered the settlement to be transferred to Swan River. Since the establishment of steam communication, the little town of Albany here, employed as a coal- ing station, has become a thriving sea-port. It possesses an excellent harbour, used by whalers. A

WESTERN CHURCH (called also the LATIN or ROMAN) broke off communion with the Greek or Eastern Church, 653; see *Greek Church*. Its history is mainly comprised in that of the popes and of the European kingdoms; see *Popes*. This church was disturbed by the Arian heresy about 345 and 500; by Pelagianism, about 409; by the introduction of image-worship about 600; by the injunction of the celibacy of the clergy and the rise of the monastic orders about 649; by the contests between the emperors and the popes respecting ecclesiastical investitures between 1073 and 1173; by the rise and progress of the Reformation in the 15th and 16th centuries; by the contests between the Jesuits and Jansenists in the 17th and 18th centuries; and by the progress of modern philosophy and rationalism, and by ultramontaniam, in the 19th; see *Roman Catholics*.

WESTMINSTER, so called on account of its western situation with regard to St. Paul's cathedral, or from there being formerly a monastery named East Minster, on the hill now called Great Tower-hill. This city joins London at Temple-bar. Formerly Westminster was called Thorney, or Thorney Island: and in ancient times Canute had a palace here, burnt in 1263. Westminster and London were one mile asunder in 1603, when the houses were thatched, and there were mud walls in the Strand. It is said that the great number of Scotsmen who came over after the accession of James I. occasioned the building of Westminster, and united it with London. *Hovel's Londonopolis*; see *Parliament*, 1834-52, 1884. WESTMINSTER BISHOPRIC AND DEANERY. At the dissolution of monasteries Westminster abbey was valued at 3977*l.* per annum: king Henry VIII. in 1539 erected it into a deanery; and in 1540 into a bishopric, and appointed Thomas Thirlby prelate. He was translated to Norwich in 1550, and with him ended the bishopric of Westminster; Middlesex, his diocese, being restored to London. The dean presided until the accession of Mary, who restored the abbot. Elizabeth displaced the abbot, and erected the abbey into a collegiate church of a dean and twelve prebendaries, as it still continues. On the revival of the order of the Bath, in 1725, the dean of Westminster was appointed dean of that order, which honour has been continued. Dr. Nicholas Wiseman was created *archbishop of Westminster* by the pope Pius IX. 30 Sept. 1850; see *Papal Aggression*. Dr. Wiseman died 18 Feb. 1865; Henry Manning was consecrated his successor 8 June, following.

WESTMINSTER BRIDGES. The handsome old bridge was begun (after a design of M. Labelle), 13 Sept. 1738, the first stone laid 29 Jan. 1738-9; opened for passengers 18 Nov. 1750; cost 426,650*l*. It was built of Portland stone, and crossed the river where the breadth is 1223 feet.

Owing to the sinking of several of its piers, most of the balustrades on both sides were removed, to relieve the structure of its weight.

By 16 & 17 Vict. c. 46 the estates of its commissioners were transferred to her majesty's commissioners of works, who were empowered to remove the then existing bridge, and build a new *arripes* (near the old one). 4 Aug. 1853

The contract required the completion of the works by 1 June, 1857

The works were suspended for a time, in consequence of the failure of Messrs. Murg the contractors. The government eventually undertook the building, which they entrusted to Mr. Thomas Page, the engineer. One half of the new bridge was opened for use early in 1860; the whole on

WESTMINSTER CONFESSION OF FAITH AND CATECHISMS were drawn up by the "Assembly of Divines" (partly consisting of laymen), who sat by authority of parliament in Henry VII.'s chapel, Westminster, from 1643 to 1647. These have ever since been the doctrinal standards of Scotch Presbyterians.

WESTMINSTER HALL (London), first built by William Rufus in 1097, for a banqueting-hall; and here in 1099, on his return from Normandy, "he kept his feast of Whitsuntide very royally." The hall became ruinous before the reign of Richard II., who repaired it in 1397, raised the walls, altered the windows, and added a new roof, as well as a stately porch and other buildings. In 1236 Henry III. on New-year's day caused 6000 poor persons to be entertained in this hall, and in the other rooms of his palace, as a celebration of queen Eleanor's coronation; and here Richard II. held his Christmas festival in 1397, when the number of the guests each day the feast lasted was 10,000. *Stow*. The courts of law were established here by king John. *Idem*. Westminster hall was stated to be the largest room in Europe unsupported by pillars (except a hall of justice at Padua); it is 270 feet in length, 74 feet broad. The hall underwent a general repair in 1802. Concurrently with the erection of the palace of Westminster, many improvements and alterations have lately been made in this magnificent hall. The Volunteer Rifle corps were drilled in the hall in the winter of 1859, and since. The courts of law removed to the new buildings in the Strand Jan. 1883. Restorations proposed by Mr. J. L. Pearson, R.A., July, 1884. The roof and windows greatly damaged by an explosion of dynamite (?) about 2 p.m. 24 Jan. 1885.

WESTMINSTER PALACE, see under *Palace of Westminster*, and *Parliament*.

WESTMINSTER REVIEW, liberal in religion and politics, first appeared, 1824, as the organ of the philosophic radicals, termed the Westminster school, friends of Jeremy Bentham. See *Utilitarianism*.

WESTMINSTER SCHOOL or **ST. PETER'S COLLEGE**, was founded by queen Elizabeth in 1560,

for the education of forty boys, denominated the Queen's scholars, who are prepared for the university. It is situated within the abbey enclosure. Besides the scholars on the foundation, many of the nobility and gentry send their sons to Westminster for instruction. A proposal in 1860 to remove the school was disapproved of in 1861.

Westminster Schools, United, comprise Emanuel and St. Margaret's hospitals, and rev. James Palmer's and Emery Hill's school charities, which were abolished by the endowed school commissioners 27 June, 1873. New schools are to be erected.

WESTMINSTER, STATUTES OF, are 3 and 13 Edward I., 1275-90; see *Acts of Parliament*.

WESTMORELAND. This county and Cumberland were granted as a fief to Malcolm of Scotland by Edward the Elder in 945; but resumed by Henry III. in 1237. Neville, earl of Westmoreland, revolted against Elizabeth in 1569, and was attainted in 1570.

WESTPHALIA (Germany). This duchy belonged in former times to the dukes of Saxony, and afterwards became subject to the archbishop of Cologne. On the secularisation in 1802, it was made over to Hesse Darmstadt; and in 1814 was ceded for an equivalent to Prussia. The kingdom of Westphalia, one of the temporary kingdoms of Bonaparte, composed of conquests from Prussia, Hesse-Cassel, Hanover, and the smaller states to the west of the Elbe, was created by decree 18 Aug. 1806, and Jerome Bonaparte appointed king, 1 Dec. 1807. Hanover was annexed to it, 1 March, 1810. The kingdom was abolished in 1813, and the countries were restored to their former rulers.

Through strike of the coal miners for increased pay and shorter hours of labour, Herr Krupp, of Essen, had to stop his iron and steel works at several places for want of coal about 4 May. A conflict took place near Gladbeck between the troops and miners, and three miners were killed, 7 May; the owners stand firm; about 39,000 men on strike, 8 May; nearly 100,000 strikers out, 13 May; the government intervenes to effect a compromise, about 13 May; the emperor receives three delegates from miners, 14 May, and advises both parties to come to a compromise, about 15, 16 May; strike spreading to Silesia &c., 15 May; strikers in Westphalia about 110,000, in Silesia 100,000, 16 May—20 May; 40 members of the striking committee arrested 26 May; strike ends by a compromise, 31 May, 1889.

WESTPHALIA or MÜNSTER, PEACE OF; the treaties signed at Osnaburg 6 Aug., and at Münster 24 Oct. 1648, between France, the emperor, and Sweden; Spain continuing the war against France. By this peace (ending the thirty years' war) the principle of a balance of power in Europe was first recognised; Alsace given to France, and part of Pomerania and some other districts to Sweden; the Lower Palatinate restored to the elector palatine; the religious and political rights of the German states established; and the independence of the Swiss Confederation recognised by Germany.

WEST SAXONS, see *Wessex*, in *Britain*.

WEYMOUTH, Dorsetshire, was given by Henry I. to St. Swithin's, Winchester. Taken from Charles I., by the parliamentarians, 1644; visited and brought into note by George III., 1789. First Dorset industrial exhibition was opened here, 25 July, 1878.

WHALE-FISHERY, it is said, was first carried on by the Norwegians in the ninth century. *Lenglet*. Whales were killed at Newfoundland and Iceland, for their oil only, 1578; the use of their

fins and bones was not yet known, consequently (a writer adds) no stays were worn by the ladies. The English whale-fishing commenced at Spitzbergen in 1598; but the Dutch had been previously fishing there. The fishery was much promoted by an act of parliament passed in 1749. From 1800 to 2000 whales have been killed annually on the coast of Greenland, &c. The quantity of whale-oil imported in 1814 was 33,567 tons; in 1826, when gas-light became general, 25,000 tons; in 1840, about 22,000 tons; in 1850, 21,360 tons; in 1861, 19,176 tons; in 1864, 14,701 tons; in 1867, 15,945 tons; in 1871, 24,679 tons; in 1872 18,719 tons; in 1878, 20,656 tons; in 1883, 17,156 tons; in 1887, 17,098 tons. *A living whale* from Labrador, 9 feet 6 inches long, placed in the Westminster aquarium, 26 Sept., died 29 Sept. 1877. White whale (Beluga), arrived 28 May; died in latter part of June.

WHARNCLIFFE MEETINGS of public companies (held to give enlarged powers under certain prescribed conditions) are so called because the standing orders of the house of lords, under which they are held, were introduced by lord Wharncliffe, about 1846.

WHEAT. The Chinese ascribe to their emperor, Ching-Noung, who succeeded Fohi, the art of husbandry, and method of making bread from wheat, about 2000 years before the Christian era. Wheat was introduced into Britain in the 6th century, by Coll ap Coll Frewi. *Roberts.* The first wheat imported into England of which we have a note was in 1347. Various statutes have regulated the sales of wheat, and restrained its importation, in order to encourage its being raised at home. In 1862 attention was drawn to the probable utility of considering the pedigree of wheat. In 1871 it was estimated that 3,571,894 acres in the United Kingdom were devoted to wheat; in 1876, 3,124,342. See *Bread*, and *Corn Laws*. Greatest producers (in order), United States, Russia, France, Great Britain, &c. The wheat crop for Great Britain is said to have yielded 71,939,647 bushels in 1888.

WHEEL, BREAKING ON THE. A barbarous mode of death, of great antiquity, ordered by Francis I. for robbers, about 1535; see *Ravillac*.

WHEEL-WORK, see *Spinning, Looms, Automation*.

WHIGS. In the reign of Charles II. the name *Whig* was a term of reproach given by the court party to their antagonists for holding the principles of the "whigs," or fanatical covenanters in Scotland; and in return the name *Tory* was given to the court party, comparing them to the Tories, or popish robbers in Ireland. *Baker.* The distinction arose out of the discovery of the Meal-tub plot (which see) in 1678. Upon bringing up the meal plot before parliament, two parties were formed: the ones who doubted the plot styled those who believed in it *Whigs*; these styled their adversaries *Tories*. In time these names, given as marks of opprobrium, became honoured distinctions. *Hume.* The Whigs brought about the revolution of 1688-9, and established the protestant succession. They were chiefly instrumental in obtaining the abolition of the slave trade and slavery, the repeal of the Test and Corporation act, Catholic emancipation, parliamentary and municipal reform, the repeal of the corn laws, and similar measures. The Whiz Club was established by Charles James Fox; one of its original members was the great Francis, duke of Bedford, who died in 1802. See *Liberals*. For the principal Whig ministers, see *Halifax, Walpole, Rockingham, Grenville, Grey, Melbourne, Russell, Palmerston, and Gladstone*.

WHIP, the popular title of the patronage secretary of the treasury, whose duty it is to collect members to make a house on important occasions, &c. Sir Wm. Hayter, the liberal "whip," 1850-8, received a testimonial for his energetic services, early in 1861. The right hon. Wm. P. Adam, an able whip, died governor of Madras, 24 May, 1881. It is the duty of both conservative and liberal whips to promote the interest of their party in every conceivable way.

The management of the house of commons by bribery is said to have begun with Clifford of the "Cabal" ministry, and continued by Whigs and Tories. Mr. Roberts (under Henry Pelham), is said to have paid members sums of 1,000*l.*, 500*l.*, &c., to each at the close of a session for their support. *Hazlitt*.

WHISKY, the spirit distilled from malt and other corn in Scotland and Ireland, of which about eight millions of gallons have been distilled annually in the former, and upwards of nine millions of gallons in the latter. The duty upon this article once produced annually about three millions. The distillation of whisky is referred to the 10th century; but some authors state it to have been earlier; see *Distillation*. In 1855 the duties on spirits distilled in Scotland and Ireland were equalised with those distilled in England. *Women's Whisky War*, see *United States*, 1874.

WHIST, a game at cards, became general at the end of the 17th century.

Edmund Hoyle, who published his "Short Treatise" about 1742, died in 1769, aged 97; lord Peterborough introduced short whist early in the present century; the laws were revised in 1864
 "Whist," a poem 1791
 Laws by "Cavendish," compiled about 1861
 James Clay, M.P., an eminent player, died 26 Sept. 1871

WHITBY, N.R. Yorkshire. The monastery here, under St. Hilda, founded by king Oswy, 657, destroyed by the Danes 876, was restored by William de Percy about 1100. The Chalmleys established alum works here in 1615. Whitby was made a borough in 1832, and absorbed into the county in 1885.

WHITEBAIT DINNER, when the cabinet ministers met at the end of each session, is said to have begun at the end of the last century, through sir Robert Preston and Mr. George Rose inviting Mr. Pitt and his colleagues to dine at Dagenham, and afterwards at Greenwich. Another account dates its origin in 1721. The annual whitebait dinner, stopped by the Gladstone ministry, was revived by the Disraeli ministry, 1 Aug. 1874, and continued by the Gladstone, 1 Sept. 1880. No dinner, 1884. The whitebait (*clupea alba*) is a subject of controversy. Albert Günther, of the British Museum, in his Catalogue of Fishes, says the whitebait is "a purely nominal species," and that all the examples which he has examined were young herrings (1868).

At the inquiry in June, 1878, James Henry Cannon, fisherman, claimed the discovery of the fish for his grandfather, Richard, who named it 1780. It was mentioned in a letter in the life of lord Malmesbury, 2 July, 1763.

WHITEBOYS, a body of ruffians in Ireland, so called on account of their wearing linen frocks over their coats. They committed dreadful outrages in 1761, but were suppressed by a military force, and their ringleaders executed in 1762. They rose and were again suppressed in 1786-7. The insurrection act was passed on their account in 1822.

WHITECHAPEL, a parish in East London, was part of Stepney till 1329. The church, built in 1673, was replaced by one consecrated 2 Feb. 1877, which was burnt 26 Aug. 1880.

New Loan Art exhibition opened 4 April, 1882

WHITECHAPEL MURDERS, &c. Henry Wainwright, a brushmaker, murdered Harriet Lane, his mistress, on his premises, 215, Whitechapel-road, and buried the body, Sept. 1874.

While conveying the mutilated remains to be concealed in his cellars in Southwark, Wainwright and Alice Day were apprehended, through the courage and activity of Alfred Philip Stokes, 11 Sept. Day was discharged; Henry and his brother Thomas were committed for trial 13 Oct. 1875
 Nine days' trial before chief Justice Cockburn;
 Henry convicted of murder; Thomas as accessory after the fact (seven years' penal servitude), 22 Nov.-1 Dec.; Henry executed 21 Dec. 1875
 1232l. subscribed for Henry's family.
 30l. awarded to Stokes.

Much excitement was caused by the murder and brutal mutilation of four unfortunate women at different times—Smith, 3 April; Tabran, 7 Aug.; Nichols, 31 Aug.; Chapman, 7, 8 Sept. Coroners return open verdict. The evidence showed the murderer possessed surgical knowledge, his object being to get possession of certain organs. Two more women murdered in a similar manner near Commercial Road and Aldgate; E. Watts or Stride and C. Conway or Edlowes between 1 and 2 A.M. 30 Sept. The lord mayor offers 500l. reward in relation to the murder near Aldgate;

Mary Jane Kelly's body found dreadfully mutilated in 26, Dorset Street, Spitalfields 9 Nov. 1888
 Rose Millett or Davis (?) strangled at Poplar 28 Dec. "
 Alice McKenzie found with throat cut, &c., in Castle Alley, Whitechapel 17 July, 1889

WHITE CROSS ARMY, the shorter title of the Church of England Purity Society, established by Miss Ellice Hopkins, supported by the bishops of Durham and Lichfield and other prelates, highly successful at Oxford, Edinburgh, Liverpool, and other places, 1884.

WHITE DOVES, a South Russian religious sect, said to be wealthy and superstitious, strongly advocating celibacy: under a chief named Koudrine. Members were tried for moral offences about April, 1876.

WHITEFIELDITES. George Whitefield, the founder of the "*Calvinistic Methodists*," born 1714, was the son of an innkeeper at Gloucester, where he received his first education. He was admitted a servitor at Oxford in 1732, became a companion of the Wesleys there, and aided them in establishing Methodism. He parted from them in 1741, on account of their rejection of the doctrine of election. He was the most eloquent preacher of his day. His first sermon was preached in 1736, and he commenced field preaching in 1739. He is said to have delivered 18,000 sermons during his career of 34 years. He visited America in 1737, 1739, and 1744. His followers are termed "the countess of Huntingdon's connexion," from his having become her chaplain in 1748, and from her energetic support of the sect, by establishing a college at Trevecca, 1767. See *Spafields*. There were 109 chapels of this connexion in 1851; but many of his followers have joined the Independents. He died 30 Sept. 1770, and the countess died 17 June 1791; see *Tabernacle*.

WHITE FLAG, see *Flag*.

WHITE FRIARS, see *Carmelites* and *Sanctuaries*.

WHITEHALL (London), built by Hubert de Burgh, earl of Kent, before the middle of the 13th century. It afterwards devolved, by bequest, to the Black Friars of Holborn, who sold it to the archbishop of York, whence it received the name of York-place, and continued to be the town residence of the archbishops till taken by Henry VIII. from cardinal Wolsey, in 1530. At this period it became the residence of the court. Queen Elizabeth, who died at Richmond in 1603, was brought from thence to Whitehall, by water, in a grand procession. It was on this occasion, Camden informs us, that the following quaint panegyric on her majesty was written:

"The queen was brought by water to Whitehall,
 At every stroke the oars did tears let fall.
 More clung about the barge: fish under water
 Wept out their eyes of pearl, and swam blind after.
 I think the bargemen might, with easier thighs,
 Have rowed her thither in her people's eyes:
 For howso'er thus much my thoughts have scannd,
 She had come by water, had she come by land."

Whitehall was partly burnt 9-10 April, 1691; totally destroyed by fire, 4 Jan. 1697-8, except the banqueting-house, which had been added to the palace of Whitehall by James I., according to a design of Inigo Jones, in 1619. In the front of Whitehall Charles I. was beheaded 30 Jan. 1649. George I. converted the hall into a chapel 1723-4. The exterior of this edifice underwent repair between 1829 and 1833.

WHITE HATS, a party in the Low Countries formed about 1377, against Louis, count of Flanders. The struggle lasted till 1384, when it was settled by Philip, duke of Burgundy.

WHITE HOUSE (Washington), built of freestone, the residence of the president, gives name to the United States government, as St. James's palace does to that of Great Britain.

WHITE PASHA, *see* *Soudan*, July, 1888.

WHITE PLAINS (N. America), where a battle was fought 28 Oct. 1776, between the revolted Americans and the British forces under sir William Howe. It terminated in the defeat of the Americans, who suffered considerable loss in killed, wounded, and prisoners.

WHITE ROSE, ORDER OF THE, includes men and women of many shades of opinion, agreeing on one point, that all authority comes from above, utterly independent of the will of the people. They regard the revolution of 1688 as a national crime, and Jacobitism as true loyalty. The order has no religious test, its sole object being to maintain the doctrine of the divine right of kings, and revive public interest in the sufferings of the house of Stuart. (Feb. 1888.)

WHITE SHEEP, a name given to the Turcomans who conquered Persia about 1468, and persecuted the Shiites, but were expelled by Ismail, who founded the Sophi dynasty in 1501.

WHITE TOWER, the keep or citadel in the Tower of London, a large, square, irregular building, erected in 1070 by abbot Gundulph, afterwards bishop of Rochester. It measures 116 feet by 96, and is 92 feet in height: the walls, which are 11 feet thick, having a winding staircase continued along two of the sides, like that in Dover Castle. It contains an extensive armoury. Within this tower is the ancient chapel of St. John, originally used by the English monarchs. The turret at the N.E. angle, the highest of the four by which the White Tower is surmounted, was used for astronomical purposes by Flamsteed previously to the erection of the royal observatory at Greenwich.

WHITSUNTIDE, a festival appointed to commemorate the descent of the Holy Ghost upon the apostles: the newly-baptized persons, or catechumens, are said to have worn white garments on Whitsunday. This feast is movable, being always exactly seven weeks after Easter. Rogation week (*which see*) is the week before Whitsunday. Whitsunday 1889, 9 June; 1890, 25 May; 1891, 17 May; 1892, 5 June; 1893, 21 May.

Whitsunday, a Scotch quarter-day, is always on 15 May, as settled by an act of 1693, but local usage varies.

WHITTINGTON'S CHARITIES. Sir Richard Whittington, a citizen and mercer of London, served the office of lord mayor three times, the last in 1419. Many false stories are connected with his name, and his munificent charities are little known. He founded his college, dedicated to the Holy Ghost and the Virgin Mary, in 1424; and his almshouses in 1429; the latter, originally built in London, now stand on Highgate-hill (built 1808) near the supposed site of the supposed famous stone which commemorated the legend of his return to London, after leaving it in despair.

WHITWORTH FOUNDATIONS. Mr. (aftd. sir) Joseph Whitworth, the eminent engineer (born 21 Dec. 1803; died 22 Jan. 1887) in a letter to the first lord of the treasury, dated 15 March, 1868, offered to found 30 scholarships of the annual value of 100*l.* each, to be applied for by further instruction of young men, natives of the United Kingdom, selected by open competition for their intelligence and proficiency in the theory and practice of mechanics and its cognate sciences, with a view to the promotion of engineering and mechanical industry in this country; and he expressed hope that means might be found for bringing science and industry into closer relation with each other than at present obtains here. This offer was accepted by the lords of the committee of the privy council, 28 March, 1868. In 1875, sir Joseph assigned an estate to support these scholarships.

WHO ? WHO ? ADMINISTRATION. *Derby's*, earl of, Feb. 1852 (*which see*).

"WHOLE DUTY OF MAN :" (the authorship doubtfully attributed to abps. Sancroft, Frewen, and Sterne; to bishops Fell and Chapel; to Dorothy, lady Packington, and others;) first published, 1659. *Lowndes*. It is attributed by some to John Ischam.

WICKLIFFITES, the followers of John Wickliffe (born 1324), a professor of divinity in the university of Oxford and rector of Lutterworth in Leicestershire. He was a forerunner of the reformation of the English Church from popery, being among the first who opposed the authority of the pope, transubstantiation, the celibacy of the clergy, &c. Wickliffe, protected by John of Gaunt, Edward's son and Richard's uncle, was virulently persecuted by the church, and only saved from martyrdom by a paralytic attack, which caused his death, 31 Dec. 1384, in his 60th year. The Council of Constance, in 1414, decreed his bones to be disinterred and burnt, which was done by the bishop of Lincoln, and his dust was cast into the river Swift. 1415. Wickliffe's English version of the Bible was commenced in 1380; a noble edition of it was printed at Oxford in 1850. *Wyclif Society*, founded in 1882 to publish his works. Quin-centenary of his death celebrated in London, &c., 21 May, 1884. *See* *Lollards*.

WIDOWS. The Jewish law required a man's brother to marry his widow if without children (1900 B.C.). For the burning of widows in India, *see* *Suttee*. Among the numerous associations in London for the relief of widows are, one for the widows of musicians, instituted in 1738; for widows of naval men, founded in 1739; for widows of medical men, 1788; a law society, for widows of professional gentlemen, 1817; and a society for artists' widows, 1827. —Widowesses were taxed in England as follows: a duke, 12*l.* 10*s.*; lower peers, smaller sums; a common person, 1*s.*; 7 Will. III. 1695.

WIGAN (Lancashire). The king's troops, commanded by the earl of Derby, were defeated and driven out of the town in 1643 by the parliamentary forces under sir John Smeaton. The earl was again defeated by colonel Ashton, who razed the fortifications of Wigan to the ground, same year; and on more by a greatly superior force commanded by colonel Lilburne, 1651. In this last engagement, sir Thomas Tildesley, an ardent royalist, was slain;

pillar was erected to his memory in 1679. The soldiers in the neighbourhood struck, and acting about 17, 18 April, 1868, were quelled by the military. Arrangements were soon after made with 10 employers. The prince and princess of Wales at their visit, 4 June, 1873, opened a new hospital, &c., and received a hearty welcome. See *Railway accidents*, 2 Aug. 1873.

WIGHT, ISLE OF, the Roman *Vecta* or *Vectis*, was conquered by Vespasian in the reign of Claudius. It was conquered by the Saxons under Cerdic about 530; by the Danes, 787, and in 1001, when they held it for several years. It was invaded by the French, July, 1377, and has several times offered from invasion by them. In 1442, Henry VI. alienated the Isle to Henry de Beauchamp, first premier earl of England and then duke of Warwick, and afterwards crowned him king of the Isle of Wight, with his own hands; but dying without heirs male, his regal title died with him, and the lordship of the isle returned to the crown. Charles I., after his flight from Hampton-court, was a prisoner in Carisbrook castle, in 1647. In the time of Charles II. timber was very plentiful. In this isle is the queen's marine residence, Osborne-house.

Prince Henry of Battenberg appointed governor Jan. 1889, officially received 29 July.

WILLS AND TESTAMENTS are of very high antiquity, see *Genesis* xlviii. The private will of Sennacherib, king of Assyria, 680 B.C., found at Nineveh, is translated in *Records of the Past*, Vol. I. Solon introduced them at Athens, 578 B.C. There are regulations respecting wills in the Koran. Trebatius Testa the civilian, introduced codicils to wills at Rome, 31 B.C. The power of bequeathing lands by the last will and testament of the owner was confirmed to English subjects 1 Henry I. 1100; but with great restrictions and limitations respecting the feudal system, which were taken off by the statute of 32 Hen. VIII. 541. *Blackstone's Commentaries*. The first will of a sovereign on record is stated (but in error) to be that of Richard II. 1399; Edward the Confessor made a will, 1066. Various laws have regulated the wills and testaments of British subjects. All previous statutes were repealed by the "Wills Act," Will. IV. & 1 Vict. c. 26, 1837, and the laws with relation to wills amended.* The present

PROBATE COURT (*which see*) was established in 1857. An office for the reception of the wills of living persons was opened in Jan. 1861. See *Thellusson's Will*. In 1869 twenty probates of wills or letters of administration were stamped for personal property, each exceeding a quarter of a million; one had a stamp of 21,000*l*. The Wills Office, removed from Doctors' Commons to Somerset House, was opened 24 Oct. 1874.

The will of Peter the Great, described in the "*Mémoires de la Chevalière d'Eon*," as a "plan for compassing European supremacy," left for his successors, and deposited in the archives of the palace of Peterhoff near St. Petersburg. It advocated "approach as near as possible to Constantinople, and towards the Indies: wars with Turkey and Persia; possession of the shores of the Black Sea, and the Baltic;" &c. The existence of the will (denied by the czars), was first announced by M. Lesur in his "*Progrès de la Puissance Russe*," published at Paris in 1812. In 1863, Dr. Berkhof of Riga asserted that the will was a forgery, probably dictated by Napoleon I. Mr. W. J. Thoms, the antiquary, and others, contend for the genuineness of the will, June, 1878.

"NAPOLEON.

"24 April, 1821, Longwood."

The following are part of the eight *Codicils* to the preceding will of the emperor:—

"On the liquidation of my civil list of Italy—such as money, jewels, plate, linen, coffers, caskets of which the viceroy is the depository, and which belong to me, I dispose of two millions, which I leave to my most faithful servants. I hope that without their showing any cause, my son Eugene Napoleon will discharge them faithfully. He cannot forget the forty millions which I have given him in Italy, or by the right (*parage*) of his mother's inheritance.

"From the funds remitted in gold to the empress Maria Louisa, my very dear and well-beloved spouse, at Orleans, in 1814, there remain due to me two millions, which I dispose of by the present codicil, in order to recompense my most faithful servants, whom I beside recommend to the protection of my dear Maria Louisa. I leave 100,000 francs to count Montholon, 100,000 francs of which he shall pay into the chest of the treasurer (Las Cases) for the same purpose as the above, to be employed according to my dispositions in legacies of conscience.

"10,000 francs to the sub-officer Cantillon (died July, 1869), who has undergone a prosecution, being accused of a desire to assassinate lord Wellington, of which he has been declared innocent. Cantillon had as much right to assassinate that oligarch, as the latter had to send me to perish on the rock of St. Helena," &c. &c. &c.

LETTER TO M. LAFITTE.

"MONSIEUR LAFITTE,—I remitted to you in 1815, at the moment of my departure from Paris, a sum of nearly six millions, for which you gave me a double receipt. I have cancelled one of these receipts, and I have charged comte de Montholon to present to you the other receipt, in order that you may, after my death, deliver to him the said sum with interest at the rate of five per cent., from the 1st of July, 1815, deducting the payments with which you have been charged in virtue of my order. I have also remitted to you a box containing my medallion. I beg you will deliver it to comte Montholon.

"This letter having no other object, I pray God, Monsieur Lafitte, that He may have you in His holy and worthy keeping.

The following WILL of NAPOLEON III. was published in the *Times*, 30 April, 1873:—

"April 24, 1865.

"This is my will. I commend my son and my wife to the high constituted authorities of the state (aux grands corps de l'Etat), to the people, and the army. The empress Eugénie possesses all the qualities requisite for conducting the regency well, and my son displays a disposition and judgment which will render him worthy of his high destinies. Let him never forget the motto of the head of our family, 'Everything for the French people.' Let him fix in his mind the writings of the prisoner of St. Helena; let him study the emperor's deeds and correspondence; finally, let him remember, when circumstances so permit, that the cause of the peoples is the cause of France. Power is a heavy burden, because one cannot always do all the good one could wish, and because your contemporaries seldom render you justice, so that, in order to fulfil one's mission, one must have faith in, and consciousness of, one's duty. It is necessary to consider that from heaven on high those whom you have loved regard and protect you; it is the soul of my illustrious uncle that has always inspired and sustained me. The like will apply to my son, for he will always be worthy of his name. I leave to the empress Eugénie all my private property. It is my desire that on the majority of my son she shall inhabit the Elysée and Biarritz. I trust that my memory will be dear to her, and that after my death she will forget the griefs I may have caused her. With regard to my son, let him keep as a

talisman the seal I used to wear attached to my watch, and which comes from my mother; let him carefully preserve everything that comes to me from the emperor, my uncle, and let him be convinced that my heart and my soul remain with him. I make no mention of my faithful servants. I am convinced that the empress and my son will never abandon them. I shall die in the Catholic, Apostolic, and Roman religion, which my son will always honour by his piety. Done, written, and signed with my hand at the palace of the Tuilleries, the 24th of April, 1865. (Signed) "NAPOLEON."

THE WILL of PRINCE LOUIS NAPOLEON, was written with his own hand, and signed 26 Feb. 1879, the night before he sailed for South Africa (where he was killed while on a reconnoitring party, 1 June, 1879). He states that he dies in the Catholic religion; expresses his love for his country, his mother the empress, and his friends; and his gratitude to the queen and royal family of England, and to the English people for their cordial hospitality. He constitutes his mother sole legatee; bequeaths legacies and memorials to prince J. N. Murat, M. F. Pietri, baron Corvisart, M. Rouhier, and others; and assigns to Victor, the eldest son of prince Napoleon Jérôme, the task of continuing the work of Napoleon I. and Napoleon III. Executors, MM. Rouhier and Pietri.

WIMBLEDON, ancient village 8 miles S.W. of London. See *Volunteers*, 1860-88.

Percy Malcolm John, Student at Blenheim house, died suddenly at his school at Wimbledon, 3 Dec. 1881; his brother-in-law Dr. George Henry Lanson suspected of poisoning him, with arsenic, 2 Dec.; was convicted of the murder, 14 March, confessed his guilt 27 April, and was executed 28 April, 1882.

WINCHESTER (Hampshire), a most ancient city, whose erection may reasonably be ascribed to the Celtic Britons, with the fabulous date 302 B.C. It was made the capital of the West Saxon kingdom under Cerdic, about 520; and of England by Egbert, 827; it became the residence of Alfred, 879-991. In the reign of William I. London began to rival it; and the destruction of religious houses by Henry VIII. almost ruined it. Several kings resided at Winchester, and many parliaments were held there. Memorials of its ancient superiority exist in the national denomination of measures of quantity, as Winchester ell, Winchester bushel, &c., the use of which has but recently been replaced

by imperial measures. The cathedral church was first founded and endowed by Cyneigla, or Keneigilaus, the first Christian king of the West Saxons. Becoming ruinous, the present fabric was begun by bishop Walkelyn, the 34th bishop, 1073. The church was first dedicated to St. Amphibalus, then to St. Peter, and afterwards to St. Swithin, once bishop here. Dedicated to the Holy Trinity by Henry VIII. St. Birinus was the first bishop of the West Saxons, his seat Dorchester, 636; Wina, in 660, was the first bishop of Winchester. The see is valued in the king's books at 2793*l.* 4*s.* 2*d.* annually. Present income, 6,500*l.*

WINCHESTER SCHOOL, the oldest of our great schools, "Seinte Marie College of Wynchestre," the charter of which is dated Oct. 1382, was founded in 1387 by William (Long) of Wykeham, bishop of Winchester, who had established a school here in 1373. The ancient statutes were revised in 1855; and still further altered by the Public Schools act of 1868. In Nov.-Dec. 1872 there was much published correspondence respecting the *tunding*—the excessive punishment of the boys by *boy prefects*.

WINDING-UP ACTS (to facilitate the winding up the affairs of joint-stock companies which are unable to meet their engagements) were passed in 1848, 1849, 1857, and 1862.

WINDMILLS are of great antiquity, and stated to be of Roman or Saracen invention. They are said to have been originally introduced into Europe by the knights of St. John, who took the hint from what they had seen in the crusades. *Baker*. Windmills were first known in Spain, France, and Germany, in 1299. *Anderson*. Wind saw-mills were invented by a Dutchman, in 1633, when one was erected near the Strand, in London.

WINDOWS. There were glass windows in Pompeii, A.D. 79, as is evident from its ruins. It is certain that windows of some kind were glazed so early as the 3rd century, if not before, though the fashion was not introduced until it was done by Benedict Biscop, about 650. Windows of glass were used in private houses, but the glass was imported 1177. *Anderson*. In England, in 1851, about 6000 houses had fifty windows and upwards in each; about 275,000 had ten windows and up-

wards; and 725,000 had seven windows, or less than seven.

WINDSOR (Berkshire). The *Castle*, a residence of the British sovereigns, begun by William the Conqueror, and enlarged by Henry I. about 1110. Edward III., who was born here, 13 Nov. 1312, caused the old building, with the exception of three towers at the west end, to be taken down, and re-erected the whole castle, under the direction of William of Wykeham, 1356, and built St. George's chapel. He assessed every county in England to send him workmen. James I. of Scotland was imprisoned here, 1406-23. Several additions were made by Henry VIII. Elizabeth made the grand north terrace; and Charles II. repaired and beautified it, 1676-80.

It was formerly an imperial city of Alsace, and was seized by Louis XIV. in 1673, and annexed to France by the treaty of Ryswick, 1697. The "lines" of Wissembourg, erected by Villars 1705, were taken by the Austrians and retaken by the French, 1793, after Hoche's victory at Geisberg. On 4 Aug. 1870, the crown-prince of Prussia crossed the Lauter and gained a brilliant but bloody victory over the French (a part of MacMahon's division), storming the lines, and the Geisberg. General Abel Douay was mortally wounded, and about 800 prisoners were made. The killed and wounded on both sides appear to have been nearly equal. The German army, composed of Prussians, Bavarians, and Württembergers, were, it is said, about 40,000, against about 10,000 French, who fought with desperate bravery.

WITCHCRAFT. The Jewish law (*Exodus* xxii. 18), 1491 B.C., decreed, "Thou shalt not suffer a witch to live." Saul, after banishing or condemning witchcraft, consulted the witch of Endor, 1056 B.C. (*1 Sam.* xxviii.) Reginald Scott's "Discoverie of Witchcraft" (against its existence), published 1584. Reprinted, 1886. Bishop Hutchinson's historical "Essay on Witchcraft" was published in 1718. Pope Innocent VIII. issued a bull against witchcraft in 1484. Thousands of innocent persons were burnt, and others killed by the tests applied.

Many Templars burnt at Paris for witchcraft, &c., 1309. Joan of Arc burnt at Rouen as a witch, 30 May, 1431. About five hundred witches burnt in Geneva, in three months, 1515.

Many burnt in the diocese of Como in a year, about 1524.

Nine hundred burnt in Lorraine, 1580-1595.

One hundred and fifty-seven burnt at Wurtsburg, old and young, learned and ignorant, between 1627 and 1629. Grandier, the parish priest at Loudon, burnt on a charge of having bewitched a whole convent of nuns, 1634.

In Bretagne, twenty poor women put to death as witches, 1654.

Disturbances commenced on charges of witchcraft in America, at Massachusetts, 1648-9; and persecution raged dreadfully in Pennsylvania in 1683.

At Salem, in New England, nineteen persons hanged (by the Puritans) for witchcraft, eight more condemned; fifty confessed themselves to be witches and were pardoned, 1692.

Maria Renata burnt at Wurtsburg in 1749.

At Kalisk, in Poland, nine old women charged with having bewitched and rendered unfruitful the lands belonging to that palatinate, were burnt 17 Jan. 1775.

Five women condemned to death by the Brahmins, at Patna, for sorcery, and executed, 15 Dec. 1802.

WITCHCRAFT IN ENGLAND.

A statute enacted declaring all witchcraft and sorcery to be felony without benefit of clergy. 33 Hen. VIII. 1541. Again, 5 Eliz. 1562, and 1 James I. 1603. The 73rd canon of the church prohibits the clergy from casting out devils, 1603.

Barrington estimates the judicial murders for witchcraft in England in 200 years at 30,000.

Matthew Hopkins, the "*witch-finder*," causes the judicial murder of about 100 persons in Essex, Norfolk, and Suffolk, 1645-7.

Sir Matthew Hale burnt two persons for witchcraft in 1664.

Seventeen or eighteen persons burnt at St. Osyth's, in Essex, about 1676.

Two pretended witches were executed at Northampton in 1705, and five others seven years afterwards.

In 1716, Mrs. Hicks, and her daughter, aged nine, were hanged at Huntingdon.

Northamptonshire and Huntingdon preserved the superstition about witchcraft later than other counties.

In Scotland, thousands of persons were burnt in the period of about a hundred years. Among the victims were persons of the highest rank, while all orders in the state concurred. James I. even caused a whole assize to be prosecuted for an acquittal. The king published his *Demonologie* in Edinburgh, 1597. The last sufferer in Scotland was at Dornoch in 1722.

The laws against witchcraft had lain dormant for many years, when an ignorant person attempting to revive them (by finding a bill against a poor old woman in Surrey for the practice of witchcraft), they were repealed, 10 Geo. II. 1736.

Credulity in witchcraft still abounds in the country districts of England. On 4 Sept. 1853, a poor old paralysed Frenchman died in consequence of having been ducked as a wizard at Castle Hedingham, Essex, and similar cases have since occurred.

WITNESSES. Two or more witnesses were required by the law of Moses, 1451 B.C. (*Deut.* xvii. 6), and by the early Christian Church in cases of discipline (2 Cor. xiii. 1), A.D. 60. The evidence of two witnesses required to attain for high treason, 25 Edw. III. 1352. In civil actions between party and party, if a man be subpoenaed as a witness on a trial, he must appear in court on pain of 100*l.* to be forfeited to the king, and 10*l.*, together with the damages equivalent to the loss sustained by the want of his evidence to the party aggrieved. Lord Ellenborough ruled that no witness is obliged to answer questions which may tend to degrade himself, 10 Dec. 1802. New act relating to the examination of witnesses passed 13 Geo. III. 1773. Act to enable courts of law to order the examination of witnesses upon interrogations and otherwise, 1 Will. IV. 30 March, 1831.

WIVES, see *Marriage*. By the Divorce and Matrimonial Causes Act, passed in 1857, the condition of married women has been much benefited. When ill-used they can obtain a divorce or judicial separation; and while in the latter state any property they may acquire is secured to them per-

sonally, as if unmarried. By another act passed in 1857, they are enabled to dispose of reversionary interests in personal property or estates. An act to amend the law relating to the property of married women was passed 9 Aug. 1870. By it the separate earnings of a wife were secured to her own use, as well as personal and freehold property bequeathed to her. She may maintain an action at law, and acquires other rights. The husband is declared not liable for debts contracted by his wife prior to marriage, and she may be sued for them. This act was amended in 1874. Husband and wife may be jointly sued for her debts before marriage. By the Matrimonial Causes Act, 1878, a magistrate can grant judicial separation, with maintenance, to a wife suffering from her husband's ill-usage.

WERTH SUR SAUER, a town in the department of the Lower Rhine, N.E. France. After storming Wissembourg (*which see*) on 4 Aug. 1870, the crown-prince of Prussia, with the 3rd army (about 150,000) marched rapidly forward and surprised part of the French army under Marshal MacMahon, including the corps of Canrobert and part of that of Faily (about 47,000), and defeated it in a long, desperate, and sanguinary engagement near this place 6 Aug. The battle lasted from 9 a.m. till 4 p.m. The chief struggles occurred in the country round Reichshoffen and in the village of Froeschweiler; the French are said to have charged the German line eleven times, each time breaking it, but always finding a fresh mass behind. The ridge on which Werth stands was not captured until the French were taken in flank by the Bavarians and Württembergers. Nearly all MacMahon's staff were killed, and the marshal himself, unhorsed, fell fainting into a ditch, from which he was rescued by a soldier. He then, on foot, directed the retreat towards Saverne, to cover the passes of the Vosges. The victory is attributed to the very great numerical superiority of the Germans as well as to their excellent strategy. The French loss has been estimated at 5000 killed and wounded, and 5,000 prisoners, 2 eagles, 6 mitrailleuses, 35 cannon, and much baggage. The Germans are stated to have had above 8000 men put *hors de combat*. It was admitted that MacMahon had acted as an able and brave commander.

WOLVERHAMPTON (Staffordshire), an old town formerly named Hamton; owes its present name to the foundation of a college here by Wulfrana, sister of king Edgar, and widow of Aldhelm, duke of Northampton, 996. The queen

was present at the inauguration of the prince consort's statue here, 30 Nov. 1866, and the church-congress was opened here 1 Oct. 1867. Wolverhampton is eminent for its manufactures in metal. Statue of hon. C. P. Villiers (its M.P., 1835-85) was uncovered, 6 June, 1879; jubilee celebrated 10 Jan. 1885. Wolverhampton returns three M.P.'s by act passed 25 June, 1885.

WOLVES were once very numerous in England. Their heads were demanded as a tribute, particularly 300 yearly from Wales, by king Edgar, 961, by which step they were falsely said to be totally destroyed. *Carle*. Edward I. issued his mandate for the destruction of wolves in several counties of England, 1289. Ireland was infested by wolves for many centuries after their extirpation in England; for there are accounts of some being found there so late as 1710, when the last presentment for killing wolves was made in the county of Cork. Wolves still infest France, in which kingdom 8384 wolves and cubs were killed in 1828-9. They were troublesome in the Vosges, Oct. 1875. 701 wolves killed in France in 1887.

WOODS, FORESTS, &c., see *Forests*. The board of woods, forests, and land revenues was constituted in 1810. The oversight of works and public buildings was added to its duties in 1832, but transferred to a separate board of commissioners in 1851. In 1874 the annual revenue of the crown woods and forests was 487,695*l.*; 1882-3, 380,000*l.* 1886, 492,624*l.*

WOOD'S HALF-PENCE, for circulation in Ireland and America, were coined by virtue of a patent, passed 1722. Against them, Dr. Jonathan Swift, by his letters signed M. B. Drapier published about 1723, raised such a spirit of opposition that the patent was withdrawn. Wood received a compensation, but was virtually banished the kingdom. The half-pence were assayed in England by sir Isaac Newton, and proved to be genuine, in 1724.

WOODHALL SPA, Lincolnshire, celebrated for mineral waters, especially containing iodine. On 22 May, 1888, Mr. E. Stanhope, M.P., sir Richard Webster, M.P., and others, inspected the pump-room, baths, hotel, and other buildings recently erected to promote the use of the waters by all classes of invalids.

WOOD PAVEMENT was laid down at Whitehall in 1839; and in Oxford-street, the Strand, and other streets. The principal part was soon taken up. In Nov. 1872, the improved wood pavement company put forth a prospectus; and

in May, 1876, wood had been largely laid down, and was said to be the best pavement in London.

Oxford-street was paved by Henson's street paving company, with a compound of wood, asphalt, felt, and Portland cement in 1876; with wood, 1878. Bond-street and many other streets paved with wood, 1879-81.

WOODSTOCK (Oxfordshire). In Woodstock, now Blenheim-park, originally stood a royal palace, in which king Ethelred held a parliament, and Alfred the Great translated *Boethius de Consolatione Philosophiae*, 888. Henry I. beautified the palace; and here resided Rosamond, mistress of Henry II. 1154. In it were born Edmund, second son of Edward I., 1301, and Edward, eldest son of Edward III., 1330; and here the princess Elizabeth was confined by her sister Mary, 1554. A splendid mansion, built at the expense of the nation, for the duke of Marlborough, was erected here to commemorate his victory at Blenheim in 1704. At that time every trace of the ancient edifice was removed, and two elms were planted on its site; see *Blenheim*. Scott's romance, "Woodstock," was published, June, 1826. Marshall's "History of Woodstock," 1873.

WOOL. From the earliest times to the reign of Queen Elizabeth the wool of Great Britain was of only superior to that of Spain, but accounted the finest in the universe; and even in the times of the Romans a manufacture of woollen cloths was established at Winchester for the use of the emperors. *Anderson*. In later times wool was manufactured in England, and is mentioned 1185, but not in any quantity until 1331, when the weaving of it was introduced by John Kempe and other artisans from Flanders. This was the real origin of the now unrivalled manufacture, 6 Edw. III. 1331. *Lymer's Fœdera*.

WOOLWICH (Kent), the most ancient military and naval arsenal in England. Its royal dockyard, where men-of-war were built in the reign of Henry VIII., was closed, 1 Oct. 1869. Here *Harry Graces de Dieu* was built, 1512; and here she was burnt in 1552. The royal arsenal was formed about 1720, on the site of a rabbit-warren; it contains vast magazines of great guns, mortars, bombs, powder, and other warlike stores; a foundry, with many furnaces, for casting ordnance; and a great laboratory, where fireworks, cartridges, grenades, &c., are made for the public service. The Royal Military Academy was erected in the royal arsenal, but the institution was not completely formed until 19 Geo. II. 1745. Woolwich returns one M.P., by act of 1885.

WORCESTER, successively an important British, Roman, and Saxon town, was burnt by the Danes (1041) for resisting the tribute called Dancgelt. William I. built a castle, 1090. The city was frequently taken and retaken during the civil wars of the middle ages, and by Cromwell in 1651.—The BISHOPRIC was founded by Ethelred, king of the Mercians, 680, and taken from the see of Lichfield, of which it composed a part. The married priests of the cathedral were displaced, and monks settled in their stead, 964. The church was rebuilt by Wolstan, 25th bishop, 1030. The see has yielded to the church of Rome four saints, and to the English nation five lord chancellors and three lord treasurers. It is valued in the king's books at 1049l. 16s. 3½d. per annum. Present income, 5000l.

The colleges engage to find a teacher wherever 10 or 12 members agree to form a class, and also to have lectures given. There were eleven classes at the one in Bloomsbury, London, in 1856; Mr.

Ruskin gave lessons in drawing. Some of these colleges have been found to be self-supporting.

International Working Men's Association (termed the International) owes its origin to some German socialists in London, 1847, and was much promoted by the foreign visitors to the great exhibition in 1862. It was definitely organised, 28 Sept. 1864, George Odger first president. Its professed object is the complete emancipation of labour from the tyranny of capitalists. WORMS, a city on the Rhine, in Hesse-Darmstadt. The Roman city, Borbetomagus, was plundered by the Alemanni, 354, and by Attila, 451; rebuilt by Clovis I. about 475. Here Charlemagne resided in 806 B.C. Here was held the imperial diet before which Martin Luther was summoned, 4 April, 1521, and by which he was proscribed. Luther was met by 2000 persons on foot and on horseback, at the distance of a league from Worms. When Spalatin sent to warn him of his danger, he answered, "If there were as many devils in Worms as there are tiles upon the roofs of its houses, I would go on." He appeared before the emperor, the archduke Ferdinand, six electors, twenty-four dukes, seven margraves, thirty bishops and prelates, and many princes, counts, lords, and ambassadors, 17 April, acknowledged his writings and opinions, and left Worms, in fact, a conqueror. Yet, to save his life, he had to remain in seclusion under the protection of the elector of Saxony for about a year. The edict putting him under the ban of the empire was issued 26 May, 1521. Worms was burnt, by order of Louis XIV., 1689, the cathedral excepted; and was taken by the French, under Custine, 4 Oct. 1792. A memorial statue of Luther at Worms was uncovered, 25 June, 1868, in the presence of the king of Prussia and other sovereigns.

WORSHIP. The first worship mentioned is that of Abel, 3872 B.C. (*Gen. iv.*) "Men began to call on the name of the Lord," 3769 B.C. (*Gen. iv.*) The Jewish order of worship was set up by Moses, 1490 B.C. Solomon consecrated the temple, 1004 B.C. To the corruptions of the simple worship of the patriarchs all the Egyptian and Greek idola-

tries owed their origin. Athotes, son of Menes, king of Upper Egypt, is supposed to be the *Copt* of the Egyptians, and the *Toth*, or *Hermes*, of the Greeks, the *Mercury* of the Latins, and the *Testates* of the Celts or Gauls, 2112 B.C. *Usher*.

WORSHIP IN ENGLAND. The Druids were the priests here, at the invasion of the Romans (55 B.C.), who eventually introduced Christianity, which was almost extirpated by the victorious Saxons (455), who were pagans. The Roman catholic form of Christianity was introduced by Augustine, 596, and continued till the Reformation (*which see*). See *Hymns, Liturgies, Prayers, Public Worship, Ritualists*.

WORTLYTYPE, see under *Photography*.

WOUNDED IN BATTLE, see *Geneva Convention*, and *Aid to Sick and Wounded*.

WOUNDING. Malicious wounding of another was adjudged death by the English statutes. The Coventry Act was passed in 1671; see *Coventry Act*. By lord Ellenborough's Act, persons who stab or

cut with intent to murder, maim, or disfigure another were declared guilty of felony without benefit of clergy. Those guilty of maliciously shooting at another in any dwelling-house or other place, are also punishable under the same statute in the same degree, 43 Geo. III. 1802. This offence is met by some later statutes, particularly the act for consolidating and amending the acts relating to offences against the person, 9 Geo. IV., June, 1828. This last act is extended to Ireland by 10 Geo. IV., 1829. An act for the prevention of maliciously shooting, stabbing, &c., in Scotland, 6 Geo. IV., 1825; amended by 10 Geo. IV., 4 June, 1829, for the prevention and punishment of assaults on women and children.

WRECKS. The loss of merchant and other ships by wreck upon lee-shores, coasts, and disasters in the open sea, was estimated at Lloyd's, in 1800, to be about an average of 365 ships a year. In 1830, it appeared by *Lloyd's Lists* that 677 British vessels were totally lost, under various circumstances, in that year. The laws respecting wrecks were consolidated in 1846 and 1854. See *Seamens* (commission of inquiry).

British vessels wrecked in 1848, were, sailing vessels, 501; steamers, 13; tonnage, 96,920. In 1851, there were wrecked 611 vessels, of which number 11 were steamers: the tonnage of the whole being 111,976.

The year 1852-3, particularly the winter months (Dec. and Jan.), was very remarkable for the number of dreadful shipwrecks and fires at sea: but a few of them are recorded. Wrecks in 25 years (1854-79), 49,322; lives lost, 18,319.

Many vessels were lost in the great storms, 25, 26 Oct. 1859; 28 May, 1861; 19, 20 Oct. 1861; and 13, 14 Nov. 1862; by a cyclone, India, 5 Oct. 1864; in the West Indies, Oct. 1867.

* *La Lutine* was a French ship captured by admiral Duncan. She contained much bullion and money, belonging to merchants ; a great loss to the underwriters at Lloyd's. The Dutch government claimed the wreck, and granted one third of the salvage in 1801 to the bullion fishers. After much discussion, and occasional recoveries, the king of the Netherlands ceded to Great Britain (for Lloyd's) half the remainder of the wreck. A Dutch salvage company began operations in Aug. 1857. At the end of 1859, Lloyd's had received 22,162l. 6s. 7d. About 99,803l. recovered ; about 1,175,000l. remaining. A chair and table at Lloyd's were made of the rudder recovered in 1859. *Martin's History of Lloyd's.*

WRITING. Pictures are considered to be the first essay towards writing. The most ancient remains of writing are upon hard substances, such as stones and metals, used by the ancients for edicts, and matters of public notoriety. Athotes, or Hermes, is said to have written a history of the Egyptians, and to have been the author of the hieroglyphics, 2112 B.C. *Usher*. Writing is said to have been taught to the Latins by Europa, daughter of Agenor, king of Phenicia, 1494 B.C. *Thucydides*. Cadmus, the founder of Cadmea, 1493 B.C., brought the Phœnician letters into Greece. *Vossius*. The

XANTHUS, Lycia, Asia Minor, was taken by Harpagus for Cyrus, about 546 B.C., when the inhabitants buried themselves in the ruins. It was besieged by the Romans under Brutus 42 B.C. After a great struggle the inhabitants set fire to their city, destroyed their wives and children, and perished. The conqueror wished to spare them, and offered rewards to his soldiers if they brought any of the Xanthians into his presence, but only 150 were saved. *Plutarch*.

At the battle of Xeres, 26 July, 711, Roderic, the last Gothic sovereign of Spain, was defeated and slain by the Saracens, commanded by Tarik and Muza.

XYLOTECHNOGRAPHICA.

XERXES' CAMPAIGN. Xerxes crossed the Hellespont by a bridge of boats, and entered Greece in the spring of 480 B.C., with an army which, together with the numerous retinue of servants, eunuchs, and women that attended it, amounted (according to some historians) to 5,283,220 souls. Herodotus states the armament to have consisted of 3000 sail, conveying 1,700,000 foot, besides cavalry and the marines and attendants of the camp. This multitude was stopped at Thermopylae (which see) by the valour of 300 Spartans under Leonidas, 7-9 Aug. 480 B.C. The fleet of Xerxes was defeated at Artemisium and Salamis, 20 Oct. 480 B.C.; and he hastened back to Persia, leaving behind Mardonius, the best of his generals, who, with an army of 300,000 men, was defeated and slain at Plataea, 22 Sept. 479 B.C. Xerxes was assassinated by Artabanus, 465 B.C.

"English," the name originally given by the Massachusetts Indians to the colonists: applied solely to the New Englanders by the British soldiers in the American war (1775-81); afterwards by foreigners to all natives of the United States; and latterly by the confederates of the south to the federals of the north during the war 1861-64.

YARD. The word is derived from the Saxon *geard*, or *gyrd*, a rod or shoot, or from *gyrdan* to enclose, being anciently the circumference of the body, until Henry I. decreed that it should be the length of his arm; see *Standard Measures*.

YARMOUTH, GREAT (Norfolk), was a royal demeane in the reign of William I., as appears from Domesday Book, 1086. It obtained a charter from John, and one from Henry III. In 1348, a plague here carried off 7000 persons; and did much havoc again in 1579 and 1664.

YASHGAR, a country, Central Asia; Yakoob, its able despotic chief, was contending with China and Russia, 1875.

YEAR. The Egyptians, it is said, were the first who fixed the length of the year.

The Roman year introduced by Romulus, 758 B.C.; corrected by Numa, 713 B.C.; and again by Julius Cæsar, 45 B.C. (see *Calendar*).

The solar or astronomical year was found to comprise 365 days, 5 hours, 48 minutes, 51 seconds, and 6 decimials, 265 A.C.

The lunar year (twelve lunar months, or 354 days, 8 hours, 48 minutes) was in use amongst the Chaldeans, Persians, and Jews. Once in every three years was added another lunar month, so as to make the solar and the lunar year nearly agree. But though the months were lunar, the year was solar; that is, the first month was of thirty days, and the second of twenty-nine, and so alternately: and the month added triennially was called Ve-Adar or the second Adar. The Jews afterwards followed the Roman manner of computation.

The sidereal year, or return to the same star, is 365 days, 6 hours, 9 minutes, 11 seconds.

The Jews dated the beginning of the sacred year in March, and civil year in September; the Athenians began the year in June; the Macedonians on 24 Sept.; the Christians of Egypt and Ethiopia on 29 or 30 Aug.; and the Persians and Armenians on 11 Aug. Nearly all Christian nations now commence the year on 1 January.

In France, the Merovingian kings began the year with March; the Carolingians sometimes began the year with Christmas, 25 Dec.; and sometimes with Easter, which, being a movable feast, led to much confusion. Charles IX. of France, in 1564, published an arrêt, the last article of which ordered the year for the time to

come to be constantly and universally begun, and written on and from 1 January.

The beginning of the year has been reckoned from the day celebrating the birth of Christ, 25 Dec.; his circumcision, 1 Jan.; his conception, 25 March; and his resurrection, Easter.

The English began their year on the 25th of December, until the time of William the Conqueror. This prince having been crowned on 1 Jan. gave occasion to the English to begin their year at that time, to make it agree with the then most remarkable period of their history. *Stow*. Until the act for altering the style, in 1752 (see *Style*), when the year was ordered to begin on Jan. 1, it did not legally and generally commence in England until 25th March. In Scotland, at that period, the year began on the 1st of January. This difference caused great practical inconveniences; and January, February, and part of March sometimes bore two dates, as we often find in old records, 1745-1746, or 1745-6, or 1741. Such a reckoning often led to chronological mistakes; for instance, we popularly say the "revolution of 1688," as that event was completed in February, 1688, according to the then mode of computation; but if the year were held to begin, as it does now, on the first of January, it would be the revolution of 1689.

The year in the northern regions of Siberia and Lapland is described in the following calendar, given by a traveller:—*23 June*, snow melts. *1 July*, snow gone. *9 July*, fields quite green. *17 July*, plants at full growth. *25 July*, plants in flower. *2 Aug.*, fruits ripe. *10 Aug.*, plants shed their seed. *18 Aug.*, snow. The snow continues upon the ground from 18th Aug. of one year to 23rd June of the year following, being 309 days out of 365; so that while the three seasons of spring, summer, and autumn are together only fifty-six days, or eight weeks, the winter is of forty-four weeks' duration in these countries.

See *New Style*, *Platonic Year*, *Sabbatical Year*, *Mohometanism*, *French Revolutionary Calendar*.

YEAR OF OUR LORD; see *Anno Domini*.

YEAR OF THE REIGN. From the time of William the Conqueror, 1066, the year of the sovereign's reign has been given to all public instruments. The king's patents, charters, proclamations, and all acts of parliament have since then been generally so dated. The same manner of dating is used in most of the European states for all similar documents and records; see *List of Kings under England*.

YEAR AND A DAY. A space of time in law, and in many cases establishes and fixes a right; as in an estray, on proclamation being made, if the owner does not claim it within the time, it is forfeited. The term arose in the Norman law, which enacted that a beast found on another's land, if unclaimed for a year and a day, belonged to the lord of the soil. It is otherwise a legal space of time.

YEAR-BOOKS contain reports in Norman-French of cases argued and decided in the courts of common law. The printed volumes extend from the beginning of the reign of Edward II. to nearly the end of the reign of Henry VIII., a period of about 220 years; but in this series there are many omissions. These books are the first in the long line of legal reports in which England is so rich, and may be considered as, to a great extent, the foundation of our unwritten law, "*Lex non scripta*." In 1863 *et seq.* various year-books of Edward I. (1292-1304) edited by Mr. A. J. Horwood, for the series of the *Chronicles and Memorials*, were published at the expense of the British government.

YEAST, a substance causing fermentation, was discovered by Cagniard de la Tour and Schwann, independently, in 1836, to be a vegetable cell or fungus.

YELLOW FEVER, an American pestilence, made its appearance at Philadelphia, where it committed great ravages, 1699. It appeared in several islands of the West Indies in 1732, 1739, and 1745. It raged with unparalleled violence at Philadelphia in Oct. 1762; and most awfully at

New York in the beginning of Aug. 1791. The fever again spread great devastation at Philadelphia in July 1793; carrying off several thousand persons. *Hardie*. It again appeared in Oct. 1797; and spread its ravages over the northern coast of America. Sept. 1798. It reappeared at Philadelphia in the summer of 1802; and broke out in Spain, in Sept. 1803. The yellow fever was very violent at Gibraltar in 1804 and 1814; in the Mauritius, July 1815; at Antigua, in Sept. 1816; and it raged with dreadful consequences at Cadiz, and the isle of St. Leon, in Sept. 1819. A malignant fever raged at Gibraltar in Sept. 1828, and did not terminate until the following year. Yellow fever raging in the southern of the United States. Sept. Oct. 1878: at Memphis, autumn, 1879; in Florida (especially in Jacksonville) and other southern states, autumn 1888. Mr. R. A. Proctor, the astronomer, died of it at New York on his way from Florida to England, 12 Sept. 1888; the epidemic abating Oct. 1888; 4,583 cases, and 396 deaths in Jacksonville to Nov. 17, 1888.

YELLOWSTONE NATIONAL PARK. about 3300 square miles, in territory of Wyoming.

It includes Yellowstone lake, about 330 square miles, with numerous geysers, volcanic and other grand natural phenomena, rugged mountains, forests, meadows, rivers, and much beautiful scenery. Its formation was authorised by congress in March, 1872. It was visited by president Arthur in 1883.

YEOMANRY, see under *Volunteers*.

YEOMEN OF THE GUARD, a peculiar body of foot guards to the king's person, instituted at the coronation of Henry VII. 30 Oct. 1485, which originally consisted of fifty men under a captain. They were called beef-eaters, a corruption of *buff-tiers*, being attendants on the king's buffet or sideboard; see *Battle-Axe*. They were of a larger stature than other guards, being required to be over six feet in height, and were armed with arquebuses and other arms. The band was increased by Henry's successors to one hundred men, and seventy supernumeraries; and when one of the hundred died, it was ordered that his place should be supplied out of the seventy. They were clad after the manner of king Henry VIII. *Ashmole's Instit.* This is said to have been the first permanent military band instituted in England. John earl of Oxford, was the first captain in 1486. *Beaumont's Pol. Index*.

YERMUK (Syria). Near here the emperor Heraclius was totally defeated by the Saracens, after a fierce engagement, Nov. 636. Damascus was taken, and his army expelled from Syria.

YEW-TREE (Taxus). The origin of planting yew-trees in churchyards was (these latter being fenced) to secure the trees from cattle, and in this manner preserve them for the encouragement of archery. A general plantation of them for the use of archers was ordered by Richard III. 1483. *Stow's Chron.* Near Fountains Abbey, Yorkshire, were seven yew-trees, called the Seven Sisters, supposed to have been planted before 1088; the circumference of the largest thirty-four feet seven inches round the trunk. In 1851 a yew-tree was said to be growing in the churchyard of Gresford, North Wales, whose circumference was nine yards nine inches, being the largest and oldest yew-tree in the British dominions; but tradition states that there are some yews in England older than the introduction of Christianity. The old yew-tree mentioned

in the survey taken of Richmond palace in 1649, is said to be still existing.

YEZIDIS, an eastern tribe, living near the Euphrates, visited by Mr. Layard in 1841: see *Devil Worship*.

YEZDEGIRD, or **PERSIAN ERA**, was formerly universally adopted in Persia, and is still used by the Parsees in India, and by the Arabs, in certain computations. This era began on the 26th June, 632, when Yezdegird was elected king of Persia. The year consisted of 365 days only, and therefore its commencement, like that of the old Egyptian and Armenian year, anticipated the Julian year by one day in every four years. This difference amounted to nearly 112 days in the year 1075, when it was reformed by Jelaledin, who ordered that in future the Persian year should receive an additional day whenever it should appear necessary to postpone the commencement of the following year, that it might occur on the day of the sun's passing the same degree of the ecliptic.

YORK MINSTER (dedicated to St. Peter). The first Christian church erected here, which appears to have been preceded by a Roman temple, was built by Edwin, king of Northumbria, of wood, about 625, and of stone about 635. It was damaged by fire in 741, and was rebuilt by archbishop Albert, about 780. It was again destroyed by fire in the year 1069, and rebuilt by archbishop Thomas, of Bayeux. It was once more burnt down in 1137, with St. Mary's abbey, and 39 parish churches in York. Archbishop Roger built the choir, 1154-81; Walter Gray added the south transept in 1227; John de Romayne, the treasurer of the cathedral, built the north transept in 1260. His son, archbishop Romanus, laid the foundation of the nave in 1291. In 1330, William de Melton built the two western towers, which were finished by John de Birmingham in 1342. Archbishop Thoresby, in 1361, began to rebuild the choir, in accordance with the magnificence of the nave, and he also rebuilt the lantern tower. The minster was set on fire by Jonathan Martin, a lunatic, and the roof of the choir and its internal fittings destroyed, 2 Feb. 1829; the damage, estimated at 60,000*l.*, was repaired in 1832 under sir Robert Smirke. An accidental fire broke out, and in one hour reduced the belfry to a shell, destroyed the roof of the nave, and much damaged the edifice, 20 May, 1840. This was restored by Sidney Smirke, at a cost of 23,000*l.*, 1841.

YORK TOWN (Virginia, United States). This mischance was attributed to sir Henry Clinton, who had not given the garrison the necessary succour they expected; and it mainly led to the close of the war. The centenary was celebrated 16 Oct. 1881 *et seq.* On 19 Oct. the British flag was saluted generally. The town was strongly fortified by the confederates in the American civil war, but surrendered to McClellan, May, 1862.

Majid obtained Zanzibar, after a contest with his brother, Barghash Seyyid, who, however, succeeded at his death, 7 Oct. 1870. An expedition for the purpose of suppressing the slave trade was sent to Zanzibar, under the command of sir Bartle Frere, 20 Nov. 1872, arrived about 12 Jan. 1873. The metal zinc is mentioned by Paracelsus (died 1541). A mine of zinc was discovered on lord Ribblesdale's estate, Craven, Yorkshire, in 1809. Zincography was introduced in London shortly after lithography became known in England, in 1817; see *Lithography*. Zinc is much used in voltaic batteries; and its application in manufactures has greatly increased of late years; see *Photoincography*.

In Nov. 1861, Prussia threatened to withdraw unless certain changes were made. By the treaty of 8 July, 1867, between the North German confederation, and the southern states (Bavaria, Wurtemberg, Baden, and Hesse), various changes were made, and by other treaties signed in Oct. these states agreed to send delegates to a customs parliament to be held at Berlin. ZOOLOGY (from *zōon*, Greek for animal): the division of biology which treats of animals: Aristotle (322-284 B.C.) the founder of the science. Systems of classification have been made by John Ray (1628-1705), Charles Linné (1707-78), G. Buffon (1707-88), and George Cuvier (1769-1832).

Linnæus divided the animal kingdom into six classes:—*Mammalia*, which includes all animals that suck their young; *Aves*, birds; *Amphibia*, or amphibious animals; *Pisces*, fishes; *Insecta*, insects; *Vermes*, worms; 1741.

Cuvier (died in Paris, 13 May, 1832), in his great work *Règne Animal*, published in 1816, distributed the animals into four great divisions, the *Vertebres* (hard-boned); the *Molluscs* (soft-bodied); the *Articulés* (jointed); and the *Radiata* (the organs disposed round a centre).

In 1859, professor Owen made known a system of arranging the class *Mammalia* according to the nature of their brains.

ZOUAVES and **FOOT CHASSEURS**. When the French established a regency at Algiers, in 1830, they hoped to find the employment of native troops advantageous, and selected the *Zouaves*, a congregation of daring Arab tribes. In time, numbers of red republicans, and other enthusiastic Frenchmen, joined the regiments, adopting the costume, &c.: eventually the Africans disappeared from the ranks, and no more were added. Among their colonels were Lamoricière and Cavaignac. The French Zouaves formed an important part of the army in the Crimean war, 1854-5.*

ZURICH was admitted a member and made head of the Swiss confederacy, 1351, and was the first town in Switzerland that separated from the church of Rome; see *Zwinglians*. A grave-digger at Zurich poisoned the sacramental wine, by which 8 persons lost their lives and many others were grievously injured, 4 Sept. 1776. The French, under Massena, after repelling an attack of the Austrians, retired from Zurich, 5 June, 1799. The Imperialists were defeated by Massena, the former losing 20,000 men in killed and wounded, 25, 26 Sept. 1799; see *Switzerland*. A new democratic constitution was adopted, 18 April, 1869.

On 24 June, 1859, the Austrians were defeated by the allied French and Sardinian army at Solferino. Preliminaries of peace were signed at Villa Franca by the emperors of Austria and France on 12 July following.

A conference between the representatives of the powers concerned having been appointed, the first meeting took place at Zurich, on 8 Aug.

After many delays a treaty was signed 10 Nov. Lombardy was ceded to Sardinia; the formation of an Italian Confederation, under the presidency of the pope, was determined on, and the rights of the ex-sovereigns of Tuscany, Modena, and Parma were reserved.

The formation of the kingdom of Italy in 1861 annulled the treaty of Zurich.
